Chapter 1

Congratulations! Say welcome to wealth!! Please do yourself a favor and protect your wealth. Don't brag that you are making money. Keep it to yourself because this is your insurance for life. Enjoy making money and help your loved ones. Don't let go of your source of living that we gave you. The more you reveal this system to others, the more you are close to ending your luck. Trust me on this. You will never lose! Deal? Ok. Let's Start....

This is a betting system or strategy based on visual prediction and physics facts. Proven and tested to work 100% on both wheels (single 0 and double 00). Have you ever seen a roulette table with so many players placing tons of money and covering all numbers BUT there is only 1 single number that has not been bet on by any player? Yes, you've seen it many times and if you are a Roulette player this has happened to you. Amazingly, that empty number comes up and NOBODY wins! Of course the Casino wins! You ask yourself how did that happen? The answer is simple: The dealer can hit any number and any sector on the wheel, or at least he can stay away from the winning numbers that the players have placed their bets! The good news is that we are going to teach you how the Dealer and the Casinos do this! How does that sound? Great huh? If you know where the dealer is aiming then, you can bet on that area. 95% of the dealers spin the same way and aim the same way because it either happens naturally or deliberately.

This is a full money back guarantee! It is preferable to try it in a land Casino, (it works for online Live Dealer Casino), because it's easier to see the numbers. If it doesn't work we will give you your money back. Guaranteed.

After you make the purchase, we will send you a Skype ID, E-mail address and/or a phone number, whichever you prefer. We will give you a One on One, step by step, instruction on how to use our system. This way we will make sure that you fully understand the system as opposed to reading a book that you may not understand in full. You can ask as many questions as you want and we will be happy to answer and explain.

Chapter 2

What do you need? All you need is to print out one of the photos of the wheels depending on which wheel you prefer to play (single 0 or 00) wheel. Remember this system works for both. You also need to know about the basic rules of roulette and the payouts. This is so easy if you have played roulette before. If you are a beginner, then we will teach you.

This system is extremely easy to learn. All what is needed from your side is to watch the wheel and know the spinning number (the number the ball is on when the dealer spins the wheel). This is so easy. The rest is what this system is all about and what we are going to teach you. No experience required.

This system has been designed by a former roulette dealer, who worked for 30 years in different casinos and in different countries. The dealer is skilled to spin the ball away from the winning numbers and sometimes target a certain number on the wheel and hit it! You can figure out that the dealer knew where the ball would fall. It comes with experience and we will teach you this experience in a very simple to understand way.

You can practice this at home and therefore go to the casino prepared without having to use your money for practice. How? We will send you video links to watch live spins and practice at home. Your training will take between 1-3 hours with us on the phone or Skype and even as little as 30 minutes if you have playing experience.

How much you can make? As much as you can, if you stick to our instructions. The only way you will lose is when you get greedy and start betting high with what you won trying to win more.

We will teach you how to bet, how much money to bet, when to bet, how to choose a table, when to stop betting and lastly when to go home.

We will teach you also the Casino countermeasures (what the Casino will do when they see a winning player) and we will teach you how to deal with it.

This is not a mathematical system, nor a progression system. Flat bets and straight up bets are done with each spin.

Chapter 3

We know that you have probably lost thousands and thousands of dollars trying to win at roulette. Now we ask you to gamble and risk your money one more time with us. With us, No loss, is guaranteed. If you don't like it, then that's fine... We will give you a full refund. It has worked for so many people and there is no reason it won't work for you. We will not end your training session without making sure you have the idea and you have mastered the system.

With our system, you don't have to worry about the dealer calling no more bets, because you will place your bet right after the dealer releases the ball which gives you time to place a good amount of chips on one or more numbers. You can also place your bets before the dealer spins.

The bankroll is 200 Units. Your target daily winning units is 500 units.

You only start betting when you monitor the table for 5 minutes. You have to first qualify the dealer. Then, you start betting with confidence because it's not a luck game any more. You know what you are doing and you know what the dealer is doing too!

Do not play in casinos that have only 1-2 roulette tables. The best place is a place like Las Vegas or any other gambling place with many roulette tables and many casinos. This will give you an edge on choosing the right table. If you don't like a table then you can just go to another. You will for sure find so many tables that are winning tables.

Always make a minimum and maximum daily win. If you make the minimum, put it aside and don't risk using it. It now remains off limits. Continue playing and once you reach your maximum, then it's time to go home and come back tomorrow. If you stick to our instructions, your monthly winnings will be shocking! You will be amazed. If you do not follow our instructions, then you will lose for sure and that's not our fault. You didn't follow the rules.

Do not play when you are tired or haven't had good sleep because this system is about concentration. You have to be relaxed and in a

good mental and physical condition and ready to use your mind effectively.

If you use your daily bankroll, that's fine, call it a day and go back the next day. Watch! Watch! And Watch before you play; that's the Golden Rule. You have to qualify the dealer. Remember, you are not there to have fun. It's BUSINESS. You qualify the table, then, you play. If the table doesn't qualify, then change tables. Do not say to yourself, 'I want to try'. You will lose. Play ONLY when its 100% guaranteed qualified table.

Golden Rule: Never risk your savings and Never go to the Casino with the money you need. Always play with money you can afford to lose. Gambling can be a form of entertainment, as long as it is not taken to an extreme. Some people spend their money on concerts, or massages, or golf. This should be seen and treated in a similar fashion.

Print out the photo of the roulette wheel. Use either the single 0 or double 0. This depends on where you want to play. The 00 wheel is easier to memorize and the 0 wheel has higher odds. With our system, you have a huge edge on both wheels. It's up to you to choose the system in which you feel comfortable and also it helps to choose the same wheel that will be available at the casino. Become familiar with the more common wheel in the places you plan to play.

Now... The core of the system: You have to decide the wheel direction and this is so easy to know! It's either clockwise or counterclockwise. Whenever the wheel is moving clockwise the ball has to be spun counterclockwise and vice versa. Single 0 roulette casinos will change the direction of the wheel on each spin.

Therefore, one spins it clockwise and the next spin is counterclockwise. Double 00 roulette tables spin in only one direction, either clockwise or counterclockwise. This makes it a little bit easier to play for beginners. After practicing experience it won't matter.

Chapter 4

Now... We're talking business: The next thing you need to do is to watch the dealer carefully and determine the number on the wheel where he releases the ball.

Here you have to be SO exact. Concentrate on the wheel and ball. Do not talk to other players or your friend. Don't let anything distract you. It's preferable that you do not drink alcohol while playing. A cup of coffee can be good or stick to water to keep you hydrated.

You do not have to play each spin. Any spin you do not like, don't bet. Play on the \$1 or less tables. If you want to stay in the game, you can put a \$1 on 0 and/or 00, and wait for the next spin.

Casino countermeasures: As soon as you start winning, the casino will notice. They will start changing dealers sometimes with each spin! Yes true! It happened with me. They will do this with each spin in order to prevent you from winning because they know you have spotted the pattern of the dealer. They will also try to distract you by asking you if you would like a player's card or if you like a drink. Always say No thanks.

Now talking Deep: Each number on the wheel has a number on the opposite side just facing it because it's a circle, correct? Ok now....Remember these Golden numbers (these are not numbers on the wheel) but you will understand their huge significance later on. These numbers are:

7, opposite 7
0+5, opposite 0+5
0-5, opposite 0-5

These might seem weird to you but don't worry you will discover that's it's a piece of cake when we show you what this means.

The above numbers are symbols of pockets on the wheel and you may notice that the single 0 wheel has 37 pockets (0 and 1-36). The double 00 wheel has 38 pockets (0-00 and 1-36). For example, when we say +5 pockets from a certain number, this means we start counting from that number which the ball was spun from, till we

reach the fifth pocket. Let's say that the ball was spun from 0 (on a double 00 wheel) and the wheel direction is counterclockwise, then the pockets that we will pass by are: (beside the 0) 2, 14, 35, 23 and 4.

What if the wheel direction was clockwise? What would be the pockets we are talking about? They would be (beside the 0) 28, 9, 26, 30, and 11. Do you see this?

You might think this is a lot of information and very sophisticated! It's not. It's as easy as ABC. We'll show you how later on. Continue reading and it's not a bad idea if you read this book several times.

Chapter 5

For those who don't want to bother and go deep into the system (more winning of course), we can give you a set of numbers on the wheel that you can place your bet on before the dealer spins. These we call the LAZY bet. How does that sound? You can't beat that huh? We give you the numbers, and you place your bet and make money. IF you want to do that, then do it for only 5 spins on each table then change the table because the dealer will easily spot you and change his spin speed.

Now comes the Dealer-Dealer (aka you) challenge. You are the player but you are challenging the dealer using his own technique. If he changes spin speed you change your bet accordingly. Basically, you are following him and he can't get away because you know where he is going! How does that sound?

The important thing that you have to know is that you don't have to win each spin. For example, if you play 10 spins on each table and you win 5 and you lose 5 then don't worry... You are a winner! Why? It's because each time you hit the number, you win double what you lost. All in all 5 winning spins out of 10 will make you walk away with a profit.

Why losses happen: The only way you can lose is because you made a mistake estimating the spin point or the ball release point, or you messed up with deciding which wheel direction. This sometimes happens if you are tired and distracted.

The last thing that would make you lose is misinterpreting the ball speed. All of the above three points are so simple and easy to determine by practice and by watching the table before starting the bet or playing. The system itself is error free because it's a law of physics.

When betting, always place the wheel layout printout in front of you. We recommend the one that we attached on the first page of this book. Also, it is so important that you have a piece of paper and a pen with you so that you can write the names of the dealers and the casino names that you feel most relaxed and have luck in winning.

This makes a big difference. On the other hand, there are dealers that are harder to beat than others especially if they are on to you. Leave your ego at home and just go to another table or another casino. Do not try to challenge a very experienced dealer. Such a dealer can vary his spin speed and wheel speed each and every time leaving you having to change your betting strategy with each spin. You can do this of course with experience. As for now, play with easy normal dealers or wait until they change the dealer.

At the end of your training session, we will give you different betting strategies on how, where and when to place your bet. Those bets could be 3 numbers, 7 numbers, 10 numbers, 14 numbers or even 34 numbers. Most of our players feels comfortable with the 7 number combos we recommend for maximum profit.

The more practice you do, the less numbers you can bet. You will be as good as 1-3 numbers in prediction. This will maximize your profit and minimize your bankroll.

Again, you only start betting after watching 5-10 spins determining the wheel/ball speed. It doesn't matter how fast or how slow the ball-wheel speed goes, what matters is that you need to determine and recognize 2 speeds. Fast and Slow. Don't worry about it now, because we are going to show you and demonstrate it to you one on one. We promise you. You will find it so easy. Seeing is better than reading in this case. We need you to read all the notes more than once so it doesn't take you more than few minutes to understand what we are going to show you. After you watch some spins, you decide to bet or not. These are based on the numbers in your mind. If your numbers comes out, then go for it! If your numbers are not coinciding and you have been observing for at least 5 minutes then go to another table or wait for another dealer. Dealers are usually changed every 30 minutes.

Chapter 6

Casinos throughout the world will allow you to hold a roulette wheel picture and sometimes they give you one to write down the numbers on it as a way of helping you. These actually do not help you. Be ready with a piece of paper, pen and a roulette wheel picture. Put the roulette photo in front of you with the Zero to your right pointing east. This is SO important, so stick to our instructions please.

Professional play : One of the pro players that has purchased our book plays the following strategy which has worked for him. However, each player can pick and choose his own way of playing as long as he is comfortable and winning. After you watch the table for enough spins to determine the winning numbers, bet 5-7 numbers only for 2 spins. If you win the first, Great! You win big. Bet the second spin and then leave regardless of the outcome. Go to another table and do the same. This is stress free and it doesn't take you long hours playing and trying to win. If you play on 10 tables and you win on 5 out of 10 then you made your daily target and you can call it a day. The daily target depends on the units you use. 1,5,10,25 Dollars.

So you can make \$100 to \$100,000 depending on how much money you can play with.

The power of this strategy is that you are in control. You decide when and how you play. You decide how much you want to win and how much you want to lose . You can do your daily limit in just an hour and then enjoy the rest of the day with family and friends. No stress any more.

It is best to combine this book with the One on One instructions that we will give you for free as part of the book. This is part of what you paid for. If you do not take the online instructions and go to the casino trying to use this strategy, you will lose and no refunds will be issued to you. If you combine the book and instructions and practice and still can't win at the casino, then we will issue a full refund. We are so sure that this is the best investment you have ever made.

Extended customer service: Even after you purchase the book and take the One on One instruction you can still contact us up to 3 years after purchase. You can call, text or e-mail us and we will gladly answer your questions. Let's say you are at a casino and you have a question that wasn't covered during training, please feel free to call and ask.

Betting numbers: The numbers you bet are different with each single spin. This is not based on a previous outcome. Let's say you are betting on 7 numbers on the first spin, they could be a completely different set of numbers on the next spin based on the strategy we are going to teach you.

Practice videos: Go to youtube and type in 'roulette spins'. You will find tons of roulette videos for players or dealers demonstrating their strategy. Only choose the videos that are clear where you can see the spin point or release point clearly.

You even can practice with a live dealer with today's live dealer casinos that exist all over the internet. Subscribe to one of these casinos and play for free practice. It's free to watch. Try to predict the outcome until you master it, then go to a land casino. Watch! Watch! and Watch! When you feel sure about hitting the numbers then start betting. Never use your money just to test.

Please stick to these instructions. Training on an IPAD or a tablet is much better than a large LCD screen because the resolution is higher and you will see better.

Congratulations again and see us on Skype

Chapter 7

Pricing: The full system price (Book+Training) is \$1499 USD. if you already paid that full amount then that's all you have to pay. If you buy the Kindle Version, the price for the book is \$9 USD. For the One on One training you still need to pay \$1490. For Kindle customers, we offer 15% discount which is \$1266.

The Mini system is priced for \$187.99. Which is designed to make you win \$500/day easily and also gives you a feel of the Original Mega system which includes the live training and demonstration on a live dealer Casino.

The payment is used via Paypal at this e-mail address (alamocity@icloud.com). For other payment methods, please contact us. As soon as we receive your payment you will be contacted immediately to setup a Skype training session.

No hidden fees or further expense is needed. You are good to go.

At Some point you will develop a skill of relating the ball-wheel relations based on previous spins. This will come by practice and how dedicated you are to practicing. For someone who just bought the system and practiced on it, we recommend playing on a double 00 wheel because casino rule is to spin in only one direction.

However, with time, it won't make a difference because you will be able to do it on both wheels.

At the casino, it's free to watch! Take advantage of this opportunity. Watch as many spins as you need. Try to predict the numbers. If your numbers come up then you are ready for real money betting. Remember... bet 2 spins only and leave no matter what the outcome. Go to another table and start over. If you do 10 tables a day following our strategy, you only win at least half of your spins and you walk away a winner. Some players play another strategy and go further. They bet each spin until the first loss. If you start betting with your money after you have watched the dealer then you quit the table upon your first loss. Sometimes you will hit a winning streak and that happens a lot especially if the dealer is tired, new or

distracted with many players on the table. This technique is called attacking the dealer.

Always start play on tables with minimum bet \$1. Feeling confident? Then, you can play higher units on same table. Not confident yet, then just bet \$1 on any number you feel is going to come out just to stay in the game. Sometimes dealers won't allow players on the table without playing. In Vegas, there are tables with 25 cents minimum, which is great for beginners, and as always you can bet high units on the same table. You are not stuck betting high with each spin.

The live training will teach you different techniques on how to determine the right numbers to bet on. They all work because the concept is the same. The range is from easy to professional. You can determine which one is more comfortable for you. If you bet 5-7 numbers, then your winnings would be larger than if you bet 15 numbers each spin. However the 10-15 numbers bet is safer if you know what you are doing and doing it right.

Golden Strategic Rules: Never take a friend with you to the casino. Switch off your phone to avoid distraction. Do not drink alcohol, it can make you reckless and uninhibited. Have a good sleep before playing and go home if you feel tired. It can help to have a cup of coffee before you start. You want to be fully concentrating without distraction. Leave your ego at home. If you lose on 1 table for 2 spins, then just leave, Do not continue on the same table.

Chapter 8

Fly Me to the Moon: Visual Roulette Prediction - MiNi.

This system is proven to work 100% if you follow our instruction. It is also considered an introductory system to the main system. It doesn't need experience, all you have to do is the following:

1- Watch 5 spins before you place your bet.

2- if 1 number of the 7 numbers set(that we will give you below) hits in one of the 5 spins that you have watched then its time to start betting

3- You bet for 5 spins . on 7 fixed numbers each spin . we will give you the set of 7 numbers below for each type of table .If non of these numbers hit . then wait for 5 minutes and start watching again or simply change table .

4- American Roulette (double Zero table) :

A) Wheel direction Clock wise, bet the following numbers:
22,34,15,24,36,13,1 (if one of them already hit in the previously watched spins)

B) Wheel direction counterclockwise, Bet the following numbers : 31,19,8,12,29,25,10

5-European wheel: Single Zero wheel roulette table:

A) Wheel direction clockwise, bet the following numbers:
27,13,36,30,8,23,10

B) Wheel direction counter clockwise, bet these numbers:
24,16,33,31,14,20,1

5- Usually American roulette tables they spin in one direction without alternating , either clockwise or counter clockwise so it should be easy to know what numbers you are waiting for . In European roulette its different because the alternate wheel direction each spin ,so they spin clockwise one spin and the next spin is counterclockwise .so remember here that the 5 spins that you want to watch have the same wheel direction . In other
