

I am Petrus Stephanus Jacobus Schutte going by the nickname Peet. In 1970 I was a student that stared at a handbook while battling to make sense of Newton. I had to learn that a wheel that turns did no work and I clearly saw that was more than obvious total rubbish. If the wheel turned while it did no work then how does a wheel drive a car forward? It is the circle that forms the straight line. Remember I was sixteen at the time but this made no sense. When the wheel turns the circle pushes the car in a straight line and the circle is doing the job of moving the car. The work was in the movement of the car and to drive the car the car had to go forward and to go forward the wheel had to turn so the wheel circling was doing the work. I realised someone made a horrible mistake and I had to tell someone about this mistake.

Then a fellow student but much older and in a senior class walked in and I asked him about that which was what I clearly saw was complete rubbish. I showed him the mistake. The wheel turns and by turning it lands the completed circle on another spot and the wheel has gone Π which pushed the car the length of the radius but in the drive train it was the circle Π that placed the movement r onto the car's allocated new position or place. I explained what I saw and he said I had to accept this statement of a circle not completing work. He told me it was Newton that said so and in physics Isaac Newton replaced God Almighty and if Isaac Newton said so that is what it is. Much to his surprise I was not intimidated by Newton's fame.

I told them that I couldn't care less who this Isaac Newton is or was and what important role he played in science and how famous and wise everybody thought he was but this business of a wheel turning while not doing work was the most outrageous and senseless garbage that I heard of and I was not taking part in this mindless exercise. This does not prove physics it defies physics and he who was Newton also was a mindless backward idiot. My opinion never changes and my attitude only got worse through the years as I got more stubborn. I was a boy of sixteen coming from a fragmented disturbance in the bushes at the time thought to be a town called Marble Hall that was formed to be placed on a map by a few buildings built mainly to disturb the bushes and had no other purpose than to burn in the bushveld scorching sun. This is a town where a horse would refuse to be so there were no horses and it wasn't even a one-horse town and there I grew up. In that town most folk including me have never heard of Sir Isaac Newton so I never had come to realise one should have respect for this feller Isaac Newton. So I told this fellow student I could care

less about Newton but Newton is wrong! I wasn't going to learn this rubbish because it was a waste of my time and it was clearly wrong. He told me to take it up with my lector the next day, which I promptly did.

The next day I explained this conclusion I came to about Newton's rubbish to my lector and I was told that I had two choices. Either I repeat after Newton or I go home. There was nothing he could do about the situation and there was nothing that I could do about my situation and the world will not discard Newton for the sake of my arguments and I had to learn Newton off by heart, repeat it in the exam and get a certificate that I passed physics or I could keep to my storey and go home being branded as a failure. That was my choice. I could be mentally handicapped because I did not understand Newton or accept Newton.

Guess what choice did I make...guess who was branded a failure but also guess who is the one that came back over forty years later and showed the world that only the failures and the mentally retarded accepted Newton. Nobody brands me a failure when I am clearly correct and nobody pushes [F@\\$%@n](#) garbage and hogwash down my throat and tell me to swallow or drown. I am not known to take shit from no one and not even Newton!

To believe Newton's ideas you have to be part of a criminal gang that fake science and only those that are the best in not getting to terms with reality and bullshit everyone can understand Newton.

In this book for the first time in human history I explain the Titus Bode law in terms of gravity and how the Titus Bode Law but most

Go to the Internet and verify the authenticity of each one

Everything in the Universe is round. Anything that is round has to apply the value of Π . This is a fact of mathematics but while Newtonian science forever tells the Universe to have "mass" and to use "mass" nowhere in science would one find Π used in prominence. Whatever you may study in astrophysics go where you wish but never would you find Newtonian science taking the fact of Π into any prominence? When you read further you will see that gravity forms by movement applying Π as a value. I have found the four phenomena that put Π in astrophysics. By valuing gravity as Π therefore the Universe consists of gravity that forms by the working of the four phenomena that Newtonian science hardly ever mention.

The **Titius Bode law** has been around for centuries and with all the mathematical splendour available there for all to use, all the brilliant mathematicians could never come close to show any ability to any understanding of this very important phenomena. They could mathematically equate the formula the sequence applying as the formula, but then after that their superior human intellect dries up.

The **Roche limit** has been around for centuries and with all the mathematical splendour available to apply in order to fathom concepts behind this phenomenon, still with all the computing ability of a machine all those physicists with all the mathematical superiority could not touch any understanding about the concept forming the background. Yet then using the truth in physics the answer is simple.

The **Lagrangian points** has been known to science for centuries and with all the mathematical splendour available not one calculation could ever explain why this event is taking place.

The **Coanda effect** has powered turbine engines and aeroplanes in flight for almost a century and with all the mathematical splendour available to design the most terrific aircraft, not one engineer could mathematically compute one fact to show understanding why this takes place. How sad it is that those claiming of much superior intellect in physics remain just no more than having computing power. The understanding is not complex. I have to warn the readers that the topics are showing a very new approach with no quick answers. Understanding is in the proof and that does not come by reading just a few lines and then forming conclusions. The information is new in nature but not hard to grasp. I did not put these phenomena in place and these phenomena nullifies Newton's correctness and therefore don't blame me because Newtonian science and astrophysics falsify Newton's claims on correctness that never existed.

What those in science do know well to do is

I managed to prove and explain four cosmic keys that build the Universe namely:

The Titius Bode Law; **The Lagrangian Points**, **The Roche limit** and **Coanda Effect**

So what does that mean because nobody heard about the four cosmic pillars.

Everything in nature in the Universe applies these phenomena in how space forms.

The Titius Bode Law: forms the solar planetary layout and annihilates Newtonian dogma that the solar system forms in any way by applying the mass of the planets.

The Lagrangian Points: holds material in position to form the rings around planets.

The Roche limit removes the idea that stars and planets can collide or crash into each other. Using this limit I prove why alien objects explode when entering the earth atmosphere and just can't collide with the surface of the earth. This explains amongst so many other things how the Tunguska event took place.

Now you ask me if this is so important why someone with your intellect do not know about these phenomena after all you know important issues?

The Coanda Effect is a ratio that movement forms between space and material. It forms the Universe in as much as forming stars in spheres and forming galactica in circles.

In applying these phenomena it shows how nature destroys dogma science forced us all to believe and precisely proves the reason why it is so clear that although known to science we see why science prefers to ignore these phenomena. I show you nature and you can see how science diverts from what takes place in the cosmos. I show you nature.

Newton and Nature never were in the same book leave alone on the same page but science prefers Newton.

That is because these phenomena disprove the mythology called Newtonian science and proves their religiosity and ideology in Astronomy, Cosmology.

I prove these phenomena for the first ever. Science clings to old concepts that prevent them from explaining these phenomena and changing the heart of the beast called science is a very complicated task I try to attempt.

Then after studying for many decades I concluded that nature proves science totally different from Newton. By not understanding Newton I now am able to understand nature because instead of Newton's hogwash nature makes much more sense.

I am the first person that is able to prove nature because I can explain and prove these four phenomena in nature.

Science says it must be ignored as they are doing four hundred of years. It can't be ignored because it is there and it is the way nature works.

Science says it is a mistake because it is "freak of nature" but how can nature freak and make mistakes. Only humans and other mortals can make

mistakes. So it is high time those physicists stop playing God Almighty and start to realise nature made no mistake.

They and their Newton are the mortals making mistakes. However...

To: Mr. Peet Schutte

27 March 2008

Dear Mr. Schutte:

I am sorry but it is apparent from your letter that you are missing the basics of mathematics and classical mechanics.

Sincerely, M. Eckern
Editor in Chief
Annalen der Physik

Prof. Dr. Ulrich Eckern

eckern@physik.uni-augsburg.de
www.physik.uni-augsburg.de/theo2

I have sent seven articles to a journal called Annalen Der Physics explaining the four laws that produce gravity. In these articles I explained how each of these natural laws form gravity resulting in Π forming and that each one and the lot together proves gravity is Π . Needless to say they never read even one of the articles. This letter is one of the notes I received with a well-to-do brush off as if I am one of the first year students in his class. This horseshit did not work on me when I was sixteen and by God it will not work on me now where I am sixty. If this is how they perceive me to be then okay I am the mindless while they are the most superior clever. I can't understand Newton making me stupid and they can, which makes them clever. But when I explained nature and how nature is in place to them, which no one in the history of humanity could ever achieve they said the mathematics I use is too feeble to impress them. They did not realise I was explaining how Π develops from one and the Universe in gravity starts in singularity which is 1^0 going to 1^1 and ending as Π . This they did not understand because they understand Newton, which I am unable to understand because I am not feeble minded enough to be brainwashed!

As I said I have to live with this role-playing too and if I am the mindless thoughtless ill literate, then the SUPER CLASS must be the SUPER-EDUCATED; where I am the class amounting to stupidity the SUPER

CLASS must be the Brainy Bunch. To distinctly point to grouping or class or whatever you wish to consider the division there are between the Brainy Bunch that “understand Newton” and me which is in the class that don’t “understand Newton” I refer to those on that side of the Universe by the names I use above. Further more when I refer to mistakes that I do prove to be mistakes in the book as we go along I refer to it as Xepted mistakes to clear another distinction of necessity. They accept pure Xepted Newtonian hogwash that only the brilliant Brainy Bunch SUPER-EDUCATED can understand.

There are the Brainy Bunch SUPER-EDUCATED able to “understand Newton” and on this side those unable to “understand Newton” and see unable to see how non-existing “mass” that was fabricated by Newton can pull an expanding Universe closer while it shifts into more space. The cleverness of the Brainy Bunch reminds me of the King that had “magic clothes” and all those that could not see the “magic clothes” were stupid so one and all saw the King’s “magic clothes” for the sake of not being stupid. This what is going on in physics is the same as the stupid King that was so “clever” he was the only one that saw the “magic clothes” so every one saw the “magic clothes”. They were able to see “mass pulling mass” where no “mass pulls mass” and nature disproves Newton’s idea of “mass pulls mass” on every new discovery but still they see that Newton was correct when Newton said, “mass pulls mass”.

They “understood” Newton while the rest with more intelligence that could not “understand” Newton’s delirious ramblings where Newton contradicts even Galileo went off to become lawyers and doctors and other worthwhile servants of intelligence and the rest that had no brains to understand what was going on in class was those that “understood Newton” and remained in physics. No wonder physics got stuck in ideas that have been around for three hundred years. All other academic institutions developed except physics because they still use forces that fly all over day and night ready to pounce on unsuspecting cosmic material and “pull”, Newton was a quack and an alchemist that believed in magic and forces in magic and so he went on to prove more forces than Newtonians had brains to “understand” reality so they joined the club of unexplained magical forces that went on a mission of pulling things all over the Universe.

This story of the King and his “magic clothes” that only in stupidity could see applies so much to Newtonians they can claim the script as the big Newtonian life story written only for and only with Newtonian scientists in

mind! They are clever because they see “mass” where no “mass” can be and now I call their bluff to show what they are able to see. I call on them to prove the “mass” they see is forming gravity that thereby is constructing the solar system in accordance with Newton.

If “mass” pulls “mass” into contraction why is the Universe expanding ever since the Big Bang by Newton’s “mass pulling mass” and that is one very tiny reason amongst numerous others why I am unable to “understand Newton”. This understanding and misunderstanding is part of the concept of the Brainy Bunch that in all their wisdom and cleverness can see the expanding contradicts Newton’s claims of the contracting that should be occurring but also while being unable to explain the anomaly of expanding contradicting Newton they still are able to clearly see Newton working and being able to “understand Newton”. What I see in reading the Universe is there is space holding material that moves and material only moves in terms of the space, which it occupies as material moves. This claim I prove in a few pages in the book when I show what Kepler’s work entail without Newton raping it blindly just to falsify Kepler in order to provide ground that would underscore his claim on mass.

I explain how the sequence works and why does the Titius Bode law works the way it does. Moreover, I also explain this way why the Roche limit, the Lagrangian system and the Coanda affect forms. They are unable to explain these phenomena and to hide behind the air incapability they present a lot of hogwash in the form of Newton’s formulas. To prove my point take any of the formulae I show to any physicist and ask him or her to replace what they have with the true values they apply to the planets and prove the correctness of the formula. Every formula I show that Newton

introduced $\left(\frac{P}{2\pi}\right)^2 = \left(\frac{a^2\sqrt{1-\varepsilon^2}}{\ell}\right)^2 = \frac{a^4(1-\varepsilon^2)}{\ell^2} = \frac{a^4(1-\varepsilon^2)}{a(1-\varepsilon^2)GM} = \frac{a^3}{GM}$ only has the ability to bluff and cannot be applied to calculate any result. So don’t fall for their centuries old tactics to scare you into obedience because their

formulas $P = \left(\frac{4\pi^2 a^3}{G(M+m)}\right)^{0.5}$ are meaningless and read it as if it is meaningless because it not worth anything as far as calculating anything of importance. It is part of their mind altering process they subject you too.

Normally through the centuries it takes about 80 to 100 years for those in science to conform to a new idea and then confirm the new idea. Going back in history we find that all those locked onto old and outdated

conceptions had to die out before a new idea was confirmed and the old idea became absolute. I thought in this modern era this would not be the case but Academics have a stronger grip on publication in modern times than what the Pope had in the time of Galileo. At least the Pope allowed Galileo a chance to publish his thoughts but that is more than what modern liberal minded Newtonians would allow.

Their stranglehold is vicious and murderous when it hides the truth and in that I need the help of a publisher that can confront those who need confronting to break this iron grip and show what mockery science is at this point. I need some publisher with a backbone that can help me take on the meaningless science and introduce the truth for the first time ever. Those formulating science are quick to throw stones at the Pope but they are exactly as guilty.

I am including four options of books that are prepared for electronic publishing. There is one that is prepared for printing purposes. The books all carry the same topic but the information is considerably less or more comprehensive. I include a selection ranging from everyday matter of fact to rather academically motivated and although the information is easily digestible to somewhat informing.

One book entertains new ideas. One book proves the concept by proving the reality of the relevancy of singularity, which has never yet been understood. In every case each one asks for a higher level of concentration or a much higher in depth understanding level than the one before or the one following because to inform and to give backing by proof requires a lot less or more concentration of factual information. The facts presented is the same but the degree of being presented with comprehensive information does alter the purchase field that the book will enjoy.

I am sitting in Darkest Africa in a barren desert not knowing how the market strategy works and incapable to do such marketing or distribution of books of this nature. But I have already proven that there is a market for this theme because I did launch two books of much significance on a free-book website. The theorem and all such information is mine unconditionally and remains mine and can never be sold or changed in ownership. It is science but remember it puts science into a very new frame where a new view on the Universe opens up. Every person on earth that studied physics are studying physics or in future is planning on going to study physics will

eventually have to read my book albeit science rejects my views to be able to understand what my much more complex Theses in volumes hold.

I got fed up with Academics unwilling even to read my work once they see I am addressing Newton's shortcomings and not singing the praise of those praising Newton's physics with so much conviction that I see Newton's religiosity and so I tried a stab in the dark. I wrote two books intended as being "commercial minded" in order to get it to the attention of people about the book and the other book I just published without any promotional work done about the second book on the free-book website.

The promoted book went off like a bat at night and the second not-promoted book hardly downloaded. The first book downloaded by the thousands and the not-promoted book hardly drew attention. Then the publisher gave the second book a write-up as he did with the first book on the grounds of the first book drawing that much attention and downloading that successful. With that promotion the second book also started to download in significant numbers. This proved there are many educated persons that doubt the correctness science claim to have. They prompted me to write these four "commercial" books to get my message out and try to earn money while getting funding to have my more academic books printed and marketed. You now are reading the promotion of one of the four books I offer to every body concerned with science.

Why would this book sell? Everyone suspect there is something drastically wrong about science and everyone knows we all are led down the garden path about science and we all are aware information is hidden from us to make science believable and everyone wants to learn the truth. To sell books the book must be promoted and I have no such funding! I then put all my hope on this theory and thought the academics will embrace my information. I do realise that there are many authors in search of publishing opportunities and therefore I have to explain what makes my book so overshadowing important when compared to any other books on offer. My books are special because I show information about science that no one even ever suspected let alone are able to prove.

I show that modern science is a hoax and a folly and I dare any person layman or academic master to prove otherwise or to prove me wrong in even the slightest detail that I present. If you think this mud slinging is big words and much boasting then I inform you that compared to the truth I uncover it spells out controversy as never before. Think how big will any

controversy be when someone proves Newton's idea about mass pulling mass is one big hoax that was and can never be proved and the entirety resting on such a claim is bogus science.

I am surprised about what flurry the moon landing controversy holds because what I have to show overshadows the moon landing controversy by light years. Considering what hoax I present makes the fact that the moon-landing event ever took place or did not take place much insignificant and quite pale in comparison. Should the moon landing be a hoax, then one department in the U.S.A will be damned by the public for one presentation but the hoax I uncover puts the entirety of physics concerning astrophysics in the open as the biggest hoax invented by man in the history of mankind.

The fraud (and I call it fraud for there is no better description) that science hides from the public overshadows the controversy about the moon landing by many miles. I have worked on this subject that I present ever since 1977 and I also bring the solution to remedy the matter. I compiled **a new cosmic theory** by which I eliminated all the incorrectness that Newton has burdened science with but with this being my opinion I did not find a garage full of academics supporters waiting to applaud me and to uphold my views on the matter. Gravity rests on movement of material in relation to other material also moving. The movement of the sun provides the earth with movement but not only that all movement going straight becomes circular movement and circular movement takes place within the circle in which it moves going forward as a straight line and in that idea of a circle becoming a straight line and a straight line becoming a circle the entire concept of cosmic gravity is vested.

According to the Big Bang theory the Universe expands and there is no evidence of pulling bringing about a Universe contracting or becoming smaller. The Hubble constant is sole evidence of this proof of expanding Therefore I challenge the concept they build on the fact that mass attracts mass and everything is pulling everything else. By the manner they selectively withhold information when teaching science, amounts to deliberate brainwashing of students in physics by "normal" education practises. The new concept I wish to introduce puts all emphasis on space and material is only space filled with material substance while other space is filed with non-material.

In the end all space are equal but the movement it has makes the difference it presents in relevancy. All space structures hold in the centre most heat concentrated and from that centre holds all material owned by that structure.

The Website of **HOW TO SWINDLE** **BY FAKING** **SCIENCE**

This book is part of the Corrupt Science series but presents information on a much less technical level and does much more ground level explaining without expressing complicated and sometimes hard to follow details when proving what I say. It is to be enjoyed by everyone on a less sophisticated level.

<http://www.lulu.com/content/e-book/how-to-swindle-by-faking-science/8026989>

Science went corrupt in 1705 when Edmund Halley told the world he used his friend Isaac Newton's physics formula to calculate the route and time that the comet that was named after him would arrive. This was where science went crooked and started to corrupt science, a position that went on ever since because that same dishonesty is still present in Newtonian science. Halley calculated the time periods since 1066 at the battle of Hastings and found a comet was mentioned every seventy-six years. This was very ordinary for a man of his class so he had to get far cleverer than

just to backdate history to get a time frame. So he really got clever and conspired with the biggest fraud in science ever in science; the man who stole all physics Doctor Hooks invented, the man that even got Kepler's figures wrong by cheating the daylight out of Kepler's work, the man called Isaac Newton. If Halley was honest about tracing the arrival of a comet that was mentioned every seventy-six years then Halley was no more than bloody ordinary and that Halley could never be. So to look smart Halley said he used the formula of Newton to calculate the route that the comet took. This says he used mass to calculate how the comet came to the sun. That says the sun's mass pulled the comet and the comet's mass pulled right back and this way the comet came to the sun. I don't go into the comet as such in this book but I do in other books. In this book I show on a lower technical level than others how Newtonian science started to go corrupt in 1705 with one conspiracy to cheat and since became the corrupt myth it now developed into. How do I know Halley did not use the mass pull mass idea, because if he did then how did he calculate that the comet was cyclic or that it returns every seventy-six years? If mass pulled the comet to the sun, what then pushed to comet back into outer space? His big ambition was to prove the comet comes and goes but if mass makes the comet come what pushes the comet back? You know that this became the biggest fraud that came to be and it is called Newtonian science ever since 1705? Since 1705 every person that practised science became part of this conspiracy willing or unwittingly, nevertheless they all faked about science. The most brilliant minds on earth this past three hundred years failed to ask this simple question: if mass pulls the comet closer what pushes the comet away? If mass forms the force of pulling and pulled the comet closer then what pushed the comet back into the darkness of the beyond? How did he know the mass of Halley's comet? Nobody then asked questions. No one asks uneasy questions...except me. I show the fake science we have by just questioning science in search of the truth. Newton and Halley got away with corrupt science. Today Newtonians get away with corrupt science.

Then those in science question my integrity as well as my ability to understand physics because I question the integrity of those in physics and in this book you read how a bag of stinking shit flies into the faces of the most holy, the most intellectual minds the world ever produced. Brainwashed as you might be just please try to understand this if you can't understand anything else; those who are too stupid or too brainwashed to see how and that Halley cheated to make him look good and to falsify the truth so that Newton could falsify physics and to make Newton a genius of

all times, which is just what Newton became after this dishonesty, then don't purchase this book because you are brainwashed beyond recovery. I don't want to steal the money of a capitulated mindless person.

However, If you think I am about to praise the stern abilities that science known as Physics holds while claiming their honesty and purity then you came to the wrong website. I am washing dirty laundry because for decades they blew my work off the table and made me to be the stupid village clown "that can't understand Newton". If you don't like what you read and which is how you are continuously mislead then go elsewhere because I am the only one who tells the truth about the truth. If you think you are about to read an ode to the honour and the ability of the total genius Newton in what his work represents then you better start to think again. I now present the world with what is false and what is true.

If you think this is an endorsement for the incorruptibility of science and the absolute correctness science portrays throughout, then you are in for a shock. I am not going to bullshit you about the sincerity of science or the honour that scientists hold above all else because the public is disillusioned enough with all the sanctimonious garbage science claims. If you believe in the honesty of science, dream on. They've been leading the public down the garden path for far too long and it is time to come clean. If you believe in the unwavering honesty of scientists then either brave yourself or page on because if you carry on reading you are going to be very disillusioned about what you are about to learn.

We see their achievements and we gasp breath in admiration. With all the amazing achievements accounted for and when recognising all the things with which science changed our way of living on the earth and what was achieved by scientists developing this super mentality and in that also giving science all the admiration dually admitted notwithstanding, I am about to dump on you the biggest conspiracy that has ever been presented and that was ever undertaken by any group of persons in the entire human race. Think of anything you might think is big or outlandish by nature and that dwarfs in comparison to what I am about to reveal.

If you studied science then your surprise will be that harsher.

It is so large that there is nothing in the past history of man with which one could compare this revelation that I reveal. It involves every aspect of all aspects of the life of every human being and this shadow hanging in our midst covers the darkest secret that was ever hidden from intellectual

human view. Those we absolutely unconditionally trust in all aspects perpetrate it. It touched on every individual walking the surface of the earth and that excludes no person of any status albeit it an infant or someone in old age.

By implementing the 4 cosmic principles I show in the book, thereby I show how nature works with the 4 keys while I show how science falsifies facts to make science seems to work by magical forces pulling. What I show was never printed before by any person and is understood for the first time in human memory. These principles redistribute cosmic density from liquids to solids. The cosmos is made up of material and non-materials.

The above I explain by proving what happens when nature performs because I managed to formulate the working process of the four cosmic principles or building blocks in Nature.

These are: **1) The Coanda Effect 2) The Titius Bode Law**
3) The Roche Limit 4) The Lagrangian Points.

If you have never heard of these phenomena it is not that surprising because you either have to believe in Newtonian magic Newtonians call science or believe in nature and nature implementing science because this is what nature uses instead of Newton. These 4 phenomena used by nature in nature disprove Newton completely.

Gravity is the movement of space within space. It is a star spinning in space. The entire Universe is relevancies formed by differentiation of density. Movement brings comparable density differences. A Black Hole is much denser than the sun and the inside of a galaxy is much denser than the outside rings of the galaxy and gravity is density differences.

Everything in the Universe moves and that movement either by contracting space or expanding space forms gravity, and gravity does not come about by mass. By turning a star rotates, therefore material contracts space and in the process it reduces the space surrounding objects and this leads to increases seen as space expanding. The faster a star spins the denser is the star and therefore the denser a star is by fast movement and the smaller the star becomes in overall size and space. Since the area called outer space does not move, the density is reduced as stars collect the density by contraction of space.
