Chapter 51-Theren 1 Sub Base

Grenwer is happier than usual. He said, 'The apprentice is at present being held in isolation on the astral base here at Theren 1.'

'Good.' I said, 'I want to see him.'

'Yes, but first, I want you to take the conscious-mental-probe test. Try to locate Reeas and Deria.'

'Yes,' but you know Kallo's apprentice is banking on us wanting to bargain for his, and also Kallo's release again.'

'I know, but we have to try, maybe he didn't make his normal exact preparations.'

'I know, but I have something that will persuade him, better than mere threats.'

'Oh, what is that?' Grenwer said.

'Please don't ask, just let me see him, you can observe through the monitors.'

I am led to the Isolation Cells; they are special Astral cells which are supposed to be escape proof, but Kallo, being Kallo, did escape, more than once, well, I will try to persuade this apprentice to stay for a while.

Kallo, or the apprentice, looks unmoved; he knows he is trapped, but probably thinks it will be a short time till he escapes, he looks at me with contempt.

'Well, look who it is, the-Trainee.'

'Yes, and look at you, the Master, in jail.'

'Not for long.'

'Who are you? You look like Kallo, but obviously you are someone else.' In the next instance, I know I have to get to him, for some reason, and I don't know why? I simply walk into his supposedly, escape proof cell. He looks stunned; he jumped up and ran for the door, probably thinking that he can get out. I grab him by the neck, as I turn into Cloft the Tourgen clone. He tries in vain to get free, I put my other hand on his forehead, as Mannus comes into my consciousness. I can feel the power starting to generate through me to the apprentice, then from the apprentice, to me. I release him; he slumps to the floor unconscious. Grenwer came in. 'How did you do that?' he said.

I don't know? 'I just felt like doing it.'

'Can it be, that you are a Special-Envoy for Mannus?'

'If I am, then I am, all I know is, I have to follow my destiny.

The other thing is, I may not know where Reeas and Deria are, but I know where they are not.'

'Really?' said Grenwer.

'Yes, and we can't use the worm-hole at Eta 63457.'

'I thought so; we didn't scan any irregularities, but to be sure, it would take a lot of time.'

'Yes, also, it wouldn't do us any good, to go there anyway. Reeas and Deria are not in any of the access areas known to us from Eta 63457.'

'What are you saying?'

'I am saying they are nowhere to be found in this Universe.'

'How do you know?'

'Mannus told me.'

'But there are no crossover points here in this sector of this Universe.'

I know, but even so, they are not here. They were thrown into Dark-Space, as you know.'

'Yes,' said Grenwer.

'Well, they were then catapulted into another universe.'

'By what?'

'By Kallo's little helpers they operate in Dark-Space.'

'We suspected something, but as you know, we can't access the place.'

'Well, now we can.' I said.

'You don't mean, you are going to go inside the Dark-Space, do you?'

'I have to.'

'But Reeas and Deria are not there.'

'No, I know, but the access way, is still there.'

'Dan, I know you have the protection of Mannus at the moment, but once you access Dark-Space, that protection will be gone.'

'Yes, I know, but I have to try for Reeas and Deria. They would do the same for me.'

'You know that Dark-Space is a compilation of numerous Black Holes, don't you?'

'Yes.'

And if you get killed, you won't be able to get back?'

'Yes, but that is only speculation, isn't it?'

Grenwer look at me in a knowing way, as if to show his love, in the only way a Guardian can, by just being in higher state of consciousness!

I know I can reach them.' I said.

'Yes.' Grenwer said. 'And if anyone can reach them, it is you.'

'Thank you.' I said.

OK, now for you students out there again: you know we are on the Astral Plane at the present time, so why don't I just go into the Dark-Space from the Astral Plane? You say. I simply can't risk going into Dark-Space from the astral plane because we might get stranded in there, maybe for a millennia or more. Yes, you say, but time doesn't matter on the Astral Plane does it? No, but Dark-Space time could be different! We have never been into Dark-Space, so, it is a chance I can't risk. We could get destroyed as Soul. How? You ask. Soul without light is nothing, yes, you say, but what if we get killed in the Physical Dark-Space? I say, I will risk it for my Reesas. At least it is the same plane of existence. The ship we will be using is the standard type, but don't be put off with that. There is nothing standard about Debra; she is simply, the highest technology in the Multiverse, more than up to any danger that we will encounter. We have super fabrication-machines on board; that means, we can replace any part, or even the ship itself with a little time. The ship itself is a law unto itself, regenerating with every second and even able to replace any person who is on board by cloning, although Sionn and company can grow bodies of any Guardian on any planet in any Universe. The ship has updated itself, as usual, also, Deria 2 and I had on our light suits, already. We wanted to be safe, rather than sorry.

The light suits are, as you know, again, the most technologically engineered clothing of any age, able to protect one from even nuclear blasts, how, you say? The material is made from structured-atoms, but, we don't know how they will cope in Dark-Space.

I am now feeling scared again, not for myself, but for Reesas and Deria. I can tell Deria 2, is also uneasy. In fact, she tells me that, she isn't just a sister of Deria 1, but a twin sister, also, they have never been out of contact for one minute, in their entire lives, never mind one day, and their lives are very long. I feel like resting, or rather meditating.

I'm going to try and contact all the Yoga Masters, plus meditation monks, that I have known in numerous past lives on Earth and other planets that I have incarnated on. I may be just Dan Sherman in my last life, but altogether, it makes up a very long list of spiritual people, plus masters. I know I have the backing of Mannus, but, in Dark-Space who knows what will happen. I feel scared in the puny body of Dan Sherman, but in the body of Cloft the Tourgen clone, I feel Invulnerable. I know it is an animalistic thing. My brain is saying, what can a beast type person do to help you? You need to use brains and logic. But I want to be Cloft, is the beast inside me taking over?

I sit down in the lotus position again, and straight away I am on a hill top overlooking a beautiful lake, I also know this place as a Sanctuary. It is a place where spiritual people gather to find a master, some people manage it, but some don't. I found the master in one past life, but died a few days later, now that master is here, plus, more than fifty more, also, numerous students. Maybe you are here also, my student friends? Don't scoff, it is totally possible. Mannus is in the center of the group, he doesn't speak, but we can feel his power. Sionn is there, also, Grenwer, plus Deria 2, I also see Daria's brethren, and all manner of higher life forms, plus Thalo and his people, also Fagil from Far-Station, which is now the planet Yalton. They helped to bring Reesas back to life when she got killed by the Burin. OK, now, I see this is serious stuff. I know exactly what to do, and that was, simply, yes, I know I use the word simply a lot, but believe me, my student friends, it is easy to contact God, a thing people don't seem to

want to do, as most people want the material things in life rather than the spiritual things. Believe me, I have had both and I can say, the spiritual things are better, because they lift you up to higher things, and so on to better worlds, in future lives. OK, enough said about that, yes, I know, you already know that, but I just want to reassure myself.

I feel overpowered by the light and sound coming from everyone and everything. My head feels as though it will explode! Then suddenly, everything is dark; but I can still function! I can still see, and hear, normally! I know this is how Dark-Space will be. I have been given access to a world which has been inaccessible throughout the ages. I feel elation beyond words. I know Deria 2 will be feeling the same, even though, she is already a higher being. God, I feel Invulnerable! Yes, you say, but how about the beings who exist in the in the Dark-Space? I say I don't care, I know we can now access it, and if so, we can overcome anything. My little fairy like friend Deria 2, who is a Master Guardian and I, can now enter a place where my darling Reeas and Deria 2's sister are being held, or in isolation. Now is the time to act.

Chapter 52-Dark-Space.

Debra is running at peak efficiency, it will only take us a short time to get to the worm-hole at Eta 63457. The Retraction-Beam has been disengaged, all we had to do is get there, we know there are no more traps, as we have extra info from the Meeting-of-the-Masters. I now feel confident, although I am not going to be over confident; I have paid dear for that feeling many times, in many lives, and it takes a long time to learn, my student friends. I go into the storage area where we keep certain important things, and one very important thing, is my Tourgen friend, Cloft. Looking at the enormous body lying in the Isolation-tube I know this, man-made clone, is a terrible thing to behold, when it is angry, and that anger comes from me! The responsibility of keeping such a terrible thing at bay, is immense. I also know that, when used in certain circumstances, it can be invaluable. The clone also has on a light suit, although we can't be certain that it will work properly in Dark-Space. Looking down at it, I truly feel like Dr. Jekyll and Mr. Hyde.

Coming up on the edge of Dark-Space, the alarm sensor goes off. Debra said,

'Dan, we are approaching something that I am not sensing properly.'

'Yes,' I said, 'It is Dark-Space, don't be alarmed, Debra.' Reeas's voice is now coming through the speaker. She said, 'Dan, don't come in here, it is a trap.'

I am shocked, at first, and then, I am conscious that Reeas won't be able to send a message out of the Dark-Space, don't ask me how, I know, I just know. My invaluable little friend Deria 2, also agrees with me. Whoever sent the message is getting worried. In my previous escapades, I encountered a race of powerful beings known as the Llantrea. They are tree like creatures that can use telepathy to contact millions of their friends and so threaten planetary systems. Maybe ,whoever sent the message, has the ability to do the same thing? Obviously, it is a first attempt to trap us, by Kallo's helpers, or, to trap me, in particular. Kallo is a prisoner, and probably they know that, but maybe they don't, maybe, Kallo, is supposed to report in at a certain time, but when that doesn't happen, they start to panic! All I know is, we are going in! I feel no danger as we enter the Dark-Space, but as we got accustomed to the darkness, I feel a terrible depression. Deria 2 becomes more visible, and I became less so. She at once, adjusted herself, and became more dark.

'Dan,' she said, 'I feel scared, I haven't felt like this for a long time!'

‘Don’t worry,’ I said, if I read this right, it won’t be dark for long.’ I can see the space in front of the ship is dense. Debra is glowing like a star! I also know from Debra, that the outside of the craft is under extreme pressure! Pressure that would crush any craft yet known, apart from our craft!

Now, you say, how is it that with the Dark-Space, being made up of numerous black holes, that everything outside the Dark-Space isn’t being sucked in, and destroyed?

That is a good question, my student friends. The answer is Kallo and his little band of helpers. Kallo himself is locked up, but his apprentices are still here, they have some sort of device, which has great power, to freeze the entrance to the Dark-Space, but, we got through, right? Yes, but all I can say is our ship has superior abilities, for which I am eternally grateful. Debra, said,

‘Dan, there is a presence that I am not familiar with taking control of the ship!’

I at once am on my guard, but as soon as I see the face of Mannus on the screen I am at ease. He didn’t need to say anything, I just know we have to let him take control.

Debra said, ‘I feel totally at ease!’ That is something that you wouldn’t expect a computer to say, eh? We are at once at speed; a speed that is up to now, unknown, in the physical realm; far beyond anything even thought of, In fact, the instruments didn’t even register. We are now shining with the light of a million suns, also, we are, as I now realize, looping around the entire Dark-Space! Yes, my student friends, don’t ask me how it happened, I can’t tell you, even the Guardians don’t know, all I know is, after about one hour, we are in light space! That’s right, the darkness is gone, also, the black holes have been moved! Where? I don’t know! The only thing that exists where the Dark-Space had been is a very large asteroid which has a protective force field around it. It has been transformed into a space base.

Mannus is now gone from the screen, and Debra is again in full-control. She knows exactly where to go. I can already see that the base, is now, just a basic mining station, with 25 buildings, of all types. The force field will be no problem to access. We simply land facing the front entrance, that in itself, is enough to make many of the inhabitants give up, but not all. OK, my fanatical friends, if you want to play it rough. I transferred my consciousness into Cloft and have Debra push through the force field. I simply walk through the walls of the ship while the airtight seal of the force field is still intact. The people on the base are in disbelief, as a Tourgen beast man comes walking through the ships wall.

‘Where are the hostages?’ I said, in my most aggressive voice.

‘They are in isolation,’ said one of the more confident human type beings. I notice that there are several Tourgen’s standing around; maybe they think they can take me on. All I know is, I have to get to Reeas and Deria. I ordered the ship to stun everyone. I feel there are traps here. Deria 2 is now flying around trying to locate her Sister and Reeas.

‘Here, Dan.’ She said it in a way that made me tingle with apprehension.

‘They are in this building, but it has a time fuse on it, and Reeas and my sister haven’t got their light suits on.’

‘OK, I said. ‘How much time do we have?’

‘less than two minutes.’

The building is made of a material that is very strong, with a door that is too small for me to access as Cloft.

'OK.' I said, 'Time for meditation.'

I came out of the body, and then in the building within seconds.

I can see Reeas and Deria are secured in an isolation tube, with detonation fuses inside the thick glass.

Reeas shouted. 'There is nothing you can do, Dan! There is no time!'

I have never seen Reeas like this before. She obviously doesn't know that they are back in light space, and thinks that we are about to be separated for eons, maybe. At that moment I feel a love for her that transcended time itself. I said, I love you, then I moved back in the physical body of Cloft. I ordered the ship to shut down everything but life support. Debra said, she had located the fuses but was unable to defuse them as they were old fashioned simple clockwork devices! I can't believe that something like that is going to beat us!

'Quick,' I said to Debra, 'push your way into the isolation room.' Debra said that the seal would be broken on the force field. I said, I don't care, I must get to Reeas. I guess I was clutching at straws, because just then, the whole place exploded in a strangely calm, but intensely bright way. I know they are dead, but I also know they will be OK. Deria 2 and I are in our light suits, so we are protected. To describe the explosion, I would have to say that it was like flying through a star. The light was so bright that even with the light suit on I am blinded for several seconds. I can't wait to see Reeas, back at the astral base at Theren 1. Hold on, you say! You said that they weren't in this Universe, didn't you? Yes, my student friends, I did, and they weren't. They had been sent through the Dark-Space into the next universe some billions of light years away, as calculated by Debra. But when we did our little light show ride, we reversed it, bringing back my wonderful Reeas and Deria. I trusted Mannus, as if he is God, and I guess he is!

We started back to base. I sleep and dream of my Reeas, although, she doesn't know she is back in light space, Deria does, as she is a higher being.

We danced all through the journey. You can pick any song you like, my student friends, whatever you think is relevant. I'm sure it will be appropriate.

Chapter 53-Debrief Astral Base.

Sionn is standing over me, as I became conscious, at the Astral base.

'Nice going, Dan.' He said.

I know he is being sincere. Guardians don't use snide remarks.

'Thanks, but once again, I couldn't finish it off, as I had wished.'

'Don't blame yourself; there is nothing you could have done. The fuses were unobtainable. Kallo's helpers thought that they had won, when all they have done, is put back their karma, again.'

I got up and looked around. Reeas is now in the room, and in her human type body, which is very attractive, I go over to her, and kiss her.

Daria's 1 and 2 are also in their human type bodies, and were equally as beautiful.

'Please follow me into the conference room,' said Sionn.

We walk into the conference room, and here are all of Kallo's people! Yes, the ones who had been on the asteroid base.

'We brought them in, to see, if they are in any way sorry for what they did.'

'I doubt it,' I said.

'No,' shouted one of the Tourgen's.

I didn't think they would be in any way altered by the experience, but I was interested to see the reaction of some of the human type people.

'What do you think?' I said to a stocky man of about thirty five, with a long scar which ran from his forehead to his neck, and must have blinded him in one eye, as he is fitted with a false android eye which looks in need of repair.

He looks at me, and said, 'Who are you?'

Sionn said, 'He is the one, who tried to defuse the bombs.'

'Never,' the man said. 'He was a Tourgen!'

'Yes,' I said, 'I was, and now, I'm me, can anyone here realize what has happened?'

The man said. 'Do you see this scar?'

'Yes.' I said.

'Well, I did it myself, to prove, I can overcome any pain, and also to accustom myself to accept android ways.'

'Do you know where you are?' I said.

'We are where you took us, to trick us.'

'I can smell a trap.' said one of the Tourgen's.

'Yes,' the others shouted.

'We will leave them here for a while.' Sionn said, 'Let us retire to the other room.'

When we are out of earshot, Sionn said, 'We want the location of the base they use in the Galaxy-Unizylon, the planet is, as yet, unreachable.'

I said, 'There seems to be a lot of unreachable places in space, don't there?'

'There are more than you can imagine,' Sionn said.

'I don't know? I can imagine a lot.'

'It may be time, for you, to have another look into the light book, but this time, you will be upgraded even further.'

'Really,' I said.

'Yes, but we also want you to keep your lower world consciousness.'

'How can that be?', I said.

'As you know, we higher beings, find it very hard to access the lower worlds, so we need people such as yourself to help us.'

'Yes,' I said, 'I understand.'

He then said, 'You will receive, lower world knowledge.'

'What is that?' I said.

Sionn seemed to be apprehensive to talk! I feel a bad feeling coming on!

I am still going to be able to see my, Reeas, and Deria, aren't I?'

'Mannus want's you to be his Special-Envoy in the lower worlds.'

'How low?' I said.

He doesn't need to tell me, I already know, it is the lowest point! I know also, that Reeas and Deria won't be able to help me.

'You will have help.' he said.

'Why do you need me, then,' I said. I then realize I had said the wrong thing, again!

'Please follow me, Dan.'

The feeling I have, at this moment, is one of apprehension and fear. I think, why should I have these lower world feelings, after being through what I have been through?

'Sit down, and look into the light book.'

I feel let down, but, I know that this job of mine, is no ordinary job; it is more, a way of life, in these worlds of God, but I still wanted to tell Sionn, that I don't want this particular job!

I then look into the light book. I can, straight away, see Mannus looking back at me; he doesn't speak, as usual, but I know what he is saying. He wants me to accept this job, that is all; the next instant, he is gone. Sionn said, 'Are you now convinced?'

'I guess, I have to be.'

'Go to level one, find the agent who is abusing the Door.'

I know Sionn means the Portal, at the main-level-crossing point; this is the very important first stage to the physical body. In other words, it is the stage where people got normal looking bodies; below this level, there will be any type of body you can think of, like the Non-Human Universe. I hope you students can keep up. Yes, I'm sure you can.

OK, I said to Sionn, 'Now, I want time with my Reeas.'

'Yes, take your time, and enjoy it. I'm sorry about this, Dan, but you know how it is, with this job.'

'Yes, I know.'

Reeas is very upset.

'How can they ask you to go, so low?'

'I guess, I'm qualified, I must be a Trained-Lower-Guardian, eh?'

Reeas is not impressed. Deria said, 'If Mannus himself thinks you can achieve this job, then you are truly blessed!'

I think about that for a minute. I then said, 'Yes, I suppose I am,' although I don't feel it. Reeas and I spent some time on her home planet. I can't help, but wonder, how long it will be, before I see this beautiful place again. I just hope you students are prepared for the lower levels, I'm sure you will be fine, after all, you are Student-Guardians.

Now for a little contemplation, after thinking, and rethinking about the difficulties to be faced in the lower regions, I

Realize, I know very little about them, apart from Far-Station, and the adventure with Tamia, on levels 11, 12 and 13. Well, I will have to find out. I am going to put myself into deep meditation mode, for a time, as usual, I am with some of my past masters. We did the usual thing, which is meditation, and then talk.

'You will have to be careful of the entities from beyond the door. One of my masters said. They can trap you with darkness. Don't let them touch you.'

That sounds like good advice, I think.

For Students: You know that the entities can't actually touch you, but in the Astral World, don't forget, we all have a spiritual body, which can be touched, by another from the same plane, yes, I know you know it. OK, sorry, I am getting a little over stretched. I need to rest, so, I decided to visit my home and family, Yes, Elaine and John, have already incarnated; but, I can still visit them in our old home. The souls who they were then are still in existence. Yes, I know it sounds ridiculous but it's true. You students will realize soon enough. OK, then. Back at the base, Sionn said,

'I have another companion for you to meet.'

I can't believe my eyes, when, Kallo himself, comes walking in! I just look on in disbelief.

'He is now totally renewed.' said Sionn.'

I said, 'I don't care what he is, I'm not going into the lower regions with a psychotic murderer!'

Sionn looks at me with his usual stern expression. Kallo then said, Hello, my friend, I'm Kallo. Have we met? Who were you referring to just then?'

He is now looking at Sionn.

'We were talking about a person, who was, supposed to be going on this trip, but is now, unable to go.' Sionn said.

'Oh,' Kallo said. 'What a pity, do I know him?'

I was starting to get pretty freaked out now. I said,

'I have to take another break,' I said.

'Please, Dan.' Sionn said, 'Can I talk to you for a moment.'

We walk into the other room.

'Dan, please sit down, and listen. I know this is a little unusual, but you have been in many unusual places and have had many unusual experiences.'

'I know, I said, 'but this is too much! I can't stand to look at the man.'

'OK, that is easily fixed.'

'No,' I said. 'Not his looks, he is Kallo!'

'No, not any more, he isn't, he has been rejuvenated and by Mannus himself, can you understand?'

I am in no mood to cooperate, at the moment, and Sionn knows it.

'Please go and rest for a while. I will check on you later.'

Sionn knows I am reeling against this. I feel I have been let down again. I go to the restroom to lie down. OK, I said to myself, let me have a reassessment of my whole career here at Guardian base. I have been through Hell-and-High-Water for them. I have done my bit to save various Worlds, and the Universe. Not to mention the Inner worlds. Now, they want me to go into the very depths of the lowest plane and find an agent who is probably going to trap me in darkness, for eternity, and to top it off, they want me to go with someone who tried to kill me at every turn! I want to meditate to Mannus. I need to get away for a while. I wake up on the usual mountain side. Mannus is seated looking very calm and unmoving. I want to wait till the time is ready to speak, but I have to get it over with. I said,

'Why have I got to go to these dark places?'

'You have been chosen, because you have the correct consciousness.'

'But am I experienced enough?'

'He didn't answer my question, but said, 'Approach me.'

For once, he opened his eyes. I am enraptured. He looks into my eyes. Time stood still, I don't know how long I was there. The feeling is of intense delight, and also, intense light!

'You are now a Guardian, do whatever you have to do.'

I wake up in the rest room. I lay there for some time, just pondering the words Mannus had said.

Sionn comes in. He knows I have been to Mannus.

'Congratulations, you are now a Guardian.'

'Thank you,' I said. 'Well, let's get going.'

'Hold on, he said. You know, Kallo, has special knowledge of the lower regions'

'Yes,' I said. 'But he doesn't know himself as Kallo.'

'So, when you want him to appear as himself, just ask him to be Kallo, also, You can ask him to be the other person.

'Oh, I see, that's a smart move. So when we need to go to one of his little realms, we can go through as Kallo?'

'Yes.'

'And who is this other person?'

'Reeas.'

'What!'

'Yes, she agreed to do this, to be with you.'

'This is madness.'

'Why?'

'I don't want her going into such a dark place.'

'Don't worry; she has volunteered to be put back in consciousness.'

'What?'

'Yes, she visited Mannus right after you.'

'I can't believe this. How long does she have to be in this state?'

'As long as it is required.'

'Do you mean, Reeas, will be in her own mind but when we want Kallo to come through, he will?'

'Yes.'

'Hold on a minute. Why can't Reeas, have her own Astral body?'

'We want to make sure Kallo is kept in a secure mode, Reeas will see to that.'

'And what happens, if he can't be kept secure? I want to see Reeas.'

'Yes, you will, although she will be in a lower state of consciousness, but she will still be as you know her, she has also been given full Guardianship.'

I start to feel a little better.

I hope you students can access this, yes, I know it is a little complicated, but I know you can handle it.

I know one thing. I don't feel like dancing, as you can imagine. Onwards my Friends!

Chapter 54-Journey into the Dark Regions.

We make preparations for the Journey. I ask Reeas if she is OK, she said, 'yes, don't worry, I can handle it.'

'How do you feel, inside yourself? You know, consciously.'

'I feel fine, when we get back, I will get my full consciousness back.'

'Good, although I would love you, no matter how you are.'

Reeas, smiles. She has a beautiful smile.

Students: Please prepare yourselves for the lower regions. Make sure you can access everything from Astral Databank.

We transfer our consciousness into the vehicle that is going to be our home for the journey. Yes, you guessed it, Debra! How can a lightship transport us to the lowest plane of existence? You ask. Well, my friends, really, it is not a lightship, but just an Astral image that we can use for now.

Anything is possible here, my student friends. Debra is still functioning, but only through me. I am certainly glad she is here, but her use, will be limited. Kallo is now becoming more friendlier! I feel ill at ease with this. But I know I can handle it. All we have to do, to get there, is be conscious of the actual lowest plane; and, we will be there!

The one thing I'm not ready for, is the darkness. It is so dark, that I simply, can not see!

'Don't worry.' Kallo said, 'You will get used to it.'

Reas is letting Kallo guide us, for now. Debra didn't say anything apart from the usual ship stuff. For you people who can't understand how the ship can function like this. I can only say that, it is part of me, and not the ship! After several hours, we came to a beacon. People with special knowledge, can see them; I noticed it is on red; this means, there is danger ahead! Our eyes are becoming used to the darkness now. I can tell you, it is a very frightening place to be; there are no visible things that you associate with normal everyday life; Just nothing of interest! We can't see very far, also, maybe three or four yards, but, we can see the beacon! I tried to get Debra to shine a light from the ship, but it doesn't help.

Kallo said, 'We will have to get out and walk from now on.'

I said, 'Why?'

He said, 'The ship is stopping us from accessing the darkness.'

I think about it, and have to agree. Debra will have to revert back into my consciousness.

'A nice trick you can do, there.' Kallo said.

'Thank you. The ship is part of me, you know.'

'Yes, and very handy, especially when you are in the Physical World, eh?'

I see Kallo's face, as he thinks about it. Can we really trust him? I think.

Kallo said, 'Now, we will have to cross the divide at the beacon. We will have to beware, as there will be a gatekeeper on guard.'

I feel a little relieved, as we had not met anything nasty up to now, but it is early days yet. I wanted Reas to appear, but I know Kallo is the expert down here, so I let him lead us for now. Suddenly, a dark shape appears, in front of us!

'Go back,' It said! I can't make out any shape at all! It is just a sort of blob on the ground, which is throbbing!

'Who are you?', I said.

'That is none of your business. My job is to stop anyone from entering here!'

'Dan, please let me handle this.' Kallo said.

'OK,' I said. Kallo then, points at the Blob, with two fingers, then speaks some words, which I know to be from the ancient Black-Art books of Dalfien, (which is a lower world planet, which Kallo himself destroyed some hundreds of years ago.) The Blob said, to Kallo 'You are the Dark-Angel who cursed us!'

Then it just vanished! I thought, my God, if this man could get back to his other self, he would again become all powerful.

'OK, my friends,' Kallo said. 'We can go back.'

'Hold on,' I said. 'We are supposed to find the agent at the door.'

'We did find him.' Kallo said, 'I neutralized him.'

'No, it can't be that easy? Mannus himself asked me to supervise this job, and I know we haven't finished it yet. The entity we contacted here, is only the gatekeeper to stop people coming in. We want the one who is letting people in, or all manner of entities.'

'Yes,' Kallo said. 'But where is he?'

My mind is starting to hurt! How can it? You say; mind is a separate thing from Astral, I know that, but nevertheless, it does. I want to be away from this place. Kallo said, 'Let us go back to the door and see what comes.'

I feel an almighty need to run. The place is starting to affect me badly. How could Mannus think I could cope in here? I want Reeas, I thought. I am looking at Kallo as I think it, and she appears

'Thank God, you are here.' I said!

'Don't worry. She said. You haven't got used to the vibrations of the place, yet.'

'I know,' I said, 'this place is starting to affect me. Kallo wants us to go back to the door again.'

'Yes, it is the only way to find the agent.'

'OK,' I said, 'just give me a few minutes to adjust. You know, Kallo got rid of the gatekeeper to stop entities coming in.'

'Don't worry; he will be replaced with another.' Reeas said.

'Do you mean, we will have to get by him as well?'

'Not if we find this agent, who is letting entities in.'

'Why did Kallo want to go back to base, when he got rid of the gatekeeper?'

'I see what you mean. Surely, Kallo, can't be getting back to his old self.'

'Well, we are in his Domain, aren't we?'

'Very well,' she said, 'we will have to keep Kallo inside from now on.'

'What about finding the agent?'

'We will try by ourselves.' Reeas replied.

'Want to dance? I said?

Reeas smiles, but I can see she is worried. We reach the door. The feeling of dread is back again. I then noticed a very dark and menacing shape appear in front of us. I know straight away this entity isn't supposed to be here. It is far, too dark, even for this plane. Reeas is replaced with Kallo, as I became 'Aware.'

'State your business,' I said.

No sound is heard, then, it lunges at us wrapping itself around us. I feel totally trapped, and also, unbelievably claustrophobic. I can feel my mind, starting to shut down; then, all at once, we are on a totally lower level! I can't understand it.

'Where are we?', I said.

I then hear Kallo's voice. 'Don't worry, old chap, I know where we are; this is a lower sub level, just give me a few minutes to get my bearings will you?'

I am now on the verge of panic! I am wrapped up in darkness and can't function; I can't even stabilize my mind for meditation! My God, I think, if this is the end, please make it quick. Suddenly, Kallo's voice comes through; he said some more magic words from the Dalfien book. I suddenly slump to the floor.

'Are you OK, my friend?' Kallo said.

'Thank you, I said, 'We need something to lift this darkness.'

I think of Reeas, she appears.'

'I was on the verge of panic,' I said.

Reeas said, 'There is nothing we can do about it, as the plane itself is made up of Dark Matter.'

'OK, but now the entity has gone, surely we can try to bring a little light of our own.' I said.

'How?' said Reeas.

I concentrate on Debra and Mannus. We are stood directly in front of the door when light from my own eyes begin to shine forth! I feel like a living lighthouse. Reeas stands there and looks on in awe. I can clearly see a person standing at the gateway; he is an identical copy, or clone, of Kallo, but he is probably another apprentice.

OK, my fine fellow, I think, you have been nabbed!

The light is now, too much for him. He disappears.

now I can relax. The next gatekeeper appears almost at once. He isn't friendly, but, I can tell he is relieved to see us; he is a type of Burin, but, has a higher consciousness, he said, 'It has taken a long time to move the Entity from the gate.'

'I know, I said, but now you can move on.'

'No!' he shouted. I am the Gatekeeper, and no one gets by me.'

I can see he is into his job, so I leave him to it.

'I think the Gate is in good hands now, eh, Reeas?'

'Yes, Dan, until another psycho murderer comes along.'

I have to smile. We transfer ourselves back to the ship then back to base. Sionn is there, as usual.
'How do you feel? Dan,'

'I feel good now, but I have to admit, I was scared.'

'Yes. It can be very disconcerting.'

'Do you mean, you have been down there?'

'Yes, but it was a long time ago, don't forget, I was also once a Trainee-Guardian,'

'Yes, and Kallo, was, also.' I said.

'Yes.'

'What is going to happen to Him?'

'He will be highly monitored from now on, although his apprentices are still out there.'

'How many are there?'

'How many worlds are there?,' also, we have a small job for you to do.'

'Oh, no, not again, can't we take an extended holiday?'

'A Guardian's work, is never done. The team will prevail,' he said.

The work goes on my student friends! Please access the relevant Database. Onwards!

Dan Sherman Other worlds-Overview

OK, my Student friends, once again, we are together, for reference, will you please upload your thoughts to Central Databank, when you feel the need to contribute to this learning, recording session. The databank, as you know, is only accessible to student Guardians, and other, Higher Entities that can access the Guardian's computer banks. I don't know you, but I know you are high enough in consciousness to make it to this level, and that, in itself, is praiseworthy, my friends.

The job we are about to embark on is not easy. The worm-hole at Zeta 54792, has been moved. Worm-holes are extremely easy to move, even going too close to them at any angle, will affect them.

We have the coordinates to get to the worm-hole, but as you can imagine, it is wriggling about through space at a very fast rate; any world or anything in its path will be in real danger. We use worm-holes to access parts of the physical Universe; they are very useful for getting to problem areas quickly. The only trouble being, people, or entities, can move them, to stop the Guardian's from doing their jobs. Now, our job, is to find out, who is moving them. The problem is, when a worm-hole gets moved, it is very dangerous.

Chapter 55-Briefing.

The team, as usual, consisted of me, Reeas and Deria.

Sionn, who is our Higher-Coordinator, asks us, to take on this job. What can we say?, even if we get killed again, we will still be able to come back to the sub plane base, yes, I know, you already know that,

but I have to relate it anyway, there might be students who find it hard to relate to some of these circumstances.

‘The worm-hole has shifted by a hundred and thirty-million light-years already.’

Sionn said, ‘We will have to use all the resources on the lightship; it should take you, fifteen days to reach the vicinity of the worm-hole, but don’t forget, it is moving away at faster than light speed already’.

‘What happens when it reaches critical speed?’ Reeas said.

‘As you know, students, critical speed is when something goes faster than the known factor.’

‘We simply don’t know.’ Sionn said.

‘How do you want us to deal with it?’ I said.

‘Do whatever you feel is right.’

I thought, that doesn’t sound good. ‘Can we take the Tourgen clone bodies?’

‘Yes, if you must, but you won’t need them.’

‘I feel better when we have them.’ I said.

You know, by now, what the Tourgen’s are, so I won’t waste any time informing you, please relate to the database for any more info, if you wish; I’ll just say, they are a man-made, race of beings that have brought havoc in the Multiverse.

Now it is time to check the ship, the ship itself, is something very special, as you know, I call her Debra after a former girlfriend of mine, in my last but one, lifetime on Earth, she doesn’t mind being referred to as a person, in fact, she likes it, for you students, who know about my exploits, as a Guardian, Debra, is something of a problem, but we managed to sort it out. Debra can appear as a hologram or a Robot, although she doesn’t like being called a Robot. Debra can become any size or shape we want; she is simply, the most technologically advanced piece of machinery of any age and capable of traveling at many times the speed of light.

Now is the time to upgrade ourselves, by looking into the light book. It is another piece of Guardian technology, giving us whatever we need to function in whatever world we are on; all we need do is look into it; anyone with a higher consciousness can learn whatever they need, just by being conscious. All the training we need to allow us, to get the job done, will be given to us, such as, language, mathematics, defense training, even music, whatever we need. This Job is different though, how can we prepare for an out of control worm-hole?

Sionn asks us to meet him in the briefing room for preparations. I am a little apprehensive, I can tell you. I am a Guardian, but this job, is different, I feel like there is something else, in store for us, maybe a trap. Kallo, as you know, is an ex-Guardian, but he is locked up at the moment, although his little band of helpers, are still out there. Kallo, literally fell from grace from the lofty heights of Sionn, his equal, to would be Lord of the Multiverse; he came unstuck, as we battled in Dark-Space, although, to be truthful that was probably Kallo’s apprentice. Yes, he has many helpers, all ready to try for their share of power. The trouble is, Kallo can transfer his consciousness into numerous things, such as androids. Keeping track of him, is a full time job. The cells at the Astral base are special units, that are supposed to keep high security prisoners, such as Kallo, secure, but very often don’t. Why can’t the Guardians keep track

of a single prisoner? The trouble is, Kallo, is not the usual prisoner, he is a Master Tactician; also, he is very skilled in lower world, domination, and is able to travel anywhere in the inner and physical worlds. How is this possible? you ask. He can transfer into any clone, that his little band of helpers, has brought into being, or simply, escape to the Astral, Mental, or Ethereal worlds, and any number of sub planes in between, at the moment though, he is secure, I just hope his helpers are not as skilled as he is, if so, we will have trouble.

Chapter 56-Emergency Detour

Debra, is, again, running at peak efficiency, she has already done the on board check, and, any other things, that we needed to know; she is linked into me, as part of my consciousness, yes, I know that sounds a bit weird, but, trust me, we sorted it out. Debra, is now, under full control; she still calls me by silly names, like Danny, and dear, but I like it, Reeas, is also, used to Debra. When Debra, was a threat in our last adventure, Reeas and everyone at the star base, were in danger of being obliterated, by Debra. But now, as I said, things are OK.

We are now, several hundred thousand light-years out, in deep space, I am about to take a dream break, when a message comes through, it is in a language I'm not conversant with, although, Debra has already translated it; It said: 'Lightship, you are now entering Transveall Space, prepare to be boarded.' I said to Reeas, 'If they can board us, they must be a superior race.' Reeas said, 'Yes, the monitors show they are of a technologically advanced race, but they won't be able to board us.'

Debra said, 'Do you want me to isolate the vessel, Dan?'

'No, Debra, not yet, we will see what occurs.'

'Dan,' Deria said, 'Stop the ship, I will go over and check them out.'

As you know, Deria is a Higher Guardian and can access places where we, in the Physical World can't. 'Thank you Deria, that will be good.'

I am now becoming aware that this little stopover, could be a nuisance. We are already late for the worm-hole crisis; the worm-hole itself, is, at this point, now traveling many times faster than light, and, if we are held up, in any way, we could miss the deadline to contact it. The Transveall are now trying to transfer their security people into our ship by the old fashioned way of transferring their bodies into basic atoms and then resembling them on board our ship. I knew this would be a failure, but I wasn't prepared for the deaths of three of their people while they continue to board us. I said to Reeas, 'They now know, that they cannot board us, yet they continue to try. Reeas said,

'They are a very dominant race. Individual lives mean nothing to them.'

The thing that worries me now, is the time it is taking to deal with this situation.

I said, 'Let me talk with them, Debra.'

'OK, Dan, you are now in contact.' I then messaged them saying:

'Transveall, we are sorry to encroach into your space, but we are on an important mission, will you please let us continue.'

Our sensors are showing that the Transveall are not people to mess with, they did everything by the book, and we can already tell that they intend to take us to their security asteroid to question us.

'We haven't got time for this, Dan.' Reeas said.

Thank You for previewing this eBook

You can read the full version of this eBook in different formats:

- HTML (Free /Available to everyone)
- PDF / TXT (Available to V.I.P. members. Free Standard members can access up to 5 PDF/TXT eBooks per month each month)
- Epub & Mobipocket (Exclusive to V.I.P. members)
