A little book of 99 quotes converted to code.

The basis of the code is alphabetical and each letter is the same number of steps away from each other letter in the English alphabet.

For example if 'B' in code is ' A' in the alphabet, then 'C' in code will also be one step away and will be 'B'.

Ok this sounds a bit complicated so I'll translate the first quote.

"K co pqv chtckf qh fgcvj, K lwuv fqp'v ycpv vq dg vjgtg yjgp kv jcrrgpu"

K = I   c = a   o = m

This code is 2 steps (S2) back. So the quote is;
"I am not afraid of death, I just don't want to be there when it happens."
(Woody Allen)

Note: Spelling in this edition is in 'English English', ie. 'colour' etc.
Also note: Watch out for the capital 'I's (eyes) and lower case 'l's (ells).

A pen and paper might be handy.

Thank you, and have fun.
