#### INTRODUCTION:

### SPAM!

Don't you just hate it?

You turn on your computer, connect to the internet, open up your Outlook Express and, hey presto! Your inbox fills up with a truckload of unsolicited emails, offering products and services that you just don't want or need!

It's bad enough being cold-called by telephone sales people, but now you're getting it from your computer too!

Sure enough, every day they darken your computer screen with adverts about viagra, mortgages, loans, breast and penis enlargements, porn and anything else they can throw at you!

More often than not, the same emails fall into your inbox several times a day from different spammers.

It's as if there's a whole gang of them, all in cahoots!

OK, so email clients like Hotmail and Yahoo have spam filters already built in to enable you to shift the spam, but, for some reason, your very own Outlook Express continues to lack any kind of filtering software. Don't you wish there was a way to automatically delete all the crap?

### But hold on!

### There is a way!

By making a few simple adjustments to the configuration of Outlook Express, you can breathe a sigh of relief while you wave goodbye to the majority of the these cyber salesmen.

By applying these simple methods, hundreds of unwanted emails will be deleted from your inbox without you even noticing!

#### HOW TO DO IT:

OK, firstly, open Outlook Express and click on **Tools** from the top list.

Select Message Tools and then select Mail. A window called Message Tools will appear.

Click on New.

A new window called **New Mail Rule** will then appear, looking like the picture below.

New Mail Rule	? ×
Select your Conditions and Actions first, then specify the values in the Description.	
1. Select the Conditions for your rule:	
Where the From line contains people	
Where the Subject line contains specific words	
Where the To line contains people	
2. Select the Actions for your rule:	
Move it to the specified folder	-
Copy it to the specified folder	
Delete it	
Forward it to people	-
3. Rule Description (click on an underlined value to edit it):	
Apply this rule after the message arrives	
4 Name of the rule:	
New Mail Rule #1	
OK Ca	ncel

### Tick the checkboxes Where the Subject Line

© Mikey J Published by dotcom Allsorts

contains specific words and Where the message body contains specific words in the Conditions box like in the picture below.

New Mail Rule	? ×
Select your Conditions and Actions first, then specify the values in the Description.	
1. Select the Conditions for your rule:	
Where the From line contains people	-
✓ Where the Subject line contains specific words	
Where the To line contains people	-
2. Select the Actions for your rule:	
<ul> <li>Move it to the specified folder</li> <li>Copy it to the specified folder</li> <li>Delete it</li> </ul>	
Forward it to people	-
3. Rule Description (click on an underlined value to edit it):	
Apply this rule after the message arrives Where the Subject line <u>contains specific words</u> <u>and</u> Where the message body <u>contains specific words</u>	
4. Name of the rule:	
Spam Filter	
ОК Са	ncel

You then write the name of the message rule in the Name of the rule field as shown in the above picture. You can call it what you like. I have called it Spam Filter.

You will see that, in the picture above, text and links have appeared in the **Rule Description** box.

Ignore these for now. We will cover these in a moment.

You then tick the checkboxes Delete It and Highlight

### it with color, like in the picture below.

New Mail Rule	? ×
Select your Conditions and Actions first, then specify the values in the Description.	
1. Select the Conditions for your rule:	
Where the From line contains people	-
Where the Subject line contains specific words	
Where the message body contains specific words	
□ Where the To line contains people	-
2. Select the Actions for your rule:	
🗹 Delete it	-
Forward it to people	
☑ Highlight it with color	
🗖 Flag it	-
<ol> <li>Rule Description (click on an underlined value to edit it):</li> </ol>	
Apply this rule after the message arrives	-
Where the Subject line <u>contains specific words</u>	
and where the message body <u>contains specific words</u> Delete it	
and Highlight it with <u>color</u>	
4 Name of the rule:	
Spam Filter	
	mand
	ncei

OK, now click on the color link.

A small box will appear with a drop box of colours like in the picture below.

I always select **Red**. I suggest you do the same. I'll tell you why in a moment. After selecting the colour, click on **OK**.

http://www.dotcomallsorts.com

The box will then disappear.

# After that, click on the Where the Subject line contains specific words link.

A box will appear where you can enter words that will trigger your spam filter like in the picture below.

ype Specific Words	
ype specific words or a phrase, and click Add.	
mortgage	Add
Words:	
Where the Subject line contains	Remove
	Options
	-

To gather a list of spam words, all you have to do is check your spam emails.

My guess is that you have received several spam emails in the short time that you have been reading this book.

Look at the text in your spam emails and find words that are only contained in spam, such as mortgage, viagra, penis and porn, etc.

Once you have a list of spam words, type them into the top field **ONE AT A TIME** and click on **Add** each time. DON'T type them all in at once.

You will then see a list of your spam words in the

### bottom box, like in the picture below.

ype Specific Words	×
Type specific words or a phrase, and click Add.	
viagra	Add
Words:	
'mortgage'	Remove
or 'viagra'	0-1-1-1
or 'lenders'	Uptions
or 'penis' ▼	
ок	Cancel

Once you have finished, click on **OK**. Your New Mail Rule box will now look like this.

New Mail Rule
Select your Conditions and Actions first, then specify the values in the Description.
1. Select the Conditions for your rule:
<ul> <li>□ Where the From line contains people</li> <li>☑ Where the Subject line contains specific words</li> <li>☑ Where the message body contains specific words</li> <li>□ Where the To line contains people</li> </ul>
2. Select the Actions for your rule:
✓ Delete it       ▲         □ Forward it to people       □         ✓ Highlight it with color       □         □ Flag it       ✓
3. Rule Description (click on an underlined value to edit it):
Apply this rule after the message arrives Where the Subject line <u>contains 'mortgage' or 'viagra' or 'lenders' or 'penis' or 'viagra'</u> <u>and</u> Where the message body <u>contains specific words</u> Delete it and Highlight it with <u>Red</u>
4. Name of the rule:
Spam Filter
OK Cancel

http://www.dotcomallsorts.com

You now click on the Where the message body contains specific words link.

A box will appear where you can enter words that will trigger your spam filter like in the picture below.

Type Specific Words	×
Type specific words or a phrase, and click Add.	
mortage	Add
Words:	
Where the message body contains	Remove
	Options
OK	Cancel

Do the same as you did with the Subject box and load in your spam words.

ype specific words or a phrase, and click Add.	
penis	Add
Vords:	
Where the message body contains	Remove
mortage' or 'viagra'	Options
or "lenders"	

Once finished, click on OK.

Your New Mail Rule box will now look like the picture below.
