Introduction

Anyone can make money online! That's a bold statement but it's true. You need to have a blueprint or a system to follow to make it happen.

Despite what you've heard, you do not need a lot of money to make money...You will however need to put in the work because you'll need to trade your time for money.

Everyone starts at the bottom..Despite all the “hype” on the Internet, there are no “First Time Wonders”. The people making money or claiming to make millions from sending an email have left out how they got there and how long it took them to get there.

Once you make your first “dollar” you'll find that it's easier to make the next “dollar”.

Now if you're serious, please take my hand and let's go on this journey together. The only thing I ask is that you truly put your best foot forward and absorb the information here and most importantly, “TAKE ACTION”.

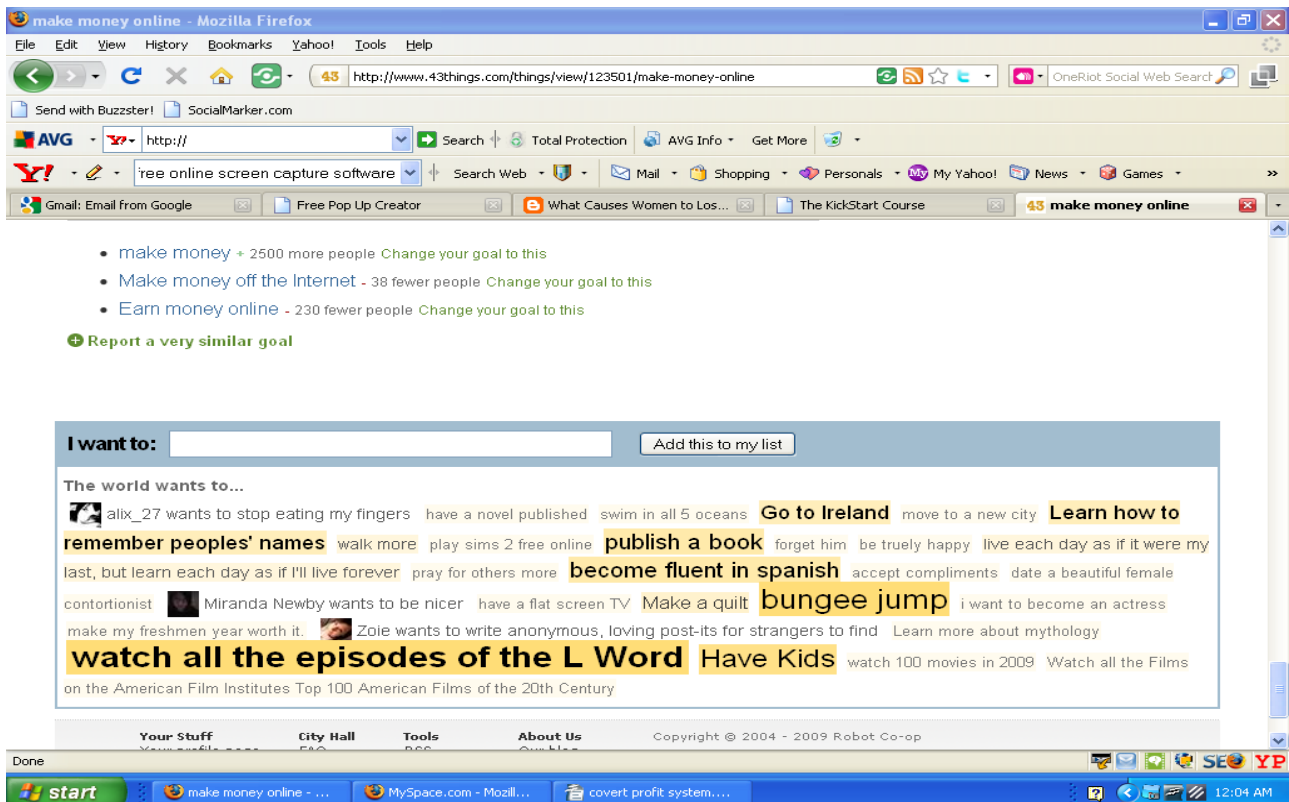

Now Let's move on to the reason you're here!

Step One – Research

The first step to beginning a project is to do your research...And don't worry because I'll make this simple.

There are many ways to complete research, but we're going to use the simplest ways and the most equitable ways.

Let's head on over to a site called [43things.com](http://www.43things.com). -

1. Sign up for a free account...

Now look at all the goals people have or all the things they want to do...All of the larger fonts or tags are the items you want to focus on, so write down at least 5 of them.. You can refresh the screen and find more ideas. Become fluent in Spanish looks like a good product to promote...So let's see if it is a profitable niche.

2. Clickbank.com – Search under the buy products.

The goal is to find out what products people are buying...Look at the top 10 items in the Society and Culture category that match the tags you found from your research on 43things.com. (speak Spanish)
