# Introduction to Private Label Rights

Since the advent of the Internet, business had been good, if not better than before. This is because the Internet provides more viable means of disseminating information about the products and the business all at the same time.

Hence, most businesses know that the proliferation of the online business will definitely boost the income-generating potential of the business.

However, most online entrepreneurs contend that for an online business to generate good income in the Internet, the business must have its own product. This is because everything is a sale, even the thoughts that you have in your mind could count as a product for sale when presented in the Internet for other people's use.

But contrary to most popular beliefs, having your own product does not limit you to the many possibilities of earning more by using a "license" that is attached with an "information product" that you may acquire online. These are known as Private Label Rights.

**Private Label Rights** is just one of the three "basic rights" that are embodied in the concept of resell rights marketing. Among the three, Private Label Rights are considered as the most moneymaking and rewarding.

Private Label Rights are represented in a certificate or authorization that is attached with an "information item." The basics of Private Label Rights is to permit people to transform, reorganize, change, or improve the elements of the said merchandise to go well with the buyer's personal desires and yearnings.

For example, if you have a Private Label Rights, you can easily segregate the contents of an E-Book, and persuade somebody to buy the contents as sequence of pieces of writing.

One of the best things about Private Label Rights is that you can actually do the same thing inversely. For instance, if you were able to buy a set of information products like a collection of articles embodied with Private Label Rights, you can easily bring them together without the risk of some law-related predicaments. Hence, you can collect

different articles from different owners. With a common thought, you can come up with a creative masterpiece.

In addition, with Private Label Rights, you can simply append some information on the said product to make it more meaningful and creative, thus, creating an impression of having a product of your own.

Best of all, you can even put your name as the author of the said work. This is the most gainful aspect of having Private Label Rights. In this way, you do not have to acknowledge the primary author of the work.

So for those who are not yet aware of the rewards of using Private Label Rights, here is a list of some of the advantages:

### **1. It is just the thing for marking your name and your business' name.**

With Private Label Rights, you can easily acquire informative products that you can use as your own. Hence, this creates an impression that you are making your own product and that you are a professional and a skilled person on the given field.

In turn, you get the trust that you need in order to compel them to buy your product.

### **2. It triggers creativity.**

One of the best things about Private Label Rights is that you can be creative in a thousand and one ways. This is because you can assemble the different elements and come up with a new and near-original work without having any difficulty of creating such product.

### **3. Develop a product!**

With Private Label Rights, you can simply modify or improve a product if ever it does not fit your taste or needs. In this way, you can both cut back wasteful time by looking for products that are totally worthless or save more money by avoiding to create a whole new product.

However, even if some people contend that it is totally unethical for a person to sell the Private Label Rights for his creations, one cannot simply surmise the fact that engaging into this kind of activity is also beneficial to the seller especially if the product is already nearing the closing stages of its "market life."

This goes to show that people must learn how to give way to any possible changes to any product that might have already lost its income-generating potential. By allowing

other people to modify or enhance the features of certain products, the advancement of such products will continue to take place. Hence, the cycle will go on.

Indeed, the basics of Private Label Rights are not just necessary for most of the Internet marketers who wish to earn more income aside from their own products but also for the whole market as well. This is because the whole system of a give and take relationship dwells in the business and that is exactly where income generates its power.

## Everyone Wins with Private Label Rights

Would you believe a person if they told you that it was possible to take another person's work, change it anyway you please and call the edited material yours?

What if that person also told you that besides being able to do so, you could actually profit from that work and not be liable for any copyright infringement?

If you haven't heard of Private Label Rights, then most likely you'd think they were pulling your leg. But all the above are true if you are able to secure these rights.

### **But what are Private Label Rights?**

To understand why Private Label Rights are so special, you need to know about resell and master resell first.

**Resell rights** are simply permission from the owner of a work (a book, for example) to allow you to take the said material and distribute it for your own profit.

**Master resell rights** take it a step further and allow you to sell the resell rights to the work. The reason why it is called master resell rights is because it covers a large set of permissible actions to the person who acquires those rights.

Experts would tell you that to get the most of your purchasing of master resell rights, the following list of actions should allow you to:

- ☒ Give the material away unaltered
- ☒ Combine the material with others
- ☒ Give the material away as a bonus item
- ☒ Use the material as content for websites
- ☒ Divide the product into separate articles
- ☒ Put the rights for the material or the material itself up for auction
- ☒ Provide the material as content for paid membership sites
- ☒ Sell resell rights for the material
- ☒ Change or alter the material

Buying the whole set of these rights are great but it can cost you. But there is a way to get almost all of these actions and not have to pay as much for master resell rights IF you acquire just the right to change or alter the material, which is exactly what Private Label Rights are.

With these set of rights, you are given permission to change another person's work. By altering the material, you have made the work your own which then allows you to profit from the material anyway you intend to.

Let's say you were able to acquire Private Label Rights for a particular E-Book. What can you do?

For starters, you can break up the book into separate chapters and then sell these as articles. On the other hand, if you were able to acquire Private Label Rights for a set of articles, you could combine them and package it as a book, which you then can sell.

You can change the material's content by adding or removing details. You can also add pictures or illustrations as well as other media like sound or video clips.

All of these actions are possible but the best part about Private Label Rights is that you are not obligated to mention the original author (or pay them any royalties) for the changes you have done to his or her material. You can claim the material as yours by putting your name as the author of the material.

With these changes, the ways on capitalizing on them are many.

You can come up with a whole new set of products from a single material source. Take an E-Book for example. On one hand, you've broken up the book to sell them as articles. On the other, you've enhanced the book's content with media to package it as your own work and putting it up for sale on the market.

Acquiring Private Label Rights are great for creating a brand for your business. As you may already know, one of the keys to a successful business is to distinguish yourself from the rest. With Private Label Rights, you can change the material and make it uniquely yours. If your target market likes your material, your market can perceive you as an expert in your line of business, which is something you can really capitalize on as you sell your products or services.

However, it is not only the person who acquires Private Label Rights who stands to benefit from it. It may be difficult to understand at first, but selling Private Label Rights benefits even the original creator.

With the increasing demand for original material to be sold with Private Label Rights, a writer can make good money from his or her work. The incentive is that he or she can command a higher price for the work given the rights that go with the material.

Furthermore, selling the right to change the material any way the buyer wants is actually giving new life to the material. By giving the buyer the freedom to change the content in a number of creative ways, the material's usability and relevance is extended.

By compensating the original content creator well; by allowing freedom and flexibility for the purchaser; and by giving the end user a wealth of very useful information, Private Label Rights are by far one of the best things out there in the world of online marketing.
