## Preface

Earth had been tolerant and resilient over millions of years, but with human developmental interventions and greed, it has become very fragile. Each country has its own policies which are mostly mean and does not consider earth as a whole. Human capital is developed at the cost of natural capital, leading to weak sustainability.

There is a need for the emergence of earth leadership for ecosystem resilience and sustainable development.

Earth leaders own earth as a whole, rather represent and love only parts of the earth.

An earth leader is a sensitive and humble human being. Primary trait of earth leadership is to exemplify a life with just values.

Each person has the ability to change the earth. Everyone is an earth leader. Leaders are not those proclaimed by oneself nor declared by someone. Leadership is not a position; it is the continuous process of being responsible for a cause.

Earth leaders should envision a better world, with selflessness and compelling for everyone to emulate.

Earth leader is consciousness of - one for all.

Author of this book had designed the 'Geo Spirit' meets for the emergence of earth leadership.
