ANCIENT AND MODERN EGYPT.
EGYPT:

ANCIENT AND MODERN.

BY THE

RIGHT REV. M. RUSSELL, LL.D., D.C.L.,

(OF ST. JOHN'S COLLEGE, OXFORD,)

Author of "Palestine; or, The Holy Land," "Polynesia," &c.

"Time was they stood along the crowded street,
Temples of gods! and on their ample steps
What various habits, various tongues beset
The brazen gates, for prayer and sacrifice!"

LONDON:
T. NELSON AND SONS, PATERNOSTER ROW;
EDINBURGH; AND NEW YORK.

MDCCCLVII
In the View of Ancient and Modern Egypt exhibited in the following pages, its learned author exercised great diligence in availing himself of the materials furnished both by ancient and modern writers, nor did he fail, in preparing a third edition for the press, to enrich it with information derived from the most recent publications both of French and English scholars. It is a singular evidence, however, of the activity and well-directed co-operation of the learned men of Europe in the present age, that the history of the most ancient people in the world is every year receiving new and important additions. A period of twelve years has elapsed since Dr. Russell availed himself of the most recent labours of Rifaud, Wilkinson, Mure, Renwick, and Rosellini. But during that time the most important additions have been made to our knowledge of Egyptian history. The whole system of historic chronology has been revised by the aid of the established succession of Egyptian dynasties, and though as yet we cannot hope that more than a partial approximation to scientific chronological precision has been made, still the results are of the utmost value in the elucidation both of sacred and profane history.

The wonderful and altogether unprecedented discoveries of M. Botta and Dr. Layard, disclosing evidences
of Assyrian power and grandeur, have revealed to us the elements of ancient Asiatic history contemporary with some of the most remarkable epochs in the Egyptian annals.

These disclosures have naturally conferred a new interest on the whole range of study comprehended in the archaeological and hierological investigations of the monuments of Egypt, which have been originated and carried on with such gratifying success by the scholars of the present generation. It has therefore become indispensable to revise the valuable labours of Dr. Russell, in order to bring down his View of Ancient and Modern Egypt to the present day. Nearly one hundred pages of entirely new matter have accordingly been added, comprehending a concise and popular history of the series of discoveries by means of which the problem of Egyptian hieroglyphics has at length been completely solved. To this is added a view of the remarkably interesting light which these discoveries have already thrown on Scripture history, and the evidences they disclose in elucidation of the progress of the older nations of the world, whose annals have been obscured or lost in the lapse of time. In its present form this volume is confidently offered to the British reader as a valuable compendium both of historical and biblical illustration, derived from the most ancient of all existing records,—the paintings and the hieroglyphics of the great valley of the Nile.

**Edinburgh, January, 1850.**

* The present edition of Bishop Russell's Egypt, has, in addition to the history of the most recent observations and discoveries in relation to the ancient history and antiquities of that remarkable country, a Biographical Sketch of the latter days of Mohammed Ali, with notices of his son Ibrahim, and his grandson the reigning Viceroy of Egypt.
