Authoring Notes

Now you have to get an ereader without light not linked to a website.

These book's articles are under free license CREATIVE COMMON by SA. You can redistribute the book according to the license quoting the author and his archive.org account named matthius, praying the book too.

I argue that we quote two sources making one work. This is to define the dialogue or dialogues with people whom created a book. It is a passion about listening to Christian radios that drives me to define God, after my reappropriation of the Christian religion. The Christianity of Charles urged me to become a Christian again, to improve myself. Then Grace's conversion allowed me to continue the book. I try in this book to create a path to answer questions about religion.

Good reading...

I Did Not Believe in God.

The best way to explain the spiritual transformation is to explain a reconversion course. At first, I did not believe in God. But I was just wondering if it existed without finding answers. The beginning of my journey seeking God begins with scientific brainstorming. Indeed, it is explained to me that to think scientifically is to emit hypotheses, to test them, including with the others, then we emits a higher hypothesis, which includes the other hypotheses. It has been explained to me that Plato has defined this scientific thinking.

With this truth's research, I use Plato to establish my truth's path. I then explain the experience of the balls' chaos that move in every directions. I am told that it is impossible for them to organize themselves. I find this valuable and therefore agrees that someone is trying to organize molecules that move in every directions. It's about souls.

Then I read Leibniz' monadology. It explains that there is a infinity's notion in life, because it is impossible for two living beings to exactly equal each other, even the twins. Indeed, there

are heat differences between twins. The monads explain both the nerves and the soul, which gives something magical to leibnizian science.

Then, I believe that hell does not exist, so that paradise does not exist. But I can not find any answer about the life's meaning. If someone created us, it's good for us to go somewhere. I believe in heaven. I only wonder if souls can be recycled, as I thought before. I thought it less and less. Now, I tell myself that some souls will be restored to another universe.

Being Hacked is Granting Me

I created coaching with a book pedagogy from 2006, also called Scientific Coaching by Solutions, when i wrote How to write stories in french. On 2012, it has reviewed quickly an international newspaper pedagogy, after helping myself them after.

While writing about Henry Charles Carey books, on 2014, a just written analysis about oportunity to create local banks in France, used by Alexandre Jardin next month to create banks.

I was also creating a book to become creative. So all of these news interested Mathieu Sommet. So 40 000 youngs followed my articles this year begining, and 20 000 youngs followed Espace des Sciences, where i was viewed. That's the archived followers' beginning.

My pedagogy to learn clarinet from flute is used by a newspaper, also read regularly next.

I also reviewed Henry Charles Carey on wikipedia. After that, Quebec followed by USA diffused old thesis about this famous and hidden economics' scientist.

On 2017, after understanding kids while pholophizing with a few, i have written Economy for Kids and for Infants in french.

On 2018, an article to create a right to genius

law, has created a truth research for kids. So, Fidelity to Mayenne Radio has explained that on 2019 or before.

On 2018 too, an article about some souls for universe, from Kepler, made me write about a time linked to soul theory, which explains beginning of life. So Aurélien Barrau spoken about that after, on 2018 and 2019.

When i wrote about radioactivity or waves creating material, a news that was erased from privatised NASA web-site, David Elbaz reacted to that after on 2019, explaining that material was created.

You can find my free ebooks and last proofs on archive.org, linking to web.archive.org. I am also happy to discover near me friendly and creative politics with kids like Geneviève on mediaparks.fr, some that thanks me like Nathalie Appéré and economics' kids in my city.

Authors' Biography

Matthiew GIROUX knows that intelligence and happiness are found while seeking for truth. This truth's research makes it possible to find a child's joy, a joy that becomes the our happiness' flame, to create every day. Our mind can only grow if it has found answers to its questions.

Thus, after writing poems to understand his emotions, news to narrate with poetry, it was a book on writing that engaged him to train others, for his greatest happiness. A second coaching book on creativity was born.

This book, Christian, is made for healthy people or people wanting to become one. There is in this book a desire to flourish and to transmit. It can also please those whom want to grow, later or now. It helps to explain life.

Computer scientist and public writer, but also economist of the real economy, you have or will have new dense and meaningful works, so that you too become ingenious and philosophical. This is a few simple but useful daily steps of reading and writing.

The book is on www.archive.org with the account matthius. The sources used are Radio

**Fidélité Mayenne, French Christian Radio and
Solidarity and Progress.**

Preface

The goal of this preface is to summarize the book, so that the different scientific questions are posted from the beginning. This allows you to seek the truth, reading the book, for your greatest happiness.

First of all, it is impossible to organize balls that go in every directions. Yet that's life does. The universe can create life, unless it is a God. In the same way, individuals are the cells of the body society, just as societies are tissues, or jobs are specialized cells.

Thus the universe is organized. Einstein said that it is impossible to organize an explosion, which the universe did. The universe should have a soul. The lesser action's work of light would confirm this soul. So gravity works in a vacuum. It also confirms a soul that would be gravity, in another universe, to also direct the light.

So we can think that God would be a soul, which would create other souls, including ours and those of the universe, larger. Indeed, Luc Montagnier, the discoverer of AIDS, was able to recreate DNA from microwaves of our body. Where would these microwaves come from? Of the soul, no doubt, of another world surely.

Our mind was designed to seek the truth. When we are in joy, it is because we have

discovered a truth. If we give ourselves pleasure, in the short term often, it is not as happy as a joy, because the joy will return in us, different, while the pleasure will be forgotten, similar. This explains that our mind is not born with chance. We are created to seek the truth.

A body that has cancer, certainly due to the environment, requires external intervention to be cured. In the same way, society should also require external intervention, when human society is disorganized. It is the role of the Holy Spirit whom speaks to us, as with the Secrets of Fatima, as with Jesus Christ.

The gospels, certainly reworked, went against every established current laws. These gospels, if we respect them, should make us a saint. Jesus Christ came to Earth to make us Saints, because he even said that we should join him, if we were seeking the truth, if we believed in God, if we were charitable, which is according to him the most difficult to achieve. For simplicity, we will join God if we are righteous.

Lourdes shows that there remains on Earth a Holy Spirit. Indeed, doctors can not explain the miracles of Lourdes. On the other hand, the Holy Spirit acts only in one place, as Jesus has shown, having also lived into the center of three

continents, because it seems that every soul can act only towards a single objective, including God.

Seeking the Truth

Why to Seek the Truth?

We do not know why there is life. If life is a material's organization, we do not know why society is organized. The why is therefore a question that directs our will to live.

Seeking the truth helps to find happiness. Our mind is satisfied with the truth. That's how we were all designed. Those who repress the truth are unhappy. To seek the truth is to understand how the world works.

At the beginning we look for different truths. We are dissatisfied to switch from one to the other. Then we are interested in a truth that clashes our life because it challenges us. So we rise hypotheses while seeking our truth. We seek our truth with our friends to find our happiness. Then, one day, our soul stands out. Also, Then, one day, our soul answers us. So, we ask to find the truth to catch mankind's happiness. We are looking for the truth through meditation and dialogue.

We are made to solve problems. To be afraid of problems is not to be prepared to find the solution. It's normal to be afraid of problems. But seeking the truth makes it possible to quickly find the solutions, to no longer be afraid of

others, by dialogue, meditating.

Intuition gives us knowledge. Sometimes it surprises us, if we listen. Intuition helps us to solve our truth's research. It's about using intuition to transform more easily. Answering his intuition can be fulfilled for his happiness and that of others.

So, sometimes, we wonder how we could, so easily, find a solution to such complex problems. God may have helped us.

So, we can reach the truth a while. We will have awakened our senses. It's not God's truth, which only God knows about. It can be a human
