- Fill a saucepan with a couple inches of water.
- Heat the water on high until bubbles start appearing at the bottom of the pan. Working with the eggs one at a time, crack the egg into a small bowl or cup.

- Add the second egg the same way keeping some distance between the two.
- Once both eggs are in, place a lid over the pan and leave for 4 minutes.
- The whites should now be cooked with the yolk runny, but note timing can vary depending on size of egg, if they are too cooked reduce the time.
