Chapter 57-Debrief 2/ Chapter 58-The Maze/ Chapter 59-Supernova / Chapter 60-Room of Doors/  
Chapter 61-Debra and Me/ Chapter 62-Change Over/ Chapter 63-Planets Gastreal, Feriensa & Felthen

Chapter 57-Debrief 2

‘It was one of those things that couldn’t be avoided, said Sionn.’

‘How come, we didn’t know they would try to confront us?’ I said.

‘Yes, you are right, we simply didn’t know that the Transveall system was that far out; they have extended their boundary by several trillion A.U.s. (astronomical units) we will have to keep them closely monitored from now on.’

‘What do we do about the worm-hole?’ Rees said.

‘You will have to dream travel to the Demarel-Galaxy, that is where the worm-hole is now exiting; the other end of the worm-hole is still in the Milky-Way galaxy, we believe someone has deliberately shifted it, for some, as yet, unknown reason. Whoever it is, must be capable of great power.’

‘It could be Kallo’s apprentice.’ I said.

‘Very probably, we tried to get some information from Kallo himself, but as you know, he is now neutralized, which is a good thing for us, but also, a nuisance when we need to get information from him. We know the worm-hole exit at the Demarel galaxy is more stable than the exit at the Milky-Way Galaxy, so, that is a better place to try to stabilize it. You can use the ships resources which are more than up to the job. The only problem could be, whoever moved worm-hole, could still be nearby, so to speak.’

‘You mean, Kallo’s helpers.’

‘Yes, or anyone else, who think they can beat the system.’

‘Why would anyone want to move a worm-hole?’ I said.

‘Because they are access points to different worlds, they could hold up our work by a long time.’

‘Yes, but is it worth all the trouble, I mean, they won’t know where the worm-hole will exit, will they?’ I replied.

‘Maybe not, but we can’t be sure, if they do have control of the worm-hole then that is more than we have, all we can do, is stabilize it, once we get there. The information that we have, is that, it is now traveling at many times faster than light; you will have to be very precise in your calculations, when it reaches your destination which will be D 870876. Another of our ships will be waiting at the planet Thirand, when you arrive by dream travel.’

Of course, it will still be Debra. Our records show she is now increasing in knowledge many times faster than thought, she will have all the data needed to intercept and control the worm-hole when you get there. Are there any questions?' Sionn seemed ill at ease for, some, unknown reason, and that is not usual, my student friends. Can this job be more than he is telling me?

'Do you mean, Debra, could again be a threat to us?' I said.

'We don't know, as yet, but be aware.'

I go to the ship; I ask Debra what her thoughts are on this job. She said,

'I have all the information I need to stabilize the worm-hole, Dan.'

'I know,' I said, 'but what do you think about the whole situation?'

I can't really tell you, until we get there, Dan.'

Maybe it is me, I think, maybe I need a meditation break.

Back at the base, Reeas said, 'See you at Thirand.'

'I said, 'What about seeing me in dreams?'

'Yes, I mean, dreams; I just meant I will see you in the physical, at Thirand.'

'OK, I said.'

Maybe it is me, again, I think, but something doesn't seem right.

Or maybe, I need a vacation? In the dream state, I find myself in a large open space which is now filling up with door after door; they form a large circle around me. I can estimate that there are 360. What does it mean? I think. I can easily have just returned to the base, but I already know this is a test I have to take. I know I have to pick the right door to go through, but which? Mannus himself had given me full Guardianship. Mannus, as you know, is lord of this part of the Multiverse, so, I know, I can get through this. I sat in the lotus position as usual, and meditated. I found myself not on the usual mountain side with Mannus himself sitting there, but in a dirty street in medieval London! I know this was one of my past lives, but I didn't know which, or who, I was supposed to be. I was invisible to the people there, but, I now can see that the person who is walking by is me in that lifetime! I followed my past life character to a market place, where he stole some food and other items. I am shocked by this, as I thought by this time, my character would be above such things, obviously not, then he made his way to a house in a back alleyway where he met an old man who was sitting on the doorstep. He said, 'Get out of my way, old man.'

The old man said, 'Don't you think you should give the things back that you stole? John.'

I now know this old man, is a Master, but John, the character from my past, didn't.

'I don't want to hurt you, whoever you are, old man, so just go away.'

The old man got up and left. I feel ashamed and depressed that I would abuse people in my past lives, but I did!

Chapter 58-The Maze

I am now back in the Room-of-Doors. OK, now I know this is a test for me. I also know it is why Sionn and Reeas acted so different. What does it mean? I know I was into spiritual things way before this incident in London, so how can it be that I was stealing and abusing people, in between lives, such as monks and holy men!

‘Do you think holy men can’t fall from grace?’ said a voice at my side. I know this person standing next to me is the Master from that incident. I am going to say something when he said, ‘Don’t reproach yourself, but search through the portals for the next question.’ He then disappeared. I am now starting to get very confused. I am looking at 360 doors; surely, they can’t all be my past lives. OK, I think, I will try one. I opened one and went through; I was astounded to see another 360 doors behind the first set! Right, I thought again, I will have to pick the right door first. I went back through the same door and find myself back at the original place. Obviously, I have to choose the correct door, but which? My mind is now reeling. I was never any good at math at school, but I am a genius when I look into the light book; that gift is now gone! I know it. How am I supposed to get out of here? If only Reeas were here, or Sionn. OK, Dan, I think, you will have to get yourself together. The Old Master said search through the portals for the next question; surely, he meant the answer? No, he said question! I look at the doors, I sat down again. This needs some serious thinking about. I close my eyes but I still can’t contact the Inner-Master. I am now beginning to panic. What can I do?

OK, it is up to me, this is a test, and I know that now. Reeas was nervous because she doesn’t want me to fail, and Sionn was edgy because he doesn’t want me to fail, either. Well, I won’t fail! Mannus himself, said I am a Guardian, so it is up to me, to prove it. After twenty minutes of hard thinking, yes, thinking; I know it usually takes serious meditation to come up with an answer, but before I tell you students what answer I came up with is; I want you to upload your thoughts to Central Database to access your chances of Guardianship, please take some time to meditate. Now, what are your answers? Why do I need to search through the portals to find an answer, or rather, a question, and also, the problem of being here, in this Maze? After some time of thinking and contemplating, I now, feel sure, I have the answer. I have to go back in time to the past life before the medieval London one! Why? You ask. Because I have to find out why I fell from grace, that is the question, all I have to do, is find out which door is the right one. I know now, which door is number one. How? You ask. I can’t tell you how, all I know is, when I face a certain direction, I know which it is; all I have to do now, is count clockwise through 360 doors to find the right one, but which one? I just know! Too easy, you say. No, my friends, not when you are on the verge of panic, as I am. I should be used to it, you say. Yes, but I am in my old consciousness. How? You ask, again, I don’t know, I can only assume, it is Sionn’s little test. I have now reached number 323 in the doors. I also know this is the portal where, the medieval London past life is stored, so, I have to access the door which is on the left of it, in other words, the previous lifetime. If you got this series of events right, well done my friends.

We will contact you sometime in the future to access your training, onward my Student-Guardians. I walk through the door into a barren desert! I already know this to be Damietta, Egypt, in the year 1219. I was with the Crusaders, we decided to take back the Holy Land. We captured Damietta, but on the insistence of Papal legate, we tried a foolhardy attack on Cairo, we were then forced to retreat. There was then, a night time attack by the ruler of Egypt; he was called Ayyubid, I was killed that night. Our army surrendered, and I was too fired up to move on, so, as you can see, I got pulled along with Karma again! My next lifetime was in London, and although I wanted to be into Christianity, I got born into a bad family; the rest is history, so to speak. I now know why I did what I did and also, when I did it. So you see, my friends, all I have to do is realize it, which I have. For your information: The Maze, or Room-of-Doors will continue to be in existence for a duration of time to help me realize my past lives, so, we will be going back there from time to time. If you want to realize your past lives, please ask your Inner-

Master to access The Portals. I can now meditate myself out of the room-of-doors, and back into the base again.

Chapter 59-Supernova.

Sionn is his usual self again; he looks at me in his knowing way. I said,

‘Did you really feel I could have messed it up?’

‘No!’ he said, I was a little worried about your state of consciousness though.’

‘Yes,’ I said, ‘I must admit, I was starting to panic.’

Reeas said, ‘I knew you would make it.’

‘Thank you, Reeas, but what does it all mean?’

Sionn said, ‘Your old consciousness has been uplifted, but it can also go downward, when needed.’

‘What? why did I have to go through a maze to simply raise my awareness?’

‘It is more than a maze; it was a real experience, something that actually happened. I want you to go back to the maze, or rather, the Room-of-Doors, whenever you feel you need to know something of value from your past.’

‘OK, well, we had better get dreaming.’ I said.

I have a feeling the Room-of-Doors is going to play a big part in my life, or lives, from now on. We sleep easily in the light chairs, and then transferred to the Astral Planet of Thirand, through dreams. We then made the transfer to the Physical Planet of Thirand. As you can see, it only takes minutes to travel millions of light-years this way. Our physical bodies have already been manufactured, grown for us, in only three days, from our D.N.A. If we wanted our Tourgen clone bodies, they could also be grown on board ship, I feel strangely different.

‘I don’t know if I want to remember all my, past lives,’ I said to Reeas.

She said, ‘No, I also don’t wish to know everything from my past, but the longer you are a Guardian the more lives you can remember.’

‘So, Sionn should remember all of he’s lives?’

‘Yes.’ she said.

‘That is a lot of lives.’ I said. Debra said, ‘How many lives have I had? Dan.’

I said, ‘I don’t know, Debra.’ Reeas looks at me. I think, I just hope the Maze hasn’t affected my relationship with Debra. I don’t want to go through the All-Powerful Debra, stage again. I can see it will only take us two days to intercept the worm-hole, but, as usual, things are not that simple. Debra said,

‘Dan, the worm-hole is going to cross into the Fexexel system of planets in just eight hours.

‘Oh, no.’ I said, ‘that isn’t supposed to happen.’

Debra said, ‘The worm-hole is now traveling at faster than any known speed, also, it is increasing by the minute.

Dan,’ Reeas said, ‘we simply don’t know how fast it can go!’

OK.' I said. 'What is the plan, team?'

Reeas said, 'Can you catch it, Debra.'

'Yes, I can, but not in the allotted time.'

I said, 'What will happen if it crosses into Fexexel space?'

Debra said, 'It will cause a Supernova, Dan.'

Just, great. I thought, why is it always me who has to deal with these catastrophes? No sooner had I thought that when the answer came into my mind, because you are a Guardian.

OK, I said, 'Why has it always got to be me in charge?' Reeas then said, 'Because you are learning to command!'

I said, fine, feeling a little put out.'

I know you are learning also, my student friends, you know also, it is not easy to command. I know through Debra, that we couldn't dream travel to Fexexel space, as they are not Guardian conscious, in other words, they don't know about Guardians, and have no Guardian space bases, in their planetary system, although they are more advanced than Earth. Yes, I know what you are going to say, how come Earth has a Guardian-Space-Base?' The answer is, the people of Earth don't know about it. I related a message to Sionn, to ask if we could inform the planet Fexel and the surrounding group of planets about the Guardians, he said yes! Apparently, they are ready to come under the protection of the Guardian-Umbrella, so to speak. OK, we can now dream travel there, but, we can't get the ship there in time! Also, we can't use the light suits, as they are linked into the ship. I ask Debra what technology the Fexel's have, she said the latest star ship is adequate for most things, but isn't up to the job of stabilizing the worm-hole. OK, I said to Reeas, 'What do you think?' She said, 'It looks like there is only one course of action Dan.' I know what she means. I said, 'you mean to board one of their ships, and intercept the worm-hole?'

'Yes,' I said, 'we can't reach the worm-hole in time to stop the supernova, but, we can dream travel there in a few minutes then try and persuade the Fexel people to believe our story, yes,' she said, 'once we show them evidence from our monitors. Of course, you know we will die, Dan.'

'Yes,' I said, 'but there is no one I would rather die with than you, anyway, we won't really die, as we will have transferred into one of their android's, then after the job, we simply transfer back to the ship.' Debra said, 'I want to die also, Dan.' I said, 'You have to stabilize the worm-hole, Debra. You will arrive later than us.'

'But what will I do, if you are not there?' she said.

I said, 'I will transfer back to the base, Debra, you know that.'

'I know,' she said, 'But I don't understand.'

I said, 'Just carry out the job like we were supposed to do, after we stop the worm hole.' Reeas and I are going on ahead.' Deria said, she would go there straight away to prepare the way for us. I almost forgot Deria, again. As you know, she is invisible most of the time, but is always there to help when needed. We said our goodbyes to Debra. I know, she is only a ship/computer/robot/hologram, but she is also something beyond that, she is part of me, as Mannus himself said.

We lost no time in getting to Fexel. Deria has by this time, contacted the government who are now, rather confused. Although, they are, several hundred years ahead of Earth, in technology, they are still many years behind Guardian technology. They didn't know about the worm-hole, but, they had detected the sudden increase in size of one of the nearest stars, that make up the Fexel system; this is the star that will supernova in about seven hours. All Reas and I can do is transfer into android robots, which we know to be very common on Fexel, in fact, there are many at the government headquarters, where we are to meet the Fexel leaders. We waste no time in explaining the situation. The Fexel's are very intelligent and highly conscious. Within two hours we are aboard their most up-to-date craft. They also insisted, on several of their androids coming with us to help. I explained that it was a one way trip, but they didn't seem to mind. I don't realize that the androids are actual Fexel people, who have died and have transferred their consciousness into the androids; of course, they don't realize that they can exist on the inner planes, when they die; in fact, all of the androids are former Fexel people! They had beaten death, so they thought. The androids who are coming with us, wanted to find out what it is like to die! I hadn't time to explain it to them, so, we got under way, and hope, that we can get the job done. I wish Debra were here, but she is one and a half days away. I know what you students are thinking, why don't I do as I did in Dark-Space and use Mannus to increase Debra's speed. I would love to try, but I'm still not back to my full consciousness, yet, anyway, I already tried to contact Mannus and failed, also, I don't want to mess this up, we only have one shot at it, and I didn't want to push Debra beyond

critical speed. We are now approaching the worm-hole; we can see it is flailing about very dangerously. The ship is more than up to the job for most things, but a worm-hole, out of control, is something else. We are, of course, several trillion Au's (astronomical units) away, at this stage but it is approaching very quickly. Everybody on board knows what to do, it will take all of us, to do the necessary calculations, something Debra could do all by herself. We know we have to approach dead center, into the mouth of the worm-hole, then trigger a fusion bomb, which, we have on board, this will then react with the ship's power supply, and create an almighty explosion, this in turn, will stop the worm-hole in its tracks. Yes, I hear you say, you hope! No, my friends, we have done our calculations correctly, it will work, as long as we hit it dead center; the only problem is, the back end is flapping about very quickly, yes, I know it is a long way away, but it still affects the front end, so, for students, Sionn has asked me to ask you, to write a thesis on the calculations and upload it to Central Database as soon as possible; no, I know we can't use it for this job, but it will be a good project for you, also state how much damage it will have caused to the surrounding systems. We are now within the worm-hole's exact path. According to the ship's calculations, we should contact it, in three hours. I feel a nagging doubt come over me; everything is going to plan but, the calculations from the android people, seem too perfect! I can't put my finger on it, but, I don't like the way they communicate with each other, it is as if, they are trying to keep something from us. Maybe it is me! I am under more than usual pressure, as I'm not in my usual consciousness, as you know. Why did Sionn want to keep me like this? Then, before I can give the order, a member of the android crew shouts,

'OK, Guardian's, this is where we take over!'

'What do you think you're doing?' I shouted.

'We are striking a blow for our freedom, and Kallo!' he said.

Not again, I thought!

'Kallo has now been neutralized.' I shouted.

'Yes, but his family is still in existence.'

'What family?' I said.

'We have many clones of our leader, scattered throughout the Cosmos.'

So, that was it, I think; that was why we kept encountering numerous Kallo's on our travels.

'We don't need the original Kallo.' he said.

'What are your plans now?' I said.'

'We will let the worm-hole do our work,' he said. I ask Reeas what she thinks; she said, they are well trained in everything to do with this ship, and its capability. Just great! I think, and here's me, in this consciousness!

'We know you are, now, limited, Earthman, our information tells us, that you cannot stop us from destroying whatever world we contact. In a fairly short time, we will dominate this entire sector of the Demarel-Galaxy, then of course, the Milky-Way-Galaxy.

We also have your friends.' I think, they can't have captured, Deria. She is too elusive for anyone to trap. Reeas looks at me with desperation. We are in our ordinary bodies, with no light suits, and I can't contact Mannus!

'You will be isolated within your android body, till we decide what to do with you, yes, you really fell for the android trap didn't you? You now know, you cannot revert back to your bodies on your light-ship.'

I know he is right. The android bodies that we are inhabiting, are now traps! Why didn't Sionn see this? Surely he knew what might happen.

'Take them to the Isolation-tubes.'

I feel the anger starting to come over me, but, I know I won't be able to change into Cloft the Tourgen-Clone, this time. I am trapped in an android body, which, I know I can't escape from; all I can do is think about Sionn, Mannus, Reeas, and Deria. Where is Deria?

'Don't get excited, Earthman, your precious Deria, is also in isolation, we managed to trap her in an android body, also. We are Master-Androids and able to link our consciousness with others of our kind.'

That gives me an idea, I think, if he can link into other androids in a similar consciousness, why can't I link into Debra?

'You will not be able to do that!' said the leader, still accessing my thoughts.

OK, I think, this calls for something special, but what? I now, simply, walk into the Isolation room, unable to stop myself, then they, put us into the Isolation-Tubes. I feel strangely calm, before losing consciousness. I wake up in the... yes, you guessed it, the Room of Doors; standing there, I begin to think, why should I be here? Surely, isolation means just that, not being able to be conscious; well, here I am, let me see what is behind one of the doors. I opened the one directly in front of me. Yes, you guessed it, exactly the same place, I open more doors, but the same again. Maybe, this is what is meant by isolation? It is a place where you can't get out of; the feeling I am experiencing is of desperation and anger. Untold numbers of people are going to be killed, in a very short time, and I can't get out of a roomful of doors! I sat down, in the lotus position; all I can do is simply meditate, I don't know if it will work in isolation, but I would try it. Nothing happened! Surely, the time must have gone by to neutralize the worm-hole. I must be still, I think. I must keep my thoughts on getting out of here. No, I think, that is what they want

me to do. I am going to do the exact opposite! I just sit here, and rest. I don't think, I don't worry, and I don't bother about the worm-hole, suddenly, I see Debra! Not the Debra from the ship, but the Debra from my past-life!

'Open the door, Dan, so I can see you better.'

I know which door to open, 359! I rush over to the door and open it, Debra is stood there as large-as-life, she is about thirty-five years old and had blossomed into a beauty; all I can think of to say is, 'God, I loved you Debra.'

'I know,' she said, 'I wish we had been in the same year at school, I really liked you, but you were younger than me. I have a message for you from Sionn,' now, I am really interested.

'Concentrate on Debra, but don't force it, let her come to you, he said, he couldn't get through himself, so he asked me to help. Does he mean for you to think about me, John? You are John, aren't you?' (For students: My name was John in that lifetime. Debra has been given certain knowledge to help me, but she won't remember anything about this later) Thank you, Debra, but he means someone else.'

'Oh, she said, I hope we can talk again sometime, but I know you must be busy, as Sionn, was a very special person, so, I know you must have a very special job to do.'

'Yes, I have, Debra, thank you, for letting me know, and I will be in contact soon.'

OK, I think, now is the time for action. You students, will now know, what I have to do, please help by once again, uploading your thoughts to Central Database. As you know, these thoughts will be used in the upgrade of the system, and the actual light books, trillions of thoughts, from billions of students. Right, here we go, I have to get my thoughts in check. I know now, that Debra is the key, I sit down and concentrated all my yoga ability on Debra, for several minutes. I then walk over to the first door and open it; Debra is stood there looking serious. 'She said, stand back Dan.' I step back, then all of the doors are flung open, Yes, you guessed it, Debra is behind every one! 'Close your eyes,' she said. Immediately I am back in the isolation-tube with my eyes closed, but I can still see Debra!

'You know what to do,' she said. I did, I opened my eyes; I can see the android's looking at me and communicating to one another, I also, know they are worried; I can tell they are trying to destroy me, as soul, but I had other plans. They don't show any facial surprise as I change into the Tourgen-clone. Yes, my student friends, I wouldn't have believed it possible before I had the meeting with Debra, but you see, she is a part of me, even though I am only in an android body, I thought, I wouldn't be able to access any part of the Guardian-Network, but I can, why didn't Sionn tell me, you say! All I can say is, it is a learning thing, and probably Kallo's helpers would have known. All I can think of, is to get out of the isolation-tube, and save Reeas and Deria. The glass surrounding me is extra thick, and able to withstand many pounds per square inches of pressure; so, I will have to smash the ends then, won't I? I kicked the bottom out, with my extra-large feet. I got out, I then smash everything I can see, including androids. Some are trying to access the laser cannons which are locked up in secure boxes on the walls, but, I know they can't get to them, as they were so sure, I couldn't get out. I now, know, which android Reeas is trapped in, it is at the other end of the room. I walk over and unlock the access hatch. I can tell they haven't tried to destroy her, I am very relieved. I also, let Deria out, she said,

'We have just several minutes to stabilize the worm-hole. OK, I said, Debra, can you please do your best. I then simply walk over to the ships control panel, and touch it; the ship is now a lightship, or Debra. She, at once, turns herself around and heads straight for the worm-hole, the whole process took

less than a minute. 'OK, Dan, it is done. The worm-hole is stabilized, and will now, return to its original position; we can't go back through it, as yet, as it will take several weeks to arrive.'

'OK team, we have to dream travel back to base.'

'What about me, Dan?' said Debra?

'You are part of me, Debra, so you will come with us; you are also the ship, so you will bring the ship back.'

'I don't feel like I am the ship anymore, Dan.'

I look at Reeas, I hope this won't alter Debra again, I think, as we make preparations to dream travel back to base.

Chapter 60-Room of Doors.

In the dream state, Sionn asked me, once again, to go on a little-mission. I know what you students are thinking. Do I get any time off. As you know, time on the Astral Plane is non-existent, so we can spend a few hours which, can seem like a few years, and vice-versa. Sionn has, also, asked me to ask you, to upload your thoughts on this job. It will be unusual, in that, we will be alone. I say alone because I won't have Reeas and Deria to help me, but you, my student friends, can access these recorded messages from central database. I am sure your thoughts are of help to me as I can access the database also. We are part of the whole, and as such, we are unlimited. I am now in the Room-of-Doors once again. I know now that this place is going to be a big part of my life as a Guardian, so I am going to treat it as an everyday thing. I am standing as usual in front of the first door, or number one, of 360. They are, as you know, my past-lives, or some of my past lives. They are also access points to any past life time on Earth, and past-lives on other planets; the 360 past lives span more than ten thousand years. I access a door at random and I will find another 360 doors behind it; that is another ten thousand years, and so forth, obviously the second set of doors will be spread out more, around the first set, that means, there will be a space between them, these spaces are also access points, to sub planes. You can see their will be a lot of doors to access, and a lot of sub planes, going back more than 350,000 years or more, and that is only human life times, before that animals; they alone, will add up to millions of lives. But, I know I have to find one in particular. Sionn is now standing next to me.

'You know, you have to find, one door,' he said.'

'Yes, I said, I sort of, knew it.'

'Good, he said, you know also, you can now alter your consciousness,'

'How?'

Just 'Be aware.'

'Can this be, how Kallo fell from grace?' I said.

'Yes, in a sort of way, it is, but don't worry, you have a very long way to go to catch up with Kallo, and I don't mean that, in a bad way. Kallo was assessed, after he went bad, and it was found, he was corrupted long before he fell from grace.'

'Yes, but he is still way ahead of me.' I said.

‘This is only a training exercise for you.’ he replied. ‘Just try to be aware, as I said. Now, the question you must contemplate on is ... well, you already know, yes?’

I am now alone in the room. I already know, he said! All I know is, I am confused. I sat down in the lotus position, and rested. I suppose, you students, are confuse, also. This is training exercise, and I have to find one life time out of millions! After some time, exactly how much, I don’t know, I stand up. Sionn said, I could alter my consciousness, OK, then, I will try. After another spell of time, I realize I am now becoming more centered, or whole. Just being in the Room-of-Doors seems to uplift me. I can now see the door in my mind; it is different from the rest, I stand in front of the first door, close my eyes, and contemplated for a few seconds, then I turn around. The door that I can see in my mind, appears in front of me. Now, the question is, my student friends, where does it lead? Please upload your thoughts again to Central Database.

I walk through the door, but it isn’t a door in the Room-of-Doors, but, the door into the Guardian sub base! Sionn said, ‘When did you realize that you didn’t need to access any door!’

I said, ‘I just felt it was the time to come straight back.’

‘Yes, he said, but, you also altered your consciousness.’

‘Yes,’ but I didn’t realize it at the time.’

‘Good, Dan, you did well.’ I think, praise indeed!

For you students: Don’t forget, the mind can trick you, it can tell you to do, or go somewhere when your inner self is saying no, just simply sit down and contemplate, before deciding on a course of action. Reeas and Deria are now with me, I don’t need to ask Reeas, if she passed the same test, I know she did.

‘Don’t worry, Dan, I wouldn’t have let you get lost in there.’ No, it isn’t Reeas speaking, but Debra, I totally forgot about her, for the whole time I was in the room of doors! How can this be, I thought? ‘Your consciousness was changing at the time,’ said Sionn. ‘Really, I said?’

‘Yes, now you will have some rest from your alter-ego’ he said.

‘Yes, but I will still be there’ said Debra!

Chapter 61-Debra and me

I am in the lecture room, listening to a potential student Guardian, giving a talk on why he wants to be a Student-Guardian. He is in the dream state. In fact, we are all on the Astral Plane. As you already know, as Student-Guardians, we can learn and function in the dream worlds, of course, he won’t know about this learning exercise, when he wakes up. So, you say, what is the point then? The point is, it is still important to have these experiences on the inner planes. As I am listening, I notice, I can now receive messages, from some outside source.’ I look at Sionn who is standing nearby. He is looking at me with his usual knowing look. I have been able to receive messages from Sionn, since I started my career as a Guardian, but these messages are different; they are from someone else! I know you students might think it is Mannus, but no. After the lecture, I am sat in the restroom alone, trying to fathom out what the messages are. Sionn, then came into the room. ‘What do the messages say?’ He said.

‘They just tell me, to go to some locations.’

‘Good,’ he said. ‘You are starting to access the Guardian-Network; you are also, the only Guardian of your short experience to do so!’

'What?' I said!

'You are in constant contact with Debra, who is now, becoming more powerful by the minute.'

'How can that be?' I said, 'did you know this would happen?'

No, but we soon found that things would alter quite drastically.'

'So, all this time, you have been monitoring me?'

'Yes, but we do anyway, the important thing is, this situation could now become a very useful tool for us.'

'I'm glad, and I understand that you mean, no insult by that.' I said.

'Yes, I know I am not the most sensitive soul, when it comes to feelings.'

'What happens now, then?'

'Just exactly what do the messages say?' Sionn asked.

'Can't you access these messages, from Debra,' I said.

'No.' Sionn replied.

'All I get is to go to several places.'

'I want you, to make a special effort to center your mind, before I tell you the next part of this message' Sionn said.

'Now, Dan, Please meditate with me to the Higher Regions, where I will give you extra mental exercises to control your mind.'

'No!' Debra shouted!

I am a little shocked, to once again, have Debra standing next to me looking angry! I know, she isn't to be messed with, like this; I also know, it is myself, who is the key to controlling her. Sionn said, 'Everything is under control, Debra.'

Debra looks at me. I can now, access her more easily, just by looking into her eyes, if she happens to be in the body form. Don't forget, we are still on the Astral Plane; we still have a physical looking body, as you know.

Debra said, 'I won't allow you, to interfere with my, Dan.'

Sionn said, 'It's alright, Debra, we won't hurt, Dan. You can be assured that he will still be the same.'

'I don't care. You are not taking him to any Higher Regions, without me!'

Debra then disappeared.

'Good, Dan, I can feel, that you now, have control. You will have to be aware that Debra is with you at all times, but for some unknown reason, she has chosen you to be her companion for life. We did all we could to get her to become her usual self after the last adventure, but to no avail. It seemed to start when you referred to her as a person.'

'I don't know if Reeas, will approve.' I said.'

'Reeas, has accepted it.'

'OK, I said, 'I can cope as long as I have Reeas, with me.'

'Yes, you will, but there may be times, when you will not be able to be together.'

'I hope not.' I said.

'You know you might have to go somewhere, or do something, that requires just your expertise, shall we say.'

'Yes,' I said.

'Good, now please concentrate on your inner self.'

I sit down in the lotus position, as usual. I am astounded to see Debra, on the inner screen of my mind, sitting in the same position! She is her usual self, who is very lovely, but every few seconds, she changes into the body of Mannus, but she still has her own head! After a time, I don't know how long, I came out of meditation. Sionn asks me what happened. I ask him why he hadn't been able to be there, he said, he couldn't access my mind, as Debra wouldn't let him!

'Really,' I said.

'That is why, you will now, be a useful asset to us. If we can't access your mind and consciousness then any agents, won't be able to either; but you, will be able to access their network, we hope, now, please try to access the inner screen while you are standing up.'

'What?'

'Yes, you can now access Debra, while you are going about your everyday business.'

'How do you know?'

'It stands to reason; Debra is now part of you, so all you have to do is realize.'

'Yes, but she was part of me before.'

'Yes, she was, but now she is more in-tune with you!'

Sure enough, when I close my eyes, there is Debra.

'What does this mean, to you, Dan?' Sionn said.

'Well, as long as I can be alone, when I need some, private time.'

'Yes, you should be able to control her now.' Sionn knows I am worried.

'Please relax.', he said. 'Mannus, has confirmed to us, that Debra will be under control, as long as you, are in control.'

Wow! That really is something, I think. I now have the most powerful Tool/Asset/weapon/Machine, I won't say Robot, I thought. 'No, don't' Debra, said.

OK Students: Please feel free to contribute to this ongoing training session. In fact, the whole of my life, has become a training session, I suppose, I really don't mind, as long as it helps the Guardians to do their job. Sionn is now looking at me with his all-knowing stare. I know he had something important to say.

'What is it?' I said.

Sionn said, 'You know, that you are now invulnerable, Dan, will you please wait in the other room.'

A few minutes later Reeas, came in, followed by Sionn.

'I know I have to keep control, at all times.' I said.

'Dan, all I can say is, Debra has now gained power more than she was ever expected to. We can't understand the reason why, she has suddenly boosted her knowledge. It is, as though, she has found a way to access the light book, which, we know is impossible!

'Can it be, that this is something to do with the agents of Kallo?' I said.

'All our information says, no. But anything is possible.'

Now, I am more worried. Reeas is now looking at me with a concerned expression.

'What is it?' I said.' Sionn said, 'We want you to go on a special mission.'

'Does that include you, Reeas.' I said. 'I mean, do you want me to go alone?'

She looks at Sionn. 'You don't need anyone to help you now, Dan.'

'What do you mean?' I said.

'Debra, will be able to do everything.'

'Never mind, Debra,' I said, 'I want to know, if Reeas wants me to go alone.'

'Of course, not!' she said.

'Then why, have I got to go alone?'

'You will not be alone, said Sionn. Debra will be there.' I started to get angry. Suddenly Debra is there!

'Don't worry, Dan,' she said, 'I will take care of you.' I at once, know, that I myself, have brought on this last little episode, with Debra, and, of course, Sionn and Reeas know it, also.

'OK, I get it.' I said.'

Sionn said, 'Debra will be you, and any other form, you happen to take on?'

'Yes, I realize that.' I said.

'And you, know also, that you won't even need a light-suit.'

'Yes, I know that, also.'

'Debra will be your defense, and everything else that you require.'

'Yes, I figured that out, also.'

'Well, we tried to get Debra to cooperate and let the rest of the Guardians have the same protection, but she adamantly refuses. This means, that you alone, will be unique, in the Guardian-Network.'

'Maybe I can try and communicate with her in the Higher Regions, again?'

‘No, Dan. We already tried and failed, she is very protective of you, so please, don’t make any waves, at this time, let’s just sail on; just be aware, that you will have to be in control, at all times. Can you please join us, for updates, in the briefing room?’

I am now, starting to worry a little, over Sionn’s talk.

In the briefing room I can now, just rest. I don’t even need to pay attention. I know Debra is taking it all in, I feel a little, surplus-to-requirements.’

‘Don’t worry, Dan, I’m here; I can do everything for you.’ Now, I am worried. I can see Sionn looking at me, every now, and again. I know if Sionn is edgy, then things are not good. At this time, my student friends, you should know, I don’t really understand the significance of the situation. I can see people in the briefing room looking at me, more and more! I don’t realize for a few minutes, that I am changing shape, from myself to Debra, every few seconds! Debra is the most powerful thing in the Multiverse, and I am now starting to worry, big-time. You will have to forgive me, if I seem a bit edgy, but you also know the reason why. I am reminded of a film, I saw as a child, in my last lifetime (Forbidden Planet) about a planet which is destroyed by its highly advanced population, who forget that they have a subconscious mind. This subconscious invisible-monster would in time, kill all the people. Now, I have a monster of my own! Now, students please excuse me, while I upload everything to do with this next mission.

#### Chapter 62-Change Over

During the uploading session, I notice that, I am becoming more like Debra; or rather, she is becoming more like me, also, the ship, and everything else, connected with it. I can now, access everything Debra can! I think that, being an android, or Cloft the Tourgen, is something special, but this awesome power, that is Debra, is something to experience, beyond anything, that I have done, so far. I realize that, I am now, in charge of, the most powerful thing, in the Physical Worlds; what about the Inner worlds, I hear you say. Yes, I can also access Debra there, when needed, because, she is part of me and vice versa. Sionn came in, with a smile, which, is something that is not usual.

‘Good news, he said. Debra, has stabilized, that is, as far as, taking in information. She was starting to worry me, as you know, Dan.’

‘Yes, I could tell.’

‘Yes, I know, I’m not the easiest of people, to read, but even I, was worried.’

‘You can trust me,’ I said.

‘Yes, I know, and don’t forget, you can access the Room-of-Doors, when you need some private time.’

‘Yes, I will, and thank you.’

For student purposes: The Room-of Doors is on the Astral Plane and not the higher regions, although, there are Higher Astral regions. Debra, is now stabilized, and under control, but she is part of me, so, she goes where I go.

I know all this information before Sionn actually told me, but it is nice to hear. You students, may or may not, understand my predicament. I suppose, it is something that one can only dream about, and that is the key. Imagine, having the powers of a God! I now, know, my next mission. I am to go to planet

called Feriensa, in a galaxy some billions of light-years away from Earth. The only way of getting there is by dream traveling.

The problem is, the highly intelligent people there, have stumbled on one of our underground bases. We knew the people there, were about ready to know about us, but even we, were surprised by the sudden discovery. I am also, told, to be prepared for any trouble, from dark agents. The other job I have to do is make a short detour of sixty-eight million light years, to another planet to question some agents who have been caught trying to destroy the planet with chemical weapons. Obviously, I won't be able to transport the prisoners with me, so, I will instruct the ruling government, to place them, into long term isolation, and then, we will question them, on the Astral Plane, at our leisure. I wonder if the two incidents are related, but I will find out later. I said my goodbyes to Reeas, Sionn, and the other members of the team. I know, I don't mention the rest of the team, very often, but you can access them yourself from the ...Yes, I know you know where. I know also, that I don't need to say goodbye, because I can meet them on the inner planes, but I still say it, habit, I suppose. In sleep mode, I am back at the Room-of-Doors, and yes, Debra isn't here, as Sionn, has said. OK, I think, I will take a little vacation.

But first, I will ask you students the same question. Where would you go? And what would you do? Please upload your thoughts to base. I start to walk through the doors, one after another. As you know, another set of doors appears behind the first set, that is, if you don't intend going to a past life, in the first set. I don't know exactly, where I am going, but I know, I have to concentrate my inner self, on the doors. I seem to be guided by something, apart from myself. Debra, you say, no, I don't think so, but, maybe it is, as you know, each section of doors, is ten-thousand years. I am now up to ninety-thousand years ago in my past lives. I stop for a while, just to get acclimatized, so to speak. Remember before, when I said there are, also, sub planes which, are also doors, at the side of the original doors, well, these doors are many. I can go through one, and find hundreds more, behind it, these are the different sub levels. Yes, I know it is a bit confusing, but I know, you can, understand it, as you are, Student-Guardians after all.

OK, I am, now, sure, I have to go through this one door; it is a sub plane door. I stop for a moment, just to meditate, for a few minutes. I know someone is behind it, but, I don't know who. Please, students, again, upload your thoughts. I know, I am asking you to upload a lot, but, it is very important, after all, you are the future. I walked through the door. Imagine my surprise when I find myself back in the sub plane base again.

Sionn, Reeas, Deria, Grenwer, all the team are there! I am stuck for words. 'You don't need to say anything, Dan, said Sionn. We are just glad that you managed to find the right portal, this means, you are now able to access any number of past lives, not just yours, but any being, in the multiverse!'

'What?' I said.

'Just rest and contemplate for a while.'

Reeas said, 'Can we talk? Dan.'

'Sure,' I said, we walk to the restroom.

'You know we will always be together, don't you?'

'Yes,' I said. I start to feel anxious. 'And I know, that whatever happens, we will always, love each other,'

'Yes, but things, are changing.'

'What do you mean?'

'Debra will be with you, always too.'

'Yes, but she is... (I have to pick my words very carefully, as I know Debra, is somewhere, very near) My work partner, you are my wife.'

I hold Reeas by the shoulders. 'Why should I be the one, to have all this power, given to me? I have only been with the Guardians, a relatively short time.'

'Don't put yourself down, you are a Higher Being, and someone, who cares about what he does. Why do you think Sionn picked you, in the first place? I'll tell you why, because you picked him!'

'Really,' I said.

'Yes, I know you are beginning to expand in power, but don't worry, we will always have each other. I had a talk with Sionn and company, about you needing someone, besides Debra, to keep you company, while on these missions, she is waiting outside. I know it is Deria.'

I said, 'There is no one, besides you, who I want by my side, more than Deria.'

Deria comes into the room, in her human form.

'Deria said, 'We will both have access to Debra, but you are the key.'

Reeas said, 'I will now start my training to be part of Deria's people.'

'What?' I said.

'Yes, I am going to become one of Deria's, brethren.'

'You are very fortunate, Reeas.' said Deria.

'I know.' Reeas replied, in an excited voice.

I am stuck for words.

'Don't worry, Dan.' Reeas said, I will still look as I do now, but I will also be able to change into Deria's usual elfin-type body.'

I look at Deria. She is very beautiful, indeed.

'I have no complaints.' I said.

Reeas laughs. Deria said, 'Dan, Reeas, please let us link hands, I want you to meditate on my people, although Reeas, will be in training for a while, she will be able to reach us, should we need her.'

'You mean, if anything happens to, Debra?' I said.

'Deria said, 'Debra is now the utmost power, in the multiverse, she is the Guardian-Network, plus much more.'

'Yes.' I said, 'but they had a network similar to Debra before, didn't they?'

'No.' said Deria, as you know; Debra is of your making.'

'Yes, but I thought we had been through all that, and rectified it.'

'She has made you, her partner. The Guardian's themselves realize this, and it cannot be altered. Now, every Dark Agent, will know this.'

'So, I have come, from being a lowly teacher, to the most hated Guardian, in the Multiverse.'

Reeas comes over, and hugs me.

'You are unreachable, by any agents.' she said.

'What about the Room-of-Doors?' I said. 'Sionn said, I can get some privacy there.'

'You can,' Deria said, 'but, you will have to be wary, only use it in emergency.'

'What?' I said, 'let me speak to Sionn.'

'Sionn, has gone into inaccessible mode.' Reeas said.

'Fine!' I said, 'the only person, who, I want to talk to, in the whole Multiverse, and he is away!'

'Don't worry, Reeas said, 'Deria and Debra will be with you.'

'I'm sorry.' I said, 'but I feel a bad experience is about to happen.'

'It must be the change you're going through,' said Reeas. 'Please rest awhile.'

I went to the restroom. I decide to lie down, and just contemplate. You students will know the difference between meditation and contemplation, so I will leave it at that. I am trying to evaluate the situation.

'Don't worry, Dan. I am here.' I opened my eyes to see my mother from my Dan Sherman lifetime, but I know, this is really Debra, as I am, now, fully aware, of everything, regarding Debra, also, I don't feel, in any way, threatened by Debra, this time.

'OK, Debra, you can go back to being yourself, please.'

'What about, your favorite, apple-pie?' she said.

'OK,' I said, maybe you can stay like you are, for a short while.' I am starting to like, this, new Debra.

I go to the sleep rooms, to say goodbye, to Reeas; no matter, how far away, we are, from each other, I know, we will always, be together. This is something a lot of people, on Earth, and other planets, sometimes forget,' onwards, my Student friends.'

Chapter 63-Gastreale, Feriensa, and Felthen.

We decide to go to the Planet Gastreal first, to interrogate the dark agents. We are to contact special security staff, who have the agents in custody. I know, now, we don't need to transfer into cloned bodies; yes, I know, I said before, we would use cloned bodies, but now, with Debra being Debra, we don't need to. We could materialize in any form we wanted. I decided to be myself, while, Debra, comes as a Tourgen-clone.

'You don't need to use that form, Debra.' I said.

'I know, but, I think it will encourage them to cooperate.'

We are greeted by security staff, who are more than a little nervous, at meeting Debra, especially when, she transforms into a smaller version of the Tourgen, to fit into the rooms and corridors we are

## Thank You for previewing this eBook
