# UNIVERSAL LAWS

Presented by Nunchi Melchizadek  
And Zoa Yogy

## 105 Universal Laws

All creation is governed by law. The principles that operate in the outer universe, discoverable by scientists, are called natural laws. But there are subtler laws that rule the hidden spiritual planes and the inner realm of consciousness. Contained within these laws (or conditions) is the true nature of matter. Knowledge of these laws has an effect upon the mental urges. Mind is the builder. Stay in full mindfulness of the application of Universal Law as related to self and to others, and know that in love all life is given, in love all things move.

In giving one attains. In giving one acquires. In giving, love becomes the fulfillment of desire, guided and directed in the ways that bring the more perfect knowledge of self as related to the universal, all powerful, all guiding, all divine influence in life. Love IS life. When we go back, merge with the God Source, in some infinitesimal but profound way, we expand the Mind of God.

Our God and higher self always points the best and most perfect way and it is ours to listen and choose or reject what we hear. God does not blame, but patiently tries again to show the perfect way, the loving way. All of creation pushes forth. We are ever becoming. Identity ever remains!

1. The Law of Abundance. (sometimes referred to as the Law of Opulence or Success.) By creating visualizations of abundance in our lives we draw this energy of success into our reality. Success or abundance does not only apply to money. There is success in communication, spirituality, relationships and so on. When creating the abundance of

financial gain remember to be IN this world, but not OF this world. We are not the sum total of your possessions.

## 2. The Law of Action.

No matter what we feel or know, no matter what our potential gifts or talents, only action brings them to life. Those of us who think we understand concepts, such as commitment, courage, and love, one day discover that we only create knowingness when we act; doing becomes understanding. Every aspirant is a focal point of energy and should be a conscious focal point. In the midst of the whirl and storm (of the chaos of third dimension) s/he should make his/her presence felt.

## 3. The Law of Akasha.

A great cosmic law which is the principle of the intelligence of substance.

## 4. The Law of Analogy.

Although this is a definite condition of third dimension existence, no analogy is ever exact in detail but only in certain broad basic correspondences. There will be found unchangeable points of resemblance, but in using analogy viewing creation, no two details are exact. Using analogy in trying to mentally explain the unexplainable, one attempts to convey understanding, in a broad sense.

## 5. The Law of Ascension.

This law defines the high vibrational frequency which the soul of an incarnational being is resonating. When a personality loses the illusion of separation from it's god self, the vibration of that person raises to the point of ascension. No longer does this mean that the incarnational personality leaves the earth plane to live a finer existence. We are meant to bring our loving energies to our every day existence, becoming an example or role model for others to emulate. We can recognize this vibrational frequency in others by the degree to which they are a magnet to others.

## 6. The Law of Attraction.

This is the basic law of all manifestation, the Love Aspect, and it governs the Soul aspect. One of the Three Major Laws, and it has 11 subsidiary laws. Fundamentally, this law describes the compelling force of attraction that holds our solar system to the Sirian. It holds our planets revolving around our central unit, the sun. It holds the lesser systems of atomic and molecular matter circulating around a center in the planet, and that of the subtle bodies coordinated around their microcosmic center. It is the primary law of man. The law of synthesis is beginning to be felt.

## 7. The Law of Balance or Equipoise. (fair exchange)

This is elaboration and continuation of the law of equalities. The law of balance is a universal law that supersedes all of man's laws, creating stability for all third dimension manifestation. Each thought must be balanced by whomever creates it. This is divine wisdom. Allow all viewpoints without feeling you must defend your own. Allow no one to tell you what your

journey must reflect or what your reality is. Do not give your power away so easily, but give your love unconditionally. Any messages communicated in love validates equality. Low self esteem is just as non productive as a puffed up sense of self esteem. They both deny equality. Another manifestation of the imbalance of this law is addiction.

#### 8. The Law of Challenge.

We have the right to ask of another his or her intent, identity, and whatever pertinent information we feel we require when encountering a disembodied being. Those who come to us in the roll of information givers to channelers don't mind being challenged. Ask the entity your questions three times (using the same words each time) and you will be given the correct information.

#### 9. The Law of Chemical Affinity.

This law governs the soul aspect in the mineral kingdom. It concerns the marriage of the atoms, and the romance of the elements. It serves to perpetuate the life of the mineral kingdom and to preserve its integrity. It is the cause of the immetalisation of the Monad.

#### 10. The Law of Cohesion.

One of the seven laws of our solar system, under the three major laws. On the second plane cohesion is first apparent. It is the first molecular plane of the system, and is the home of the Monad. Divine coherency is demonstrated.

#### 11. The Law of Color.

All colors are centers of attraction, and are complementary or are antipathetic to each other. Color is healing and impacts the physical, emotional, mental and human body profoundly. Man is partially composed of color in the aura (we are color, tone, symbols and speed of vibration, or light). When intense rays of one or more colors are sent to a specific area of the body, change results.

#### 12. The Law of Common Ground.

This is viewed as a problem solving approach and is an area where two or more can gather to blend differences. It demands that the area be cleansed of previous energy left by others who historically have passed through, or lived on the spot. This is done by two or more sending loving energy to the area for a specified period of time. Cage the area with a gold net and it will stay cleansed of other's energy. You will leave your energy, but that can be cleansed once you have used this space and are leaving.

#### 13. The Law of Consciousness.

As consciousness expands, the space for events increases and therefore the dimensions in which man cogizes good and evil, opportunity and possibilities, past-present-future enlarge to reveal the outstanding needs in this present world cycle.

#### 14. The Law of Continuity of Consciousness.

The Universe is in a continuous and endless process of creation. Cosmic consciousness is a reality, and everything in creation is connected to everything else. The medium for the

'implicate order' of this relationship is consciousness. The fusion of individual consciousness and the universal consciousness (the building of the antahkarana) results in the development of universal knowledge, of omniscience (all science/all knowledge). Continuity of consciousness is achieved by us after the soul has been acknowledged, awakened, liberated and identified with the Whole (enlightenment). A step to achieve enlightenment is to be aware of our thoughts, emotions and actions, the faculty that enables us to be vigilant, observant or to know.

#### 15. The Law of Cycles.

The world of nature exists within a larger pattern of cycles, such as day and night and the passing of the seasons. The seasons do not push one another. Neither do clouds race the wind across the sky. All things happen in good time. Everything as a time to rise, and a time to fall. Whatever rises, falls and whatever falls shall rise again. That is the principle of cycles.

#### 16. The Law of Cyclic Return.

Otherwise known as the wheel of reincarnation, once a soul qualifies for an incarnation to third dimension, there is an understanding that it must be completed. Reincarnation is that process by which the 'consciousness of the permanent atom' manifests in another body through the human birthing process. (This accounts for the fact of genius in the very young.) All karma must be cleared or forgiven and certain aspects of soul growth accomplished before this entire episode of reincarnational growth is considered finished .

#### 17. The Law or Right to Decree. (Divine Invocation)

This particular law exists for those working in service to others. Self serving beings will find this law ineffective. This law allows the ascended realms to move from the confines of the Law of Non-Intervention to act on our behalf. Add the phrase to your decree, "Under the Law of Grace" as this is an 'out' clause which will not allow us to manifest or invoke anything which would be detrimental to our existence or not of the highest interest for all, and remain karmic free. In order for your decree to work it must be invoked three times. An Example - "By Divine Decree, in the name of (Yahweh, God, Jesus, Ascend Masters, healing Angels, Mother Mary, My I AM self, etc.) and under the Law of Grace, I ask for \_\_\_\_\_. It is done, and I thank you." Say the entire request three times, then let it go - trust it is in higher hands.

#### 18. The Law of Discipline.

By practicing discipline, one expands the entity to a greater degree than almost any other action. Discipline is the surest means to greater freedom and independence. It provides the focus to achieve the skill level and depth of knowledge that translates into more options in life. Commitment involves discipline over a specific period of time. Discipline and commitment provide the bridge between here and our goals.

#### 19. The Law of Disintegration.

One of the seven laws of our solar system, under the three major laws. On the third plane comes the final casting-off, the ultimate shedding of the sheaths, of the fivefold superman. A

Chohan of the sixth Initiation discards all the sheaths beneath the monadic vehicle, from the atomic to the physical.

#### 20. The Law of Divine Flow.

By living in the moment, centering ourselves in love and being in service to others (as opposed to service to self), we live in the law of divine flow. We stay in the moment by moment flowing of our higher self, creating actions which reflect love and allowingness. When we are able to do this, we notice how we say just the right things, do what is best for all, and refrain from doing that which we previously disliked in ourselves or others. We maintain a stronger connection to our God self. The more we do this, the more we are able to do this. To a degree, the deliberate letting go of this flow is the allowing of our spiritual integrity to be compromised.

This Law concerns the ability of an entity to complete a round of reincarnation, develop such soul growth that the vibrational speed of the being qualifies him/her to merge with God. We then become a soul extension of God and among our choices many we have the ability to live in the liquid light which flows in and from God, or reincarnate as an avatar in third dimensional existence with the purpose of aiding mankind.

#### 22. The Law of Economy.

The Brahma aspect of the Logos is characterized by that method in the wide distribution of matter, the scattering of the atoms of matter and their dissociation from one another, vibratory rhythm, heterogeneity and quality and their inherent rotary action. This Law of Economy causes matter always to follow the line of least resistance, and is the basis of the separative action of atomic matter. It governs matter, the opposite pole of spirit. Initiates must master this law before they can achieve liberation, or enlightenment.

#### 23. The Law of Economy of Force.

One of the three major laws. The Activity Aspect. This is the law which adjusts all that concerns the material and spiritual evolution of the cosmos to the best possible advantage and with the least expenditure of force. It is the law of the physical atom, and makes perfect each atom of time and each eternal period and carries all onward and upward and through, with the least possible effort with the proper adjustment of equilibrium and with the necessary rate of rate of rhythm. Unevenness of rhythm is really an illusion of time, and does not exist in the cosmic center. We need to ponder on this, for it holds the secret of peace, and we need to grasp the significance of that word through, for it describes the next racial expansion of consciousness, and has a hidden meaning. The person who aims at providing a point of contact between conditions of chaos and Those Who work for constructive ends and order, should likewise use that most necessary factor of common-sense in all that s/he does. This involves always obedience to the law of economy of force, due to discrimination, and a true sense of values. Where these are present, time will be economized, energy will be wisely distributed, excessive zeal will be eliminated, and the Great Ones will be able to depend upon an aspirant's sagacity and thus find a helper.

24. The Law of Equalities (or Analogy), otherwise known as the Principle of Correspondence or Essential Divinity. "As above, so below; as below, so above." The major linking agent in the universe is the energy of love-wisdom, and the purpose of analogy is to lead the mind back toward the sense of oneness (enlightenment). The thoughts and images we hold in our conscious and subconscious minds will manifest their mirror likenesses in our external circumstances. Our outer world is a mirror of our inner world. Earth is a school for practicing these laws of mind control.

There is a Correspondence between the Laws and Phenomena of the various planes of Being and Life. This principle enables the phenomenon of Discernment, Intuition, Hunches, etc. and that which is called remote viewing or out of body experience. Correspondence enables that which is normally unknowable, to become known to the individual who learns and knows how to use this principle. Some use it in a conscious and deliberate manner while others may not even be aware that they are using this principle. When used knowingly, it will enhance the clarity of vision and enables the mind to penetrate the most secret of secrets, and can shed light on many a dark paradox. Correspondence establishes the interconnectedness between all things in the universe and keeps all things relative to each other. Known to the adepts and masters of ancient Egypt as the substance of the ethereal, the spirit substance or web that pervades and interpenetrates the universe. This substance acts as a medium for the transmission of light, heat, electricity, gravity.

It is non-material in nature. Also known as the un-created substance, or universal substance. The substance in which all suns, worlds, and galaxies are suspended in space, time, and change. All of us are intimately connected to all of the above mentioned events, and to each other, whether or not it is realized. The ethers are where spirit substance is manifesting the beginning of matter. Science refers to this substance as "dark matter" that cannot be seen, touched, smelled, or weighed. Dark matter does not absorb or reflect light and is therefore invisible. It is considered to be a non material substance. It was first discovered on Earth while doing research with the Hubble space telescope. The planes of Correspondence in the order of manifestation are, The Great Spiritual Plane; The Great Mental Plane; The Great Physical Plane, or the Trinity (the ascending scale of life and being).

25. The Law of Expansion.

This law of a gradual evolutionary expansion of the consciousness indwelling every form is the cause of the spheroidal form of every life in the entire solar system. It is a fact in nature that all that is in existence dwells within a sphere. The sphere requires two types of force - rotary and spiral-cyclic to produce its own internal activity. The law of relativity, or the relation between all atoms, which produces that which is called Light, and which in its aggregated phenomena, forms that composite sphere, a solar system. It is also known as the law of expansive response, and its symbol is the flaming rosy sun with a sign in the center, a sign symbolizing the union of fire and water. . The ray energy is expansive energy of the 3rd ray, the adapting factor.

## 26. The Law of Expectation.

Energy follows thought; we move toward but not beyond what we can imagine. What we assume, expect or believe colors and creates our experience. By changing our expectations, we change our experience of every aspect of life.

## 27. The Law of Faith.

The Law of Faith is founded upon the recognition that we know more than we have read, heard, or studied. We Know more because we Are a part of the ALL. We have a direct link to universal wisdom. We only have to look within, listen, discern, then trust. We need to develop more trust in our own deepest intuition and wisdom as the final arbiter and source of our decisions.

## 28. The Law of Fixation.

One of the seven laws of our solar system, under the three major laws, and governs the time of an individual's rebirth. This is the governing law on the mental plane, finding its greater correspondence in the Law of Karma on cosmic mental levels, and has a close connection with manas, the fifth principle. 'As a man thinks, so is he,' according to his thoughts are his desires and acts, and so results the future. The mind controls and stabilizes, and coherency is the result.

## 29. The Law of Flexibility.

This law involves a pragmatic acceptance of the present moment. We accept ourselves, others and current circumstances rather than a rigid resistance of the moment. It requires an alert and expansive state of awareness, and embracing and making constructive use of the moment. Stumbling blocks become stepping stones and problems become opportunities. Everything serves our highest good if we make good use of it. The serenity prayer used by Alcoholics Anonymous and other twelve step programs reflects this law. "God grant me the serenity to accept the things I cannot change, the courage to change the things I can, and the wisdom to know the difference." This prayer was drawn from Buddha's writings.

## 30. The Law of Forgiveness.

This law works with the energy of allowingness, and seeing all as love, so one may dispense with the unnatural feeling of getting even. The old energy of an eye for an eye keeps the vibrations of a person very low. To forgive, to release old anger, allows the law of grace to intercede and dispense with amounts of karma an individual has stored in his or her akasha. Non-violence is the natural outgrowth of the law of forgiveness and love. All good comes from forgiveness. It is a truth that the continuation of the human species is due to man's being forgiving. Forgiveness is holiness. By forgiveness the universe is held together. Forgiveness is the might of the mighty; forgiveness is quiet of mind. Forgiveness and gentleness are the qualities of the self-possessed, and represent eternal virtue.

## 31. The Law of Free Will, or the Law of Choice.

We in third dimension have the right to expand or contract, to bring our creative and

expressive energies out into the world in positive or negative ways. This is our ultimate decision. Not all of existence lives with this law as it carries with it both the possibility of great soul growth and the ability to lose soul growth and create evil or negativity. No matter what our circumstances, we have the power to choose our direction. We also choose to be under the influence of others or choose to be an example for others. We do it with a hundred actions which lead to the circumstances we find ourselves in today. Thoughts are things and the mind is the builder. The free will we use to create mixes with our ability to love profoundly, and therefore this path reflects the duration of the time spent in attempt to merge with the Great Soul of all Creation. The Christ warned of that which could destroy the soul (not Spirit) so there is always a possibility that a soul entity on its journey could become a God-hater with diminished light and be absorbed back into the Spirit of God to become just spirit and no longer a soul with separate awareness. A goal of our higher selves is to voluntarily and willingly surrender our egos to be a perfected spirit, hanging up the Soul-

Overcoat of manifestation regardless of how many lifetimes it takes.

### 32. The Law of Gender.

This law embodies the Truth that gender is manifested in everything - the masculine and feminine law is ever at work on all planes of causation. Gender manifests on all three planes of causation which are the great spiritual plane, the great mental plane, and the great physical plane. The law is always the same on all planes, but on the higher planes, it takes higher forms of manifestation. This law works in the direction of generation, regeneration, and creation. All life forms contain the two elements of gender - masculine and feminine. On the great physical plane, the sexes of all species are manifested as male and female and the role they play in sexual reproduction. On the great mental plane, gender manifests as masculine and feminine energies that exist within each and every person. Every male has its female element, and every female has its male element. On the great spiritual plane, gender manifests as the Father-Mother principle of the Infinite Omnipresent God in whose mind the universe is conceived and firmly held. It is written, "We all live, move, and have our being within God. When balance and learning reach a critical mass, the personality achieves the merger of God, and see self as neither male or female, but as one blended self.

### 33. The Law of Good Will.

Knowledge of this law will help those who have feelings of futility when thinking about the course of world events. By viewing life in terms of energy, we understand that our higher self coupled with our thought/mind action creates, and our actions/energy solidifies this thought into matter or results. In an energy relationship there is always a positive, creating side and a negative, receiving side of that creative relation. This is simply how the world works. The will-to-good is the positive, creative impetus, which, when received, makes the manifestation of goodwill possible. We are either mentally polarized or emotionally polarized, and only those who are mentally polarized can begin to appropriate this energy through will on the mental plane. When this is fully comprehended, we begin to realize why the manifestation of goodwill is not more widespread. Djwhal Khul states that "It is absolutely essential that the will-to-

good be unfolded by the disciples of the world, so that goodwill can be expressed by the rank and file of mankind. The will-to-good of the world knowers is the magnetic seed of the future." From Rays and the Initiations. p. 110. Our mental capacity today readily contacts those ideas which constitute the purpose behind the form. We have the ability to mentally construct a happening, and see it through to completion. This is will-to-good. The desire of one to create a loving scenario is 'goodwill', another but related action. The will-to-good is always an education process where the recipients are left free to receive the idea or not. The responsibility for expanding the amount of goodwill in the world directly lays on the shoulders of the intelligentsia of the world. In the goodwill process it is the creative/idea/problem solving individuals who are directly responsible for creating goodwill. The "rank and file" of humanity simply do not yet possess the mental capability to evoke the process yet, even though many are able to participate in the process. This knowledge should fill the responsible group with a greater amount of hope and assurance, because they have the power to generate goodwill in their every day routine solving of problems. Djwhal Khul says in Esoteric Healing, p. 545, "When the majority of the inhabitants of the earth are being rapidly oriented towards good, towards righteousness, as the Bible expresses it, and when the bulk of human beings are inclined towards goodwill 'then ill health will persistently, even if only gradually, disappear and die out and finally become nonexistent. Slowly, very slowly this is already happening'"

#### 34. The Law of Grace.

This can waive the Law of Karma. When applied, this law allows a person to receive more than one deserves or works for if it is in the highest good for all. When called upon, this law allows the person to send another a healing, to do soul talk, use divine decree, etc. and not suffer the consequences of karma incurrence, or interfere with the receiver's soul plan. The wording to insert in the request is "Under the Law of Grace." Another aspect of this law is to be of higher vibration to consistently live in grace. i.e. A loving person who works diligently sending world healing to Mother Earth and all on her body, and focusing so much on this activity, while shopping she forgets her car meter has expired. In all probability her car will not receive a ticket for this expiration. This condition can not be abused or it will leave.

#### 35. The Law of Group Endeavor.

This law defines the multiplying of energy one creates when acting with like minded individuals to form a group effort to pray, manifest, do lightwork, or even to create degrees of control which we define as evil or black magic. Where the efforts of an individual may equal one unit, the efforts of two praying or healing for a common goal with equal energy will effect the energy of twenty units instead of the sum total of two. With three, the resultant energy explodes further. The longer pure thought (the exclusion of any other thought) of one's desired goal is held in the mind, the more powerful the result. Holding a pure thought for an increment of time is the beginning lesson of manifestation.

#### 36. The Law of Group Life.

Not only must man fulfill in love his family and national obligations, but he must think in the

wider terms of humanity itself, and so bring the Law of Brotherhood into \_expression. Brotherhood is a group quality. Questions of self such as "Will my action tend to the group good? Will the group suffer or hurt if I do this action?" Abiding by these actions will gradually become part of our racial consciousness, and our civilization will adjust itself to these new conditions. All aspects of life of God are interdependent, and when one proceeds to fuller \_expression, all of the group benefit.

#### 37. The Law of Group Progress.

This law is also known as the law of elevation. The symbol is the mountain and the goat standing at the summit with the astrological sign of Capricorn. (All hard places can be surmounted and the summit reached by the Divine Goat - a symbol meaning group effort.) The ray energy is progressive energy of the 7th ray, the evolving factor.

#### 38. The Law of Healing.

This law concerns the ability of one to channel energy (prana - chi - holy spirit) which radiates from the Source we call God. The purpose of this channeled energy is to either improve self or another by removing blockages or instilling the sacred energy which pulsates from the Source of God. With intent or technique we may send this energy to the past, present, or future. Hands-on healers who are effective in healing have brain waves at 7.8 Hz - the same as the earth's pulse beat. Their brain waves are in sync with the earth's at the time the healing is performed. Another aspect of this law is the ability of one in third dimension to heal self by that which triggers a leap in faith.

#### 39. The Law of Higher Will.

From the viewpoint of our separate self and smaller will, it's normal to act on the basis of our own desires and preferences. When we surrender our smaller self and will to the guidance of a higher will and dedicate our actions for the highest good of ALL concerned, we feel an inspired glow at the center of our life.

#### 40. The Law of Honesty.

Recognizing, accepting and expressing our authentic interior reality lies at the heart of honesty. Only when we are honest with ourselves can we speak or act honestly with anyone else. In the sense of integrity, honesty entails acting in line with higher laws despite negative impulses to the contrary. We don't need to be punished for breaking spiritual law or higher laws. The act itself is the punishment and sets into motion subtle forces whose natural consequences we cannot escape any more than we are able to escape the force of gravity. When we let fear stop us from expressing our true feelings and needs, we are being dishonest with ourselves and it costs us a sense of energy and spirit.

#### 41. The Law of Identity.

This law pertains to the individual right of all to create one's own beingness. It applies to the time spent between incarnations as well as third dimension incarnational experiences. When an entity merges with the Great Central Sun/God, the entity still may separate to accomplish something, and will possess his/her individual identity.

#### 42. The Law of Intention.

When a person's intention is held in the mind and action of the physical effort does not follow, people create false impressions of self. He or she thinks self is good or better than actions prove. Energy must follow intention for that which is perceived as good to happen. When an act of kindness is performed and intention is such that one wishes to be recognized for goodness, or has underlying motivation which is not of the higher order, higher rewards will not be forthcoming. Intention and effort must be of the higher vibration to gain or create spiritual accomplishment and reward. If a person gives a promise to another to do something and has an intention to do so, but does not follow through with action, this becomes a lie, a breaking of one's word, and creates karma.

#### 43. The Law of Intuition.

We can only get in touch with our own source of intuition and wisdom when we no longer depend upon others' opinions for our sense of identity or worth. Do we value and trust our own intuition, or do we value and transfer authority to the opinions of others over our own inner feelings? Our intuition becomes more profound when we claim our own sacred identity.

#### 44. The Law of Inverse Proportions. (Longevity)

One need not die if the pranic life force is not lost but increased, and drawn from the Cosmic source, conquering death and fate. The span of life is related to the rate of breathing. If the span of life is 120 years and the normal person breathed 21,600 times per day, that is 15 respirations per minute. If the rate of breathing is 18 per minute, however, the span of life will be about 96 years. If because of poor living habits and needless expenditure of energy the average rate of breathing is 30 per minute, the life span will be only 60 years. If the rate is slowed through yogic practices and self control to an average of only 5 respirations per minute the life span will be 360 years. If it is one per minute, the life span will increase to 1,800 years. If the rate of breathing is reduced to zero, the life span becomes infinity. The secret of longevity lies in the technique of diverting the breathing to the subtle channels and centers.

#### 45. The Law of Justice.

This law upholds creation's farthest swinging orb. The functioning of this law is instantaneous for people of God-realization. They have banished forever all thwarting crosscurrents of ego. The universe conspires for retribution.

#### 46. The Law of Karma.

This is the natural principle of cause and effect. Every cause has its' effect; every effect has its cause. Everything happens according to law. Chance is but a name for law not recognized. There are many planes of causation, but nothing escapes the law. It is ever at work with chains of causations and effects that govern all of life and manifested matter. If a person was to follow each chain link of causation, it will be found that it has its beginning and endings in the non material realm, the realm of spirit. It affects the throwing of dice on a gambling table or a rock slide that is caused by rain and wind. Each can be followed and understood to the observing mind which sees the cycles in all things, and realizes that all things follow the Great

Law. The law itself is illusive and cannot be proven other than observed with the mind and is used to determine the causations and effects of any event. When this law is used with conscious effort, desired results can be produced in a person's life by steering him or herself along definite paths of causation. When the law is used in an unconscious and haphazard mind, the effects could become potentially disastrous for the individual or group of individuals. So called "accidents" could occur without warning to individuals who toil through life without awareness. We are responsible for the very thoughts that we produce and the final result of our own mental alchemy. Fear is one of the most

dangerous mental causation that prevents a person from thinking and acting as the higher self would prefer. The cause of fear is the result of a lack of knowledge about the unknown God which should be the most important educational journey in a person's life. The causation of fear can only be removed through knowledge, wisdom, and understanding Universal Law, the reality that we live in order to produce the desired effects in our lives. The greatest evil under the sun according to Hermes/Thoth, is Not knowing God. In every minute

thought, action, and deed that is performed, a person sets into motion unseen chains of causations and effects which will vibrate from the mental plane throughout the entire cellular structure of body, out into the environment, and finally into the cosmos. Eventually the vibratory energy returns to its originator upon the return swing of the pendulum. All this in less time than the twinkling of an eye. Because there are seven dimensions of reality in which causations can occur, we remain unaware of many reasons for effects. By understanding Universal laws we can learn to operate in grace instead of accumulating karma (restrictive). This law is mechanically or mathematically operative; its workings may be scientifically manipulated by men and women of divine wisdom (fully realized). The karmic law requires that every human wish find ultimate fulfilment. Therefore, desire is the chain that binds man to the reincarnational wheel. Karma is attracted only where the magnet of the personal

ego still exists. An understanding of karma as the law of justice underlying life's inequalities serves to free the human mind from resentment against God and man.

#### 47. The Law of Knowledge.

This law concerns the fact that all knowledge concerns energy, its application, and its use or misuse. Much information is withheld from a person until s/he is a disciple, and still more until he is a pledged initiate. Information is not as necessary to the training of the disciple or initiate as is the proper use of thought energy. (i.e. Full Mindfulness) Knowledge is the right apprehension of the laws of energy, of the conservation of force, of the sources of energy, of its qualities, its types and its vibrations.

#### 48. The Law of the Lotus.

This refers to the egoic lotus or the 'Flowering of Self' and includes knowledge, love and sacrifice.

#### 49. The Law of Love.

One of the seven laws of our solar system, under the three major laws. This is the law of the

astral plane. It aims at the transmutation of the desire nature (love in the personality), and links it up with the greater magnetism of the love aspect on the buddhic plane (love in the Triad), and the Monads of Love. These three points mark periods of completion, and starting points for fresh endeavor in the life of the evolving Monad - from the personality to the Triad, from the Triad to the Monad, from the Monad back again to its Source. Love limits itself by desire.

#### 50. The Law of the Lower Four.

This law is also known as the law of etheric union, and its symbol is a male and female form, placed back to back. The male figure is holding above his head a shield or tray of silver, a great reflector, while the female form holds aloft an urn full of oil. Below this sign is another hieroglyphic which contains the secret of the astral plane, which has to be dominated by the mental. The ray energy is fiery energy of the 5th ray, the vitalizing factor.

#### 51. The Law of Magnetic Control.

One of the seven laws of our solar system, under the three major laws. This holds paramountly on the buddhic plane, and in the development of the control of this law lies hidden the control of the personality by the Monad via the egoic body. A second description on a very physical/man level, is that every thought we have creates a match that comes back to us like a boomerang.

#### 52. The Law of Magnetic Impulse.

Also known as the first step towards marriage, or the law of the polar union. It results in an eventual union between the man or atom and the group which produces harmonious group relations. It is also known as the law of the polar union, and the symbol is two fiery balls united by a triangle of fire, thus picturing the triple interplay between all atomic structures. The ray energy is radiatory energy of the 2nd ray. Manifesting factor.

#### 53. The Law of Magnetism.

This is the law which produces the unifying of a personality, and though it is an expression of lunar force, is of a higher order than the law of physical sex. The three aspects are the stage of high intellectuality, or of artistic attainment. Second is the stage of discipleship. Third is the stage of treading the Path.

#### 54. The Law of Manifestation.

There are actions, sounds, techniques, mental energy and symbols which when understood, will enable one to manifest first energy (love, more joy, peace, etc.) into one's aura, then with practice and increased love held in the heart and emotional body - physical objects. Thought is a force, even as electricity or gravitation. The human mind is a spark of the almighty consciousness of God. Whatever the powerful mind (holding a pure thought - that which excludes any other thought) believes very intensely will instantly come to pass.

#### 55. The Law of Mantras.

Each mantra is a linkage to a certain aspect of the absolute, a certain manifestation of

Divinity. In true mantra practice, one forgets the fact that the self is chanting, becomes the mantra itself, and attains the state where nothing but the mantra exists. One's being then connects with the higher being the mantra represents if it is the name of a Master Being, or connects with the ray of light emanating from God if it is a sound (aum or om, hu, etc.). The practice of chanting mantras is profoundly beneficial in raising the vibration of self.

#### 56. The Law of Meditation.

This law is defined as a current of unified thought. It is a continuum of mental effort to assimilate the object of meditation, free from any other effort to assimilate other objects. The very least that may happen is the calming of self. When meditating on God, the most profound happening will bring a merging of the two, or enlightenment, as Buddhists call this occurrence.

#### 57. The Law of Mentalism.

"THE ALL is MIND" The All is substantial reality underlying all the outward manifestations and appearances which we know as empirical. The material universe, phenomena, matter, energy and all that is apparent to our material senses. It is spirit undefinable, unknowable, and thought of as a universal, infinite, living mind. This Law explains the true nature of energy, power and matter. The Universe is mental in nature, and mental transmutation is the art of changing the conditions of the universe, along the lines of matter, force, and mind. The atom of matter, the unit of force, the mind of man, and the being of the arch-angel are all but degrees in one scale, and all fundamentally the same. The difference is solely a matter of degree and rate of vibration. All are creations of the All, and have their existence solely within the Infinite Mind of the All.

#### 58. The Law of Miracles.

This law is operable by any person who has realized that the essence of creation is light. A master is able to employ his/her divine knowledge of light phenomena to project instantly into perceptible manifestation the ubiquitous light atoms. The actual form of the projection (whatever it is, water into wine, medicine, a human body) is determined by the master's wish and by his/her powers of will and visualization. All events in our precisely adjusted universe are lawfully wrought and lawfully explicable. The so-called miraculous powers of a great master are a natural accompaniment to his/her exact understanding of subtle laws that operate in the inner cosmos of consciousness. Nothing is a miracle except in the profound sense that everything is a miracle. Is anything more miraculous than that each of us is encased in an intricately organized body, and is set upon on earth whirling through space among the stars?

#### 59. The Law of Monadic Return.

This law concerns the 'force of evolution' and is the sum total of three influences. The strength of vibrations from the seven stars of the Great Bear depend upon the closeness of the connection and the accuracy of the alignment between any particular Heavenly Man and His Prototype. Second is the Seven Sisters, or the Pleiades. Third is the sun Sirius. It is the

appearance or the disappearance of these waves of life-force which sweeps into incarnation the divine pilgrims, and which brings about the cyclic manifestation of such great Lives as the 'Silent Watcher' and the 'Great Sacrifice.' Within limits, man is the controller of his destiny, wielding forces and energies, manipulating lesser lives and controlling lesser centers of energy, and as time passes, his radius of control becomes even more extensive.

#### 60. The Law of No Judgements.

The Universal Spirit does not judge us; judgements are human inventions, a means to compare, contrast and control as we judge ourselves against artificial, and often idealistic standards of perfection, morality or truth. Under the law of equalities, our judgements attract judgement to us in equal measure. The life/karmic review conducted by yourself after death is a condition of living in duality/third dimension.

#### 61. The Law of Non-Attachment.

Attachment to the self creates karma. Non-attachment to the self dissolves karma. This non-attachment to the self is made possible through the realization that the ultimate nature of the self is Empty. The self does not exist as a separate entity. A full conceptual understanding needs to occur, but mere conceptual understanding does not lead to liberation. Many methods have been devised to help human beings attain this realization, and usually fall into two categories. The first is 'non-attached behavior' and the other is called 'spiritual practice.' Through diligent application of these methods, an individual can free him or herself from the confines of karmically determined existence. Enlightenment is real and attainable.

#### 62. The Law of Non-Intervention.

This law concerns the individual rights of people and society situations to serve self rather than live in the vibration of service to others. This law prevents physical beings and non physical beings from intervening or correcting what they see as wrong or harmful. If this law is violated, there is great karma incurring. Another aspect of this law is that spirit is not permitted to channel material to a recipient that would force a change in the evolution of the person. There is an exception when the channeler is willing to undergo a trance, and the consciousness leaves the body for another consciousness to enter and impart knowledge that was previously unknown to the individual.

#### 63. The Law of One.

The Lord is ONE. All that is, is His - of self, of the universe, of the activities in the earth. All moves and has its being in Him. So it is in self. Life itself is the consciousness, the awareness of that Oneness of that Universal Consciousness in the earth.

#### 64. The Law of Order of Creation.

The beginning of law carries all the way through. And that which comes or begins first is conceived in spirit, grows in the mental and manifests in the material. First it was the means and source or manner by which the powers that be made the centralization for making known to the children of men, and children of God, the directing forces or powers. Man eventually turned this into that channel for destructive forces. While man developed in this direction for

many centuries, humans are leaning toward light. We are reaching toward the critical point of more in the light than in darkness.

#### 65. The Law of Patience.

Luke said- "In your patience possess ye your souls." Patience involves spiritual, mental and physical thought and action. Through it, we learn to know our self, to measure and test our ideals, to use faith and to seek understanding through all the other virtues. Patience allows all other virtues to manifest more profoundly. Patiently we realize that any fault we see in another is one we have personal knowledge of from prior experience. Patiently we seek true understanding, not just knowledge, as we realize that every soul is totally unique and will come to its enlightenment in its own time.

#### 66. The Law of Patterns.

Any habit or pattern, whether we call it good or bad, tends to reassert itself over time unless we break that pattern by doing something different. If it is good, we can reinforce the pattern with small self rewards. We have the power of spontaneous action, doing old things in new ways, changing and restructuring our lives and our behavior. Some of our change ability is dictated by the ways we learned when we were young. We learned to make sense of the world by observing patterns, and this has survival value. We can correct the patterns we see as dysfunctional, negative or destructive by doing something different that will have sufficient impact to interrupt the old pattern.

#### 67. The Law of Perfection.

This law concerns the absolute perfection of the process of our unfolding. From a transcendental perspective, everyone and everything is unconditionally perfect. From a conventional viewpoint, perfection doesn't exist. Excellence is the best we can achieve, and achieving it takes time and practice. When we understand the larger picture, we understand our role and responsibility in helping the world we live in to become more loving, giving, kinder and gentler. When we live up to this responsibility, we expand into the perfection of our higher selves.

#### 68. The Law of Periodicity.

Training for the aspirant will be cyclic, and will have its ebb and flow, as all else in nature. Times of activity succeed times of pralaya, and periods of registered contact alternate with periods of apparent silence. If the student develops as desired, each pralayaic period is succeeded by one of greater activity, and of more potent achievement. Rhythm, ebb and flow, and the measured beat of the pulsating life are ever the law of the universe. In learning to respond to the vibration of the high Places, this rhythmic periodicity must be borne in mind.

#### 69. The Law of Planetary Affinity.

This law is concerned with the connection of the interaction of the planets with each other and their eventual marriage.

## 70. The Law of Polarity.

Everything is Dual. Everything has poles. Everything has its pair of opposites. Like and unlike are the same. Opposites are identical in nature, but different in degree. All paradoxes may be reconciled. The evidence of this principle is observed in the polarity of planets and the various celestial bodies that includes our earth, solar system, and galaxy. Everything has polarity. Without the law of polarity - light, gravity and electricity would not be possible. On the mental plane, this principle manifests itself in the heart center of each person as the

enlightened or dark mind. The Principle of Polarity makes possible the choices we make on the scale of life between good and evil, right and wrong, generosity and greed, love and fear, truth and lies. The law of cause and effect is closely connected to polarity and holds us true to the choices and actions we make by returning to us what we have measured out to others. Like the swing of the pendulum, it always returns where it began.

In biblical terms it is expressed as, "Whatsoever a man sows, so shall he reap." "Do unto others, as you would have them to you." This principle establishes the paradox or the dual aspects of reality. "Everything that is, has its double." Positive and negative, light and darkness, hot and cold, Love and fear, mortality and Immortality.

## 71. The Law of Prayer and Meditation.

Prayer is a conscious concerted effort to commune with the Consciousness of Life and its Creator and thus we speak to God. Prayer is also an aligning, cleansing process opening up our inner-selves to the Source of all life and demonstrating that we are anxious for enlightenment and guidance. In prayer we speak to God but so often we do not wait for a reply. Meditation is the freeing and emptying of ourselves of obstacles that hinder communication and allow us to channel the God-Force, spiritually, mentally and physically. Meditation is likened to God speaking to us, and is the attunement of our physical and mental bodies to their spiritual Source. "Be still and know that I am God." In meditation, correctly aligned and unobstructed, the Creative Forces of God can rise along spiritual and physical channels in our bodies and be disseminated through sensitive spiritual chakras. Prayer is the precursor of meditation. Meditate regularly as we meet the Living God within the temple of our own body, cleansed and consecrated.

## 72. The Law of the Present Moment.

Time does not exist. What we refer to as past and future, have no reality except in our own mental constructs. The idea of time is a convention of thought and language, a social agreement. In truth, we only have this moment. When we hold regret for an occurrence in the past we keep the regret alive with pictures and feelings we conjure up. When we feel anxiety about the future, we keep the anxiety alive with the pictures we imagine. Time is the abstract concept. When we practice remembering that the here and now is all we have, our present moments improve.

## Thank You for previewing this eBook

You can read the full version of this eBook in different formats:

- HTML (Free /Available to everyone)
- PDF / TXT (Available to V.I.P. members. Free Standard members can access up to 5 PDF/TXT eBooks per month each month)
- Epub & Mobipocket (Exclusive to V.I.P. members)
