Who Am I And Why Should You Care?

I am Aaslin Sathrak and I run the blog [RapidBlogMoney dot com](http://RapidBlogMoney.com). I have been making a living online back from 2007. Like most newbies who come to internet searching for an income opportunity, I too searched the internet for a job and ended up falling into many traps like paid to click, paid to view ads in my initial days as a newbie kid in making money online. I had no one at that time to guide me and show me the right path to succeed online. I myself learned everything using trial and error methods. Initially I had huge success with Google AdSense. At one time, my sites were ranking on top of Google and made me four figures every month.

But All of a sudden, all my rankings dropped. From a four figure income, I was back again to the three figure range in Google AdSense. That's when I started looking for other income opportunities where you do not depend on Google. Luckily

Affiliate Marketing has been very successful to me. I am back on track with making four figures every month. I am scaling it up and hopefully will reach the six figure mark in a few months this year. My biggest month so far is \$12,000+ and my income goal is to hit \$10,000 per month every month within this year.

This Guide is about 5 online income opportunity which both newbies and experienced internet marketers can make use to enjoy a continuous four to six figure income every month.

What is Possible By Making Money Online?

Making money online and living the dot com lifestyle will give you so many benefits. It is not only financial freedom, but you also have the convenience of working from anywhere, anytime.

Working in your offline job, even if you make a lot of money, you will not have the time to relax and enjoy life. But for me living the dot com lifestyle, I can work anytime, and enjoy always. I am my boss, that's what I am proud of. There is no one to question me about the deadlines I met today. I don't work round the clock. I work 2-4 hours a day. Most of the days, I only check my emails, verify that my campaigns are okay and then enjoy my life.

If you spent the same 9-5 routine in your online job, what is the use of working online? Though you

may need to spent additional hours in the initial days, you must work smart, not hard. Only smart work can bring you success very soon and you must be free to work just 2-4 hours within 3 months you start your online business.

All our life we did a thing in a certain way, now when someone advise us to do it in a better way, most of the time we will not accept them considering the fact that we have done it for years. This is why very few will be able to achieve it. They all want it, but because of past conditioning, they will not be able to achieve it until they can break free of their self-doubts and limitations.

And there is a myth in few countries. Earning money online is not at all possible. If a person earns money online, then he must be either scamming or performing any other illegal activities. Don't ever

have that mindset. Making money online is much easier than you do offline.

Basics of Making Money Online

Anyone trying to make money online must either sell his own product or sell a product for another person. You can sell whatever you want ranging from software, eBooks, ad space in your website (like in Google AdSense), or real products like Amazon.

To make money online, you have five prominent ways,

- 1. Using Advertising Networks (Like AdSense)**
- 2. Freelancing**
- 3. Be an Affiliate (Promote a product from another marketer using special affiliate link)**
- 4. Sell your Own Product. (Real or info product)**

5. Licensing Model (Like [MOBE](#))

Selling Ad space in Websites

You must have a website with traffic to make money from this method. There are thousands of bloggers around the world who make money from google adsense, infolinks, chitika and other ad networks. In this method, you must have more traffic to make more money.

This method is one of the easiest methods to start making money online. However to maximize the income, it requires a lot of work. You will need to appoint staffs to create content or create it yourself.

Steps To Earn Through Ad Networks:

- Choose a topic/niche of interest.

- Register a domain.
- Purchase a hosting. I prefer [hostgator](#) and [bluehost](#).
- Setup a wordpress blog and start writing quality content that will invite visitors to your blog.
- Whenever a visitor clicks an ad, you will earn money.

Disadvantages of This Method:

- Payout is very low.
- Income is very inconsistent. In Some months, you will make four figures, some other months 3 figures.
- You are at the mercy of Google. When Google rolls out an algorithm update like the panda or penguin and if suppose your website gets hit, all your income will go back to ZERO. You must start again from zero.

Making Money by Freelancing

You can sign up at websites like freelancer.com, elance.com or fiverr.com and use your skills to do projects for others and get paid. If you have coding or design skills, you can get a handful of projects in the sites I have mentioned above.

Disadvantages of Freelancing:

- You'll have to work hard.
- You need to work until your client is satisfied.
- Income will be within a limit.

Affiliate Marketing Model

Affiliate marketing is one of the most popular online business models. It's also one of the most misunderstood.

In a nutshell, affiliate marketing is where an affiliate (you) refers a customer to a vendor, and the vendor gives the affiliate a commission if a sale or an action

takes place. You do not work for the vendor. Think of yourself as an independent contractor.

The affiliate model was pretty much invented by Amazon.com (they own a patent on it). If you referred a customer to Amazon, and that customer buys something from the site, Amazon will give you 2% to 20% commission, depending on the product.

Many well-known brands have affiliate programs.

The advantages of affiliate marketing are many.

They include:

- No need to create your own products.
- The vendor handles all the hard work like delivery, invoicing, customer support, etc.
- You can do this from anywhere in the world.
- Easy to set up and get started.
- Low startup cost.

- Fairly easy to scale.
- Works while you're sleeping.

When done correctly, affiliate marketing is one of the best online business models you can use. I have been an affiliate marketer since 2009 and have made thousands of dollars from it, but you have to know what you're doing.

The truth of the matter is, most affiliate marketers end up losing money because they do it the wrong way. It doesn't help that the industry promotes this way as the way to get rich.

When it comes to affiliate marketing, there is a right way and a wrong way. I'm here to teach you the right way.
