

Chapter 1

Introduction

The oldest and strongest emotion of mankind is fear, and the oldest and strongest kind of fear is fear of the unknown. These facts few psychologists will dispute, and their admitted truth must establish for all time the genuineness and dignity of the weirdly horrible tale as a literary form. Against it are discharged all the shafts of materialistic sophistication which clings to frequently felt emotions and external events, and of a naively insipid idealism which deprecates the aesthetic motive and calls for a didactic literature to "uplift" the reader toward a suitable degree of smirking optimism. But in spite of all this opposition the weird tale has survived, developed, and attained remarkable heights of perfection; founded as it is on a profound and elementary principle whose appeal, if not always universal, must necessarily be poignant and permanent to minds of the requisite sensitiveness.

The appeal of the spectrally macabre is generally narrow because it demands from the reader a certain degree of imagination and a capacity for detachment from every-day life. Relatively few are free enough from the spell of the daily routine to respond to rappings from outside, and tales of ordinary feelings and events, or of common sentimental distortions of such feelings and events, will always take first place in the taste of the majority; rightly, perhaps, since of course these ordinary matters make up the greater part of human experience. But the sensitive are always with us, and sometimes a curious streak of fancy invades an obscure corner of the very hardest head; so that no amount of rationalisation, reform, or Freudian analysis can quite annul the thrill of the chimney-corner whisper or the lonely wood. There is here involved a psychological pattern or tradition as real and as deeply grounded in mental experience as any other pattern or tradition of mankind; coeval with the religious feeling and closely related to many aspects of it, and too much a part of our inmost biological heritage to lose keen potency over a very important, though not numerically great, minority of our species.

Man's first instincts and emotions formed his response to the environment in which he found himself. Definite feelings based on pleasure and pain grew up around the phenomena whose causes and effects he understood, whilst around those which he did not understand—and the universe teemed with them in the early days—were naturally woven such personifications, marvellous interpretations, and sensations of awe and fear as would be hit upon by a race having few and simple ideas and limited experience. The unknown, being likewise the unpredictable, became for our primitive forefathers a terrible and omnipotent source of boons and calamities visited upon mankind for cryptic and wholly extra-terrestrial reasons, and thus clearly belonging to spheres of existence whereof we know nothing and wherein we have no part. The phenomenon of dreaming likewise helped to build up the notion of an unreal or spiritual world; and in general, all the conditions of savage dawn-life so strongly conduced toward a feeling of the supernatural, that we need not wonder at the thoroughness with which man's very hereditary essence has become saturated with religion and superstition. That saturation must, as matter of plain scientific fact, be regarded as virtually permanent so far as the subconscious mind and inner instincts are concerned; for though the area of the unknown has been steadily contracting for thousands of years, an infinite reservoir of mystery still engulfs most of the outer cosmos, whilst a vast residuum of powerful inherited associations clings round all the objects and processes that were once mysterious, however well they may now be explained. And more than this, there is an actual physiological fixation of the old instincts in our nervous tissue, which would make them obscurely operative even were the conscious mind to be purged of all sources of wonder.

Because we remember pain and the menace of death more vividly than pleasure, and because our feelings toward the beneficent aspects of the unknown have from the first been captured and formalised by conventional religious rituals, it has fallen to the lot of the darker and more maleficent side of cosmic mystery to figure chiefly in our popular supernatural folklore. This tendency, too, is naturally enhanced by the fact that uncertainty and danger are always closely allied; thus making any kind of an unknown world a world of peril and evil possibilities. When to this sense of fear and evil the inevitable fascination of wonder and curiosity is super-added, there is born a composite body of keen emotion and imaginative provocation whose vitality must of necessity endure as long as the human race itself. Children will always be afraid of the dark, and men with minds sensitive to hereditary impulse will always tremble at

the thought of the hidden and fathomless worlds of strange life which may pulsate in the gulfs beyond the stars, or press hideously upon our own globe in unholy dimensions which only the dead and the moon-struck can glimpse.

With this foundation, no one need wonder at the existence of a literature of cosmic fear. It has always existed, and always will exist; and no better evidence of its tenacious vigour can be cited than the impulse which now and then drives writers of totally opposite leanings to try their hands at it in isolated tales, as if to discharge from their minds certain phantasmal shapes which would otherwise haunt them. Thus Dickens wrote several eerie narratives; Browning, the hideous poem "Childe Roland"; Henry James, *The Turn of the Screw*; Dr. Holmes, the subtle novel *Elsie Venner*; F. Marion Crawford, "The Upper Berth" and a number of other examples; Mrs. Charlotte Perkins Gilman, social worker, "The Yellow Wall Paper"; whilst the humourist W. W. Jacobs produced that able melodramatic bit called "The Monkey's Paw".

This type of fear-literature must not be confounded with a type externally similar but psychologically widely different; the literature of mere physical fear and the mundanely gruesome. Such writing, to be sure, has its place, as has the conventional or even whimsical or humorous ghost story where formalism or the author's knowing wink removes the true sense of cosmic fear in its purest sense. The true weird tale has something more than secret murder, bloody bones, or a sheeted form clanking chains according to rule. A certain atmosphere of breathless and unexplainable dread of outer, unknown forces must be present; and there must be a hint, expressed with a seriousness and portentousness becoming its subject, of that most terrible conception of the human brain—a malign and particular suspension or defeat of those fixed laws of Nature which are our only safeguard against the assaults of chaos and the daemons of unplumbed space.

Naturally we cannot expect all weird tales to conform absolutely to any theoretical model. Creative minds are uneven, and the best of fabrics have their dull spots. Moreover, much of the choicest weird work is unconscious; appearing in memorable fragments scattered through material whose massed effect may be of a very different cast. Atmosphere is the all-important thing, for the final criterion of authenticity is not the dovetailing of a plot but the creation of a given sensation. We may say, as a general thing, that a weird story whose intent is to teach or produce a social effect, or one in which the horrors are finally explained away by natural means, is not a genuine tale of cosmic fear; but it remains a fact that

such narratives possess, in isolated sections, atmospheric touches which fulfil every condition of true supernatural horror-literature. Therefore we must judge a weird tale not by the author's intent, or by the mere mechanics of the plot; but by the emotional level which it attains at its least mundane point. If the proper sensations are excited, such a "high spot" must be admitted on its own merits as weird literature, no matter how prosaically it is later dragged down. The one test of the really weird is simply this—whether or not there be excited in the reader a profound sense of dread, and of contact with unknown spheres and powers; a subtle attitude of awed listening, as if for the beating of black wings or the scratching of outside shapes and entities on the known universe's utmost rim. And of course, the more completely and unifiedly a story conveys this atmosphere, the better it is as a work of art in the given medium.

Chapter 2

The Dawn of the Horror-Tale

As may naturally be expected of a form so closely connected with primal emotion, the horror-tale is as old as human thought and speech themselves.

Cosmic terror appears as an ingredient of the earliest folklore of all races, and is crystallised in the most archaic ballads, chronicles, and sacred writings. It was, indeed, a prominent feature of the elaborate ceremonial magic, with its rituals for the evocation of daemons and spectres, which flourished from prehistoric times, and which reached its highest development in Egypt and the Semitic nations. Fragments like the Book of Enoch and the Claviculae of Solomon well illustrate the power of the weird over the ancient Eastern mind, and upon such things were based enduring systems and traditions whose echoes extend obscurely even to the present time. Touches of this transcendental fear are seen in classic literature, and there is evidence of its still greater emphasis in a ballad literature which paralleled the classic stream but vanished for lack of a written medium. The Middle Ages, steeped in fanciful darkness, gave it an enormous impulse toward expression; and East and West alike were busy preserving and amplifying the dark heritage, both of random folklore and of academically formulated magic and cabbalism, which had descended to them. Witch, werewolf, vampire, and ghoul brooded ominously on the lips of bard and grandam, and needed but little encouragement to take the final step across the boundary that divides the chanted tale or song from the formal literary composition. In the Orient, the weird tale tended to assume a gorgeous colouring and sprightliness which almost transmuted it into sheer phantasy. In the West, where the mystical Teuton had come down from his black Boreal forests and the Celt remembered strange sacrifices in Druidic groves, it assumed a terrible intensity and convincing seriousness of atmosphere which doubled the force of its half-told, half-hinted horrors.

Much of the power of Western horror-lore was undoubtedly due to the hidden but often suspected presence of a hideous cult of nocturnal worshippers whose strange customs—descended from pre-Aryan and pre-agricultural times when a squat race of Mongoloids roved over Europe with their flocks and herds—were rooted in the most revolting fertility-rites of immemorial antiquity. This secret religion, stealthily handed down amongst peasants for thousands of years despite the outward reign of the Druidic, Graeco-Roman, and Christian faiths in the regions involved, was marked by wild "Witches' Sabbaths" in lonely woods and atop distant hills on Walpurgis-Night and Hallowe'en, the traditional breeding-seasons of the goats and sheep and cattle; and became the source of vast riches of sorcery-legend, besides provoking extensive witchcraft-prosecutions of which the Salem affair forms the chief American example. Akin to it in essence, and perhaps connected with it in fact, was the frightful secret system of inverted theology or Satan-worship which produced such horrors as the famous "Black Mass"; whilst operating toward the same end we may note the activities of those whose aims were somewhat more scientific or philosophical—the astrologers, cabbalists, and alchemists of the Albertus Magnus or Raymond Lully type, with whom such rude ages invariably abound. The prevalence and depth of the mediaeval horror-spirit in Europe, intensified by the dark despair which waves of pestilence brought, may be fairly gauged by the grotesque carvings slyly introduced into much of the finest later Gothic ecclesiastical work of the time; the daemonic gargoyles of Notre Dame and Mont St. Michel being among the most famous specimens. And throughout the period, it must be remembered, there existed amongst educated and uneducated alike a most unquestioning faith in every form of the supernatural; from the gentlest of Christian doctrines to the most monstrous morbidities of witchcraft and black magic. It was from no empty background that the Renaissance magicians and alchemists—Nostradamus, Trithemius, Dr. John Dee, Robert Fludd, and the like—were born.

In this fertile soil were nourished types and characters of sombre myth and legend which persist in weird literature to this day, more or less disguised or altered by modern technique. Many of them were taken from the earliest oral sources, and form part of mankind's permanent heritage. The shade which appears and demands the burial of its bones, the daemon lover who comes to bear away his still living bride, the death-fiend or psychopomp riding the night-wind, the man-wolf, the sealed chamber, the deathless sorcerer—all these may be found in that curious body

of mediaeval lore which the late Mr. Baring-Gould so effectively assembled in book form. Wherever the mystic Northern blood was strongest, the atmosphere of the popular tales became most intense; for in the Latin races there is a touch of basic rationality which denies to even their strangest superstitions many of the overtones of glamour so characteristic of our own forest-born and ice-fostered whisperings.

Just as all fiction first found extensive embodiment in poetry, so is it in poetry that we first encounter the permanent entry of the weird into standard literature. Most of the ancient instances, curiously enough, are in prose; as the werewolf incident in Petronius, the gruesome passage in Apuleius, the brief but celebrated letter of Pliny the Younger to Sura, and the odd compilation *On Wonderful Events* by the Emperor Hadrian's Greek freedman, Phlegon. It is in Phlegon that we first find that hideous tale of the corpse-bride, "Philinnion and Machates", later related by Proclus and in modern form the inspiration of Goethe's "Bride of Corinth" and Washington Irving's "German Student". But by the time the old Northern myths take literary form, and in that later time when the weird appears as a steady element in the literature of the day, we find it mostly in metrical dress; as indeed we find the greater part of the strictly imaginative writing of the Middle Ages and Renaissance. The Scandinavian Eddas and Sagas thunder with cosmic horror, and shake with the stark fear of Ymir and his shapeless spawn; whilst our own Anglo-Saxon *Beowulf* and the later Continental Nibelung tales are full of eldritch weirdness. Dante is a pioneer in the classic capture of macabre atmosphere, and in Spenser's stately stanzas will be seen more than a few touches of fantastic terror in landscape, incident, and character. Prose literature gives us Malory's *Morte d'Arthur*, in which are presented many ghastly situations taken from early ballad sources—the theft of the sword and silk from corpse in *Chapel Perilous* by Sir Launcelot, the ghost of Sir Gawaine, and the tomb-fiend seen by Sir Galahad—whilst other and cruder specimens were doubtless set forth in cheap and sensational "chapbooks" vulgarly hawked about and devoured by the ignorant. In Elizabethan drama, with its *Dr. Faustus*, the witches in *Macbeth*, the ghost in *Hamlet*, and the horrible gruesomeness of Webster, we may easily discern the strong hold of the daemoniac on the public mind; a hold intensified by the very real fear of living witchcraft, whose terrors, first wildest on the Continent, begin to echo loudly in English ears as the witch-hunting crusades of James the First gain headway. To the lurking mystical prose of the ages is added a long line of treatises on witchcraft

and daemonology which aid in exciting the imagination of the reading world.

Through the seventeenth and into the eighteenth century we behold a growing mass of fugitive legendry and balladry of darksome cast; still, however, held down beneath the surface of polite and accepted literature. Chapbooks of horror and weirdness multiplied, and we glimpse the eager interest of the people through fragments like Defoe's "Apparition of Mrs. Veal", a homely tale of a dead woman's spectral visit to a distant friend, written to advertise covertly a badly selling theological disquisition on death. The upper orders of society were now losing faith in the supernatural, and indulging in a period of classic rationalism. Then, beginning with the translations of Eastern tales in Queen Anne's reign and taking definite form toward the middle of the century, comes the revival of romantic feeling—the era of new joy in Nature, and in the radiance of past times, strange scenes, bold deeds, and incredible marvels. We felt it first in the poets, whose utterances take on new qualities of wonder, strangeness, and shuddering. And finally, after the timid appearance of a few weird scenes in the novels of the day—such as Smollett's *Adventures of Ferdinand, Count Fathom*—the released instinct precipitates itself in the birth of a new school of writing; the "Gothic" school of horrible and fantastic prose fiction, long and short, whose literary posterity is destined to become so numerous, and in many cases so resplendent in artistic merit. It is, when one reflects upon it, genuinely remarkable that weird narration as a fixed and academically recognised literary form should have been so late of final birth. The impulse and atmosphere are as old as man, but the typical weird tale of standard literature is a child of the eighteenth century.

Chapter 3

The Early Gothic Novel

The shadow-haunted landscapes of "Ossian", the chaotic visions of William Blake, the grotesque witch-dances in Burns's "Tam o'Shanter", the sinister daemonism of Coleridge's "Christabel" and "Ancient Mariner", the ghostly charm of James Hogg's "Kilmeny", and the more restrained approaches to cosmic horror in "Lamia" and many of Keats's other poems, are typical British illustrations of the advent of the weird to formal literature. Our Teutonic cousins of the Continent were equally receptive to the rising flood, and Brüger's "Wild Huntsman" and the even more famous daemon-bridegroom ballad of "Lenore"—both imitated in English by Scott, whose respect for the supernatural was always great—are only a taste of the eerie wealth which German song had commenced to provide. Thomas Moore adapted from such sources the legend of the ghoulish statue-bride (later used by Prosper Mérimée in "The Venus of Ille", and traceable back to great antiquity) which echoes so shiveringly in his ballad of "The Ring"; whilst Goethe's deathless masterpiece Faust, crossing from mere balladry into the classic, cosmic tragedy of the ages, may be held as the ultimate height to which this German poetic impulse arose.

But it remained for a very sprightly and worldly Englishman—none other than Horace Walpole himself—to give the growing impulse definite shape and become the actual founder of the literary horror-story as a permanent form. Fond of mediaeval romances and mystery as a dilettante's diversion, and with a quaintly imitated Gothic castle as his abode at Strawberry Hill, Walpole in 1764 published *The Castle of Otranto*; a tale of the supernatural which, though thoroughly unconvincing and mediocre in itself, was destined to exert an almost unparalleled influence on the literature of the weird. First venturing it only as a "translation" by one "William Marshal, Gent." from the Italian of a mythical "Onuphrio Muralt", the author later acknowledge his connexion with the book and took pleasure in its wide and instantaneous popularity—a

popularity which extended to many editions, early dramatisation, and wholesale imitation both in England and in Germany.

The story—tedious, artificial, and melodramatic—is further impaired by a brisk and prosaic style whose urbane sprightliness nowhere permits the creation of a truly weird atmosphere. It tells of Manfred, an unscrupulous and usurping prince determined to found a line, who after the mysterious sudden death of his only son Conrad on the latter's bridal morn, attempts to put away his wife Hippolita and wed the lady destined for the unfortunate youth—the lad, by the way, having been crushed by the preternatural fall of a gigantic helmet in the castle courtyard. Isabella, the widowed bride, flees from this desing; and encounters in subterranean crypts beneath the castle a noble yyoung preserver, Theodore, who seems to be a peasant yet strangely resembles the old lord Alfonso who ruled the domain before Manfred's time. Shortly thereafter supernatural phenomena assail the castle in divers ways; fragments of gigantic armour being discovered here and there, a portrait walking out of its frame, a thunderclap destroying the edifice, and a colossal armoured spectre of Alfonso rising out of the ruins to ascend through parting clouds to the bosom of St. Nicholas. Theodore, having wooed Manfred's daughter Matilda and lost her through death—for she is slain by her father by mistake—is discovered to be the son of Alfonso and rightful heir to the estate. He concludes the tale by wedding Isabella and preparing to live happily ever after, whilst Manfred—whose usurpation was the cause of his son's supernatural death and his own supernatural harassing—retires to a monastery for penitence; his saddened wife seeking asylum in a neighbourng convent.

Such is the tale; flat, stilted, and altogether devoid of the true cosmic horror which makes weird literature. Yet such was the thirst of the age for those touches of strangeness and spectral antiquity which it reflects, that it was seriously received by the soundest readers and raised in spirit of its intrinsic ineptness to a pedestal of lofty importance in literary history. What it did above all else was to creat a novel type of scene, puppet-characters, and incidents; which, handled to better advantage by writers more naturally adpated to weird creation, stimulated growth of an imitative Gothic school which in turn inspired the real weavers of cosmic terror—the line of actual artists beginning with Poe. This novel dramatic paraphernalia consisted first of all of the Gothic castle, with its awesome antiquity, vast distances and ramblings, deserted or ruined wings, damp corridors, unwholesome hidden catacombs, and galaxy of ghosts and appalling legends, as a nucleus of suspense and daemoniac

fright. In addition, it included the tyrannical and malevolent nobleman as villain; the saintly, long-persecuted, and generally insipid heroine who undergoes the major terrors and serves as a point of view and focus for the reader's sympathies; the valorous and immaculate hero, always of high birth but often in humble disguise; the convention of high-sounding foreign names, mostly Italian, for the characters; and the infinite array of stage properties which includes strange lights, damp trap-doors, extinguished lamps, mouldy hidden manuscripts, creaking hinges, shaking arras, and the like. All this paraphernalia rattles with amusing sameness, yet sometimes with tremendous effect, throughout the history of the Gothic novel; and is by no means extinct even today, though subtler technique now forces it to assume a less naive and obvious form. An harmonious milieu for a new school had been found, and the writing world was not slow to grasp the opportunity.

German romance at once responded to the Walpole influence, and soon became a byword for the weird and ghastly. In England one of the first imitators was the celebrated Mrs. Barbauld, then Miss Aikin, who in 1773 published an unfinished fragment called "Sir Bertrand", in which the strings of genuine terror were truly touched with no clumsy hand. A nobleman on a dark and lonely moor, attracted by a tolling bell and distant light, enters a strange and ancient turreted castle whose doors open and close and whose bluish will-o'-the-wisps lead up mysterious staircases toward dead hands and animated black statues. A coffin with a dead lady, whom Sir Bertrand kisses, is finally reached; and upon the kiss the scene dissolves to give place to a splendid apartment where the lady, restored to life, holds a banquet in honour of her rescuer. Walpole admired this tale, though he accorded less respect to an even more prominent offspring of his *Otranto*—*The Old English Baron*, by Clara Reeve, published in 1777. Truly enough, this tale lacks the real vibration to the note of outer darkness and mystery which distinguishes Mrs. Barbauld's fragment; and though less crude than Walpole's novel, and more artistically economical of horror in its possession of only one spectral figure, it is nevertheless too definitely insipid for greatness. Here again we have the virtuous heir to the castle disguised as a peasant and restored to his heritage through the ghost of his father; and here again we have a case of wide popularity leading to many editions, dramatisation, and ultimate translation into French. Miss Reeve wrote another weird novel, unfortunately unpublished and lost.

The Gothic novel was now settled as a literary form, and instances multiply bewilderingly as the eighteenth century draws toward its close.

The Recess, written in 1758 by Mrs. Sophia Lee, has the historic element, revolving round the twin daughters of Mary, Queen of Scots; and though devoid of the supernatural, employs the Walpole scenery and mechanism with great dexterity. Five years later, and all existing lamps are paled by the rising of a fresh luminary of wholly superior order—Mrs. Ann Radcliffe (1764-1823), whose famous novels made terror and suspense a fashion, and who set new and higher standards in the domain of macabre and fear-inspiring atmosphere despite a provoking custom of destroying her own phantoms at the last through laboured mechanical explanations. To the familiar Gothic trappings of her predecessors Mrs. Radcliffe added a genuine sense of the unearthly in scene and incident which closely approached genius; every touch of setting and action contributing artistically to the impression of illimitable frightfulness which she wished to convey. A few sinister details like a track of blood on castle stairs, a groan from a distant vault, or a weird song in a nocturnal forest can with her conjure up the most powerful images of imminent horror; surpassing by far the extravagant and toilsome elaboration of others. Nor are these images in themselves any the less potent because they are explained away before the end of the novel. Mrs. Radcliffe's visual imagination was very strong, and appears as much in her delightful landscape touches—always in broad, glamorously pictorial outline, and never in close detail—as in her weird phantasies. Her prime weaknesses, aside from the habit of prosaic disillusionment, are a tendency toward erroneous geography and history and a fatal predilection for bestrewing her novels with insipid little poems, attributed to one or another of her characters.

Mrs. Radcliffe wrote six novels, *The Castles of Athlin and Dunbayne* (1789), *A Sicilian Romance* (1794), *The Romance of the Forest* (1791), *The Mysteries of Udolpho* (1794), *The Italian* (1797), and *Gaston de Blondenville*, composed in 1802 but first published posthumously in 1826. Of these *Udolpho* is by far the most famous, and may be taken as a type of early Gothic tale at its best. It is the chronicle of Emily, a young Frenchwoman transplanted to an ancient and portentous castle in the Appennines through the death of her parents and the marriage of her aunt to the lord of the castle—the scheming nobleman Montoni. Mysterious sounds, opened doors, frightful legends, and a nameless horror in a niche behind a black veil all operate in quick succession to unnerve the heroine and her faithful attendant Annette; but finally, after the death of her aunt, she escapes with the aid of a fellow-prisoner whom she has discovered. On the way home she stops at a chateau filled with fresh horrors—the

abandoned wing where the departed chatelaine dwelt, and the bed of death with the black pall—but is finally restored to security and happiness with her lover Valacourt, after the clearing-up of a secret which seemed for a time to involve her birth in mystery. Clearly, this is the only familiar material re-worked; but it is so well re-worked that *Uldolpho* will always be a classic. Mrs. Radcliffe's characters are puppets, but they are less markedly so than those of her forerunners. And in atmospheric creation she stands preëminent among those of her time.

Of Mrs. Radcliffe's countless imitators, the American novelist Charles Brockden Brown stands the closest in spirit and method. Like her, he injured his creations by natural explanations; but also like her, he had an uncanny atmospheric power which gives his horrors a frightful vitality as long as they remain unexplained. He differed from her in contemptuously discarding the external Gothic paraphernalia and properties and choosing modern American scenes for his mystery; but his repudiation did not extend to the Gothic spirit and type of incident. Brown's novels involve some memorably frightful scenes, and excel even Mrs. Radcliffe's in describing the operations of the perturbed mind. *Edgar Huntly* starts with a sleep-walker digging a grave, but is later impaired by touches of Godwinian didacticism. *Ormond* involves a member of a sinister secret brotherhood. That and *Arthur Mervyn* both describe the plague of yellow fever, which the author had witnessed in Philadelphia and New York. But Brown's most famous book is *Wieland*; or, *The Transformation* (1798), in which a Pennsylvania German, engulfed by a wave of religious fanaticism, hears "voices" and slays his wife and children as a sacrifice. His sister Clara, who tells the story, narrowly escapes. The scene, laid at the woodland estate of Mittingen on the Schuylkill's remote reaches, is drawn with extreme vividness; and the terrors of Clara, beset by spectral tones, gathering fears, and the sound of strange footsteps in the lonely house, are all shaped with truly artistic force. In the end a lame ventriloquial explanation is offered, but the atmosphere is genuine while it lasts. Carwin, the malign ventriloquist, is a typical villain of the Manfred or Montoni type.

Chapter 4

The Apex of Gothic Romance

Horror in literature attains a new malignity in the work of Matthew Gregory Lewis (1775-1818), whose novel *The Monk* (1796) achieved marvellous popularity and earned him the nickname of "Monk" Lewis. This young author, educated in Germany and saturated with a body of wild Teuton lore unknown to Mrs. Radcliffe, turned to terror in forms more violent than his gentle predecessor had ever dared to think of; and produced as a result a masterpiece of active nightmare whose general Gothic cast is spiced with added stores of ghoulishness. The story is one of a Spanish monk, Ambrosio, who from a state of over-proud virtue is tempted to the very nadir of evil by a fiend in the guise of the maiden Matilda; and who is finally, when awaiting death at the Inquisition's hands, induced to purchase escape at the price of his soul from the Devil, because he deems both body and soul already lost. Forthwith the mocking Fiend snatches him to a lonely place, tells him he has sold his soul in vain since both pardon and a chance for salvation were approaching at the moment of his hideous bargain, and completes the sardonic betray by rebuking him for his unnatural crimes, and casting his body down a precipice whilst his soul is borne off forever to perdition. The novel contains appalling descriptions such as the incantation in the vaults beneath the convent cemetery, the burning of the convent, and the final end of the wretched abbot. In the sub-plot where the Marquis de las Cisternas meets the spectre of his erring ancestress, *The Bleeding Nun*, there are many enormously potent strokes; notably the visit of the animated corpse to the Marquis's bedside, and the cabbalistic ritual whereby the Wandering Jew helps him to fathom and banish his dead tormentor. Nevertheless *The Monk* drags sadly when read as a whole. It is too long and too diffuse, and much of its potency is marred by flippancy and by an awkwardly excessive reaction against those canons of decorum which Lewis at first despised as prudish. One great thing may be said of the author; that he never ruined his ghostly visions with a natural explanation.

He succeeded in breaking up the Radcliffian tradition and expanding the field of the Gothic novel. Lewis wrote much more than *The Monk*. His drama, *The Castle Spectre*, was produced in 1798, and he later found time to pen other fictions in ballad form—*Tales of Terror* (1799), *Tales of Wonder* (1801), and a succession of translations from the German.

Gothic romances, both English and German, now appeared in multitudinous and mediocre profusion. Most of them were merely ridiculous in the light of mature taste, and Miss Austen's famous satire *Northanger Abbey* was by no means an unmerited rebuke to a school which had sunk far toward absurdity. This particular school was petering out, but before its final subordination there arose its last and greatest figure in the person of Charles Robert Maturin (1782-1824), an obscure and eccentric Irish clergyman. Out of an ample body of miscellaneous writing which includes one confused Radcliffian imitation called *The Fatal Revenge*; or, *The Family of Montorio* (1807), Maturin at length evolved the vivid horror-masterpiece of *Melmoth the Wanderer* (1820), in which the Gothic tale climbed to altitudes of sheer spiritual fright which it had never known before.

Melmoth is the tale of an Irish gentleman who, in the seventeenth century, obtained a preternaturally extended life from the Devil at the price of his soul. If he can persuade another to take the bargain off his hands, and assume his existing state, he can be saved; but this he can never manage to effect, no matter how assiduously he haunts those whom despair has made reckless and frantic. The framework of the story is very clumsy; involving tedious length, digressive episodes, narratives within narratives, and laboured dovetailing and coincidences; but at various points in the endless rambling there is felt a pulse of power undiscoverable in any previous work of this kind—a kinship to the essential truth of human nature, an understanding of the profoundest sources of actual cosmic fear, and a white heat of sympathetic passion on the writer's part which makes the book a true document of aesthetic self-expression rather than a mere clever compound of artifice. No unbiased reader can doubt that with *Melmoth* an enormous stride in evolution of the horror-tale is represented. Fear is taken out of the realm of the conventional and exalted into a hideous cloud over mankind's very destiny. Maturin's shudders, the work of one capable of shuddering himself, are of the sort that convince. Mrs. Radcliffe and Lewis are fair game for the parodist, but it would be difficult to find a false note in the feverishly intensified action and high atmospheric tension of the Irishman whose less sophisticated emotions and strain of Celtic mysticism gave him the finest

possible natural equipment for his task. Without a doubt Maturin is a man of authentic genius, and he was so recognised by Balzac, who grouped Melmoth with Molière's Don Juan, Goethe's Faust, and Byron's Manfred as the supreme allegorical figures of modern European literature, and wrote a whimsical piece called "Melmoth Reconciled", in which the Wanderer succeeds in passing his infernal bargain to a Parisian bank defaulter, who in turn hands it along a chain of victims until a revelling gambler dies with it in his possession, and by his damnation ends the curse. Scott, Rossetti, Thackeray, and Baudelaire are the other titans who gave Maturin their unqualified admiration, and there is much significance in the fact that Oscar Wilde, after his disgrace and exile, chose for his last days in Paris the assumed name of "Sebastian Melmoth".

Melmoth contains scenes which even now have not lost their power to evoke dread. It begins with a deathbed—an old miser is dying of sheer fright because of something he has seen, coupled with a manuscript he has read and a family portrait which hangs in an obscure closet of his centuried home in County Wicklow. He sends to Trinity College, Dublin, for his nephew John; and the latter upon arriving notes many uncanny things. The eyes of the portrait in the closet glow horribly, and twice a figure strangely resembling the portrait appears momentarily at the door. Dread hangs over the house of the Melmoths, one of whose ancestors, "J. Melmoth, 1646", the portrait represents. The dying miser declares that this man—at a date slightly before 1800—is alive. Finally the miser dies, and the nephew is told in the will to destroy both the portrait and the manuscript to be found in a certain drawer. Reading the manuscript, which was written late in the seventeenth century by an Englishman named Stanton, young John learns of a terrible incident in Spain in 1677, when the writer met a horrible fellow-countryman and was told of how he had stared to death a priest who tried to denounce him as one filled with fearsome evil. Later, after meeting the man again in London, Stanton is cast into a madhouse and visited by the stranger, whose approach is heralded by spectral music and whose eyes have a more than mortal glare. Melmoth the Wanderer—for such is the malign visitor—offers the captive freedom if he will take over his bargain with the Devil; but like all others whom Melmoth has approached, Stanton is proof against temptation. Melmoth's description of the horrors of a life in a madhouse, used to tempt Stanton, is one of the most potent passages of the book. Stanton is at length liberated, and spends the rest of his life tracking down Melmoth, whose family and ancestral abode he discovers. With the family he leaves the manuscript, which by young John's time is sadly

ruinous and fragmentary. John destroys both portrait and manuscript, but in sleep is visited by his horrible ancestor, who leaves a black and blue mark on his wrist.

Young John soon afterward receives as a visitor a shipwrecked Spaniard, Alonzo de Monçada, who has escaped from compulsory monasticism and from the perils of the Inquisition. He has suffered horribly—and the descriptions of his experiences under torment and in the vaults through which he once essays escape are classic—but had the strength to resist Melmoth the Wanderer when approached at his darkest hour in prison. At the house of a Jew who sheltered him after his escape he discovers a wealth of manuscript relating other exploits of Melmoth, including his wooing of an Indian island maiden, Immalee, who later comes to her birthright in Spain and is known as Donna Isidora; and of his horrible marriage to her by the corpse of a dead anchorite at midnight in the ruined chapel of a shunned and abhorred monastery. Monçada's narrative to young John takes up the bulk of Maturin's four-volume book; this disproportion being considered one of the chief technical faults of the composition.

At last the colloquies of John and Monçada are interrupted by the entrance of Melmoth the Wanderer himself, his piercing eyes now fading, and decrepitude swiftly overtaking him. The term of his bargain has approached its end, and he has come home after a century and a half to meet his fate. Warning all others from the room, no matter what sounds they may hear in the night, he awaits the end alone. Young John and Monçada hear frightful ululations, but do not intrude till silence comes toward morning. They then find the room empty. Clayey¹ footprints lead out a rear door to a cliff overlooking the sea, and near the edge of the precipice is a track indicating the forcible dragging of some heavy body. The Wanderer's scarf is found on a crag some distance below the brink, but nothing further is ever seen or heard of him. Such is the story, and none can fail to notice the difference between this modulated, suggestive, and artistically moulded horror and—to use the words of Professor George Saintsbury—"the artful but rather jejune² rationalism of Mrs. Radcliffe, and the too often puerile extravagance, the bad taste, and the sometimes slipshod style of Lewis." Maturin's style in itself deserves particular praise, for its forcible directness and vitality lift it altogether above the pompous artificialities of which his predecessors are guilty. Professor Edith Birkhead, in her history of the Gothic novel, justly
