### **Non-U.S. Copyright Status**—Status of text and images in this publication.

All essays and images in this work are believed to be in the public domain or are published here under the fair use provision of the U.S. copyright law. Responsibility for making an independent legal assessment of an item and securing any necessary permissions ultimately rests with anyone desiring to reuse the item under the GFDL. The written permission of the copyright owners and/or other rights holders (such as publicity and/or privacy rights) is required for distribution, reproduction, or other use of protected items beyond that allowed by fair use or other statutory exemptions. An independent legal assessment has been made after a search for copyright status of text and images. No representation as to copyright status outside the United States is made. If an error occurs in spite of the good faith efforts, the offending item will be removed upon notice to

The U.S. Copyright Office *Circular 22* points out, “Even if you conclude that a work is in the public domain in the United States, this does not necessarily mean that you are free to use it in other countries. Every nation has its own laws governing the length and scope of copyright protection, and these are applicable to uses of the work within that nation’s borders. Thus, the expiration or loss of copyright protection in the United States may still leave the work fully protected against unauthorized use in other countries.”

### **DocBook**—And related topics.

This publication is based on Open Source DocBook, a system of writing structured documents using SGML or XML in a presentation-neutral form using free programs. The functionality of Docbook is such that the same file can be published on the Web, printed as a standalone report, reprinted as part of a journal, processed into an audio file, changed into Braille, or converted to

most other media types. More information about DocBook can be found at *DocBook Open Repository* (<http://docbook.openforge.net>). Information concerning the processing of this book is in the Colophon.

## “Preface”

*Tabulae Rudolphinae : quibus astronomicae. . . by Johannes Kepler, 1571-1630, NOAA*

### Why Open Source?

Almost all classic major works in philosophy and literature are accessible *via* online sources on the Internet. Fortunately, many of the influential and abiding works in philosophy are in the public domain; these readings provide a convenient way to produce quality learning experiences for almost anyone seeking information and help. Our present collection of edited readings is free, subject to the legal notice following the title page.

## Chapter 1. “Preface”

By placing these selections in the public domain under the GFDL, this product is being open-sourced, in part, to minimize costs to interested students of philosophy and, in part to make it widely available in a form convenient for a wide variety of readers. Moreover, users themselves can improve the product if they wish to do so. Viewed in this way, the release of these readings is in a genuine sense a small test of the Delphi effect in open source publishing.

This particular edition should not be viewed as a completed work. It is the first step in the development of the open-source text. The development model of *Reading for Philosophical Inquiry* is loosely patterned on the “release early, release often” model championed by Eric S. Raymond.<sup>1</sup> With the completion of version 1.0, various formats of this work can be made available for distribution. If the core reading and commentary prove useful, the successive revisions, readings, commentary, and other improvements by users can be released in incrementally numbered “stable” versions.

## A Note about Selections

Reading selections in this collection of papers are often selections with deletions of text *in passim*; consequently, the ideas of the writers are examined out of their literary and historical context. The main focus for our approach to philosophy, however, is not so much on historical understanding as it is on the use of those germinal ideas which spark thinking about some significant issues of life and thought.

In general, as the difficulty of the reading increases, the length of the selection decreases. The primary consideration of selection and inclusion is to introduce primary sources accessible for a wide variety of readers, including high school and homeschooling students. In addition to this core set of readings, supplementary readings are in process of publication.
