SOLUTION EXPLANATIONS

Bike sales in Powerbike

1. Taking into account the different types of bikes offered by Powerbike, which month showed the highest increase in sales in comparison with the previous month?

- A. May say B. June C. July D. August E. Cannot say

A rise was seen only in July ($39 - 37 = 2$). We cannot state what the rise in May was as we don't dispose of the data from March.

Salaries in three selected mid-size companies

Company A	Salary (EUR)	900	1200	1400	2000
	Number of employees	16	25	10	5
Company B	Salary (EUR)	1100	1300	1700	2200
	Number of employees	8	22	14	10
Company C	Salary (EUR)	1300	1500	1700	1900
	Number of employees	4	8	12	6

2. What is the average salary in the company B?

- A. €1220.43 B. €1540.74 C. €1633.33 D. €1789.20 E. €1950.50

In order to calculate the average in this case, multiply the wage by the number of people who get it and then divide by the total of employees:

$$(1100*8 + 1300*22 + 1700*14 + 2200*100)/54 = 1540.74$$

Gender division for 3 companies

3. In KST, the ratio of employees with some higher education to those with PHDs and those with only secondary education equals 5:2:6. How many employees with PHDs are there in KST?

- A. 13 B. 27 C. 39 D. 54 E. 97

Number of KST workers: 351

We divide it by the sum of parts $5+2+6 = 13$ and multiply by the part of people with a doctorate

$$\frac{351}{13} = 27 * 2 = 54$$

4. How many male customers took advantage of the last minute offer to Morocco?

- A. 89 B. 110 C. 156 D. 187 E. Cannot say

Don't be tempted to take 15% of men, because the only data given is that the 15% of the overall number of customers took last minute with no data about the gender division.

- A. 29% B. 32% C. 35% D. 41% E. Cannot say

*Electricity expenses in 2007: $3,804.99*3 = 11,414.97$ €*
