Chapter 70-Kerion 6 / Chapter 71-The Corruption of Sionn (1)/ Chapter 72-Super Robots

Chapter 67-The search for Debra The Loss of Dan

In the restroom, which is fairly plain, I notice some personal little things, that I know are from Reeas, things like photos of my wife and son, from my last life, and some furnishings from my home.

‘Thank you, Reeas,’ I said, she knows I can’t function as I want, even simple things, are now, hard for me to do.

‘Reeas, how am I going to live, like this?’

‘You will be fine.’

‘I can’t even conjure up, simple personal belongings.’

‘Dan, why do you believe, you are now in this condition?’

‘I have been trying to fathom that out, but as yet, I don’t know.’

‘I believe you are being deliberately kept in this state, for some special reason.’

‘Why?’

‘As I said before, it must have something to do with Debra.’

‘Oh, yes, I can’t even remember that.’

‘Don’t worry, come, we will access the dream worlds.’

‘But we are already on the Astral Plane, and didn’t Deria say it is a special sub plane, maybe we can’t go beyond it?’

‘I know, Reeas said, but let us see, how far we can go.’

‘I know I should relate something to the students who can access this recording, but maybe you had better do it, Reeas.’

‘Yes, Dan, I will.’

For Students who can still access these messages: This is Reeas again. Please remember that we are now outcasts. The trouble being, Kallo and whoever else is helping him. If you can access

these messages please help by uploading any info which will be of use to us, from wherever you are able to go in the inner worlds. My belief is Sionn or Mannus is still in charge of things, but for some reason, they are letting Kallo rule the roost, for the time being. If Kallo himself manages to send you messages, or interferes with the recordings, then we are all in trouble.

Not even Sionn is allowed to send messages en masse to students.

I am also worried about Dan. He seems to be receding more in consciousness. We have either got to get into the Guardian network, or find Debra. As Sionn and Mannus are unavailable and Kallo rules the network, I suppose our only option is to find Debra. Now, Students: Why would Debra go away? I believe she thinks Dan is dead. Well, not dead, but isolated, as soul. The only thing I can think, is that Debra is searching for Dan somewhere in Dan's past lives! now, I know some students will think nonsense. But don't forget, Debra is everything that is the Guardian-Network, she is also a part of Dan, how can she access the inner worlds, then? She is, in essence, a mechanical fabrication. But she is more than a mechanical fabrication, she is part of Dan.

Now, Students: Where would you start? Please upload your thoughts to central database. If you said the Room-of-Doors you are right. But not Dan's Room of Doors, no, mine! How can I access Dan's past lives from my Room-of-Doors? you ask, and I can answer that, by saying, the same process that I used not very long ago on Altreea. The problem is going to be which door to access? Students again, please upload your thoughts on this problem, and I will take a little break and access the database, not by light book as you know, but by the old fashioned way of Thought-Transfer. I know we call it old fashioned, but really it is a process that is very old.'

'The Light Book, on the other hand, is simply a modern way of accessing the network on various worlds, both inner and outer. The light book itself, is also, very old, but not as old as the thought-transfer system. Now, I am back from my little break. Dan is increasingly getting worse, so I have decided to leave him at the sub plane base. I asked him to try and use the thought-transfer system to contact me but I decided that it is too much for him, yes, students. I am very worried. My Dan, is much worse than when he first came here as a trainee. Time is now of the essence. I meet Deria before I go to the sleep room, she also is coming on the mission to find Debra. I am now feeling better. If anyone can find her, it is Deria, she also said we can use her Room-of-Doors, instead of mine. For Students: We can access our own Room-of-Doors and we can access someone else with permission; why can't I access Dan's then? You say, because he is in such a low consciousness, and in no condition to give permission. We are now stood before 360 doors. As you know, each level of doors is 10,000 years of past lives. Deria wants to contemplate before we start.

'Reeas, I feel a strange need to a walk through five levels!'

'That is 50,000 years ago.' I said.

'Yes, normally, it would be, but my lives are much longer than humans, but don't forget, for Dan, it will be much more.'

'How much?'

'In the hundreds of thousands, we will see when we get there.'

It didn't take long to reach the fifth level.

‘Reeas, I’m getting a message from Oasis.’

‘I can access it also, Deria. Dan has de materialized; he is nowhere to be found on the inner planes!’

‘This is Kallo’s work,’ said Deria.

‘He must have done something to Dan, at the derelict house, when we were in the lower regions,’ I said, ‘he pretended to save Dan, when in reality, he was destroying him! I can’t function like this Deria! I have to get to Kallo. I’m going to rip his head off!’

‘No, Reeas! We have to find Debra; she is the key, now, Kallo knows this, and he will also be looking for her.’

‘But he has access to all the worlds, while we only have access to this special region.’

‘No, Reeas, we can access my Room-of-Doors to any time! Kallo cannot reach us here. Trust me.’

‘I’m sorry, Deria. I’m stressed out.’

‘I know.’ Deria said. ‘But I feel Dan, is OK. Kallo couldn’t destroy Dan in the lower regions because he wanted to access Debra. That is still the case.’

‘Why has Dan gone, then?’

‘Because Kallo wants to make it harder for us, come, we are at the crossing point. I feel an urge to access the fifteenth door on this level.’

Students: I just want to say, that of all the people, or should I say Higher Beings, that I have access to, I am very glad, that I have Deria here with me, she is all that I aspire to be. Dan has told me, that he aspires to be like me! And I love him for it. What I am saying is, no matter how high we go in consciousness, there is always someone who is higher.

Kallo, on the other hand, may be riding high at the moment, but as sure as night follows day, he will fall. Deria has told me to tell you students, that she is getting some messages from you. They say that there is a strong impulse to go to level eighteen! She has informed me that this is a false thought reading, probably from Kallo himself; please continue to send your thoughts, and try to be aware. OK, we have now passed through the door. The landscape is beautiful as usual. Anywhere Deria has been, in her passed lives, is probably like this. I am now getting used to the place. I know it is a planet called Belrine; Deria spent several lifetimes here, as a woodland nymph. I would like to describe the landscape in more detail, but words will not do it justice; let me just say, that everything you can imagine heaven to be, is here. I am also very grateful to Deria for helping me in my training to become one with her people.

The experience, is very probably, going to be vital in finding Dan. Deria is now in meditation. I sit down and do the same. I open my eyes, to find myself, sitting on a beautiful golden cushion. I look around to see, Deria, plus hundreds of her kind, sitting in a large circle. I can’t help noticing the beautiful young lady, sitting in the center; she is dressed in a silver silken gown, and has a golden tiara on her head, with a large ruby type stone in the center. I can see the stone getting brighter! The light seems to melt into me, now, I can see wings starting to grow from her back! They grow so big, that they are now bigger than her. The Love I feel is overpowering.

‘Deria, Reeas, she said, please come forward.’

I know this Higher Being is called Gloriel.

‘Hold my hand.’

I look at Deria, who also was incredibly beautiful. We walk forward, and take her hand.

‘Now, close your eyes.’

At once, I can see Debra! She is talking to a Stone-Age person!

‘Please, Dan! Talk to me.’ she said!

I know the stone-age person is Dan as a Neanderthal man; I also know the scene we are experiencing, is from one of Dan’s past lives, from Earth, in the region that will become Germany, 250,000 years ago! of course, Dan can’t possibly know Debra is there; all he is bothered about is surviving day to day. Debra is different; I notice she is smaller, and younger, with a worried look on her face. All at once, we are back in the circle.

‘Now, Deria and Reeas, you know what has happened?’

Deria said, ‘Yes, Debra is being guided to Dan from lifetime to lifetime.’

‘Yes, but there is a danger that Dan could become lost within his own past lives.’

‘How is that possible?’ I said.

‘Debra is looking for Dan, in his normal consciousness, once she finds him, and she will, he will merge with her in the wrong time. Kallo, as you know, wants just that to happen, he will be rid of Dan. He can then concentrate on creating a new Debra.’

‘Surely, Mannus won’t allow that?’ I said.

‘Mannus let’s the lower worlds, take care of themselves. It is up to the Guardians, to keep order.’

I feel anger, love, frustration and confusion all in one.

‘What can we do?’ said Deria.

‘It is no good trying to get to Dan as the stone-age person, as Debra, has now gone’ she could be anywhere in hundreds of thousands of Dan’s past lives. You must try to get to Kallo.’

‘What?’ I said.

‘He won’t be expecting that;’ of course, it will have to be Deria, she has special powers, when it comes to concealment. You, Reeas, will have to search for Sionn.’

‘All I can think about, is my Dan.’ I said.

‘Yes, I know. Don’t worry, we will keep an eye on the Guardian- Network from here. Should there be any change, then, we will message Deria. Hold on, my friends, something has happened. I am getting a message from Grenwer. Please return to the sub base, right away, where you will be briefed. Farewell.’

We are now back in the Room-of-Doors.’

‘I’m worried sick, about Dan, Deria’

‘We will do just as Gloriel said; I feel something good has happened. You have an unbreakable link with Dan, Reeas; it is like two stars that are too close together, there is no way that they can escape the gravity, or their destiny.’

‘Or three stars, Deria, the other one, being you!’

‘Thank you, Reeas. I feel as close to you, as my twin sister, do you know, my sister and I have been together for eighteen lifetimes and nine thousand years?’

‘That is a long time, Deria.’

‘It is only long, if you think it is long; time is only what you perceive it to be, and Kallo cannot harm us, Reeas; he can only try to catch us in lower consciousness, as he did with Dan. Please remember, to always look to the Higher Regions. I have to go somewhere, Reeas, please don’t ask me where. I feel I am needed to help someone. Go to the sub base, and relax. I will see you later. Farewell.’

I return to the sub plane base.

Please remember students: We are still on the Astral Plane, also, we are still in the special sub plane known as Oasis. It can get confusing, for some students, especially students, who can access the Guardian-Network, but they might not have sufficient consciousness, to realize it, yes, I know it is confusing, but that is the way it is. God works in mysterious ways. A person may have been working for lifetime upon lifetime on the inner planes, helping to serve God; but he may live an ordinary life on his, or her, planet, until one day, the Master appears. This can happen on the inner or the outer worlds. Right, enough lessons for now.

I make my way to the restrooms, at Oasis. Imagine my surprise when I see Grenwer, standing there!

‘What’s happened?’ I said.

‘Please, don’t worry, just sit down, and meditate, to the fifteenth level, of the Mental Realm.’

‘I don’t know, if I can? My mind’s in a mess.’

‘Reeas, please relax. Dan is OK. He is with Mannus, at the moment.’

‘Thank God, can I see him? How is he?’

‘Please, just rest in meditation, and follow me.’

I close my eyes, in blessed relief, I open them to find myself in a function room, similar to the one at the sub base, then, to add ecstasy, to joy, there is Sionn! He is sitting at his usual place on the platform as the Higher-Coordinator. I also know Dan is near, so you can imagine my excitement.

‘Come, Reeas.’ he said. ‘Sit here, at the front, let me start, by saying it is thanks to Reeas, Deria, and numerous other Guardians, that Kallo, and his accomplices, are now, close to finally being brought to justice. Some of you, are probably a little confused, by the events that have

taken place in the Guardian-Network, also, we must welcome any students, that can access this level. It is secure, so please, don't worry about your thoughts being intercepted. 'Please be assured, that we have everything in order. The events over the last few days, have been satisfactory to say the least. We have now captured several thousand dark agents, with many more predicted to be caught, in the near future. Now, Reeas, there is a certain little job, we want you to do.'

'On my own?' I said.'

'No, you will have help.'

I feel my senses tingling, right now, I also feel Joy, beyond compare, as my Dan, comes walking out from the side of the stage, followed by Debra!

I can't control myself; I jump up to grab him. I also put my arm around Debra!

'How long have you been like this?' I said.

'Not very long, I'm still receiving thoughts by the second!

It feels as though, I am an android, again!'

'Please don't worry, about that,' said Sionn. 'It will settle down, later. Now we have someone else to thank.'

I know it is Deria, before he finishes speaking. 'She has, not only, successfully brought Debra back to us, but also managed to infiltrate Kallo's network, without being detected, on numerous occasions, for this, she is to receive the order of 'Master Guardian.' Deria then comes walking out from the side; she is in her human form, and as Dan has said before, she is very beautiful. We are now, all together again.

How did you manage to find Debra, so fast?' I said.

'I just went beyond the conscious mind. I felt that I should, simply go, to a certain past life, of Dan's, and I would meet Debra there, so that is what I did.'

'Which past life was it?' I said.'

'Believe it or not, it was on Altreena again, and yes, he was a Napie again!'

'I can't help it, if I like being cuddled and loved.' Dan said.

'There will be a lot of that, later,' I said.

'I can do it better.' said Debra, as she turns into the Robot Nanny!

Sionn said, 'Now, Dan, Reeas, Deria and Debra, please report to the briefing room for details.'

I can't help thinking, I might have to be careful again, in front of Debra, even if she isn't here!

Chapter 68-Deception

Message to Students: (From Reeas.) Dan, will be taking over the message report to students for the near future, thank you, for supporting me, while I was in charge of this service.

Students from Dan: Thank you, for sending me your thoughts, and helping me to get back to full consciousness, although, in reality, it was Mannus who did most of the work. I was in good hands. The whole thing was set-up by Sionn, as you will now find out.

I am feeling pretty good, as I walk into the briefing room with Reeas, Deria and Debra. I am now my old self, but, I am also something more, again! I can relate to everything that is going on around me, from the actual job, to Kallo's past lives!

'Dan, I know you are experiencing some small differences' said Sionn, 'but these will abate soon, please be seated. You all know, that Kallo, still thinks he is in charge of our Network. I know personally that he is ordering a full-scale crash of the entire Guardian-Network through his agents.'

'Surely, they must know, by now, that we are on to them.' Reeas said.

'Yes.' said Sionn. 'But we actually gave them false information! This operation has been long in preparation. Kallo, actually believes he is within grasping distance of the whole Guardian-Network; he also thinks, I am destroyed as a Higher-Guardian.'

'How?' said Reeas.

'I let him slip a little drug pellet into my shoulder, some weeks ago, while we were having a conversation.'

'Really?' I said. Wasn't that a little too obvious.'

'Not when it was a minute robot the size of a pinhead. Don't forget, Kallo is a Master, when it comes to Robotics, of course, I knew about it before hand, but he thought I didn't.'

Never underestimate Kallo, he is cunning, beyond measure. If everything goes according to plan, he will be in an extra high security astral cell again soon, as will his accomplices. Now, here is what I want you to do:

Dan and Reeas, go to the physical sub base at Earth. Kallo is now there, planning the destruction of the Milky-Way Galaxy.'

'What? How can he manage that?'

'He is going to destroy everything that represented you.' Sionn said.

'How will he do it?' said Reeas.

'With a weapon that he invented some time ago, actually several hundred years ago, don't worry, we know all about it, and it has not been used before; it is a device that can heat up the sun to many times its temperature, don't worry about the devise, we will take care of it, just get to Kallo, and pretend you are the way you were, when Kallo threw you out of the network, keep the ruse going for as long as you can, to help us gain more information. Debra will, of course, be invisible, or rather, part of you. You won't need the clones or the ship, as you can dream travel to Earth, then Debra, will guide you; she has only to touch you, Reeas, to give you, the same security as Dan. Debra appears at once.'

'I'm going to enjoy this.' I said.

‘Before you enjoy it, Dan, please get as many names of dark agents as you can, also, any other information you can get, you have to get near Kallo, and Debra will do the rest, you will also not be detectable by any agents. Deria has the special job of neutralizing the weapon. Don’t worry, again, the weapon cannot be used to heat up the Sun, but it can be dangerous to the underground base, as it has been booby trapped, we could not interfere with the booby traps, but we did neutralize the device some time ago. When you get to Earth, do not use the Thought-Transfer system, even for students! It would probably be OK, but we don’t want to risk it. You won’t need to message us, as we have everything under control. Just concentrate on getting near to Kallo, any questions?’

‘Just one, can I hurt him?’

‘If he tries to hurt you, then yes, Kallo, as you know, has a very big ego, so all you have to do, is make him angry. After all these years, you would think he would learn to control himself but he is so used to being in charge, that no other position will do.’

The job of taking Kallo to Mannus was another trick; we knew there was little we could do to alter Kallo in that direction, but again, it helped us to gain more information about their network. Kallo’s defenses, really did come down, for a time, now he thinks he can dominate everything.

Getting to Earth in the physical will lesson his defenses even more, he will think he can easily defeat you, but he will be wrong. Now, do your best, my Guardians, as Zelda 3, would say.’

I am now, in a really good mood. I have full consciousness, and I can access the Guardian-Network. I also have Reeas, Deria and Debra to help me, what more could a soul want?

For students: please excuse us, while we transfer to Earth, via thought-travel, and no, it is not the same thing as thought-transfer. We are on alert, as regards the Guardian-Network, so we can’t accept, or send, thought-transfer messages. Please be patient, and access the network later.

We are now on Earth, at the base in Northumberland; you remember the base is called Kelsay. For students, again: We don’t need the cloned bodies of anyone, to transfer into, as Debra is now our protection. I know it is hard, to get your head around, but I know, you can understand. You are Students-Guardians and are unlimited. I know it is hard to believe, but you are also Spiritual Beings and Eternal.

We arrive in invisibility mode across the road from Giants-Seat lane, where we know the base is sited. I also know that there is a security cordon in place, in the form of a no access sign, and road block. I can’t see any one on guard, but I can be sure there is.

‘We better do this by the book,’ Reeas said. ‘If we get in there too easily, Kallo will suspect something.’

‘Yes, you are right, what do you suggest?’

Debra said, ‘Can I do it, Dan?’

‘What are you going to do? I said.

‘I will charm them, with my girly looks.’

‘No, Debra, you know, you can’t show yourself! There will be all sorts of security stuff in there.

I will neutralize any security stuff.

‘We can’t risk that. We have to act as though we are still in low consciousness, so, you will have to be invisible, until the last minute!’

Reeas said, ‘let us get arrested trying to access the portal; we will be taken to Kallo.’

‘Yes,’ I said, ‘that seems to be the best way, Reeas.’

‘I will access the portal before you.’ said Deria. ‘I will also use the high invisibility mode, so I won’t be detected, don’t forget, do not send any messages when you materialize, as Sionn advised. I will also check out the lane itself, to locate any enemy. Give me a few minutes, before you make yourself known.

For any students, who think we are using thought-messages at the moment, no, we are not, we are protected by Debra.

Deria comes back to tell us that the lane is clear! We walk across the road, and into Giants-Seat lane. No one appeared to stop us; maybe they think they are undetectable?

Well, I suppose they are, after all, it has been undetectable, for a very long time. We get to the place where I know the portal to be. It is between two very large oak trees. Debra is now in high undetectable mode, or rather, part of me, and undetectable by anyone, apart from such people as Kallo. Yes, I know it sounds complicated, but you will understand when you access these records later. We can’t risk uploading them straight away, for security reasons, you understand. Debra is now informing me, that the portal itself has been moved. How come, I didn’t know about

this? you say, because, Debra is the network, and I am part of Debra, yes, a part, I suppose, I could fully merge with Debra, but I don’t want to. I want to be me. I now know the portal, is on a sort of changing pattern; one minute, it will be somewhere, then a few minutes later it will be somewhere else. Kallo must be very busy changing things, such as security, in the network, well; we will just have to put a stop to it. Debra can easily fathom out the next position for the portal, but, that will make it seem, like we know about this new technology!

‘When will the portal revert back to this spot? I asked Debra.

‘Not for seventeen days.’

‘OK. We can’t risk letting on, that we know about the changing portal, so we will have to simply hang around till we are detected.’

Reeas said, ‘let us become visible then we are sure to be detected.’

OK, I said, but Debra will be part of me and invisible, here we go, sure enough, it takes just three minutes, for the security people to surround us; they came from one of the portals, that is sited not more than a few hundred yards away.

‘Where do you think you are going?’ said the leader.

‘Can people not walk in the countryside?’ I said.

‘Not around here, they can’t.’

‘Oh. Why?’

‘Because it is a restricted area, that’s why. Who are you?’

‘Never mind, I said, sorry to bother you. We got lost, we will make our way home now.’

‘No you don’t.’ he said. ‘We have to make a security check on you. Identification papers please, never mind, we now, know who you are. Word is coming through, from below. I don’t know why you attempted to come here, you must be as dumb, as Kallo says you are, and you lady, why hang around with a loser like this; maybe, you can be re programmed, I can use a babe like you, to keep me company, on cold nights. Ha. OK, inside, losers.’

It only takes a few minute,s to reach the heart of the complex.

Surprisingly, it isn’t Kallo who greets us; it is a Kallo look alike. How do I know, you ask? Simply, Debra, I also know, these Kallo clones, are now, being installed at all the Guardian bases in all the worlds of existence!

Can you imagine, students, what that means? If I was a Trainee-Guardian, I would be very nervous now, I can tell you, but I am not a trainee anymore. My little team, and I, have the job of defeating the greatest threat to the entire Multiverse! For security reasons, you cannot upload your thoughts on this situation, at the moment, but you are free to access the database later. Sorry for any inconvenience, but I know you can understand, we are a little busy at the moment.

‘Well, look who it is?’ The Kallo Clone, said, ‘the Trainee fool, and the Faithful servant. How did you expect, to get in here? The few remnants of the Guardian-Network, must be desperate. I see you, are partially back to your trainee consciousness. I know you would try to access some base or other, but I really didn’t think you would be so stupid, as to access this base. I now realize, you are just a simple human oaf, and your companions are equally stupid. It really is a triumph for me to capture you, and the pleasure I am going to get from seeing you all suffer, of course, I’ll have to keep you in some form of consciousness to find Debra, as you know, but now, I am fully ready to take over the entire network.’

‘Oh?’ I said. And what does Mannus, think about that?’

‘Fool! You know Mannus, let’s the lower worlds, take care of themselves; and I will take care of them, my way.’

‘What do you think Mannus is?’ Reeas said.

He is the watcher and the power, and part of that power, has been given to me, to use, as I may.’

‘Are you even the real Kallo?’ I said.

‘Ha! Fool. Do you think it matters which part of Kallo is which?’

‘So, have you got Debra, on line?’ I said.

‘Yes, fool. How do you think we managed to get millions of Kallo clones, into existence?’

‘It wouldn’t have been with Manus’s help,’ I said.

‘I will enjoy merging you, with a lower entity.’ The Kallo clone said.

‘And when will that be?’ I said.

‘In a very short time,’ he replied.

‘Oh? And what sort of entity, will it be?’ I asked.

I haven’t made up my mind, as yet, maybe it will be a Tourgen! You are used to being a lower consciousness beast man, aren’t you? But this time, you won’t have any strength. You will just be a drooling moron.’

I am very tempted, to change into Cloft the Tourgen Clone, and then say, Oh, like this, you mean. But I know we have to keep up the pretense a little longer. I need the information from Deria, about the weapon, first, also, I need to get the all clear, from Sionn. It is frustrating to listen to this Kallo clone, but I know my time will come. Reeas said, ‘What do you intend for me?’

‘Ah, my dear Reeas, what do you say to coming along as my partner? We could access a lot of places, such as here on Earth. I know, I detest the place, for being the birth place, of this moron here, but there is such potential here.’

Now, my student friends: I have to admit to a little mistake on my part. I let my frustration come out in the shape of Debra. She, being part of me, appeared for a split second! This was due to a little anger. I am now, fully in control. But Kallo saw her and the entire base is alerted. I had to think quickly.

‘I see you really do, have Debra,’ I said.

Kallo promptly walks out of the room, and is gone for five minutes. He comes back, but I can tell, that this Kallo, is the real thing, he is now looking at me, with a cruel, uncaring glare.

‘Where did you go? Was it to send out a search party? Can you not even keep control of Debra?’ I said.

‘It is time to merge you; we have a particularly dirty Swamp-Man from Lagna.’

‘Get real, Kallo.’ I said, ‘I know, you can’t do that. I may be a little low in consciousness but anyone knows, that it has to be the same consciousness as myself!’

‘Oh, that is where you are wrong. We managed to find a Multiple Match, yes, you will have company in there, ha, fourteen, in fact. You will be stuck for as long as I want you to be!’

‘You are completely mad.’ Reeas said. ‘Has the trip to Mannus not taught you anything?’

‘It taught me, that I can ascend to power, also it taught me to pass judgment on people I detest.’

‘Now, does Dan want to be dragged to the cloning room? Or should we escort you as civilized people.’

‘I can walk.’ I said. I am now receiving a message from Deria that the weapon to destroy Earth is now completely safe, although Kallo, and his team don’t know it.

'And then there is you, Reeas, do you want to rule the Milky-Way Galaxy, and everything else, or do you want to be an outcast!'

'I will go with my Dan.'

'I'm afraid not, my dear, this is a one way trip for your Husband. You will have to either be accepted by my team, or you can be placed in a secure Astral Cell, of course, you will have to be treated first.'

'What do you mean?' I said.

'I mean, she will have to be reprogrammed into our network, you, on the other hand, will be forgotten!'

Students: As you can imagine I am now starting to get very angry. I am also getting a little impatient. Remember, we are on the physical world, that means, I can hurt Kallo, If I can get to him; Indeed, I know I can get to him, but I want it to be like, a freak accident thing. I want to get more information from him, before I finally kill him. If we were on the Astral Plane, I know he would be able to just shrug off any injury, or simply, transfer to another sub plane, but here in the physical world, things are different, I know I have to keep myself in check, for obvious reasons, just a little longer. I can now see security guards forming all around us. I figure that if he is severely injured, he might drop his guard even more. I don't want him to die, as yet, but I want him to suffer. I know it is not the Guardian thing to do, but he has made many people's lives a misery over a very long time. I know you students can't help me at the moment with the security measures in place, but you will be able to access these messages later. Please feel free to

contribute your ideas on what you would have done in my place. Kallo is now looking at me with his high-and-mighty look.

'OK, I'm getting tired of this, now. Take them to the cloning room. Make sure, she sees him merged with the other specimens.'

As Kallo turns around to walk out, I run as fast as I can and jump on Kallo's back, I then put my left arm around his neck and with my right hand I poke his right eye out. Everyone is surprised by the speed of it, although I held back a lot, as you can imagine, I had to make it believable. I wasn't particularly bothered about getting more information now, as being this close to Kallo, had done the trick! We have all the information we need. I can now, wreak havoc, if I want to and I want to. Kallo is now, screaming in agony. I let the security guards pull me off.

'Why didn't you stop him!' he shouted. The leader of the security team said, 'We didn't think he could move that fast! Something isn't right, here.'

'I'm going to take extreme pleasure, in cutting off all your skin, later.'

'Oh, are you? You might have a little trouble cutting this skin off.'

I then transform into Cloft the Tourgen. The look on Kallo's face, even with one eye, is something to behold. Reeas is now, in the same form as me. I then instruct Debra to neutralize any weapons, on the base. The security people are now panicking, but no one wants to take on the Tourgen. I then walk over to Kallo. There is no emotion in his face now, just hatred.

'Have you any last requests?' I said.

‘Go to Hell,’ he said.

‘I probably will, but when I go, it will be to help people, not dominate them, oh, and I’ve just had a message from Sionn; he said, to tell you, that your cell at the Astral High Security Prison, is fitted out with new technologically advanced escape proof measures.’

‘No prison can hold me. Fool.’

‘It can when you are placed in long term sleep mode, with no access to the lower regions, and no consciousness to go higher,’ I said. He then spit in my face. I particularly despise that, so I grab him by the neck and squeeze till his other eyeball popped out. I am now getting a message to place the people who are loyal to Kallo, in the secure compound, which is located directly beneath the room we are in. All we needed to do now, is simply, walk to the briefing room. Sionn himself, is now, at the base.

Chapter 69-Debrief 3

The feeling as we walk into the briefing room, was one of emotion. I know the Guardians don’t show their feelings very often, but this time, things are different. People are clapping and cheering! I feel good, as we are ushered to the front row. Sionn said:

‘Dan, Reeas, Deria and Debra, please accept our thanks, the job went off as we predicted, but due to your excellent acting ability, we were able to gain much more information. The touching of Kallo’s neck, in the physical realm, did the trick; we now have the locations of many more agents. Kallo himself, is already in isolation. You will be surprised to know that, 6,553 Special-Dark-Agents have also, been located, including, even in this, very room. Sionn glances around as some people in the audience are starting to get up and move to the side; security people are now at the doors, to arrest them. ‘These people have been shielded under the Guardian umbrella, for a long time, they will be isolated, and monitored, from now on. As of now, the Guardian-Network is fully operational. Dan and company, have proved to be worthy allies. Debra, is now back as a fully-operational part of the Guardian-Network. This base is now, the most important part of this section of the Milky-Way galaxy. Dan, Reeas, Deria and Debra, please follow me, into the other room. After going over some details of the operation, which I already know, from Debra, Sionn said,

‘The Network is now secure, you can all now go back to normal duties, ‘Dan, you will be your normal self, from now on.’

‘What do you mean?’ I said. I notice Debra is now gone!

‘You will be separate from Debra.’

‘I don’t feel any different.’ I said.

‘No, the process will take a while to become noticeable.’

Please report to the operations room, to finalize the process.’ Sionn then walked out of the door.

Reeas said, ‘you are finally free of Debra!’

‘Yes,’ I said, ‘but I thought she would be a part of me forever; that is what I was told. Why do they keep doing this to me?’

‘What do you mean?’

‘I mean using me, as a sort of useful part of the network, and then dumping me, when it is over. They didn’t even think to inform me about the plan.’

‘If it is any conciliation, we weren’t informed either.’

‘I know, but you didn’t lose anything.’

‘You didn’t lose anything!’

‘I know, but why don’t they inform me? I feel such a fool, sometimes.’

‘Listen Dan, I thought I had lost you more than once! Do you know what I have been through?’

‘I’m sorry, Reear; it must be the first effects of the changeover.’

‘Why don’t we take a break, let us visit your family.’

‘Yes, then we will visit yours, Dan.’

After a lovely vacation, in the company of loved ones, we reported back for duty. For students: I am trying to come to terms with the loss of Debra, I must say, I feel much the same as usual, but with the knowledge, that, I do not have access to the most powerful thing in the Multiverse as part of my consciousness!

Debra is now just the ship. I must say, I will miss her antics, especially her dressing up in all the styles of the nineteenth, twentieth and twenty-first centuries just to impress me! I know what some of you students, are saying. How can I lose something, that is part of me? Did Mannus himself, not say, Debra is part of you, and as such cannot be parted from you?’

I just wanted to say goodbye, I suppose.

Sionn is now calling for our team, to go to the briefing room. I know it is some new job, even before we get there, and that is without Debra!

With Debra, I would have known, every detail!

‘We have a small problem in a galaxy known as Spiron 21,’ Sionn said. ‘The people on the planet, Kerion 6, are about to tamper with the time frame. They are just about ready to know about us. But this crisis, has arisen; they will attempt to travel forward in time to access knowledge about things, that they won’t be able to handle! You can imagine what damage that could do! Before you ask, the simple question, how can they? We all know it is impossible, yes. Well, I can tell you, that it could actually work, but not in the way the Kerion’s think; the device that they will use, will be propelled at much greater than light speed. Many thousands of times faster in fact! It will travel to the designated point of reference, in a split second! That point of reference, is the neighboring galaxy Phopion; it will then, propel itself back within another split second. The inhabitants would have been the same age, of course. But they won’t survive. The

time dilation will be massive, tens of thousands of years, actually. The trouble will be, that a large part of Phopion, will be destroyed, plus all the neighboring planetary systems.

Kerion 6, will also be destroyed.’

‘Is there any way, Debra, can handle this?’ Reeas said.

‘Well, you may as well know, she is below par.’

‘Why?’ I said, ‘isn’t she up to the job?’

Sionn is now looking at me, with his I-know-what-you-are-thinking look.’

OK, team; this is how we want to handle it: Dan will have access to Debra, but only in a small way.’

‘And how small, will that be?’ I said.

‘She won’t be able to leave the ship.’

‘So, all we have to do, is the same thing we did on Relmar7 in the Andromeda-Galaxy when we stopped the scientist from using the chemicals!’

‘No, Dan, that was a relatively easy thing to do, besides the danger wasn’t real. The real trick was to catch Kallo. This will be much more dangerous. The atomic structure of the time traveling machine has already reached critical point.’

‘Why was it left to get this dangerous?’ Deria said.

Sionn is now looking a little bemused. He said, ‘The Network was down at the time, it was that part of the plan, to catch Kallo?’

I didn’t want to make it any harder for Sionn, I know his job is the hardest in the Universe. So I left it at that.

‘We also believe this crisis, is due to Kallo’s helpers!’ Sionn said. I thought they had been captured.’ Reeas said.

‘There may be some dark agents, who are beyond our network radar.’

‘You mean, other masters?’ I said.

‘Yes, he, or they, probably helped to construct the time machine, and will probably be willing to die in it, taking half the Spiron 21, and Phopion, galaxies with it! You also know, that the massive time shift that will occur when the machine comes back to Spiron 21, will alter the space time continuum.’

‘How do you mean?’ said Reeas.

‘You may as well know. We simply don’t know! We have our best people working on it, but one thing is for sure, time will alter for Spiron 21 and Phopion, also, it will spread to other galaxies!’

‘How can it spread?’ I said.

‘The structured atoms, from the time machine, will create an enormous blast, the like of which, we have never seen before. This will result in a Googol-Photon, explosion, making many stars, in the Spiron 21, and the Phopion galaxies, explode and implode, at the same time.’

I am a little overawed at this, all I can think of to say is, can we take the Tourgen clones?’

Sionn said, ‘You won’t need them, but yes, I will make arrangements for them to be grown on Kerion 6.’ Sionn then left the room, leaving me, Reesas and Deria to stare at each other in amazement.

For students: we are back to normality, so to speak, please upload your thoughts again on how you would handle this particular job. If you have any experience in time travel techniques, please help. I have now been told there are already three students working on the problem on Kerion 6 already, in the dream state. I will make it one of my priorities to meet you, when I get there. This is very, good my student friends, keep up the good work. As students, you will already know, that there is a Guardian base, on Kerion 6. There are two lightships, already at the base, so we won’t need to take Debra. I must admit I used to like Debra insisting to wear something appropriate for the trip, even if it was full combat gear. Ha, sorry, I am just trying to play down the enormous task that we have to do. The trip itself will take too long by lightship, as Spiron 21 is many light years away. We will travel there in the dream state, then transfer into our cloned bodies, which are already grown, and waiting for us, in the Guardian base, on Kerion 6. We retire to the sleep rooms, to make the transfer. I want to ask Reesas to dance, but I know this isn’t the time.

You students know, I like to dance; it is one thing that keeps me in touch with the real world, whatever and wherever, that world may be, or should, I say, Earth. The real world for me now, is a combination of many things. For students who are working on the inner planes, at this time, the real world, is the everyday world where you are in the waking consciousness. If you only knew the truth! All I know is, we are eternally grateful for your help.

Chapter 70-Kerion 6

I am now conscious, in the cloned body of myself, on Kerion 6, Reesas is herself, and Deria is invisible, as she said she would be before we left base; she is a Master when it comes to detection; she can access other places, that we simply, can’t get to, and she is, even now, seeking out agents, who could be somewhere in hiding. The greeting committee, is made up of just three people. The higher-Coordinator for Spiron 21, who is called Maxim 3, plus two Guardians named Reilous 4 and Ferious. Deria informed me, that they are genuine. She then informed me, that she is going undercover, for the near future; we cannot contact her, in any way, but she, as usual, can contact us. The Guardian base, is similar to Earths, but is much deeper underground; sixty seven miles, in fact. For Students who wonder how the lightship gets into, and out of, the bases, it is something comparable to, the light particles, which are called neutrinos; they come from outer space, hit the Earth, or any other planet, travelling through any object, even people, then, they shoot straight out into space again. Well, that is what the lightship does. It can travel through anything, even stars! We don’t need any gates or underground entrances to access the bases, OK, lesson over. I am now going to access the Astral Plane to meet the students who managed to get here in the dream state.

Reeas and I, are now conscious, in the Astral bodies on Kerion 6. I already know the three students are waiting for us, in the briefing room. After saying our hello's, I ask if any of them had any luck unscrambling the coding locks, on the Deep Access Computer Banks; the answer is negative. Whoever programmed the time traveling machine, to lock into the Central-Database, on Kerion 6, knew what they were doing. This whole episode, is now, starting to hit me. Reeas said the same. Whoever it is, intends to destroy multiple worlds, and alter, the time continuum, and we can't do a thing, about it! Deria is now, sending me a message. We have to get back over to the Physical World Planet of Kerion 6. Deria said she might have a possible lead. Deria is still in high cloaking mode, when we became conscious at the base.

'Dan, do not reply to this message, do not even think too deeply about me, sending it to you! Get over to the time traveling facility, as soon as you can.'

Reeas and I are now, in the elevator, heading up to the outside world. Reeas knows not to break the silence of thought, as it will compromise the situation. We just concentrate on getting there. I am very interested in the main mode of transportation though; It is a sort of small moving roadway, plus escalator, the people seemed to be standing on nothing, but on closer look, it is a sort of clear self-cleaning plastic, or glass. The people are moving about in their millions! Everywhere I look, there are people! Kerion 6, is about the same size as Earth, but hundreds of years ahead, in technology. I know the population to be one hundred and forty-five, billion; every conceivable space has been used up, on the planet, even underwater; I think, this will all be gone in the next few hours. We are then escorted to a special air car, which is laid on by the Guardians. It didn't take long, to get us to the time traveling facility. I keep my thoughts to myself, as we enter the building; we are then escorted into a special elevator; I can tell, this

Lift, is no ordinary elevator, we are going to descend, sixty-seven miles! No wonder, the Guardians had the foresight to make the base so deep! No students, I didn't compromise myself. The Guardian-Database works in mysterious ways. Some notes, can be added later, and some right away. We are now, entering the facility. We have special permission, of course, from the Kerion Government. They are now aware of the Guardian-Network. The damage is done, so to speak, as the time machine is nearing critical point, so, it didn't matter too much, if the enemy agents find out about us, but we still have to be careful. I want to find the master agent, and that will be difficult. We know we have just ten hours, to, either find the correct cancellation codes for shutting down the machine, which is a long shot, as it is nearing critical point already, or, find the master agent, or agents, to get the codes. Deria is now sending me a message. It said, be careful, when you get to the time machine, itself; there is an alien presence there. We are wearing our light suits, so we are protected, but anyone, and everything else, will be vulnerable. We reach the time machine room to be greeted by several scientists, who seemed very nice and friendly,

in fact overly so. I feel they are trying to put us off guard. I have to ask them to be silent, for a while, that seems to agitate them. Reeas said, 'Dan, I can sense a presence.' I am also sensing a feeling of what, I can only describe as, depression, coming from an area, to the right of the machine itself.

'OK, I want everyone out of here, and I want a security check, and isolation bands, on all the people here.'

'What?' Shouted the leader of the group? We are senior officials, here!'
