JFK Assassination- The Last Book 11-13-22

John Kennedy probably suspected that he could be assassinated in his first term. Close to having just sworn in, his loyal intelligence agents told him of a monolithic worldwide conspiracy that had all of the functions of a small government, but that operated in the Black and threatened our way of life: he was the guest speaker at the National Publishers Association formal luncheon at the Waldorf Astoria in New York on 27 April, 1961 and said:

“we are opposed around the world by a monolithic and ruthless conspiracy that relies primarily on covert means for expanding its sphere of influence, -on infiltration instead of invasion, on subversion instead of elections, on intimidation instead of free choice, on guerrillas by night instead of armies by day. It is a system which has conscripted vast human and material resources into the building of a tightly knit, highly efficient machine that combines military, diplomatic, intelligence, economic, scientific and political operations.”

“Its preparations are concealed, not published. Its mistakes are buried, not headlined. Its dissenters are silenced, not praised. No expenditure is questioned, no rumor is printed, no secret is revealed. It conducts the Cold War, in short, with a war-time discipline no democracy would ever hope or wish to match.”

It sounds sort of like what GHW Bush was up to in 1961, operating on an island off the coast of Cuba, he was running commando attacks on Cuba under cover of darkness. A brother in “Skull and Bones” Fraternity at Yale gave him the island for use for his “Zapata Oil Company” as a cover for being there. But he was running commando raids on Cuba to help unseat dictator Fidel Castro. Jack Ruby (also a Bush associate) ran guns to the island to help the cause. Ruby was Nixon’s man (and GHW Bush’s man), a private eye for Nixon

in his Commie hunting days for congress in the late 40s. Ruby also worked for the mafia so he could be trusted to do espionage work without bitching for Nixon, who was owned by Prescott Bush. Nixon got Prescott's support by answering an ad for "a malleable attorney interested in politics", from Prescott and his other banking friends on the East Coast. It was posted on the west coast and Nixon responded yes. "They welcomed and supported Nixon and "guided" his mission in politics" in a radical right wing direction, covert takeover growth.

Meanwhile, J. Edgar Hoover ran the FBI. He had shadowy connections to Big oil and Clint Murcheson and vacationed annually at Murcheson's resort in Del Mar, CA near the race track as Murcheson's guest. It is likely that Hoover had his lover, Clyde Tolson, Associate Director of the FBI with him (Hoover being his sexual partner), so that Big Oil, I suppose, probably had film on them. And therefore had leverage on the Director of the FBI. Hoover had his agents shadow JFK so they were aware and had proof of JFK's philandering with women outside of his marriage. Being a friend and neighbor with Lyndon Johnson, Hoover got Lyndon the VP spot under Kennedy by not disclosing JFK's philandering nationally before the 1960 elections. JFK knew he could retire Hoover in his 2nd term and blow out Johnson, (if he got a 2nd term), but meanwhile had to put up with Johnson, who was given no power as Vice President. But Johnson was determined to assassinate Kennedy during his **first** term so he would become president. LBJ's attorney, Ed Clark would manage that plan that LBJ's gunman, Mac Wallace, would flesh out into a scenario, (a little in-house project). GHW Bush would support with Cuban veterans from the Bay of Pigs invasion that he organized, who while hating Castro also disfavored JFK for his lack of air support for their Bay of Pigs landing. Nixon's black OPS chiefs: E. Howard Hunt and Frank Sturgis would train the Cubans in Florida. But Kennedy could not support the CIA Bay of Pigs project with air support as that would

have been an act of war, yet undeclared by congress. Besides, Nixon did the government coordination for Eisenhower on this CIA plan.

So Bay of pigs was a bad surprise that the CIA would launch, with or without JFK's support, in his early presidency. So we can see both Nixon and his benefactor, GHW Bush (son of Prescott Bush) were closing in on the elimination of Kennedy and the furthering of the radical right wing covert world takeover that they were part of. And there were attempts on JFK's life before Dallas: the last of which was in Chicago in September 1963. Agent Abraham Bolden worked in the Chicago office at that time. He had been invited by JFK, who ran into Bolden in a basement bathroom while on travel sometime early in his presidency, to join the Secret Service at the White House and he accepted this opportunity. Only his fellow agents were racists and they abused Bolden crudely/without respect, using the "N" word regularly with him, and got him fired in his first month or so while he was on probation as a new recruit. In 1964 Bolden, then, wanted to be a witness to the Warren Commission of his knowledge that Secret Service (SS) under JFK were racists, and obviously did not make improvements in JFK's protection in Dallas, even after knowledge of the attempted coup in Chicago in September, '63. In fact **JFK's SS eliminated his protection** . They put him on a slow course, 10mph (where 35mph was the guide book minimum) in the center of Dealey Plaza among tall buildings with open windows (against protocol) by taking a right from Main onto Houston and subsequent slow wide turn onto Elm St. with a pause to proceed to the luncheon engagement at the Trade Mart in Dallas through the underpass, crowded with spectators on the overpass above (against protocols again). They moved the press way back and put in the SS car that failed on purpose to evacuate the president during the barrage of shots through the Plaza. They removed the rear bumper stand guards, and moved the motorcycle escorts protecting his flanks. The president was totally vulnerable. The

Police Chief and Sheriff and Mayor sped ahead of the limo and waited safely under the overpass while the attack began from the top of Elm street to the picket fence on the grassy knoll, to avoid being hit by live fire. It was a set up. In short JFK's execution was supported by his SS, his CIA, Dallas Law enforcement, The City of Dallas, the state of Texas, and private shooters from various locations. Howard Hughes was one source of funding through Nixon to E. Howard Hunt, a paymaster for the JFK assassination. Maybe Operation 40, an assassination squad developed by Nixon kicked in support. Big Oil (Murcheson) ended up paying Ed Clark \$4 million in oil producing land afterwards as his reward for the successful mission.

JFK's wife knew of the planned kill in Dallas and she had no other opportunity like this one to be freed from her philandering husband, and get the respect of the people and freedom to remarry for a better life. I understand her position and her desire to retain the respect of the world and not live with a womanizing roue, like JFK. I blame the real conspirators even though she was most definitely an accomplice to the crime. It was made to look like help for her husband. (But she should have pushed him to the floor at the top of the street and laid on him to protect him), while screaming for the limo to evacuate, and force the conspirators to go off plan to get their job done. They might have killed her to get him in this case, but she had an opportunity to possibly save the president who was loved the world around. Instead she propped him up by his left arm/elbow after he was injured, to keep him a target for the kill. (It may have been her who was loved more around the world.) ***I'm pretty sure that he knew he was under attack at the top of the street, because he jerked his hand back from a near hit ; and slid toward Jackie pretty quickly. The limo didn't evacuate. Soon he heard a loud shot at Z170, and noticed that they weren't moving out. He may have complained but shortly thereafter got hit in the back by a muffled subsonic rifle shot.***

So he stood up and said he was hit, as if to tell the crowd. “Is anybody supporting me” he must have thought. Kellerman, right front seat in the limo testified to JFK saying he was hit, but he failed to move out in a hurry to the hospital, and in another 15-20 seconds, JFK was shot dead by his driver while Kellerman shielded his face from shot blast with a blue binder per plan. The back wound was a flesh wound and the bullet fell out easily during the autopsy at the Bethesda, Md. Morgue. But the neck shot from the front (with no exit) hit him at frame Z225 as shown in the Zapruder (Z) film, which was fully edited (sanitized) by the CIA, and not seen in public for 12 years. TV anchorman Dan Rather saw the film within days of the shooting and said on the air that the fatal shot thrust JFK forward, but that was a lie that he may have been forced to tell, or was he a radical right wing conspirator, helping their cause? I deeply dislike him for not correcting his comment. He was a co-conspirator for that alone. I was ready to drop out of college and help pursue the culprits responsible as I was against my father’s racism. I suspected LBJ and his fellow racist/supremacist pals.

JFK’s neck shot opened his trachea and made it hard to breathe and disabled his voice. He held both hands at his throat until the right temple shot from the knoll that stuck into his skull on the inside left, causing great pain. He grabbed the left side of his head with his left hand. Then he saw Greer bearing down on him with his shiny 45, 4 feet away and raised his right fist but was shot dead in the right forehead near the hair line that blew out the back of his head 2.5inches wide by 4 inches tall, an oval hole that was fatal, so he couldn’t be revived at Parkland Hospital in Dallas and was pronounced dead at 1pm Dallas time. He had raised his right fist, his only defense, for the fatal shot. This forced the driver to pop up to fire over his fist while still hitting his forehead. A close up of a reprocessed Moorman photo shows the fist, a fraction of a second

post fatal shot, that shows the large exit wound from the shot (at left). His body hadn't been slammed against the rear seat yet & Greer popped back down and is retrieving his 45 while keeping it low. Greer had it right next to his left cheek near the kill. He raised it up from Z303-Z313. Those who saw it figured he was firing back. At right is Z 313. shooting with his left hand.

I drew the white line

Below are Zapruder frames 303-316 with a shiny object coming into the scene opposed to the top of Roy Kellerman's head and then moving forward with its angle flattening out to point in the direction of

the president while becoming flat above the top of Kellerman's head as a flat topped shiny object. All human beings have rounded domes in the shape of their skulls. This includes Kellerman as shown in frame Z285, for instance, when all occupants looked at JFK, saw a bloody president holding his throat and didn't rush off to the hospital in a hurry! He would have survived the neck and back shots easily, but all in the limo and most in the SS car following knew

of the assassination plan for the day, so Greer and Kellerman looked at each other at Z290 and Greer brought the limo to a stand still for a few seconds. Dallas Police Officer Roscoe White hit JFK in the right temple from behind a stub wall on the grassy knoll 75 feet away. Bill Nelson witnessed the hit.

Proof's on the next page. Witness testimony is at the top, left to right. Then the Mary Moorman scene reprocessed by me in Light Room with NIK Pro Sharpener 3, and color enhanced by me. Marie Muchmore's film also had segments that showed Greer pointing his 45 at JFK and again with Pro Sharpener 3 it disclosed the muzzle of the 45 indicating that the flat topped shiny object was a 45 automatic (Greer's personal fire arm, shiny 45 automatic). Moorman captured the 45 being retrieved by Greer while Kellerman is shielding his face with the blue trip folder to avoid being burnt by the hot gases of the discharge of Greer's kill shot. So we have two views identifying the weapon that killed JFK from ~4 feet away showing the muzzle of the flat topped shiny weapon pointed at JFK. Also the horizontal blur in Greer's head at Z313 is caused by the jolt of his 45 moving his head back to make it copy wider in that frame only while JFK's head explodes in the same (1/40 second exposure of) frame Z313. This is due to the kick of his 45 expanding the apparent width of his head, and the time coincidence nails Greer as JFK's assassin. Why else would a grievously injured Kennedy raise his fist in front of his face before the frame? He saw his killer, his driver, who shot him like a rat who was trapped in a corner. Many frames were removed to speed up the

MARY MOORMAN'S FAMOUS POLAROID PICTURE IS THE BEST ALL AROUND SUMMATION TO THE TRAGIC END OF JOHN F. KENNEDY'S LIFE.

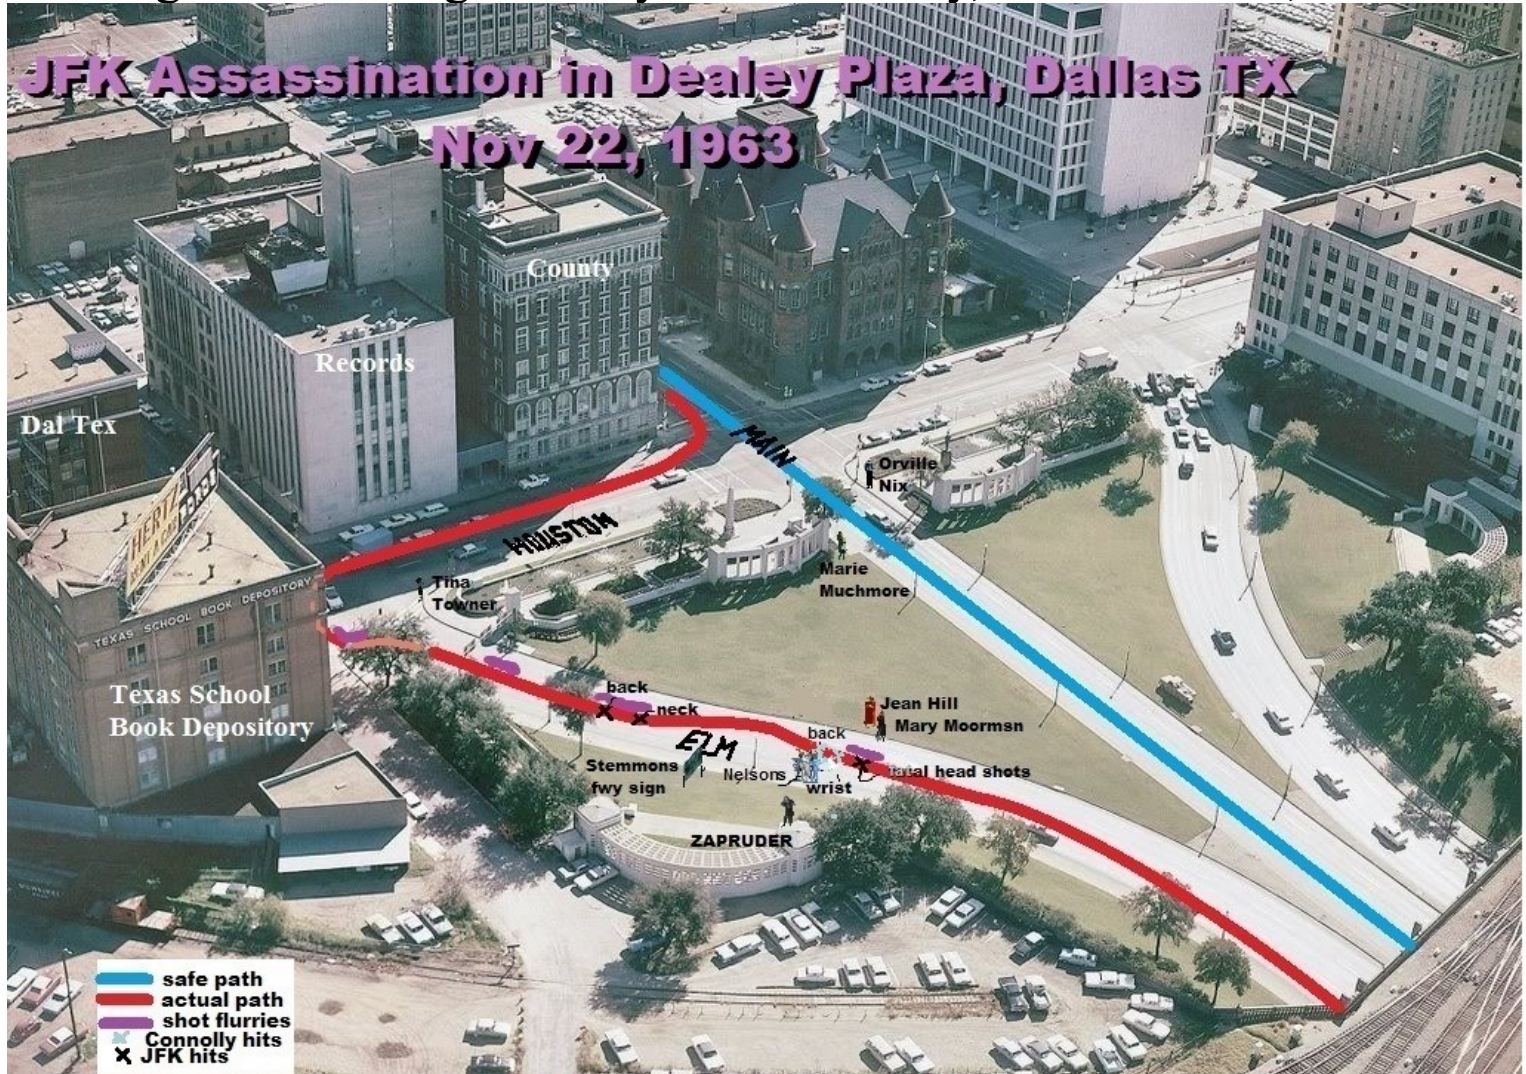

action, and create a new scene for it, then pasting the new limo group on the alternate “moving” background, from photo conspirators scanning the background behind the limo group at the kill site in Dealey Plaza to have a moving background available to print the new limo revised group, (with lots of “edit outs”) onto this alternate “moving” background scene. This new background would show people looking where the president was ahead of them since the conspiratorial background scans could not include the limo group, as that would be pasted in with the “evidence removed” edited limo group later. This creates a very real looking fraudulent “moving” drive thru the plaza. Such is the extant Zapruder film available to the public. **The real original “in camera film” would run longer with the slow speed and pauses and stops and shot evidence that happened during the live action of the kill.** Proof of this is in frames where the background people and limo group people are both in perfect focus. In a moving parade the limo group should remain in focus while the people in the background are slightly blurred due to the relative velocity of the limo to the crowd when the camera is trained on the moving limo. When the limo pauses or stops both the limo group and most of the people in the crowd are in clear focus as eg Zapruder momentarily stops his scan. Most of the stop/pause film evidence shows a frame or two with this coincidental good focus evidence. But the majority of these frames were removed and trashed to eliminate evidence (e.g. stops) of all that happened and how long it took. While the limo slowed or stopped, clusters of shots occurred; for instance at the wide turn at the top of the street when JFK was aligned for safe shots from West facing windows in the Dal Tex Building. At least 3 shooters were there since they are the only shooters who might possibly cross JFK’s path to the manhole cover for the 3 missed shots that hit there. All other suspect shooter sites would be way over JFK’s head or have no coincidence of a JFK hit with the view of the manhole

cover. I reproduced the view that these Dal Tex shooters had for shots at JFK on the street below. He was stopped on the right with clear street beyond at short range at the first shots. The street view shows

witnesses, shot flurries, and his path down Elm on the next page. It features the location of most key spectators and their movie cameras with respect to the wavy path taken to best accommodate the shooters for the kill. A loyal researcher Don Roberdeau prepared a detailed plot plan of Dealey Plaza with range scaling and elevation (Height Above Sea Level- HASL) and notes of great value to enable the creation of a forensic ballistic shooting analysis. He wasn't well advised for the limo path he shows. I had more recent counsel to show it the way it happened. But I have not been able to locate any other researchers' possible use of Roberdeau's work with the correct path or any other detailed shot analysis on the assassination so; I created my own regimen for this work that I 11 believe is very accurate in

tracking shots through Dealey Plaza that day, 22 November, 1963.

Overview of Dealey Plaza on 22 Nov '63

I published a summary of my shot data to account for all shots that hit or missed the president that day in my autobiography¹. In preparation for that document I had to redo my shot analysis to be more complete than it had been in previous works of mine. I studied and incorporated the shots at the top of the street: the “firecrackers” that were really silenced rifles shooting subsonic rounds that could be disguised in the term “firecrackers” with silencers on those rifles. The plan was to kill JFK with a combination of multiple subsonic/silenced rounds with 3 loud, full strength, high velocity rounds spaced apart to mimic a single shooter having to reload for each shot. The single shooter patsy was

Lee Harvey Oswald, who was incidental to the plan and knew at least 1 (non-FBI) participant, Jack Ruby. He was operating with an FBI manager and had a pay code from the CIA, plus he had a background in Black OPS in the Marine Corp where he was a radar tech in the U-2 spy plane program, and part of a program that developed “doubles”, Look alikes, who had parallel lives but didn’t know each other in the FBI, *so the FBI could use one to create evidence on the other*. The “Hiddell” name used to buy a mail order Mannlicher Carcano was on an id card with a picture of the look-alike to Lee Harvey Oswald. It was planted with Lee Harvey Oswald’s personal effects when he was arrested so he could be identified as the owner of the Mannlicher Carcano, that was chosen as the murder weapon the next morning.

OSWALD IS NOT HIDEELL

Lee Harvey Oswald

Phoney i.d. man

This left all of Italy laughing as they knew that that rifle was insurance that the other side won the war. It would have never been chosen as the weapon to kill JFK. Besides existing ammo was 20+ years old and therefore unreliable. Besides, all of Japan astutely backed JFK's driver as the assassin from the Z film alone Anybody with any sense could tell that something fishy was going on when the rear shooting Oswald suspect was put forth in the media as the killer on day 2.

What started that confusion was the White House press Secretary who 30 minutes after the shooting **told the nation and the world, for the first time, that JFK had been killed.** *He said the doctors told him it was a simple matter of a shot to the head, where he coincidentally pointed to his own right forehead on film released with this statement on day 1.* The CIA/FBI/rotten government conspirators have said that the pointing didn't indicate where the bullet went in. But **it did identify precisely where the kill shot hit JFK** at the hair line on the right forehead. Furthermore, Roy Kellerman testified that the last two loud shots were back to back in a split second, bang-bang and no rifle existed that could back this performance at that time. That being the case, the **Warren commission**, while being bound to tell the truth, **lied in fact to the world to close the case, quickly.** At least two shooters were needed to reproduce what Roy Kellerman and the rest of the crowd heard. **So direct rebuttal to a lone assassin remains, from day one** by an extremely close witness, Roy Kellerman, front right seat in the limo and JFK's personal body guard. Furthermore LBJ told Judge Warren that Cubans were on site and if that became known, he would be **forced** to attack the Soviet Union (**not true**). Cubans who left Cuba were for Bautista and not communists. Irrespective, Warren got the message and found per J. Edgar Hoover's assertion that Lee Harvey Oswald was the lone assassin. Then the government cloaked the kill and all evidence into classified information to be held for 60+ years in the interest of national security. This may have baffled congress. **But no single low level person represents a threat to National Security with a single rifle kill, especially after he's dead 2 days later.** The whole government case is a bumbling lie that has tried to cover-up a Banana Republic type hit, that I'm shining light on while proving with forensic ballistic analysis the actual shot sequence.

I present scientific proof of a 16-20 shot coup, which is the true story of the Actual JFK Assassination.

First, White House Press Secretary, Martin Kilduff announces JFK's death to the world. Parkland doctors in attendance at JFK's arrival at Parkland Hospital and assisting nurses added up to 22 people in the emergency room used. Doctors Carrico, Baxter, Perry, and McClelland started work to assist in oxygen provision to JFK. He had a ~4mm neat round entry bullet hole below his Adam's apple that intersected with his trachea to the lungs. Shot from the front, there was no exit. They performed a tracheotomy centered on the bullet hole and inserted a chest tube to help breathing. A rear shooter would then constitute a conspiracy. Oswald was the only patsy of the government cover-up. Doctors Peters and Kemp arrived and assisted in chest compression for circulation. Blood was administered, but pumping only made bleeding worse, according to Dr. Jenkins. No brain activity was there. Before completing formal reports on their work doctors were each required to annotate body diagram forms with notes on defects that day. Copies were available when I started research in 2008, and I had them. They have since disappeared from my computer. I know that there is intrusion into my files and things missing. I remember the 4 X 7 mm defect (bullet hole) to the right of T-3 in his back, the neat 4mm round neck wound in the front with no exit. And a small high right forehead entry wound presumably connected to the 2.5 X 4 inch exit wound in the temporal occipital region in the back of the head.

There was no rear neck wound, identified as the entry for the magic bullet by the Warren Commission/ Gerald Ford. That was an **outright Ford lie** that enabled the claim of a lone assassin .

Nor was any proof presented of Oswald's ability to track a moving target and get 8 wounds, counting James Tague's wound from an errant bullet while firing 3 rounds in 6.5 seconds with a bolt action rifle. That seems impossible for any shooter. & **13 is the 4th hit on JFK** beyond Oswald's allotment of 3 shots; **magic bullet is dead!**

In fact, 3 NRA masters all failed to get a single head hit on fixed targets, given 2 tries each with 3 rounds a piece per try in a Warren Commission sponsored test. Only 1 of 3 met the time constraint. The results proved otherwise, especially with what was found on the rifle: a missing shim under one of the feet supporting the scope of the rifle .

FBI tested the rifle without the shim and got 2" X 8" AZ n EL errors at 25 yds. The weapon as found represented no threat. AND Oswald shot "Maggie's Drawers" in his Marine Corp test by missing the board that the target was mounted on. He was not a master, expert,

sharpshooter, nor a marksman. He was measured laughable with his rifle by the Marine Corp. The sights were fixed before the masters tested. The **Warren commission threw out all missed shots (which eliminated tens of actual shots and a larger**

conspiracy). **It was a multi - fraudulent investigation.** And LBJ (a murderous traitor) chose its members from radical right wing and some traitorous (G. Ford and A. Dulles) members who lied to try to stop a real investigation into the assassination of John F. Kennedy. The voluminous report measured 45 inches thick with 26 volumes, and it is a filibuster of an investigation into the murder of a US president.

We The People deserve a real investigation. Unfortunately the covert worldwide conspiracy was in control of America and had the backing of our Nazi-like military, who frag to keep quiet, men and officers who refuse to commit war crimes, This shocking truth causes all kinds of mental
