Introduction

Hello there. In this guide I'm going to talk about finding highly targeted keyword domain names, that are easy to get ranked well on Google and other search engines. I'm also going to talk about an opportunity that could possibly net you a few hundred \$ in just a few days.

Let's get started by talking a little bit about what keyword domains are, and how can they help you.

Let's say for example, that we're targeting the keyword “dog training advice”. A keyword domain, in this case, would be, for example, dogtrainingadvice.com/net/org, or mydogtrainingadvice.com, or dogtrainingadvicesite.com.

The reason why you want to use a domain name like these, is that they can be pretty easy to rank with in the top 10 in Google. Let me show you some examples:

agility training for dogs Search

It's not that hard to find these kinds of examples - the truth is, that a keyword-targeted domain name makes it easier to rank for your target keywords!

BUT there's a problem. You see... Most of these keyword-targeted domain names are already taken. It's not that easy anymore to find available keyword domains.

[The Best Domaining Course, Link Building Tools, SEO Training and More!](#)

That is why we're going to use a specific tool to come up with tons of keyword-targeted domains - The best thing about this tool is that it only takes a few seconds to generate these domain suggestions, and many of these domains are still available!

Now, let's move onto our method...

The Method

Let me introduce you to [Keyword Domain Generator](http://greatpremiumdomains.com/keyworddomaingenerator/)
(<http://greatpremiumdomains.com/keyworddomaingenerator/>):

The Easiest Way to Find Highly Targeted Keyword Domain Names!

Just insert your preferred prefixes and/or suffixes, and your keywords below, and hit 'Generate'!

Ideas:

- Use the [suggested prefixes and suffixes](#) or write your own!
- Search for local business domains by inserting [city names](#) as prefixes!
- Find more great domains and opportunities at [Great Premium Domains.com](http://GreatPremiumDomains.com)!

The first thing you need is a keyword list. You can use, for example, the free Google Keyword Tool to create your list, or any other tool.

[The Best Domaining Course, Link Building Tools, SEO Training and More!](#)

My Recommendations:

[Market Samurai](#)

This has quickly become my favourite keyword research tool. It generates keyword lists using the Google KW Tool, but the way it presents this data makes things a lot easier for its user.

[Instant Traffic Creation](#)

In ITC you can find a very good and affordable keyword research service. They won't create just any keyword list for you, but they'll pick the easiest, less competitive keywords in your niche.

Once you have your keyword, all you need to do is paste that list to Keyword Domain Generator, set your preferred prefixes and suffixes, and hit 'Generate'.

KDG already has some pre-inserted prefixes and suffixes (like “my-”, “-site” and so on), but you can add your own if you'd like.
