

# Advanced Photoshop Tutorials

## TAKE YOUR SKILL TO NEXT LEVEL

Hi, my name is Patrick and I'm a professional graphic artist, photo editor, colorist (photo & video) and photographer.

My main goal with this eBook is to teach you how you can create better photos by spending as little money as possible and it all starts with photo editing.

No, you don't need a \$3000 camera or a \$1500 lens to take professional quality photos. In fact, the difference you will notice between a photo taken with an entry level DSLR camera + the kit lens and the same photo taken with the Canon 5D Mark III for example is minimal compare to the difference you'll notice between one photo expertly edited in Photoshop and the same that wasn't.

If you already have Photoshop, (you can download the free trial for 30 days btw) you can improve your photos dramatically by learning how to properly color correct and color grade.

Then, you can take your photos to a whole new level if you can master the art of what we call photomanipulation, compositing and retouching. By mastering those techniques, you will be able to turn your photos into digital art!

# 1. How To Create A Cartoon Character With Photomanipulation & Retouching

## Photomanipulation + Retouching + Color Grading Tutorial

We will be covering a lot of things in this massive tutorial. You will learn step by step how you can create any cartoon character you imagine using photomanipulation, retouching and color grading techniques. This tutorial has a massive 89 steps detailing the entire process to achieve the image above and don't worry, all my tutorials can be done by anyone who has basic knowledge of Photoshop. Unlike other tutorials you'll sometimes see out there, you don't need to be a skilled digital painter to achieve the same results I get here as I'm not a good digital painter myself ;)
