

TWITTER TRAFFIC AUTOMATION

TWITTER FACTS

"Twitter is ranked as one of the 50 most popular websites worldwide by Alexa's web traffic analysis. ...Compete.com blog entry ranked Twitter as the third most used social network based on their count of 6 million unique monthly visitors and 55 million monthly visits. ...a Nielsen.com blog ranked Twitter as the fastest-growing site in the Member Communities category for February 2009. Twitter had a monthly growth of 1,382 percent, Zimbio of 240 percent, followed by Facebook with an increase of 228 percent."

There are many e-books out there telling people how effective traffic from Twitter is, but most of them fall short in revealing how it is actually done. Some "Twitter Gurus" are even charging as much as \$100 for their e-books or secrets. I will save you the inconvenience from buying them and share my knowledge **FREE of charge**. Moreover **no software** is necessary to successfully implement this technique.

How do you attract traffic from Twitter?

For those who are not familiar with Twitter, it is a type of Social Network whereby you "follow" somebody's tweets/messages. When you decide to follow a person, that person has the option to reciprocate. If he or she follows you, then your tweets or messages will appear on his or her Twitter page. There are two ways you can attract traffic from Twitter (a) People reading your profile and clicking on your website link on the profile and (b) From the Tweets/messages (with links attached to the Tweets. I will explain further on this later).

Methodology to get traffic from Twitter

This guide will be in 3 parts:

- (1) Setting up a Twitter Account – The Do's and Don'ts
- (2) Techniques on how to attract huge followers and translates into huge traffic
- (3) The Experiment: Monetize your Traffic

Part 1: Setting up a Twitter Account – The Do’s and Don’ts

If you have a Twitter account, proceed to Part 2.

To start of, you need a Twitter account.

- 1) Visit Twitter.com
- 2) Enter your desired nickname.

Please don't use spammy nicknames. Nicknames such as Supercashmachine, EarnMoney247 and the likes will put people off when they view your profile. It is important to remember, No followers mean No visitors.

Make sure you select your desired nickname according to your interest; better still use your real name if you're famous. The idea is to have interesting nicknames to encourage web surfers to take a peek at your Twitter profile. E.g. of good nicknames are: **garden4life**, **Music_Depot**. The nickname tells us immediately what the interest of the person is.

- 3) Once you've set up your Twitter account, proceed to "**Settings>Account>One Bio Line**" tab. At the "**Bio line**" section, please state briefly your interest e.g. gardening, music, business etc. And, make sure you end your "**Bio**" with your website URL. Twitter by default uses bit.ly URL shortening service to abbreviate long URLs. So even if you do not shorten your URL, Twitter will automatically shorten it

Account Password Devices Notices Picture Design Connections

Name: Enter your real name, so people you know can recognize you.

Username: Your URL:
http://twitter.com/ No spaces, please.

Email:

Time Zone: (GMT-06:00) Central Time (US & Canada) ▾

More Info URL: 4
Have a homepage or a blog? Put the address here. (You can also add Twitter to your site here)

One Line Bio: 3
About yourself in fewer than 160 chars.

Location:
Where in the world are you?

Language: English ▾
What language would you like to Twitter in?

Protect my updates
Only let people whom I approve follow my updates. If this is checked, you WILL NOT be on the public timeline. Updates posted previously may still be publicly visible in some places.

Save

for you. It is advisable to set up your own bit.ly account so that you can manage and control your own shortened URL. [Click here](#) to get your own bit.ly

- 4) Insert also your website URL at “**Settings>Account>More Info URL**”.

Preferably use your own bit.ly account to shorten your URL, otherwise Twitter will generate its own.

- 5) Proceed to “**Settings>Picture**” tab. It is advisable that you upload your own photo to give personalized feel to your profile.

Do not upload copyright picture for your profile. You do not want you Twitter account to be suspended. You certainly do not want your Twitter account to be suspended when you have 10,000+ followers.

- 6) Generally, your Twitter account is ready. Feel free to browse and customize the rest of your profile.

Customize your Twitter profile and make it interesting and refreshing using [MyTweetSpace](#).

Part 2: Techniques on how to attract huge followers and translates into huge traffic

After setting up your Twitter account, you need to create an account with [TweetLater](#) and [Twollo](#) to automate the “recruitment” of your followers. These two are web-based automation services “white listed” by Twitter. You can be rest assure that you will not be blacklisted.

Setting up TweetLater account: Free of Charge

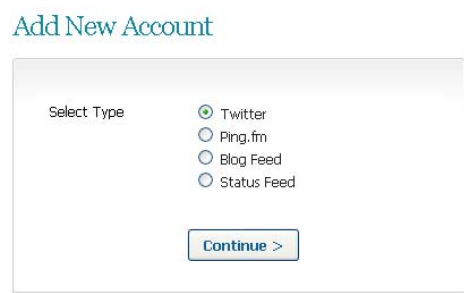

Essentially, [TweetLater](#) automates your “**Auto Welcome**” to your new followers, send your customized welcoming message, “**Auto Follow**”, “**Vet Followers**” and “**Auto Unfollow**”. These will be further explained in details once you’ve set up your free [TweetLater](#) account.

Basic things you need to set up with [TweetLater](#)

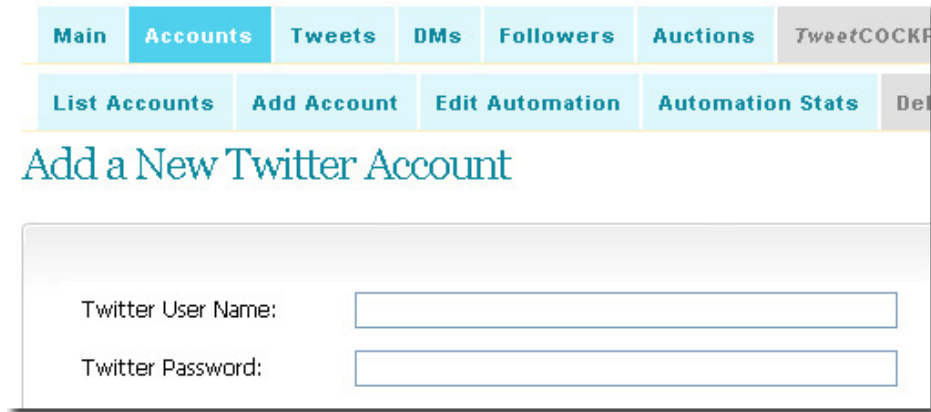

- 1) Proceed to [TweetLater](#) and [click here](#) to sign up for free.
- 2) Once you’re logged in, at the dashboard, proceed to “**Accounts>Add Account**” tab.

(a) Check the Twitter button and click “**Continue**”.

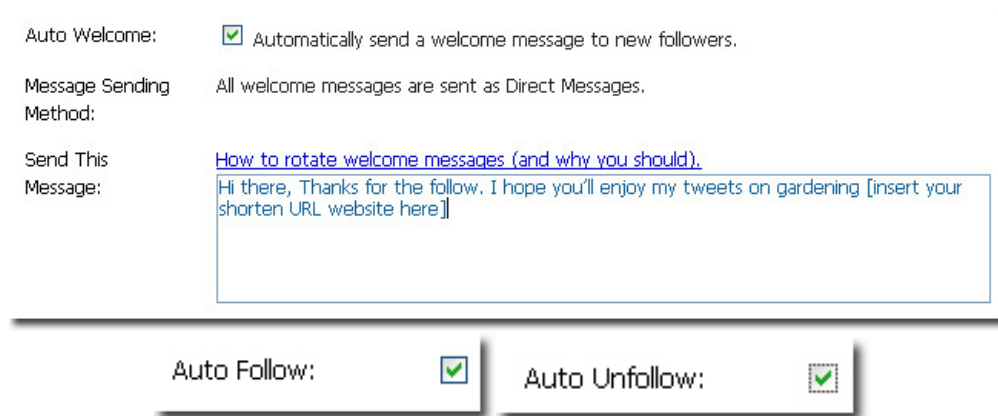

(b) At “**Add a New Twitter Account**”, enter your “**Twitter User Name**” and “**Twitter Password**”. i.e. key in your actual Twitter ID/username and password. [TweetLater](#) will communicate directly with your Twitter account for the automation to work.

Please make sure you have entered your Twitter User Name/ID and password correctly.

(c) Please check the following boxes: “**Auto Welcome**”, “**Auto Follow**” and “**Auto Unfollow**” and then click “**Save**”. There are other options as well; it is up to you whether you want to check them.

It is important to note that you will not see new followers at least **for the first** 8 hours because [TweetLater](#) will cross check for new

followers within the said period. So, please be patient. You can check your automation statistics at "**Accounts>Automation Stats**" tab

- 3) The next important thing is to enter your welcoming message at "**Send This Message**".

You must not leave this step out. When someone follows you, [TweetLater](#) will automatically send a Direct Message (DM) to the new follower. It is crucial that you do not "over sell" your website. [TweetLater](#) puts it quite succinctly "The message should not be about you, it should be about your follower and your future interaction with your follower."

E.g. a non-spammy welcoming message: *"Hi there, Thanks for the follow. I hope you'll enjoy my tweets on gardening [insert your shorten URL website here]"*

Auto Welcome: Automatically send a welcome message to new followers.

Message Sending Method: All welcome messages are sent as Direct Messages.

Send This Message: [How to rotate welcome messages \(and why you should\).](#)

Hi there, Thanks for the follow. I hope you'll enjoy my tweets on gardening [insert your shorten URL website here]

Important to include your website URL in the message as it will direct traffic to your website.

- 4) You're basically done here, next is proceed to [Twollo](#).

Setting up Twollo account: Free of Charge

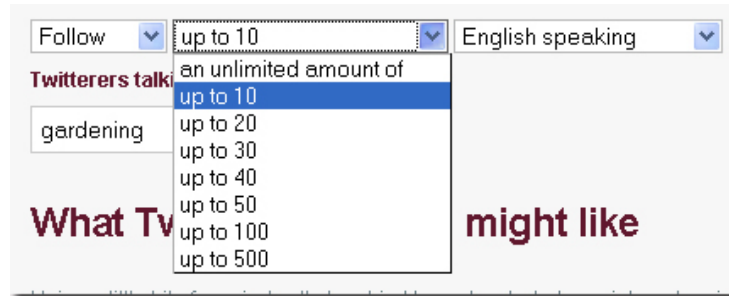

What's [Twollo](#) all about? In essence it is a web-based automation tool that searches for fellow Twitters of the same interest. Which is why it is important to state your interest in your "**Bio**" in your Twitter profile. You might be saying, "*Hang on, why am I trying to follow others when I want people to follow me instead*". Well, the way Twitter works is, if you follow someone and the person you follow shares the same interest and likes your profile, they will follow you back. Both will mutually benefit from this system. But I have a little secret that will help bring more traffic to you than to your followers.

Basic things you need to set up with [Twollo](#)

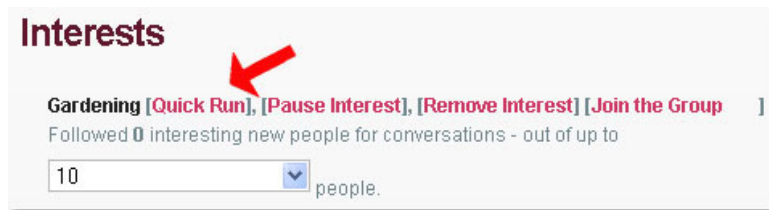

- 1) Proceed to [Twollo](#) and [click here](#) to sign up for free.
- 2) Login with your Twitter ID/Username and password and follow the instructions.
- 3) At "**Interest> Twitterers talking about**", enter your interest e.g. Gardening, Gardening Tips, Work from Home, Earn Money Online

A screenshot of the Twollo 'Interests' form. The title 'Interests' is in a bold, dark red font. Below the title, there are three dropdown menus: 'Follow' (set to 'Follow'), 'up to 10' (set to 'up to 10'), and 'English speaking' (set to 'English speaking'). Below these is a section titled 'Twitterers talking about:' in a bold, dark red font. Underneath, there is a text input field containing the word 'Gardening' and an 'Add' button to its right.

- 4) Then configure how many people you want to follow and in what language. Number of people to follow ranges from 10 people to Unlimited Number. If you select 10 people, [Twollo](#) will search for 10 people with same interest and then stop. If you select "**an unlimited amount of**", [Twollo](#) will continue searching for infinite number of people with the same interest.

- 5) Once you've entered your configuration enter "**Add**". And that's it.
- 6) To test whether you have done it correctly, click on "**Quick Run**"

- 7) Then, check your Twitter profile whether the number of "following" has increase. The people you follow, in turn may follow you back. That's how you build your "follower" numbers.
- 8) And that's it, set and forget it – Everything will be done automatically from now on.

You may not find a sudden surge of followers because of various factors. (1) As this is a free service, [Twollo](#) allocate its resources equally among its members and therefore you will be put in a queue with the rest of other [Twollo](#) members. When it is your turn, [Twollo](#) will search and update people you are following (2) The people you are following chooses not to follow you back (Please do not be offended) (3) Give people time to follow you back, not everyone check their Twitter account daily. (4) The "interest" you have selected is not that popular. Therefore, add variation of your "interest", e.g. gardening, gardening tips, garden tools, fruits, fertilizers and etc. By adding variations, the number of "followers" will increase dramatically, subject of course to how popular the "interest" is.

As for the little secret I mentioned earlier on how to drive further traffic to your website or Twitter profile; the method is to have regular tweets/messages and adding your URLs at the end or beginning of the tweets/messages. "But I don't have time to tweets/messages everyday, what should I do?" you might ask. The answer is to automate your tweets/messages by using either one or all of these web-based automated tweets senders: (a) [TwitRobot](#) (b) [Twitterfeed](#) (c) [Twaitter](#)

How to use TwitRobot?

1) Visit [TwitRobot](#). Click [here](#) to register with TwitRobot.

2) Click on "Twitter Login"

A blue button with rounded corners and a slight shadow, containing the text "Twitter Login" in white.

3) Enter your "Twitter ID/Username" and "Password" and then click "Allow"

A screenshot of a Twitter authorization dialog box. It features the Twitter logo (a lowercase 't' in a blue square) on the left. The text reads: "An application would like to connect to your account". Below this, it says: "The application twitRobot by Twit Robot would like the ability to access and update your data on Twitter. This application plans to use Twitter for logging you in in the future. Not using Twitter? [Sign up and Join the Conversation!](#)". There are two input fields: "Username or Email:" and "Password:". At the bottom, there are two buttons: "Deny" (grey) and "Allow" (green with a right-pointing arrow).

4) At the Dashboard menu, Click on "My Tweets" button

5) It will open "My Product's Advertisement tweets". Create as many tweets/messages and add your shortened URLs at the end of each tweets. Make sure the tweets/messages are under **140 characters** or your shortened URLs will be cropped out.

6) Once you have done entering your Tweets/messages, click “**Auto Posting**” button.

7) At the Auto Posting section:

Set the interval of your tweets, i.e. every 3 minutes to every 6 days. There are three choices of tweets: “**RSS Feed**”, “**My Product’s Advertisement**” and “**Some Random Auto Tweets**”

- 8) Checked **"My Product's Advertisement"** box. Make sure you have entered your lists of tweets/messages in **step 5**.
- 9) For the sake of variety, also checked the **"Some Random Auto Tweets"** box as well and/ or **"RSS Feed"** box. However, you are not able to insert your shorten URLs
- 10) Set your **"Priority"** settings accordingly. If you want **"My Product's Advertisement"** tweets/messages to be sent out more than **"Some Random Auto Tweets"** and/or **"RSS Feed"**, then set **"My Product's Advertisement"** priority higher.
- 11) Then, click **"Save"** to save your settings.
- 12) At **"Current status"**, click **"Start"**. Check your Twitter profile to view your posting. Your task is done.

How to use Twitterfeed?

- 1) Visit [Twitterfeed](#) and create an account for free. [Click here](#) to register with [Twitterfeed](#).
- 2) Once logged in, click **"Create New Feed"** and follow the instructions in **"Step 1: Create a new feed"** which is basically to connect to your Twitter account.

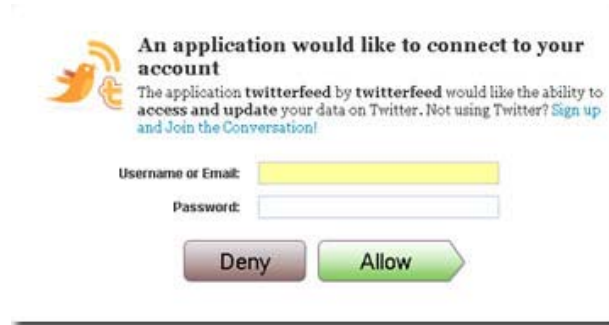

- 3) Click on **"Connect your feed to your Twitter account"**

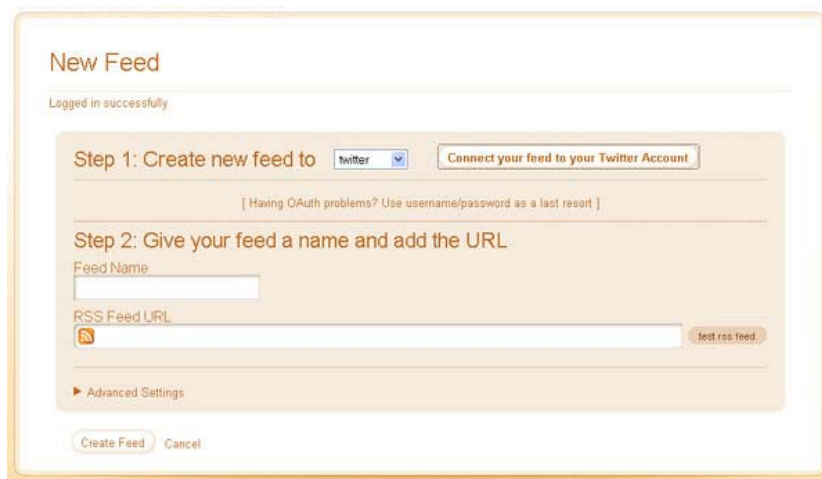

Please ensure that you are logged in to your Twitter account before you click on the **"Connect your feed to your Twitter account"** button

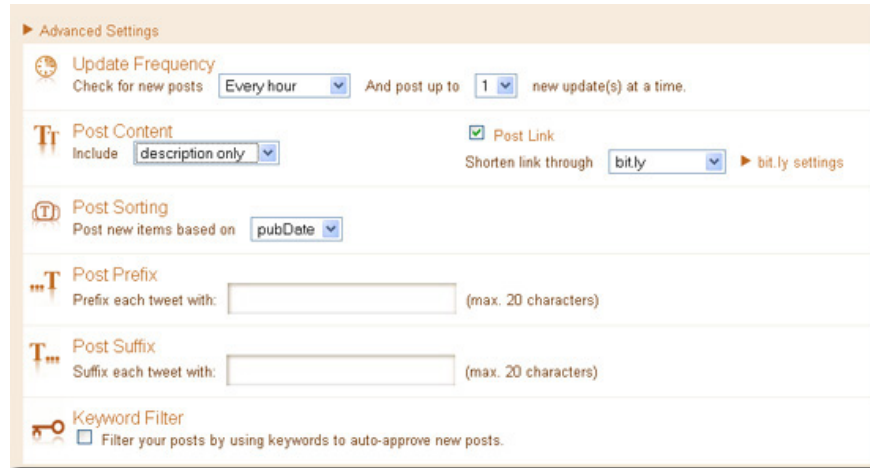

4) Next step, please click **“Allow”**

5) **“Step 2: Give your feed a name and add your URL”**. Enter your Feed Name and the URL of your RSS feed and then click on **“test rss feed”** button. If the test says **“ok”**, proceed to **“Advanced Settings”**.

6) Then click **“Advanced Settings”**. The configuration is self explanatory. At **“Post Content”**, select what you want to post from your RSS feed. If you choose **“Title only”**, the tweets will display the Title and at the end it will automatically insert the URL of the Title.

- 7) If you wish to insert your own shortened URL, select **"Description Only"**. Enter your shortened URL at **"Post Prefix"** if you want your shortened URL at the end of the tweets. If you want the shortened URL at the beginning of the tweets, select **"Post Suffix"**. It is advisable to use **"Post Suffix"** to avoid you shortened URL to be cropped out.
- 8) Click **"Create Feed"** and you're done.

How to use Twaitter?

- 1) Visit [Twaitter](#) and login using your Twitter ID/Username and password. [Click here](#) to register with Twaitter.
- 2) To automate and recur your Tweets for an indefinite period, typed in your tweet/message and then click **"Twait"**.

- 3) “**Schedule your message**” menu will expand. Click on the “Recurring” button. Set the date and time of your first schedule tweets.

Schedule your message:

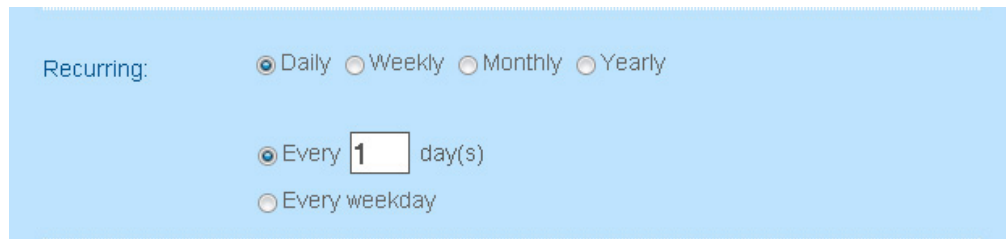

One Time Recurring

Day: 

Time: :

TimeZone:

- 4) Select how often you want the same tweet/message to be sent: Daily, Weekly, Monthly, Yearly.

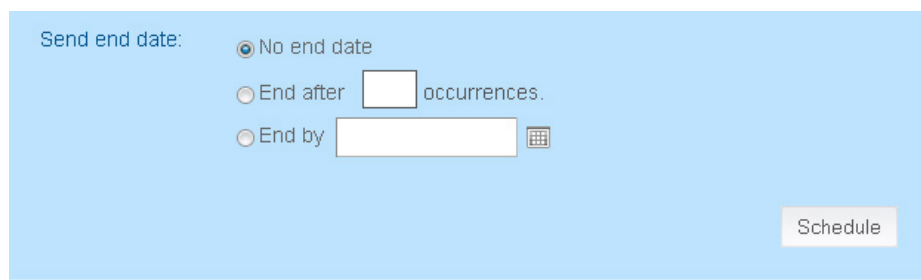

Recurring: Daily Weekly Monthly Yearly

Every day(s)

Every weekday

- 5) If you want the tweets/messages recurred indefinitely, then select “**No end date**”

Send end date: No end date

End after occurrences.

End by 

- 6) Finally, click “**Schedule**” to save the tweet/message setting.
- 7) To check the status of your schedule tweets/messages, click on “**Scheduled Messages**”

8) Try to create as many tweets/messages and change the recurring time for the delivery of each of the tweets/messages.

Important: When using [TwitRobot](#), [Twitterfeed](#) or [Twaitter](#), please adhere to Twitter terms and conditions and avoid aggressive following and excessive tweets. Excessive Tweets will put people off and usually results in losing followers. Please automate your tweets/messages moderately. Once in a while a bit of “human” tweets will be nice.

Other Tweets/Messages Scheduling or Feeder Services

Part 3: The Experiment: Monetize your Traffic

You can experiment with any affiliated programs to monetize your Twitter traffic. In my case, I chose [People Search affiliate program](#). The Twitter traffic conversion ratio is simply astounding.

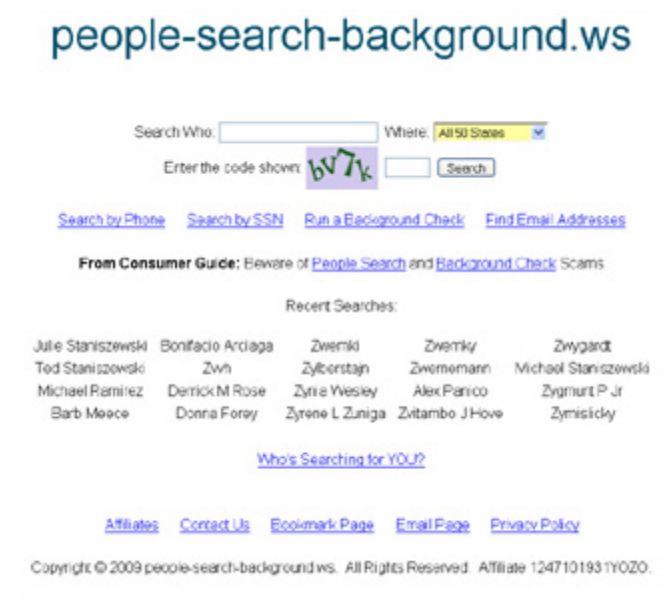

A brief summary of the People Search affiliate program and how you will earn from it

People searches are absolutely HUGE! Did you know [30% of all searches on Google and Yahoo](#) are people search related? Think about it; people use

the Internet to look up old friends and classmates, find background information on job applicants and business partners, find romance, and connect with others. To see the potential for yourself go to [Google's free keyword tool](#) and look up some huge markets like "weight loss" and "make money." Then type in "[free people search](#)" and you'll see what I'm talking about.

Earning Streams

1) When you sign up with the [People Search program](#), you will be given your own search engine. The first thing when you join the [People Search program](#), you are required to input your ClickBank, HD Publishing and Mylife affiliate IDs. Every time people use your search engine, they are referred to either one of the said affiliates. So you earn commissions from the searches.

<http://people-search-background.ws/>

For the fun of it, check out the Search Engine above and type your name or your friend's name in the search engine.

2) In order to enjoy the full benefit of your Search Engine, you must complete all 3 steps required under the program. After completing all 3 steps, [People Search](#) will guarantee you a minimum \$125.00 commission

Thank You for previewing this eBook

You can read the full version of this eBook in different formats:

- HTML (Free /Available to everyone)
- PDF / TXT (Available to V.I.P. members. Free Standard members can access up to 5 PDF/TXT eBooks per month each month)
- Epub & Mobipocket (Exclusive to V.I.P. members)
