Preface to second edition	xi
Preface to third edition	xiii
1 Propagation of radio waves	1
1.1 Frequency and wavelength	1
1.2 The radio frequency spectrum	1
1.3 The isotropic radiator	3
1.4 Formation of radio waves	3
1.5 Behaviour of radio waves	7
1.6 Methods of propagation	13
1.7 Other propagation topics	18
References	24
2 The decibel scale	25
2.1 Decibels and the logarithmic scale	25
2.2 Decibels referred to absolute values	25
3 Transmission lines	35
3.1 General considerations	35
3.2 Impedance matching	35
3.3 Base band lines	36
3.4 Balanced line hybrids	36
3.5 Radio frequency lines	37
3.6 Waveguides	45
3.7 Other transmission line considerations	47
References	51
4 Antennas	52
4.1 Antenna characteristics	52
4.2 Antenna types	56
4.3 VHF and UHF antennas	60
4.4 Microwave antennas	69
4.5 Loop antennas	73
References	78
5 Resonant circuits	79
5.1 Series and parallel tuned circuits	79
5.2 $Q$ factor	81
5.3 Coupled (band-pass) resonant circuits	81
References	84

6	Oscillators	85
6.1	Oscillator requirements	85
6.2	Tunable oscillators	85
6.3	Quartz crystal oscillators	87
6.4	Frequency synthesizers	89
6.5	Caesium and rubidium frequency standards	93
	References	94
7	Piezo-electric devices	95
7.1	Piezo-electric effect	95
7.2	Quartz crystal characteristics	97
7.3	Specifying quartz crystals	101
7.4	Filters	102
7.5	SAW filters and resonators	105
	References	109
8	Bandwidth requirements and modulation	110
8.1	Bandwidth of signals at base band	110
8.2	Modulation	112
8.3	Analogue modulation	113
8.4	Digital modulation	123
8.5	Spread spectrum transmission	129
	References	131
9	Frequency planning	132
9.1	International and regional planning	132
9.2	National planning	132
9.3	Designations of radio emissions	134
9.4	Bandwidth and frequency designations	135
9.5	General frequency allocations	135
9.6	Classes of radio stations	139
9.7	Radio wavebands	142
	Reference	142
10	Radio equipment	143
10.1	Transmitters	143
10.2	Receivers	148
10.3	Programmable equipment	157
	References	158
11	Microwave communication	159
11.1	Microwave usage	159
11.2	Propagation	159

11.3	$K$ factor	161
11.4	Fresnel zones, reflections and multi-path fading	161
11.5	Performance criteria for analogue and digital links	164
11.6	Terminology	165
11.7	Link planning	165
11.8	Example of microwave link plan	165
	Reference	166
12	Information privacy and encryption	167
12.1	Encryption principles	167
12.2	Speech encryption	168
12.3	Data encryption	169
12.4	Code division multiple access (CDMA) or spread spectrum	172
12.5	Classification of security	172
	References	172
13	Multiplexing	173
13.1	Frequency division multiplex	173
13.2	Time division multiplex (TDM)	174
13.3	Code division multiple access (CDMA)	177
	Reference	178
14	Speech digitization and synthesis	179
14.1	Pulse amplitude modulation	179
14.2	Pulse code modulation	179
14.3	ADPCM codecs	181
14.4	The G728 low delay CELP codec	181
14.5	The GSM codec	182
	References	182
15	VHF and UHF mobile communication	183
15.1	Operating procedures	183
15.2	Control of base stations	186
15.3	Common base station (CBS) operation	186
15.4	Wide area coverage	187
16	Signalling	194
16.1	Sub-audio signalling	194
16.2	In-band tone and digital signalling	195
16.3	Digital signalling	197
16.4	Standard PSTN tones	198
	References	199

17	Channel occupancy, availability and trunking	200
	17.1 Channel occupancy and availability	200
	17.2 Trunking	201
	17.3 In-band interrupted scan (IBIS) trunking	203
	17.4 Trunking to MPT 1327 specification	203
	References	204
18	Mobile radio systems	205
	18.1 Paging	205
	18.2 Cordless telephones	206
	18.3 Trunked radio	207
	18.4 Analogue cellular radio-telephone networks	208
	18.5 Global system mobile	209
	18.6 Other digital mobile systems	211
	18.7 Private mobile radio (PMR)	213
	18.8 UK CB radio	213
	References	213
19	Base station site management	214
	19.1 Base station objectives	214
	19.2 Site ownership or accommodation rental?	214
	19.3 Choice of site	214
	19.4 Masts and towers	215
	19.5 Installation of electronic equipment	216
	19.6 Earthing and protection against lightning	217
	19.7 Erection of antennas	219
	19.8 Interference	221
	19.9 Antenna multi-coupling	225
	19.10 Emergency power supplies	226
	19.11 Approval and certification	227
	References	227
20	Instrumentation	229
	20.1 Accuracy, resolution and stability	229
	20.2 Audio instruments	230
	20.3 Radio frequency instruments	231
	References	235
21	Batteries	236
	21.1 Cell characteristics	236
	21.2 Non-rechargeable, primary batteries	238
	21.3 Rechargeable batteries	242

22	Satellite communications	246
22.1	Earth orbits	246
22.2	Communications by satellite link	248
22.3	Proposed satellite television formats	248
22.4	Global positioning system (GPS)	252
	References	255
23	Connectors and interfaces	256
23.1	Audio and video connectors	256
23.2	Co-axial connector	258
23.3	Interfaces	268
	Reference	280
24	Broadcasting	281
24.1	Standard frequency and time transmissions	281
24.2	Standard frequency formats	283
24.3	UK broadcasting bands	284
24.4	BBC VHF test tone transmissions	284
24.5	Engineering information about broadcast services	287
24.6	Characteristics of UHF terrestrial television systems	288
24.7	Terrestrial television channels	291
24.8	Terrestrial television aerial dimensions	294
24.9	AM broadcast station classes (USA)	295
24.10	FM broadcast frequencies and channel numbers (USA)	296
24.11	US television channel assignments	299
24.12	License-free bands	301
24.13	Calculating radio antenna great circle bearings	302
25	Abbreviations and symbols	307
25.1	Abbreviations	307
25.2	Letter symbols by unit name	313
25.3	Electric quantities	321
26	Miscellaneous data	323
26.1	Fundamental constants	323
26.2	Electrical relationships	323
26.3	Dimensions of physical properties	324
26.4	Fundamental units	324
26.5	Greek alphabet	325

26.6 Standard units	325
26.7 Decimal multipliers	327
26.8 Useful formulae	327
26.9 Colour codes	334
Index	337

## Preface to second edition

---

This edition of the *Newnes Radio and RF Engineer's Pocket Book* is something special. It is a compendium of information of use to engineers and technologists who are engaged in radio and RF engineering. It has been updated to reflect the changing interests of those communities, and reflects a view of the technology like no other. It is packed with information!

This whole series of books is rather amazing with regard to the range and quality of the information they provide, and this book is no different. It covers topics as diverse as circuit symbols and the abbreviations used for transistors, as well as more complex things as satellite communications and television channels for multiple countries in the English speaking world. It is a truly amazing work.

We hope that you will refer to this book frequently, and will enjoy it as much as we did in preparing it.

John Davies  
Joseph J. Carr

## Acknowledgements

I gratefully acknowledge the ready assistance offered by the following organizations: Andrew Ltd, Aspen Electronics Ltd, BBC, British Telecommunications plc, Farnell Instruments Ltd, Independent Television Authority, International Quartz Devices Ltd, Jaybeam Ltd, MACOM Greenpar Ltd, Marconi Instruments Ltd, Panorama Antennas Ltd, Radiocommunications Agency, the Radio Authority, RTT Systems Ltd. A special thanks goes to my wife Dorothy for once again putting up with my months of seclusion during the book's preparation.

## Thank You for previewing this eBook

You can read the full version of this eBook in different formats:

- HTML (Free /Available to everyone)
- PDF / TXT (Available to V.I.P. members. Free Standard members can access up to 5 PDF/TXT eBooks per month each month)
- Epub & Mobipocket (Exclusive to V.I.P. members)

To download this full book, simply select the format you desire below
