# **Our family has not paid out of pocket for groceries or gasoline in over a year, and never will!**

**First of all I want you to know that everything you are about to read is 100% true. Secondly, I want you to know I am not a writer. So if you will give me a little bit of slack I am going to share with you exactly how my family has not paid out of pocket for gasoline or groceries in over a year, and never will for the rest of our life.**

**My name is Dawn Calvert. For over 5 years I was a single mother working in finance for a major Fortune 500 company. Our family lives in the Marietta, Georgia area. I have a large family; 5 sisters and we were born and raised here. At the end of this report I will give you my phone number and contact information because I want you to know I am a real person, just like you.**

**I was looking for a way to supplement my full time salary to pay for my two children's private Christian education. That search, lead me to a seminar in Atlanta, Georgia, where I first met my husband, Dale Calvert.**

**Our Family**

Many people call Dale a serial entrepreneur. After doing the long distance dating thing for a year, we were married in October and I was laid off in April. Thankfully, Dale and I had worked together on several other business projects even before we were married.

In today's economy, to not have a financial plan B makes no sense to me. My husband teaches that people are in one of six financial states.

#1: Lack

#2: Desperation

#3: Mediocrity

#4: Growth

#5: Comfortable

#6: Wealth

I hope that as you are reading this you have not fallen into a state of Lack or Desperation. Most people live their lives in a state of mediocrity. They know they have the potential to do more, be more, have more, help other people more, but they get bogged down by the demands of life.

They are too busy building someone else's dream to live their own. They are too busy making a living to make any money and create financial stability.

Helen Keller said, "*Hell starts when the person you are, meets the person you could have become.*" Why am I sharing this philosophy with you?

I understand that you are reading this report to learn how your family can receive free groceries and gasoline. That part is a "no brainer". I know that if over the next few pages I can effectively communicate this process, that virtually everyone reading my words right now will be receiving free groceries in a short period of time. That means you!

Thousands of everyday people across the United States and Canada have already taken advantage of what I am going to share with you. So I am excited for you! I just ask that you stay with me, and **read every sentence carefully**, and I am going to do my best to share with you this awesome blessing.

I know that there will be several experienced, business minded people who will read this report. Maybe a friend, business associate or relative passed this report on to you. So if you

will allow me, I would like to take just a minute and **spea**k to the impatient entrepreneurs first.

## A Short Message to Entrepreneurs

You understand that wealth is created in front of trends. I don't have to explain that to you. You also understand that every major trend in this country has been created by one group, the baby boomers. From Gerber baby food to plastic surgery and everything in between.

I heard a preacher say one time, *"If we could see the future, we would all be millionaires."* I felt like standing on the pew and shouting, "NO! NO we wouldn't, not if we don't take advantage of what we see!"

So let me take a minute and share with you one of the hottest trends we will probably see in our lifetime.

### HOME GROCERY DELIVERY AND PICK UP

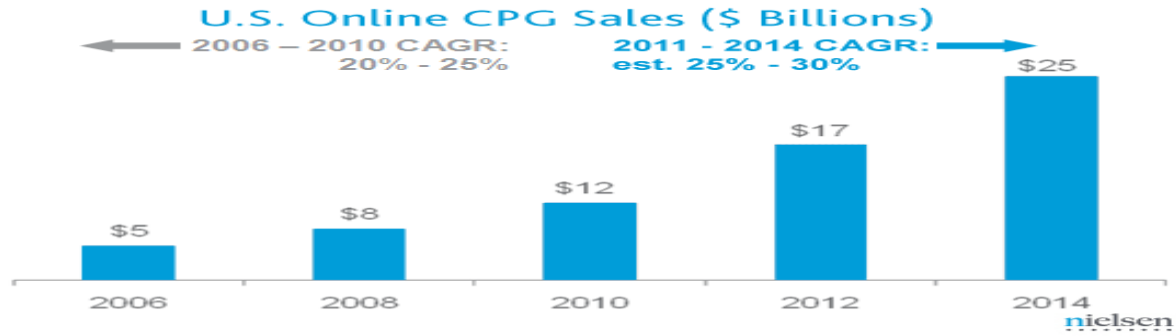

At first glance this trend makes no sense to some Entrepreneurs, including my husband Dale, until he got the facts. Dale thought, "Why would anyone order groceries online and have them delivered, if they can just go to the grocery store and pick them up?"

Keep in mind this is coming from a man who probably hadn't spent 10 hours of his life in a grocery store. 😊

I can tell you, as a busy mom working a full time job, there has not been a time in my life when I wouldn't have welcomed the opportunity to go on line and place my order (average time 3 minutes and 47 seconds) and then swing by a pick-up hub and have someone load them in my car for me, or better yet deliver them to my door!

However, the more important point is, over the next few years millions of people are going to lose the ability and/or the desire to get out in traffic and fight the crowds at the grocery store! You are right, if you think we are talking about the baby boomers.

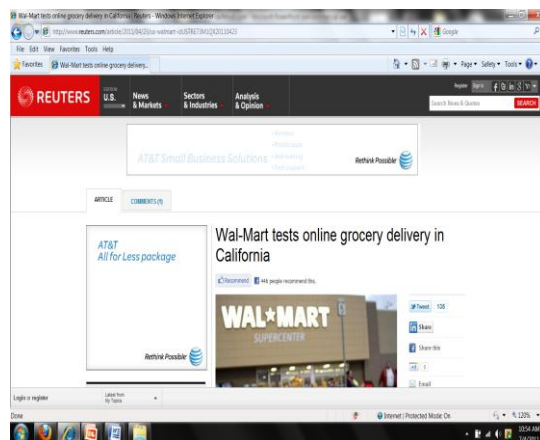

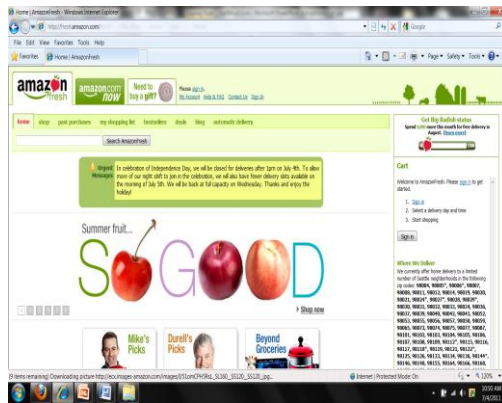

This trend is happening and will continue to happen regardless if we believe it is going to or not! See the chart below from Nielson:

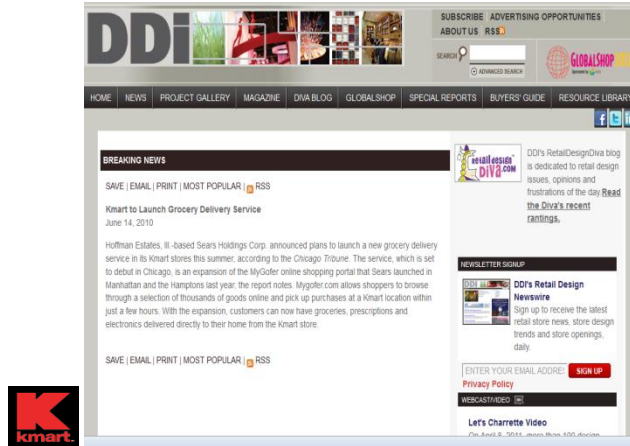

This trend will more than double to **\$25 BILLION** by 2014!

I have seen projections that state the Online Grocery Business could reach **\$85 Billion** within the next 10 years. The question is, how would you like to get a piece of that pie?

Major players like Walmart, K- Mart, and Amazon recognize this trend and are experimenting with local grocery delivery in a few markets.

Over the last year or so that we have been associated with this company the one thing I have learned is that when the facts are shared, **Entrepreneurs see the upside potential of this trend very quickly and take immediate action and get their questions answered.**

If I am talking about you, there is nothing else I will share in this document that can speak louder than Neilson, Amazon, K- Mart and Walmart. However, the one thing that I would like to mention before I let you go, is that none of these large conglomerates will be able to run and keep up with us. If anything, they will only help us bring this business model to the forefront of people's minds.

Why?

**"Independent Hubs"**

### PRESS RELEASE

**Pensacola, Florida** MPB Today announces Independent Grocery Hub Program.

MPB Today is the marketing organization for Southeastern delivery, a grocery delivery company based in Pensacola, Florida.

The company recently held their first ever National Convention in Atlanta, Georgia with over 600 independent affiliates in attendance from throughout the United States and Canada.

At the event, Gary Calhoun, the CEO and President of MPB Today, announced the new Independent Grocery Hub program. This program will allow entrepreneurs and commercial real estate owners to establish grocery delivery hubs throughout the United States, with the guidance of the MPB Today executive staff.

Because of the aging of the population as well as the busy schedules of families, the grocery delivery business is a huge trend. In a national survey grocery shopping was rated the second most hated household chore, behind cleaning bathrooms.

Neilson has projected the trend to double by 2014, and some reports project the grocery delivery business to reach eighty five billion dollars domestically within the next ten years. With the introduction of the Independent Grocery Hub program, MPB Today and Southeastern delivery seem to be positioning themselves to be a major force in this booming trend.

For more information on the Independent Hub Program, or the requirements to become an MPB affiliate contact MPB Diamond Distributor Dale Calvert at 770-499-2061 or visit [MPB Today](#).

**Entrepreneurs, I hope these facts have given you a glimpse of the future. As you know, “A Wise Person Investigates what a fool takes for granted.” My suggestion to you is that you contact the person that sent you this report right now and get your questions answered. They will be able to get you on the phone with a field leader. I promise you that if you take just a little bit of your time, and really get the facts you will be blown away by the upside potential of this unique, one-of-a-kind trend.**

Like my husband and I, we understand you are busy. We didn't have another hour in our day. However, some of the best advice I ever heard has been:

***“You have to say No to a lot of good opportunities, so you have time for the great ones”***

After taking the time to get the facts, we quickly came to the decision that there is nothing we could be doing with our time that had more upside potential and could help more people than this program. It is one of the best business decisions we have ever made.

Again, if you are an entrepreneur minded person, I know at this point you have enough facts that makes the evaluation of this program obvious. My recommendation to you is that you immediately contact the person that sent you this document.

# Simple Plan for you to Receive Free Groceries, Gasoline, Prescription Medicine, Tires, and Anything Else that Sam's Club or WalMart sells.

Thanks for your patience. At the time of this writing, over 70,000 people just like you have taken advantage of the simple system I am about to share with you.

If you can keep an open mind, and understand this is **NOT LIKE ANYTHING YOU HAVE EVER SEEN, HEARD ABOUT OR BEEN INVOLVED WITH BEFORE** you are about to get excited! I am excited for you, because we have seen so many lives changed for the better over the past several months, and I know it is just starting.

Some people are so closed minded they can see through a key hole with both eyes. I know this probably isn't you, or you wouldn't be reading this report to start with!

Let me ask you a question. How many people do you know? Statistics tell us that the average 18 year old knows 787 people by at least their first name. I assume that if you are reading this you are probably over 18, but let's just round that number down to 500 people you know, ok?

Are you with me?

Out of those 500, how many of them would like to receive free groceries for the rest of their life? 100% ..... right? It doesn't matter if they are a multi-millionaire, or living on government assistance, they would love free groceries for the rest of their life, right?

If you disagree with that, then just stop reading because this is definitely not for you. Quite frankly, we only want to work with those that see the glass half full and have a basic understanding of human nature.

Next question, if you asked any person, anywhere in the United States or Canada, “**You wouldn’t want to learn how you can get your groceries for free for the rest of your life would you?**”

What do you think most would say?

What would you say?

Really what do you think the normal, human reaction would be?

I can tell you from experience, if I am pleasant, polite, smile, and don’t look like I just crawled out from underneath a rock, 70% will say something like:

\*Sure, how can I do that?

\* Are you serious, of course!

\* Absolutely

\* How would something like that work?

Etc. etc.

About 30% of the population is so closed minded and fearful they say something off the wall like, no I wouldn’t be interested in that. It is really sad to me that 30% of the population perceive themselves to be such a victim to the point that they are not capable of having a normal common sense conversation.

About 30% of the time when I run into these closed minded people, I just say a silent prayer for them and then verbally say ..... *really?* Well I didn't think you would be, but can you do me a favor and just pass my business card along to someone who would be interested in free groceries. I hand it to them and walk away.

What is really interesting is how many of those people start trying to ask me questions as I walk away. I hear things like.

- Is this for real?
- How does this work?
- Can I give this to my sister?
- Is this your website?

Etc. etc. etc. I just say everything is on the website and so is my phone number, call me if you have any questions.

The last thing I am going to do is try to convince somebody they should start getting their groceries free instead of paying for them, I mean really. People who are afraid to step out of their comfort zone just a slight bit, ultimately die with their music still in them. It is sad, but if they want to continue to pay out of pocket for their groceries, so be it. There are way too many people that jump on this program when they see it.

## How This Blessing Fell Into Our Lap

A little over a year ago, someone my husband didn't know sent him an email about a program called MPB Today. For some reason he didn't delete it and actually visited the website. He found the concept very interesting, but again not having enough hours in the day to pursue one more project, he didn't take action.

Thankfully, a week or so later, one of his staff members asked him if he had heard about the program? He said something like, "yes, I checked out the website and it looked interesting."

That night the staff member sent Dale an email that said, "hey I joined it, and I know you and Dawn have some consumer savings program websites, where you may want to place a banner ad or something."
