This book is meant to arm your mind for the real purpose you mean to. It can be used as a reference book for the problems you encounter in life.

Let your mind free, but think by principles.

The level of rational thinking that defines a man and decides his fate.

Human cannot create real value but we can create effective information. That is our use value for the nature.

Table of contents in category order for important articles

1. Physics:

1) **Matter existence and non-matter existence:** [“What are the physical properties of time?”](#) [“Is the spirit of physics time?”](#) [“Objective existence --non matter existence”](#) [“Talk about objective existence theory \(1\)”](#) [“Talk about objective existence theory \(2\)”](#) [“What is matter, and what are examples of matter and non-matter?”](#) [“What is existence?”](#) [“What does the natural world include?”](#) [“Is time the most valuable resource? Why is time most valuable?”](#) [“How do you know this world will last forever?”](#) [“Does gravity slow time?”](#) [“Why there is no space without time, and no time without space?”](#) [“Does the existence of matter require a cause?”](#) [“How old is the universe? Is there any scientific proof? Do you have any theories?”](#) [“Is time relative or absolute in physics?”](#) [“Do multiple realities exist? How can it be explained/proven scientifically and/or philosophically? Can they be independent, co-existing, or are there various types or classifications?”](#) [“How do we know space really exists?”](#) [“How do we know time really exists?”](#) [“What are the most fundamental laws of Physics?”](#) [“What is the opposite of time?”](#) [“Are galaxies moving, or is space expanding?”](#) [“Why are space-time and mass related? Why should it be?”](#) [“Why the results of observation and measurement in scientific experiments can have different explanation?”](#) [“Why the atomic clock in the GPS satellite shows a slower time than it on the earth if without the correcting off set?”](#) [“Can matter exist in more than 3 dimensions?”](#) [“Is it theoretically possible that there was no beginning to the universe and that it just goes eternally back into the past?”](#) [“Is it possible future can affect present?”](#) [“Does nature inherently resist change?”](#) [“What scientific facts are often ignored and not many people know but are actually very important to know?”](#) [“How can you prove or disprove space-time?”](#) [“If matter cannot be created from nothing, then how did the universe create matter from nothing?”](#) [“Why do things need a cause?”](#) [“If time \(The Present\) suddenly permanently paused, could there be motion?”](#) [“Does everything have a beginning?”](#) [“What are the laws of nature that could never be changed?”](#) [“What is fundamental in the cosmos?”](#) [“What are 2 things that are not classified as materials? Why?”](#) [“Are there things that are not material?”](#) [“What is the system of the laws of nature as you understand it?”](#)

2) **Thermodynamics:** [“How do you arrange the order of the laws of thermodynamics?”](#) [“Does entropy decrease or increase in the black hole?”](#) [“What is the fundamental law of thermodynamics that govern the movement of matter?”](#) [“How does matter existence state stability tendency lead to matter existence state balance?”](#) [“How does matter existence state stability tendency lead to matter existence state ordering?”](#) [“What happened in an endothermic reaction?”](#) [“Thermodynamic aesthetics”](#) [“The principle of efficiency. What is efficiency principle?”](#) [“What is the difference between dissipative structure and concentrative – dissipative structure?”](#) [“What makes the world work? \(What is ordering this world? What makes the world as it is? Will the world have an end? Will the universe be brought to a dark, cold, quiet dead end by entropy ever growing?\)”](#) [“What causes an energy balance in the universe?”](#) [“Why does energy dissipate/decay?”](#) [“Will the entropy growing process finally bring everything to an end? If on galaxy level energy is constantly renewed by the function of central black hole, why in any local space and time the real value is limited?”](#) [“What goes down with time?”](#) [“What are a few things which compound with time?”](#) [“What keeps the universe balanced and how?”](#) [“What is entropy in thermodynamics? What is entropy?”](#) [“What are the relations between energy and entropy?”](#) [“Entropy: When did Entropy start?”](#) [“Why the total entropy of the universe never change?”](#) [“What is the second law of thermodynamics?”](#) [“What is so important about the statement “The total entropy of the universe never changes?””](#) [“What is natural process?”](#) [“What is rational process?”](#) [“What is manmade process?”](#) [“What is the difference between natural process and rational process?”](#) [“What is the essence of beauty?”](#) [“Can natural process lead to better future for human? Why natural process carried natural order cannot give human future?”](#) [“Tomorrow will be better? Will there be a “better tomorrow”?”](#) [“What is the difference between living matter and non-living matter? What is the difference between non-living matter and living things?”](#) [“What is the meaning of the stable behavioral strategy in natural process?”](#) [“Why does energy renewal destroy information?”](#) [“What is the difference between natural order and manmade order?”](#) [“What is effective information?”](#) [“What is a “process information”?”](#) [“How does information and energy intertwine in the field?”](#) [“Do the actions of humans increase entropy significantly? If so, can that be seen as detrimental in any way?”](#) [“What are examples of objects that vibrate? Why do they vibrate?”](#) [“What is the meaning of disorder energy?”](#) [“What is the meaning of disorder information?”](#) [“What is information?”](#) [“What is the purpose of information?”](#) [“How do you know this world will last forever?”](#) [“How do natural selection mechanisms work?”](#) [“How does natural process ruin human future?”](#) [“What is the meaning of “order”?”](#) [“What do orders mean?”](#) [“What is the sequence: “order forms process and then process forms system” or “system forms process and then process forms order”?”](#) [“Can gravity positively affect gravity intensity by the high temperature it caused?”](#) [“Did the birth of the universe violate the conservation of energy?”](#) [“Are entropy and temperature inversely related on a cosmological scale, considering the universe has decreased in temperature but has increased in entropy over time?”](#) [“What](#)

is maximum entropy?" "What is binding energy, actually?" "What is the hottest temperature possible?" "Does mass ever lose its gravitational energy?" "If matter and energy are interconvertible, can energy also generate gravitation (bend space-time) like matter does?" "If a bit of mass was cooled to absolute zero, would the atoms in it collapse?" "Why is it impossible to achieve 0 K° temperatures? What will happen to gravity if 0 K° temperature can be achieved?" "What does "rational order" mean?" "Does the second law of thermodynamics come to contradiction with the theory of evolution?" "Why does evolution tend toward increased order despite the second law of thermodynamics?" "Are we the embodiment of entropy?" "What does "negative entropy" mean?" "Thermodynamics is based on what?" "What are your thoughts on the "Genetically Modified Human"?" "What is the quantum balance of energy?" "Is the quantum energy in the universe relative?" "How does "natural order destruct manmade system"?" "Why is the matter existence process the same process of matter evolution?" "What is the difference between "continuation of the information" and "continuation of the information existence"?" "Is it the 2nd Law of Thermodynamics which forbids and prevents the self-assembly of the information we know is necessary for life?" "What is natural order? What do you mean by natural order?" "What is rational order? What does "rational order" mean?" "What is the relationship between chaos and order? Could we assume that in some cases, chaos is required to reach increasing order?" "What's the best way to distinguish between Order & chaos?" "How does the natural process mask natural order?" "Can you give a simplified version for the definitions for natural order and rational order?" "Is the entropy of the universe increasing because the universe is expanding, and energy is becoming less dense? If the universe stops expanding, and energy is no longer becoming less dense, will the second law of thermodynamics still be valid?" "Is a fusion-powered future inevitable?" "How can you prove the natural process expressed natural order is not the true natural order but only the rational process expressed natural order is?" "Why is the natural process expressed natural order so stable?" "What is the difference between energy and material value?" "What does natural order look like?" "In your opinion, can 'Mother Nature' fix anything... given enough time?" "Is energy a conserved quantity?" "What is real value? What is considered to be having real value?" "Will we ever exist in an environment of complete and perfect thermodynamic equilibrium?" "What does the second law of thermodynamics mean to us?" "What does the second law of thermodynamics imply about the state of randomness of our universe?" "The universe is thermodynamically balanced between its mass state matter – energy state matter mutual transformation movements. How in complete exact detail is the Universe mass, matter, energy, and matter mutual transformation balanced?" "Does entropy increase or decrease with heat conduction in three processes (transport, circulation, and radiation)?" "What is order and value?" "What is natural order in your understanding in social science? What is natural order in simple words?" "Is there a natural order that exists at all? Why does someone deny natural order?" "Is there a natural order in the universe?" "How can destruction be a thermodynamically irreversible process?" "Can nature depollute the synthetic chemical pollutions? How long will it take if it can? What are the effects on human health, ecosystem integrity, and evolution efficiency?" "Can nature recycle everything?" "If there is an absolute zero, is there a limit on how hot something can get?" "What is a characteristic that all living things must have to survive?" "What is the most expensive thing in the universe? How can you calculate the cost for everything in the universe?" "What is a processes connection, and what processes are we talking about?" "What is a process?" "How will the world end?" "What is nature's plan?" "Why can't work create value?" "Why and how do things evolve?" "What is the difference between a natural order and a man-made order?" "Why does natural efficiency principle spontaneously cause order but human economic efficiency principle cause disordering effect?" "How does nature create a rational order?" "Why can rational order not naturally happen?" "What simple rule would fix the world if everyone actually followed it?" "Does everything in the universe deteriorate in some manner?" "Do you think chaos is the natural order of the world? Why?" "Is there a contradiction between the energy conservation law and the second law of thermodynamics?" "How can natural processes connect?"

3) Energy: "What is energy?" "What are the main forms of energy and their mathematical expressions?" "Is the energy of the universe a specific physical constant?" "Is energy a conserved quantity?" "Is hydrogen an energy source or an energy carrier?" "What is the meaning of disorder energy?" "Is a fact that vacuum energy exists? Has it been ever proven to exist experimentally? If it has been, does the energy remain constant as space expands? Does that violate the law of energy conservation?" "What really is energy? I am an 8th grader, and my knowledge about physics is extremely simple. I don't think "the ability to do work" is enough for me to understand it. I can't even imagine energy."

4) Mass: "What is the mass of photon?" "What is the relation between mass and kinetic energy?" "If photons have zero mass, why do they feel the effects of gravity?" "What is the smallest particle of a photon in quantum physics?" "It's often said that mass and energy are equivalent. Would it be more accurate to say that mass is a specific type of energy?" "Does gravity have mass?" "How did scientists convert light into matter and anti-matter?" "Does photon have rest mass?"

5) **Energy state matter (quantum):** [“How do you describe a photon?”](#) [“What is in the integrated equation to describe the photon’s mass --- energy, energy --- frequency relations?”](#) [“What mass movement caused the vibration momentum of photons?”](#) [“How can you calculate the vibration momentum, linear momentum and the mass of photons?”](#) [“How can Einstein mass energy equation be explained? What is mass energy equation?”](#) [“Why \$E = mc^2\$ cannot be used to describe photon energy?”](#) [“What is the reason for modifying equation \$E = hf\$?”](#) [“What’s the fundamental reason why the speed of light cannot be broken? Why does the universe want to preserve the upper barrier on speed of light so much so that it readily slows down time rather than see the speed barrier broken?”](#) [“What is the mass of photon?”](#) [“Why can electromagnetic waves travel in a vacuum where another wave needs a medium? Why don't electromagnetic waves require a medium to travel?”](#) [“What are radio signals broadcast by waves?”](#) [“How would you explain Einstein’s theory of relativity? Why does the speed of light appear the same to all observers?”](#) [“What is the energy \(in joules\) of an ultraviolet photon with wavelength 120 nm?”](#) [“Why is energy balance an important principle in quantum physics?”](#) [“What is so special about light that its speed is considered the cosmic speed limit?”](#) [“Is the speed of light the same in non-inertial frames \(such as accelerating frames of reference\)? Is the speed of light still the same in an accelerating frame?”](#) [“How did you figure out the integrated equation to describe the photon’s mass --- energy, energy --- frequency relations?”](#) [“Can you briefly explain what is the point to modify and integrate \$E = hf\$ and \$E = mc^2\$ into \$E = mv + mc^2\$?”](#) [“Can an unobserved/coherent quantum matter wave \(an atom\) be given momentum?”](#) [“Why do accelerated electrons radiate energy, i.e., in particle accelerators, and do they lose their effective mass as a result?”](#) [“The speed of light is 300,000 km per second. Why does light not travel faster/slower?”](#) [“If one interpretation of quantum physics was proven as the correct one, would that answer all questions about the nature of reality?”](#) [“Is light matter?”](#) [“Does a single photon have a single wavelength or a series of wavelengths?”](#) [“Physics: Can we equate \$E=mc^2\$ and \$E=hf\$?”](#) [“Is it true that Einstein’s equation, \$E=mc^2\$, is wrong?”](#) [“How do you describe the quantitative relations between the light speed \$v\$ and \$c\$, mass media resistance \$R\$, and frequency \$f\$?”](#) [“What is the significance of Einstein's equation, \$E=mc^2\$?”](#) [“Does light travel forever or does it eventually fade?”](#) [“If something is 40 million light years away, how long will it take for the light to reach us?”](#) [“When looking at a star, how do I know if the wavelength I observe was affected by red/blue shift from its move or it is original and the star is not moving to/from me? Don't I need a standard to compare with?”](#) [“If light has no mass, how can a solar sail be propelled?”](#) [“Where did the original kinetic energy come from, and where will it finally go?”](#) [“What does an electromagnetic wave actually look like? They're always portrayed as two 2D waves merged perpendicularly but that doesn't make any sense cause where's the depth? Does it only exist on axes? What'd it look like in an accurate simulation?”](#) [“Can a wave be a particle? Why or why not?”](#)

6) **Basic theory:** [“What are the relations between momentum and kinetic energy?”](#) [“How will the kinetic energy change if the momentum of an object is doubled?”](#) [“How will the kinetic energy change if the momentum of a particle is doubled?”](#) [“What is momentum change \$\Delta p\$?”](#) [“Does rate of change of momentum = impulse?”](#) [“What is the general meaning of kinetic energy?”](#) [“What part of the total energy can be used to do work?”](#) [“Is the energy in the universe balanced?”](#) [“If matter and energy are interconvertible, can energy also generate gravitation \(bend space-time\) like matter does?”](#) [“Why is the speed of light in vacuum, ‘ \$c\$ ’, the universal speed barrier?”](#) [“How do energy and momentum differ?”](#) [“What is the central black hole critical mass?”](#) [“How can the central black holes keep their structure and function stable?”](#) [“How can the universe balance itself?”](#) [“How can you distinguish between gravity \$g\$ and acceleration \$-a\$ in a sealed room? What is the implication for our social reality?”](#) [“What is in this modified mass – momentum relations equation: \$p = mc^2 + mv\$, \(13\)? Is energy balanced on universe level?”](#) [“What is wrong with \$\sum \(mc^2 + mv\) = \sum \(mv + mc^2\)\$, \(15\)?”](#) [“How much of the energy in the universe is in the form of light? How do we determine this?”](#) [“How would you explain Einstein’s theory of relativity? Why does the speed of light appear the same to all observers?”](#) [“What is an exponential progression?”](#) [“What is a “process information”?”](#) [“What is effective information?”](#) [“What is information?”](#) [“How much faster is factorial growth compared to exponential growth?”](#) [“What is the meaning of “order”? What do orders mean?”](#) [“Can gravity positively affect gravity intensity by the high temperature it caused?”](#) [“Is it correct to say “Physics can only derive a correct answer by observation”?”](#) [“What do sound waves carry?”](#) [“What is the difference between force and kinetic energy?”](#) [“What is the difference between arithmetic and scientific calculations?”](#) [“What is potential energy?”](#) [“Can the bending of light due to sun gravity according to GR be the refraction of light due to sun atmosphere?”](#) [“Which is the most used physics law that is likely to be broken in the near future?”](#) [“Is it plausible that it's impossible to combine general relativity with quantum mechanics?”](#) [“Based on Albert Einstein's quote, “If you can't explain it simply, you don't understand it well enough,” can you explain his theory of relativity?”](#) [“Why the results of observation and measurement in scientific experiments can have different explanation?”](#) [“In physics, why are there so many force equations? Can all these equations be equated somehow to create a “jack of all trades” force equation?”](#) [“Is there terminal velocity in a vacuum?”](#) [“Why do laser beams vanish abruptly in the night sky?”](#)

7) **System:** [“What is the difference between open system, closed system, isolated system and infinite system?”](#) [“What are examples of isolated systems?”](#) [“How do complex systems fail?”](#) [“What are some base explanations of how very complex things work?”](#)

2. Cosmology and world view: [“What is the way this world exists?”](#) [“Will the entropy growing process finally bring everything to an end? If on galaxy level energy is constantly renewed by the function of central black hole, why in any local space and time the real value is limited?”](#) [“From the modern and more accepted scientific view, how could define the whole universe as an entity \(existence\) that contains all material and non-material things such as consciousness, abstract, ideas, concepts, etc.?”](#) [“What is the reason the whole galaxy disk acting like a piece of solid object to spin at the same angular speed? Is that against the law of physics? Is that against the law of physics?”](#) [“Can the continuous energy renewing process in the galaxy – central black hole system replenish the energy/material value in a local space and time such as solar system?”](#) [“What will happen to the stars in the universe?”](#) [“Is the universe an open or a closed system”](#) [“What keeps the universe balanced and how?”](#) [“What does the natural world include?”](#) [“Why doesn't evolution contradict entropy, given that things seem to develop more detail, fall into more order overtime?”](#) [“What makes up the majority of mass in the universe?”](#) [“What is so important about the statement “The total entropy of the universe never changes”?”](#) [“Red shift --- space dilation or energy dissipation?”](#) [“How is the truth found?”](#) [“How do you know this world will last forever?”](#) [“What is the maximum energy of the universe?”](#) [“Is the cosmos eternal? Why?”](#) [“Is a clash between facts and theories proof of progress?”](#) [“How will the universe end? When will that happen?”](#) [“Is Mother Nature perfect in its grand design?”](#) [“Is it true that you have to take seriously the notion that understanding the universe is your responsibility, because the only understanding of the universe that will be useful to you is your own understanding? Why or why not?”](#) [“If a black hole forms due to compressed or extreme mass, why do massive stars need to reach the end of life first to become a black hole? Why not turn into a black hole based on the star original enormous mass \(during the star stable life\)?”](#) [“What do astronomers mean when they say “the structures of the universe.” What are these structures? I only see galaxies and stars.”](#) [“What is the world all about?”](#) [“What interesting information is in a black hole that people don't know?”](#) [“Is there any recent model to explain how the nature of the universe is structured?”](#) [“Can a black hole be destroyed?”](#) [“Can an atom be converted into a quantum black hole?”](#) [“Why is the cosmic microwave background uniformly spread in space? How do you explain the so evenly distributed microwave background in the universe?”](#) [“Will humans ever be able to fully understand cosmology?”](#) [“What do you believe singularities inside black holes are?”](#) [“What will the universe be like in 1 or 2 trillion years from now?”](#) [“What is expected to happen to the universe in \$10^{10^{57}}\$ years?”](#) [“Is there enough nuclear fuel on the planet to take a space mission to another star?”](#) [“How long does it take for a black hole to release its energy?”](#) [“Is it theoretically possible that there was no beginning to the universe and that it just goes eternally back into the past?”](#) [““Does nature inherently resist change?”](#) [“In nature, is there only complete chaos without any order?”](#) [“What is the importance of living in an expanding universe?”](#) [“What is the meaning of the phrase “everything that has a beginning must have an end”?”](#) [“How can you prove or disprove Big Bang theory?”](#) [“How can life be rare but also infinite in the universe?”](#) [“Is there a theoretical maximum mass that a singularity can achieve before becoming unstable \(i.e. possibly Big Bang\)?”](#) [“How massive is a black hole that is 90 billion light years across?”](#) [“If there is an absolute zero, is there a limit on how hot something can get?”](#) [“How will the world end?”](#) [“In what ways is the world getting better, and will it all matter in the end?”](#) [“Is Big Bang and singularity possible?”](#) [“Why is there a fine-tuned universe?”](#) [“What is fundamental in the cosmos?”](#) [“Why isn't the universe just a huge Galaxy? Is it because it would involve a center?”](#) [“How does the idea of the multiverse affect individuals in society?”](#)

3. Evolution:

1) **Laws and principles:** [“Why is evolution never referred to as a law when gravity has both a theory and law aspect? What are the natural laws that govern evolution process?”](#) [“What is the fundamental cause of matter evolution?”](#) [“What drives evolution?”](#) [“What is evolution?”](#) [“Talk about efficiency principle \(1\) --- general explanation and application examples”](#) [“What makes nature ordering its systems?”](#) [“How do natural selection mechanisms work?”](#) [“Does the second law of thermodynamics come to contradiction with the theory of evolution?”](#) [“Why does evolution tend toward increased order despite the second law of thermodynamics?”](#) [“Why matter existence process is the same process of matter evolution?”](#) [“What is the difference between “continuation of the information” and “continuation of the information existence”?”](#) [“Does the theory of evolution contradict the second law of thermodynamics, which states that the universe and all its systems are progressively moving toward disorder or entropy ?”](#) [““Does nature inherently resist change?”](#) [“What is lacking in Darwin's theory?”](#) [“Is evolutionary explanation still valid today?”](#) [“What is the evolution universal exchange?”](#) [““Macro-evolution is a myth. Micro-evolution can be observed!” How true is this statement?”](#) [“What is the most probable mechanism that caused life to emerge on Earth?”](#) [“Can evolution make the world a better place?”](#) [“What is a characteristic](#)

that all living things must have to survive?" "What is the general definition for natural selection?" "How does life happen and evolve?" "What is nature's plan?" "Why and how do things evolve?" "Why does natural efficiency principle spontaneously cause order but human economic efficiency principle cause disordering effect?" "How does nature create a rational order?" "What is life? Why does life evolve? Where does it evolve to?" "Does evolution have an end?" "Can negative selection mechanism naturally form by natural process? How does that process work?" "When will negative selection occur, and what is its function for nature?" "What is positive selection, and what is negative selection? Can you give a few examples?" "What is the general definition for natural selection? What is process level natural selection and what is system level natural selection?" "Is evolution driven more by mutations or by adaptations and natural selection?"

2) Applications: "What was the spark that made life happen? What reason did molecules have to come together in extremely specific ways to make an organism? Was it a happy accident, much like mutations within natural selection?" "What make the social Darwinism obsolete?" "Why doesn't evolution contradict entropy, given that things seem to develop more detail, fall into more order overtime?" "What is the racial issue?" "What is the coordination between our thinking information and our biological information?" "Is Darwinism a racist theory?" "What may be the reasons for a human group competition failure in the human social system?" "How do process level and system level natural selection mechanisms work on us today?" "How do you apply rational choices in life?" "What is the problem with evolutionary genetics? What is the problem with evolutionary anthropology?" "What might more highly evolved beings be able to do?" "Are only "life forms" in evolution process?" "Is it possible for panspermia to be correct?" "How do you think the world after human extinction would look? How long until nature produces a new sentient society?" "How can life be rare but also infinite in the universe?" "What is your theory about human evolution?" "Why did the Neanderthals go extinct while we survived?" "Why would evolution tend to result in systems that act rationally?" "What will be the causes of (information evolution) processes disconnection?" "How does the natural order cause negative selection mechanisms in our human social system and destruct the social and natural systems in range(1)?" "What is the effect of synthetic chemical pollutions on evolution efficiency?" "How did humans evolve above other species?" "Why does something that exists obey the laws of nature?" "How does the natural order cause negative selection mechanisms in our human social system and destruct the social and natural systems in range (2)?" "Have humans evolved a broad suite of social strategies that solve all kinds of adaptive problems?" "In what ways is the world getting better, and will it all matter in the end?" "Why do some humans have green eyes?" "How long will it take for humanity to completely evolve and change from what we presently are to something else?" "Could humans become a truly Interstellar species within 500 years?" "Is human evolution over? What remains for us to become perfect beings? Is there a risk of involution?"

4. Biology: "What are we?" "How does evolution play out? Can we use that knowledge to benefit the human future?" "What is the coronavirus?" "How can children grow to their full height?" "What do you suggest to control the spread of the corona virus?" "What are your thoughts on the "Genetically Modified Human"?" "What are your thoughts on food and/or animals or plants being genetically modified?" "Why is genetic engineering considered to be important?" "Can the DNA of living things be modified and engineered?" "What decides the reproduction rate of life?" "Shouldn't it be possible to discover whether random mutations produce a new species in the laboratory? It's no secret that genes can be manipulated, so why not just test the theory of evolution to prove it or disprove it?" "Why would any human risk tampering with the human genome by creating synthetic biology?" "What is the relation between human and virus and what is the benefit of this relation?" "Is it ethical for humans to interfere with the genomic composition of living organism?" "Will global society eventually mix everyone and make humanity a single race? If so, how many years do you expect it to be?" "Will science eventually conquer genetics?" "Why were we not designed to depend on inorganic matter for nourishment instead of having to take on other lives to feed?" "Aren't vaccines making humans weak? When the Black Death hit Europe, it killed off almost 60% but the remaining humans survived it. Should we let diseases kill off weak humans, kind of like natural selection?" "What is eugenics?" "How would you say that genetic engineering is useful nowadays?" "Do you think humans will ever be spliced with other animals' genomes for favorable abilities?" "As a country with a history of economic, political, psychological dependence and subservience to other countries, do you think the use of GMO will be more beneficial or detrimental?" "What is wrong with GMO? Why is GMO food bad for you?" "Why are humans or humanity considered to be unnatural?" "Why didn't natural selection lead to the evolution of a totally harmless parasite?" "Why does life require water to start?" "What is a field or topic that you became obsessed with due to the Covid-19 pandemic?" "Cell Biology: Will we become immortal by 2050? Could humans be immortal in the year 2050?"

5. Social science:

1) Laws and principles: "Are there natural laws that govern social science?" "What are the characteristics of truth?" "If we can measure success with one value, what will be that value?" "Principles and concepts that relevant to

[human society](#)” [“World view questions and answers \(1\) --- Explain the fundamental issues in natural and social sciences”](#)
[“Who is making the choice and who decides the result?”](#) [“Would you try to change or adapt to the world?”](#) [“What do we fundamentally depend on to survive: adaptation or manipulation?”](#) [“What make the Social Darwinism obsolete?”](#) [“If Darwin’s principle of “free competition and natural selection” is universal law, why the Social Darwinists are wrong in social practices?”](#) [“Why does the natural process bring a destructive effect on the manmade social system?”](#) [“To what degree is Social Darwinism partially true?”](#) [“Tomorrow will be better? Will there be a “better tomorrow”?”](#) [“Is social science a real science?”](#) [“How do natural laws decide social development?”](#) [“What is the summary of the “tomorrow will be better”?”](#)
[“What is the essence of stable behavioral strategy?”](#) [“Why natural process cannot lead human social system into future?”](#)
[“What is natural process?”](#) [“What is rational process?”](#) [“What is manmade process?”](#) [“What is the difference between natural process and rational process?”](#) [“Can natural process lead to better future for human? Why natural process carried natural order cannot give human future?”](#) [“What is the difference between living matter and non-living matter? What is the difference between non-living matter and living things?”](#) [“What is the meaning of the stable behavioral strategy in natural process?”](#) [“What does natural process mean for life?”](#) [“How do natural selection mechanisms work?”](#) [“What is the difference between natural order and manmade order?”](#) [“Why we still cannot find solution for our problems in this world?”](#)
[“What is rationalism?”](#) [“What is rationality?”](#) [“What is the rationalist social principle?”](#) [“Is rationalism bound to science?”](#)

6) Contradiction: [“Why does natural process bring destructive effect on manmade system?”](#) [“How does natural process bring destructive effect on manmade structure?”](#) [“How can natural process bring rationality in social system?”](#) [“Sustainable development and sustainable peace?”](#) [“What’s one fact/event that proves the world is corrupt?”](#) [“What is this “system error” that makes the present social problems very hard to solve?”](#) [“Why doesn’t society help with societies’ problems?”](#) [“How can I become rich?”](#) [“Why is every human action in conflict with nature?”](#) [“What are problems](#)

based on?" "What are some examples of pro-rich ideology that are actually anti-rich?" "Is human population control ethical?" "Is it more important to be holy than more righteous?" "Can we insist a natural order-run social system while using science and technology to overcome the difficulties to reach the future?" "What is wrong with the traditional rationalism and empiricism?" "What is the reason democracy is not working, and why are people still longing for democracy?" "Why is religion causing fights and war?" "Does "Uncertainty is the only certainty" cause any paradox?" "What is the biggest obstacle to world peace? Is it something inherent in mankind or something more like policy that has been developed over time?" "What behaviors will be widely considered to be terribly immoral and wrong a hundred years from now in the year 2121, which are not now widely regarded as wrong?" "Can we keep the present natural order-run social system while just by some rational modification and innovation to achieve sustainability?" "Why are we motivated by materialism?" "What would be examples of ideologies that always seem to provide the same answers no matter what the question seems to be?" "Why natural order derived natural measure cannot solve natural problems?" "In which condition does democracy lead to bad decision?" "Is it moral to protect universally applied rights out of self interest? Is it OK to be protective of My rights as long as I support your rights to do the same?" "What is the root of all the problems we face today and also the solution?" "Many people want to save the world but, does the world want to be saved? Does the world want to save itself?" "Should we live for the present or the future? Should we really care about the future or the present?" "What's rational but wrong?" "Should we as an individual sacrifice our freedom for the greater good of humanity as a whole?" "Why does "free competition and natural selection" seem wrong in our present social system?" "Could you explain why Marx thought that "the human is alienated"?" "My boyfriend is a biochemist with a PhD and strongly believes in God. How can a scientist believe in God?" "What do you think the society readily accepts the benefits of science technology even though negative results also come out from them?" "Aside from nature always automatically solving problems in nature, why should it leave us alone? Shouldn't it automatically solve problems for us too?" "What is a balanced spiritual choice between fulfillment and salvation?" "If humanity had the desire, do we currently have technology available to make Earth a Utopia? That means food, clean water, medicines, educational opportunities, power, housing and Internet for everyone?" "Why are we more often stuck in a cycle of response downstream of problems rather than upstream where we might prevent them from happening in the first place?" "In what important way are nature and nurture not opposed to each other? Also state the two sides of nature/nurture debate"

7) Reality check: "What is the world's biggest modern issue?" "What's going on in this world? What is happening in our real world?" "What is the biggest threat to personal freedom?" "What in your opinion is humanity's most impressive achievement?" "How can the fundamental behavioral strategy of everyone act according to his best of interest be wrong?" "What is the most crucial political change the world economy is anticipating?" "Are humans planet earth's biggest problem?" "Why do we constantly have conflict?" "Is the world population growth an issue? How can it be solved?" "What costs nothing but provides the greatest value in life?" "To what extent can we change human nature?" "How would you classify people?" "Why are there so many bad people in the world?" "Why do bad things happen to good people and good things happen to bad people?" "Are people fundamentally good or bad in general?" "Why good people do bad things sometimes?" "If good things constantly happen to bad people (and so may bad things happen to good people), then how are good people supposed to live with it?" "Why do bad things happen to good people?" "Why is the concept of self-interest important in economics?" "What does "basic human decency" mean in today's society?" "What steps do you want to take to end hunger in this world?" "Can you allow everyone to act in their own self-interest and achieve an outcome that's fair?" "What's one thing that would help solve all the world's problems?" "What are the most unknown worldwide problems in present day?" "What goes down with time?" "What are a few things which compound with time?" "What is something that does not compound with time?" "Why young people feel anxious these days?" "What are the main social problems in our society, and how can they be solved?" "Why more growth there are more problems in this world?" "What is wrong in our social system that prevent us getting things right?" "Why human behave irrationally?" "What will be the next world war?" "Why human population can no longer depend on natural process to naturally adjust to balance it with nature?" "Why we cannot live in an opportunistic way of life anymore?" "Has the world become more free or less free over your lifetime?" "What big scientific breakthrough is near and what will its potential effect be on humanity?" "What is the real problem of this world?" "Is to be honest the best policy?" "Can a policy be based on freedom?" "Can a policy be based on equality?" "Can we have freedom, equality, prosperity, and future at the same time?" "Why do people do bad things?" "Do the actions of humans increase entropy significantly? If so, can that be seen as detrimental in any way?" "How does natural process ruin human future?" "Are thoughts inertial?" "Does science have an obligation to expand the education of the individuals contained in a society?" "Why does social superstructure lag behind social infrastructure progress?" "What is the present world condition?" "What is the interaction mechanism in the human social system, and how does it work?" "What is this "the point of intelligence"?" "Can the laws of chemistry and physics explain our experience of consciousness (our thoughts, freewill, emotions, and beliefs)?" "What is consciousness?" "What are the relations among life, intelligent life, perpetual existence, consciousness, artificial intelligence?" "What is your opinion about class struggle?" "Does the

share that with my therapist I won't have the answer of why I feel the way I feel." "Is God the laws of nature?" "Is there a natural order that exists at all? Why does someone deny natural order?" "According to the theory of evolution, humans are apes, so why do we live in houses, not cages?" "Are we all living for different purposes?" "Why does this human world go from bad to worse so stubbornly?" "Can you give an example of natural order is destructing our social system?" "Why does free interactions caused natural order in our present social system not work?" "What is the source of all evil and destruction in our present social system?" "Why does evil and destruction happen and prevail in our present social system?" "What is dignity? Why is it important?" "What is your definition of a luxury life?" "What are the society's unwritten rules?" "Which country will be the world's leading economic power in 2050 and why?" "Is poverty a product of the rationalization of society?" "Why does the world create problems faster than we can solve them?" "Why can global climate cooperation be hampered by tribalism?" "It takes to be uneducated to think that one is educated enough to be the judge of what the experts agree with." "What is your opinion of this statement?" "What do you think freedom is? How can you see the path to achieve it?" "Is it possible that life would be unequal even in a socialist society because some individuals would learn how to manage the shared resources better than others?" "Why are things always getting wrong when we let it happen naturally in our present social system, and why do our efforts to solve these problems always end up making it worse?" "Does nature have different plans for us?" "What is this "great acceleration"?" "What country has made the most science discoveries?" "What is the most scarifying thing for an intelligent life species?" "What animal fact made you think "no wait, really"?" "When thinking about inequality, is it essential to remember that humanity was once almost universally poor, hungry, and miserable?" "Why did Hitler fail?" "Is that true: what is natural will necessarily be rational?" "Who is the most experienced and sophisticated ruler?" "Is money important or necessary to be happy?" "What is the biggest decision that has ever been made by humankind?" "What significant progress has humanity made after WWII?" "Is freedom achievable, or is it a never ending, moving goal post?" "What do you think of the world today compared to 20+ years ago?" "Do you agree that a decent boss can make the world of difference at work? Why?" "What is the single greatest achievement in human history that had an impact on humans?" "How does our past relate to our future?" "What is the biggest lie society has taught you to believe?" "What are the common modern taboos and also the common mistakes of our whole modern social system?" "Do you believe everybody has their own destinies?" "What do you think about the present Russian-Ukraine border tension?" "What did the Germans have to do to be able to capture Stalingrad?" "What do you think are the five most dangerous things in the world?" "What are some examples of the saying "the road to hell is paved with good intentions"?" "What is the world's toughest unsolved problem?" "What is the reason a highly educated person cannot find a job these days?" "What is happening with the world today?" "Is the world about to enter a new era?" "Is the Internet the world's largest functional anarchy?" "What are the common and popular wrongs of today's social systems?" "Why are people so cruel in the world?" "Should be getting rich our goal in our lives?" "How do sanctions work?" "God doesn't play dice", what does it really mean?" "Why are the problems so stubborn in this world?" "What are the most epic failures in history?" "Have people's opinions always been very polarized; no middle ground (e.g., are you a capitalist or communist, religious or atheist, Nazi or Zionist, etc.) or only lately?" "Can the modern justice system give all members of the social system true justice?" "In modern society, how is being an optimist better than being a pessimist, given that there is substantially less risk today than in hunter-gatherer times?" "Will the universal basic income become a necessity in the future as more advanced tech and AI are developed which can perform tasks more efficiently than humans?" "Why is everyone smart but me?" "What makes your sentence so long and so cumbersome?" "How does natural order lock life in a death role?" "What are the causes or factors responsible for war?" "Are we building or destroying this world?" "What is the biggest culture shock you have ever faced?" "What are some examples of the fallacies in our modern way of life?" "What is the mafia?" "In your opinion, what is one website that if you were to remove it from the face of the internet, would cause the world to come to an end?" "What happens around the world that most people don't know about?" "To what extent do we as humans consider reliance on new technology diminishes us as humans?" "What has become a complete human failure?" "Is life fair, or is it just our reality projecting itself onto things, events, and people?" "What is it like to have an IQ of 145? Do people have an easier time understanding philosophy at a certain IQ level?" "Why is there so little technological advancement?" "What is the connection of science and technology to a good life?" "What can we do with no technology?" "As long as human beings have free will, there can never be total peace. What are your thoughts on this?" "Is it possible for humanity to have total peace?" "How fast would technology progress if all millennium prize problems were solved tomorrow?" "What do you think is wrong with the world today? What is wrong in our present world on earth?" "How will life end on Earth?" "Why do some people have a problem for every solution?" "How will I ever prevent the biggest waste of human potential?" "What is wrong with the term extremist?" "How do you confirm trust that the universe has a plan better than yours?" "Do you understand the present world on earth?" "Is it an achievement for us to have shaped the world to suit our needs?" "Is Europe responsible for the destruction of our planet?" "How many years is a human actively useful to his/her society or generation?" "Can you briefly explain how negative selection mechanisms form?" "What is the greatest enemy or greatest enemy or hindrance development of technology and knowledge?" "What's the easiest thing in the world?" "Are you happy to be proven wrong, especially when it results in something good?" "What

[effects has civilization and technology brought into modern day life?](#) [“How come we don’t fit in with this planet?”](#) [“Who really controls Russia, Putin or the Oligarchs?”](#) [“Have you ever seen a genius make a fool of themselves?”](#) [“Why is the decades of social system modification and renovation not working to solve our problems?”](#)

8) Politics: [“What do you wish every politician knew about economics?”](#) [“Why human have tried different social economic systems but the fundamental problem still remains?”](#) [“What is the Middle East crisis all about?”](#) [“Which politician will you support this time?”](#) [“Why “cold war thinking” still not obsolete?”](#) [“What is the most abstract concept in the social sciences?”](#) [“What should be the focus of the political, social, and economic change?”](#) [“What is wrong with our present political science?”](#) [“What is the valid social system choice for us?”](#) [“What is the meaning and nature of politics?”](#) [“How can territorial disputes be resolved?”](#) [“How can we become a more unified country when binary political systems inherently tend to perpetuate divisiveness?”](#) [“What is the logic behind nationalism? Why should your country be better than others?”](#) [“What is the foundation of a political united front?”](#) [“What is wrong with the global politics?”](#) [“Is it a good idea to have public monuments and statues built in Greta Thunberg’s honor while she is still alive? Does this generation deserve a monument?”](#) [“What is the human unique way to “eat” other men?”](#)
