101. WooCommerce	49

Introduction

Getting Started

Before WordPress can be used a few things must already be in place. You need:

1. Web Host
2. Domain Name
3. WordPress already installed

WordPress has a few requirements, but most modern web hosts already meet them.

Choosing Providers

Recommended Webhosts

[HostGator](#) is a leading provider of web hosting, reseller hosting, vps hosting, and dedicated servers. Over 8000000 websites trust HostGator for their web hosting, especially for Wordpress.

Use [discoup005](#) can get a 25% discount.

Domain Registrars

Godaddy.com, Namecheap.com, Gandi.net, and Moniker.com all come highly recommended. Do keep in mind, though, that a good domain name registrar is not always the best web hosting provider, and vice versa.

1.Jetpack

Supercharge your WordPress site with powerful features previously only available to WordPress.com users.

<http://wordpress.org/plugins/jetpack/> or <http://jetpack.me/>

2. WordPress SEO plugin by Yoast

Improve your WordPress SEO: Write better content and have a fully optimized WordPress site using the WordPress SEO plugin by Yoast.

<http://wordpress.org/support/view/plugin-reviews/wordpress-seo>

3. External Links

Force all external links to open in a new window. Add rel=nofollow to all external links. Add an icon to all external links. Good for SEO.

<http://wordpress.org/extend/plugins/sem-external-links/>

4. Better WP Security

The easiest, most effective way to secure WordPress. Improve the security of any WordPress site in seconds.

<http://wordpress.org/plugins/better-wp-security/>

One-Click Protection

The button below will turn on all the basic features of Better WP Security which will help automatically protect your site from potential attacks. Please note that it will NOT automatically activate any features which may interfere with other plugins, themes, or content on your site. As such, not all the items in the status will turn green by using the "Secure My Site From Basic Attacks" button. The idea is to activate basic features in one-click so you don't have to worry about it.

Secure My Site From Basic Attacks

5. Snazzy Archives

Snazzy Archives is a visualization plugin for your WordPress site featuring an unique way to display all your posts. Your archive page will never be boring again!

<http://wordpress.org/extend/plugins/snazzy-archives/>

6. WP Smush.it

Reduce image file sizes and improve performance using the Smush.it. Every image you add to a page or post will be automatically run through Smush.it behind the scenes. You don't have to do anything different. You can also run your existing images through Smush.it via the WordPress Media Library.

<http://wordpress.org/extend/plugins/wp-smushit/>

The screenshot shows the WordPress Media Library interface. It lists three images with their details and Smush.it processing status:

File	Author	Attached to	Date	Smush.it
daisychain-sample1.jpg	admin	Hello world!, 2008/12/20	1 min ago	Reduced by 13.2% Smush.it now!
birds-to-draw1.jpg	admin	Hello world!, 2008/12/20	1 min ago	No savings Smush.it now!
airport-security-wide2.jpg	admin	Hello world!, 2008/12/20	1 min ago	Reduced by 4.5% Smush.it now!

7. WP Greet Box

Display a different greeting message to your visitor depending on which site they are coming from.

<http://wordpress.org/extend/plugins/wp-greet-box/>

Welcome **Googler!** If you find this page useful, you might want to [subscribe to the RSS feed](#) for updates on this topic. X

9. Google XML Sitemaps for Videos

The Video Sitemap plugin will generate an XML Sitemap for your WordPress blog using all YouTube videos that you may have embedded in your blog posts.

<http://wordpress.org/extend/plugins/xml-sitemaps-for-videos/>

The image shows a grid of six thumbnail cards, each representing a different feature or tip related to the plugin:

- Add Clickable Links In YouTube Videos Without Using Annotations**: Shows a screenshot of the YouTube video player interface with annotations highlighted.
- RSS.com Domain Up for Grabs**: Shows a hand writing on a whiteboard with the word "RSS" written in red.
- Yoga Camp for Google Chrome Users in India**: Shows a woman in a yoga pose.
- BlogAds Invitations Available for Bloggers & Site Owners**: Shows a screenshot of a blog dashboard.
- A Video Game That You Can Play on YouTube**: Shows a screenshot of a video game interface with the text "Don't let the car crash to save the car".
- A Video Game That You Can Play on YouTube**: Another screenshot of the same video game interface.

10. nRelate Related Content

nRelate is designed to drive eyeballs deeper into your site by displaying related content as either thumbnails, text, or both.

<http://wordpress.org/extend/plugins/nrelate-related-content/>

The image shows a screenshot of the nRelate plugin's interface. At the top, it says "You may also like -". Below that is a grid of five cards, each with a thumbnail, title, and a brief description:

- Plugin Update: Thumbnail Sizes, Content Sharing ...**
- 5 Reasons to Try nrelate's Related Content Plug ...**
- nrelate** (with a large blue 'n' logo)
- 3 Reasons to Share Content from Sites on Your B ...**
- Get More Life Out Of Your Old Blog Content**
- The Spotlight: PrettyMuchAmazing.com**

11. SEO Smart Links

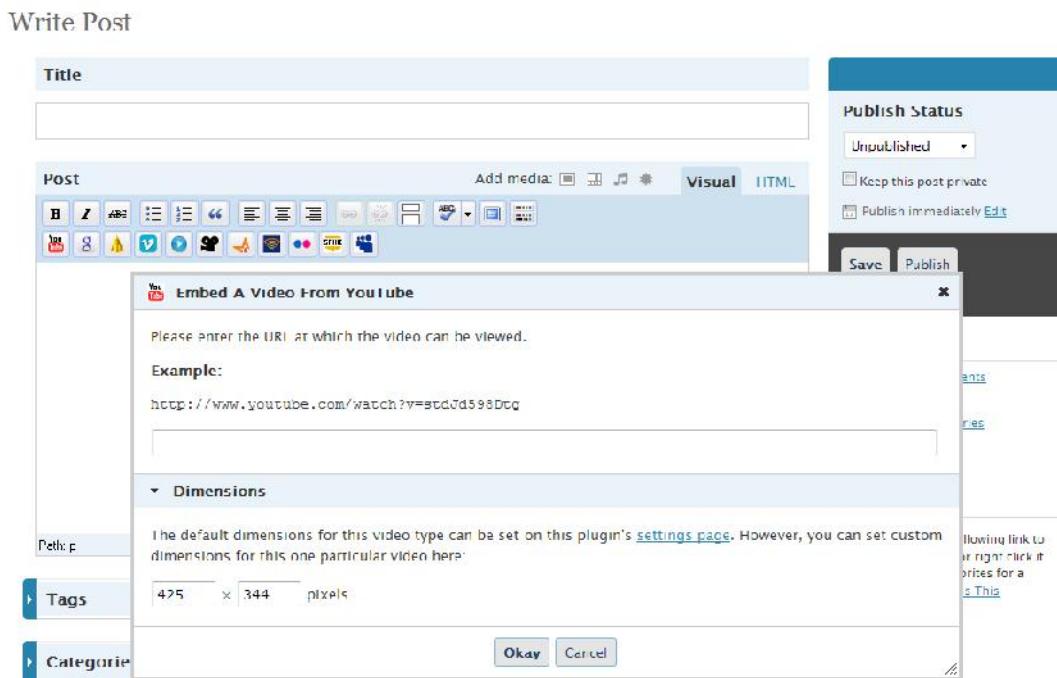

Lets WordPress automatically link keywords and phrases in your posts and comments with corresponding posts, pages, categories and tags on your site.

<http://wordpress.org/extend/plugins/seo-automatic-links/>

12. Viper's Video Quicktags

Allows easy and XHTML valid posting of videos from various websites such as YouTube, DailyMotion, Vimeo, and more.

<http://wordpress.org/extend/plugins/vipers-video-quicktags/>

13. Akismet

Akismet checks your comments against the Akismet web service to see if they look like spam or not.

<http://wordpress.org/support/view/plugin-reviews/akismet>

14. upPrev Previous Post Animated Notification

When a reader scrolls to the bottom of a single post, a button animates in the page's bottom right corner, allowing the reader to select the next available post in the single post's category.

<http://wordpress.org/extend/plugins/upprev-nytimes-style-next-post-jquery-animated-fly-in-button/>

101 Free & Best Wordpress Plugins 2013

15. SEO Rank Report

Track your Google rankings every 3 days and see reports of your progress in a graph. You will also be able to visualize your traffic flow in response to ranking changes and receive emails notifying you of major rank changes.

<http://wordpress.org/extend/plugins/seo-rank-reporter/>

#	Graph	Keywords	URL	Current Rank	Rank Change	Start Rank	Visits	Start Date	Action

DOMAIN USES	UNLIMITED	UNLIMITED	UNLIMITED	UNLIMITED
	SIGN UP	SIGN UP No risk. Cancel at anytime. No hidden fees. (***)	SIGN UP	SIGN UP

18. Lightbox Plus

Lightbox Plus permits users to view larger versions of images, simple slide shows, videos and content all in an overlay.

<http://wordpress.org/extend/plugins/lightbox-plus/>

19. Booking Calendar

Its a plugin for online reservation and availability checking service for your site.

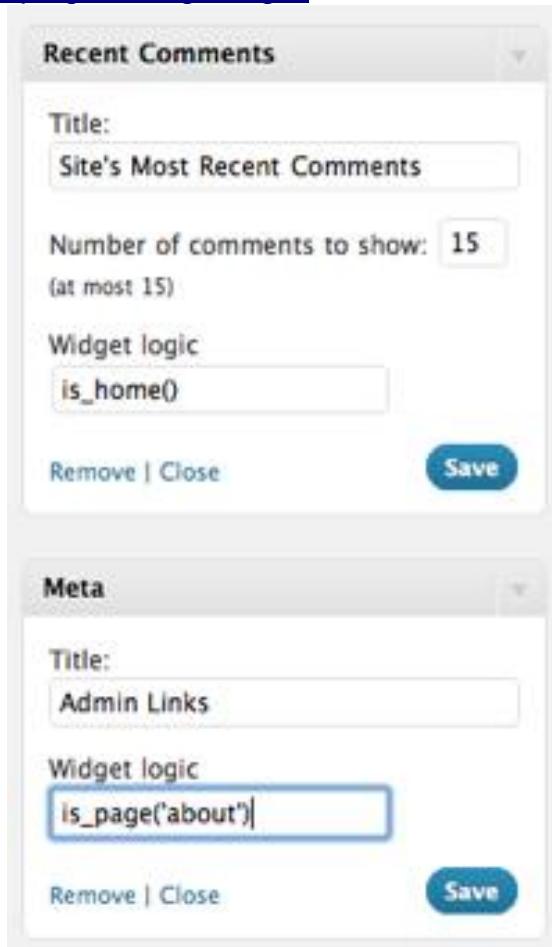

<http://wordpress.org/extend/plugins/booking/>

A screenshot of a 'Bookings listing' interface. At the top, there's a header with a calendar icon, the text 'Bookings listing', and search/filter buttons ('Booking ID', 'Go', 'Filter', 'Actions'). Below the header is a toolbar with buttons for 'Actual dates', 'ID ↑', 'Help', and a 'Booking Status' dropdown set to 'All'. The main area is a grid of booking entries. Each entry includes columns for 'ID' (e.g., 22, 21, 20, 19, 18), 'Labels' (e.g., APPROVED, PENDING), 'First Name', 'Email', 'Details', 'Booking Dates' (e.g., June 21, 2012 - June 23, 2012, June 19, 2012 - June 21, 2012, etc.), and 'Actions' (e.g., red and green icons). Some rows are highlighted in green, indicating specific status or selection. At the bottom, there are navigation links for 'Prev', '1', '2', '3', '4', '5', and 'Next'.

20. Widget Logic

Widget Logic lets you control on which pages widgets appear using WP's conditional tags. It also adds a 'widget_content' filter.

<http://wordpress.org/extend/plugins/widget-logic/>

21. Theme My Login

Changes your normal WP login page to another page on your site that you can configure yourself.

<http://wordpress.org/extend/plugins/theme-my-login/>

22. Visitor Maps and Who's Online

Displays Visitor Maps with location pins, city, and country. Includes a Who's Online Sidebar. Has an admin dashboard to view visitor details.

<http://wordpress.org/extend/plugins/visitor-maps/>

The screenshot shows a blog post titled "Nami Sirens Test" from September 2008. The post content discusses a siren test for the Pacific County All Hazard Alert Broadcast Sirens. It includes a photo of a tall siren tower. To the right, a sidebar features a "Sidebar Widget" with a red arrow pointing to it. The widget displays "Who's Online" information: 18 visitors online right now, 17 guests, and 1 member. It also shows a link to "Powered by Visitor Maps". A "Meta" sidebar on the right lists links to Site Admin, Log out, Entries RSS, Comments RSS, and WordPress.org. At the bottom, there are "Read more" and "Comments" links.

23. GD Star Rating

Plugin allows you to set up advanced rating and review system for post types and comments in your blog using single, multi and thumbs ratings.

<http://wordpress.org/plugins/gd-star-rating/>

The screenshot shows the "Features" tab of the GD Star Rating plugin settings. It includes sections for Cache Support, Plugin Features, JS and CSS files, Charset, and Internet Explorer. The "Plugin Features" section contains numerous checkboxes for rating-related features like time restrictions, moderation, and multiple rating support. The "JS and CSS files" section has checkboxes for linking external rating code and CSS files. The "Charset" section specifies character encoding as UTF-8. The "Internet Explorer" section includes checkboxes for IE opacity fixes and specific settings.

24. Sidebar Login

Easily add an ajax-enhanced login widget to your site's sidebar.

<http://wordpress.org/extend/plugins/sidebar-login/>

The screenshot shows a login form titled "Login". It includes fields for "Username" and "Password", a "Remember me" checkbox, and a "Login »" button. Below the button are links for "» Register" and "» Lost your password?".

25. PHP Code Widget

Like the Text widget, but also allows working PHP code to be inserted.

<http://wordpress.org/extend/plugins/php-code-widget/>

The screenshot shows the "PHP Code" widget configuration. It has a "Title" field set to "Test" and a large text area labeled "PHP Code below will run:" containing the PHP code "<?php echo 'testing!'; ?>". At the bottom, there is a checked checkbox for "Automatically add paragraphs." and a "Save" button.

26. Peter's Login Redirect

Redirect users to different locations after logging in and logging out.

<http://wordpress.org/extend/plugins/peters-login-redirect/>

Specific roles	
Role	URL
<input checked="" type="checkbox"/> contributor	<input type="text" value="http://localhost/wp-latest/contribu"/>
<input checked="" type="checkbox"/> editor	<input type="text" value="http://localhost/wp-latest/edit_lan"/>
Add: <select>Select a role</select>	
URL:	

27. Another Wordpress Classifieds Plugin

Add a classified ads section to your WordPress site, quickly and easily.

<http://wordpress.org/extend/plugins/another-wordpress-classifieds-plugin/>
