GRATEFULNESS

Our existence happens around of small groups of people along all our terrestrial life. Make this counting and you will see that our familiar cycle or of friends is restricted. The humanity is built of the sum of these small groups. These can become gods or demons, winners or losers.

We have that small group of companions of the existence. Many of them already do years that we don't have contact, but those human beings will be eternally registered in our genetic memory and they will be perpetuated for the eternity. Your names are in abbreviated way for not committing anybody. Intuitively, we are sure when reading this work; they will know that we are honoring your names in the annals of the human knowledge.

They are Martins, Dirceu; Hemeritas, Bernadete Batista; Almeida, Edemur; Gusman, Francisco; Silva, Roberto Borges; Mota, Manuel Mendonça; families Almeida, Massucatto, Heméritas and Santoro; Babio, Maria Dolores G; Gangi, Eliana; Assunção, Maria da Graça F; Oliveira, Doraci; Diná; Raul and family; Hemeritas, Regina Isabel (*in memoriam*) and Almeida, Virgínia Massucatto (*in memoriam*). Receive our sincere gratefulness and hugs that are replete of love because we have the honor of knowing them in that plot of the existence. In case, any of our friends are not mentioned, want to forgive us, however know that will always be in our minds and hearts.

Thank you for everything.

BIOGRAPHY OF THE AUTHORS

Dallida Cedrack is Bachelor in Administration with master's degree in Sciences of the Computation. She is researcher, international lecturer, pioneer in the education and divulgation of new alternative system to the current socioeconomic models. She seeks the behavioural change and she trains the people to live new society style in which the money and the wealth are abundant for complete satisfaction and the people's desires, without anybody is excluded or lose any thing with the change. She possesses large experience in finances, systems analysis, training in informatics with wide social and economic vision of the man's existence in society. Besides writing various articles, she accomplished the translation of the book XUSING: The Systemic Theory of Usuarism of authorship of Pichaël Sueckes for the English language.

Pichaël Sueckes is Bachelor in Economic and Administrative Sciences with master's degree in Accounting Sciences. He is author of the book "XUSING: The Systemic Theory of Usuarism". He is international lecturer, accomplishes lectures and courses about the new systematics as alternative model for the human society in its aspects economic, social and political. He is considered a citizen of the world, always traveling to new regions in order to divulge this Theory and the XUSING Project. He dedicates all his life to change the current obsolete economic and political systems as capitalism, socialism, communism and monarchism because all are generators of problems and they only act in a palliative way, without solving the great world questions that afflict the humanity.

FOREWORD

We asked the reader much patience and small effort to read this work of the beginning until the end. We make this appeal because its reading is extremely important for you, your family, your country, the Earth Planet and mainly all the partners of our existence, such as: the human beings, animals, vegetables, earth, air, water, fire, the stars and the immensity of the universe with its galaxies, black holes, comets, molecules, atoms and electrons. It doesn't matter what is your faith, social class or conviction, you will see that it will be worthwhile.

We wrote and edited this proposal in four hands and two minds in approximately twenty months in the city of Foz do Iguaçu, Paraná, Brazil. This city in its powerful wealth lives together in harmony with various ethnic groups and it unites the beauty of the nature with the gracefulness of the union between people and habits. Foz do Iguaçu has history and magnificent legends; it offers as gift us with powerful natural beauty of the waterfalls and its parks. Also, it presents rare beauty that we observed in the tangency point between the end of the night and the dawn. We see an exuberant vision with stars that irradiate strong lights, soon after it paints in the sky the shiny colors of the solar irradiation. So many times, we appreciated such beautiful spectacle.

This masterpiece is not romance, story, soap opera, self-help or review of gossip political or artistic. It is a Project that propitiates the dear reader a great hope of solution to the social problems, political, economic, administrative and monetary problems that are already parts of our daily life, whether we wish or not. This Project accomplishes the dream that is so expected for generations along millenniums because it exhibits that this gift it is possible of becoming reality, without it is utopia.

Therefore, there will be compensation. The reading of all the parts does with that you understand the whole to motivate you to make correct decision and to do the sure thing. It is not worthwhile to browse its pages or to read a topic in a random way to discard soon after, affirming: "I think I already know, it doesn't operate or that is good for another to do". You have to read it in the sequence of the topics from beginning to end. In case the explanations or themes are hazy, persist, continue and don't discourage. When you terminate the reading, you will understand of what we are treating and what represents for your own benefit. Don't lose this opportunity; don't let to pass in blank. Know that in our existence, the opportunities are little, unhappily when they appear, we lost them and later we stayed all our life lamenting the spilled milk, therefore we used the reasoning to justify our failures and sufferings that we caused our dearer beings for the loss "of that" great chance. Invest in this innovator proposal that is treated with detail in this work. Perhaps this chance is last alternative capable to generate light focus in the bottom of the well in which the human society is inserted, where the socioeconomic misfortunes are justified on behalf of the current system. Therefore, read it with wish, hope and conscience. Believe, this Project gives you opportunity to be the realizer of the change of the world and of yourself.

This Project that we offered you as gift has beginning, way, end and feedback. This signifies that we equated an alternative model with complete social, political and economic solution, without being palliative. It turns viable its implantation financially through the abundance of resources that already exists in availability for any nation.

We exhibited in details that the proposal is equated. Paradoxically, we verified that problem never went lack of money to solve the serious questions of the human life in society. It is fact evidenced by the trillion of trillion dollars that are spent every year for the governments as solution tentative, without never to solve the serious socioeconomic problems through monetary fortunes that are foreseen in social budgets or of gigantic social infrastructures in any country of the world. Add in this immensity of money, other trillion of trillion dollars donated annually by social investors or altruistic sponsors.

As if it was not enough. There is more other trillion dollars that are lent or donated by international financial organisms as form of help to the countries. Add all this, you will see that the countries spend rivers of money with inexpressive reached result, therefore this only enriches minorities or group of “friends” of the detainers of the power. Facts and data prove that every lot of money with certainty is going to the pocket of somebody or it gets lost in the corruption because more than 80% of the world wealth are in hands of minorities or few families. The billion of beggars that are “helped” socially with those trillion of trillion dollars stay only licking the lips of desires and suffering of strange mercy as support of this degrading practice. Everything is hidden as inevitable solution by incompetent technocrats or bureaucrats that indirectly benefit with that hypocrisy. Only to have the idea, see that the cost of our proposal is insignificant and unique to end in a definitive way with the social and economic problem in comparison with the immensity of money that governments spend every year.

Verify that the cost of the investment is zero, because our proposal considers the cost of the lost opportunity, besides returning the investment with very more wealth and well-being for majority of the population. It only represents a tiny part of all the money that today already spend in a palliative way. We idealized this proposal in such a way that someone can introduce it as Project to the social investors, sponsors or governmental authorities. If it is the case, adapt the values of the budget in agreement with the proposal of fundraisings and only change the proposers’ name that will present the Project. The form how we wrote, it avoids that proposer depends on somebody with high knowledge to present it. Nothing will cost; make difference; try at least. With certainty the people with more necessities will thank with the purity of your hearts. (See Figure-12 until 24)

As support, we utilized German Method ZOOP “Ziel Orientierte Projekt Planung” (Planning of Oriented Project for Objectives) to write this Project. This is simplified with small adjustments so that the global idea of our proposal satisfies to the diverse requisites of social sponsors in level national or international. With that, we utilized scientific fundamental, so much for its presentation as for execution so that the proposal solves in a definitive way the social or economic problems, which it will result in potential tool that will give great chance of its approval before the financial institutions that seek the social development, human well-being and the preservation of the environment.

Ponder, the change is part of our existence, everything is in constant transformation. Follow your intuition, it is the natural impulse, you will thus be capable to liberate and to build unimaginable realities. Leave the trap of the current system that always terrorizes the humanity on behalf of better days than never arrive. Know that you won’t be alone in this healthy responsibility, trust us. Dream how it will be safe to live at any country with the terminus of the insecurity, the end of the lack of income and elimination of the illicit acts with its high social cost for the State and to the people. Change for new economic model that will integrate all countries in global village without frontiers, besides generating wealth, usufructs and incomes, without there is high investment cost, because we will utilize all the existent organizational resources. Believe, the safety and liberation will be total.

With love receive our sincere Usuarist greeting,

Michael Sueckes & Dallida Cedrack

USUARIST PRINCIPLES

They give trust to our proposal and guarantee that its objectives are fulfilled and the results fully satisfied because this Project is based in the Systemic Theory of Usuarism whose postulates are mentioned below. The solution is simple, that's enough to abstract of the current system for its comprehension and to apply new Computational Monetary System activates the economy, generates income and solves crucial problems. This proposal accomplishes the same things under new perspective and it conquers high socioeconomic and environmental gains with productivity, it only requires behavioural change and open mind.

INTRODUCTION

"If we wish everything to stay how it is, it is necessary that everything changes."

Giuseppe Lampedusa

"If the misery of our people is not caused by the laws of the nature, but for our institutions, our fault is big".

Charles Darwin

The state-owned grandiose and expensive infrastructures of the countries, international aid organizations and the organizations of the Third Sector of the civil society (non-profit) seek to solve serious social problems that last long per millenniums, however they don't obtain the definitive solution to the human beings' basic necessities that become excluded in its majority for imposition of the perverse existent socioeconomic model in the world that privileges minorities and it impedes that all the citizens live with dignity and well-being in any country. This current economic model possesses serious systemic errors because it is based on the destruction for the consumption to generate income and mistakenly to move the economy; this destruction is corroborated in any country because it was built in a botchy way, which creates economic fundamentals with harmful results. The result is catastrophic because it isolates the familiar unit (individual), the public unit (the State) and the producing unit (corporation public or private) in the middle of the society, even if these units attempt to group in associations, cooperatives, unions, political parties or socioeconomic networks to acquire force political or economic. This existent model impedes that the well-intentioned purposes are concretized, mainly in relation to the obtaining of resources and generation of income. It places the whole human society in a straitjacket, inclusive the own State or Country. As consequence, stays the whole time in removing symptoms of the situation, to practice mendings or to roll the problems infinitely.

This perverse socioeconomic model creates the scarcity in the middle of the abundance, for instance, the world hunger in the middle of the abundance of produced foods; the lack of income in the middle of the abundance of available capital, the lack of products or services in the middle of the abundance of wastes or idle stocks, among others. Those practices already proved its inefficacy for the solution of the immense current problems in which more and more become worse; annually it is consuming trillion dollars in helps that never end. Observe then that there is much money, available material and human resources or in potentiality that are impeded of circulating for current system. It impedes that the humanity lives with happiness and enjoy the material and technological well-being in that persons can gain, without anybody loses. The problems of the economic scarcity, the lack of money and infrastructure lack only exist due to the countless structural faults in the current system. Also, it causes the brutal punishment most of the human beings anywhere in the Planet Earth without any need. Another shame of its impotence is to allow the deviations of trillion dollars that are diluted in the corruption, wastes or illicit enrichment.

The solution of the serious socioeconomic problems must be systemic so that the human society can really be organized and to integrate its agents in a wide global network, without frontiers and without the blockades of the limitation of the use of the money in any region of the planet. It has to practice new monetary system without the limitations of the coins utilized at each country, without isolation of the individuals or of the corporations. Therefore, this solution is immediate and it begins with the change of the current economic and monetary model to substitute it for new monetary system that eliminates the physical coin or hard cash with all its correlate costs and to avoid that there is its transfer among people or among current accounts. Believe, this simple change will eliminate 80% of the serious economic and social problems, besides the illicit acts that involve the possession of the money, purchase of favors of somebody else through the corruption, bribery, piracy of products or contrabands. We go beyond, we offered 3 fantastic strategies as solution.
