Fuller’s Introduction to Sociology

Collection Editor:
Abigail Fuller
# Table of Contents

Preface ............................................................................................................. 1

## 1 An Introduction to Sociology

1.1 Introduction to Sociology ................................................................. 5
1.2 What Is Sociology? ........................................................................... 6
1.3 Theoretical Perspectives ............................................................... 12
1.4 Why Study Sociology? ................................................................. 20
Solutions ......................................................................................................... 24

## 2 Sociological Research

2.1 Introduction to Sociological Research ........................................... 25
2.2 Approaches to Sociological Research ........................................... 26
2.3 Research Methods .......................................................................... 32
Solutions ......................................................................................................... 51

## 3 Culture

3.1 Introduction to Culture .................................................................... 53
3.2 What Is Culture? ............................................................................. 54
3.3 Elements of Culture ........................................................................ 61
3.4 Pop Culture, Subculture, and Cultural Change ............................. 70
Solutions ......................................................................................................... 79

## 4 Society and Social Interaction

4.1 Social Constructions of Reality ..................................................... 81
Solutions ......................................................................................................... 87

## 5 Socialization

5.1 Introduction to Socialization ........................................................... 89
5.2 Why Socialization Matters ........................................................... 91
5.3 Agents of Socialization .................................................................... 96
5.4 Socialization Across the Life Course ............................................ 103
Solutions ......................................................................................................... 109

## 6 Groups and Organization

6.1 Introduction Groups and Organizations ......................................... 111
6.2 Types of Groups ............................................................................ 113
6.3 Group Size and Structure ........................................................... 121
6.4 Formal Organizations ..................................................................... 127
Solutions ......................................................................................................... 134

## 7 Deviance, Crime, and Social Control

7.1 Introduction to Deviance, Crime, and Social Control .................... 135
7.2 Deviance and Control ..................................................................... 137
7.3 Theoretical Perspectives on Deviance ......................................... 141
7.4 Crime and the Law .......................................................................... 152
Solutions ......................................................................................................... 161

## 8 Social Stratification in the United States

8.1 Introduction to Social Stratification in the United States ............... 164
8.2 What Is Social Stratification? ....................................................... 166
8.3 Social Stratification and Mobility in the United States ................. 174
8.4 Theoretical Perspectives on Social Stratification ........................... 182
Solutions ......................................................................................................... 188
9 Work and the Economy
  9.1 Introduction to Work and the Economy .................................................. 189
  9.2 Economic Systems ................................................................................. 190
  9.3 Work in the United States ................................................................. 208
Solutions ......................................................................................................... 221
10 Race and Ethnicity
  10.1 Introduction to Race and Ethnicity ....................................................... 223
  10.2 Racial, Ethnic, and Minority Groups .................................................... 224
  10.3 Stereotypes, Prejudice, and Discrimination ......................................... 229
  10.4 Theories of Race and Ethnicity ......................................................... 232
Solutions ......................................................................................................... 235
11 Gender, Sex, and Sexuality
  11.1 Introduction to Gender, Sex, and Sexuality .......................................... 238
  11.2 The Difference Between Sex and Gender ............................................. 240
  11.3 Gender .................................................................................................. 249
  11.4 Sex and Sexuality .................................................................................. 259
Solutions ......................................................................................................... 267
12 Marriage and Family
  12.1 Introduction to Marriage and Family ..................................................... 270
  12.2 What Is Marriage? What Is a Family? .................................................... 272
  12.3 Variations in Family Life ....................................................................... 280
  12.4 Challenges Families Face ..................................................................... 289
Solutions ......................................................................................................... 299
13 Religion
  13.1 Introduction to Religion ....................................................................... 302
  13.2 The Sociological Approach to Religion ............................................... 303
  13.3 Religion in the United States ............................................................... 311
Solutions ......................................................................................................... 316
14 Government and Politics
  14.1 Introduction to Government and Politics ............................................. 318
  14.2 Power and Authority ......................................................................... 320
  14.3 Politics in the United States ............................................................... 327
Solutions ......................................................................................................... 331
15 Social Movements and Social Change
  15.1 Introduction to Social Movements and Social Change ......................... 333
  15.2 Social Movements ............................................................................... 335
  15.3 Social Change ...................................................................................... 346
Solutions ......................................................................................................... 352
Glossary ......................................................................................................... 353

Preface

About OpenStax College

OpenStax College is a non-profit organization committed to improving student access to quality learning materials. Our free textbooks are developed and peer-reviewed by educators to ensure they are readable, accurate, and meet the scope and sequence requirements of modern college courses. Unlike traditional textbooks, OpenStax College resources live online and are owned by the community of educators using them. Through our partnerships with companies and foundations committed to reducing costs for students, OpenStax College is working to improve access to higher education for all. OpenStax College is an initiative of Rice University and is made possible through the generous support of several philanthropic foundations.

About This Book

Welcome to Introduction to Sociology, an OpenStax College resource created with several goals in mind: accessibility, affordability, customization, and student engagement—all while encouraging learners toward high levels of learning. Instructors and students alike will find that this textbook offers a strong foundation in sociology. It is available for free online and in low-cost print and e-book editions.

To broaden access and encourage community curation, Introduction to Sociology is “open source” licensed under a Creative Commons Attribution (CC-BY) license. Everyone is invited to submit examples, emerging research, and other feedback to enhance and strengthen the material and keep it current and relevant for today’s students. You can make suggestions by contacting us at info@openstaxcollege.org. You can find the status of the project, as well as alternate versions, corrections, etc., on the StaxDash at http://openstaxcollege.org.

To the Student

This book is written for you and is based on the teaching and research experience of numerous sociologists. In today’s global socially networked world, the topic of Sociology is more relevant than ever before. We hope that through this book, you will learn how simple, everyday human actions and interactions can change the world. In this book, you will find applications of Sociology concepts that are relevant, current, and balanced.

To the Instructor

This text is intended for a one-semester introductory course. Since current events influence our social perspectives and the field of Sociology in general, OpenStax College encourages instructors to keep this book fresh by sending in your up-to-date examples to info@openstaxcollege.org so that students and instructors around the country can relate and engage in fruitful discussions.

General Approach

_Introduction to Sociology_ adheres to the scope and sequence of a typical introductory sociology course. In addition to comprehensive coverage of core concepts, foundational scholars, and emerging theories, we have incorporated section reviews with engaging questions, discussions that help students apply the sociological imagination, and features that draw learners into the discipline in meaningful ways. Although this text can be modified and reorganized to suit your needs, the standard version is organized so that topics are introduced conceptually, with relevant, everyday experiences.

Features of OpenStax _Introduction to Sociology_

The following briefly describes the special features of this text.

Modularity

This textbook is organized on Connexions (http://cnx.org³) as a collection of modules that can be rearranged and modified to suit the needs of a particular professor or class. That being said, modules often contain references to content in other modules, as most topics in sociology cannot be discussed in isolation.

Learning Objectives

Every module begins with a set of clear and concise learning objectives. These objectives are designed to help the instructor decide what content to include or assign, and to guide the student with respect to what he or she can expect to learn. After completing the module and end-of-module exercises, students should be able to demonstrate mastery of the learning objectives.

Key Features

The following features show students the dynamic nature of Sociology:

- **Sociological Research:** Highlights specific current and relevant research studies. Examples include “Is Music a Cultural Universal?” and “Deceptive Divorce Rates.”
- **Sociology in the Real World:** Ties chapter content to student life and discusses sociology in terms of the everyday. Topics include “Secrets of the McJob” and “Grade Inflation: When Is an A Really a C?”
- **Big Picture:** Features present sociological concepts at a national or international level, including “Education in Afghanistan” and “American Indian Tribes and Environmental Racism.”
- **Case Study:** Describes real-life people whose experiences relate to chapter content, such as “Catherine Middleton: The Commoner Who Would Be Queen.”
- **Social Policy and Debate:** Discusses political issues that relate to chapter content, such as “The Legalese of Sex and Gender” and “Is the U.S. Bilingual?”

Section Summaries

Section summaries distill the information in each section for both students and instructors down to key, concise points addressed in the section.

Key Terms

Key terms are bold and are followed by a definition in context. Definitions of key terms are also listed in the Glossary, which appears at the end of the module online and at the end of the chapter in print.

³http://cnx.org
Section Quizzes

Section quizzes provide opportunities to apply and test the information students learn throughout each section. Both multiple-choice and short-response questions feature a variety of question types and range of difficulty.

Further Research

This feature helps students further explore the section topic and offers related research topics that could be explored.

Acknowledgements

*Introduction to Sociology* is based on the work of numerous professors, writers, editors, and reviewers who are able to bring topics to students in the most engaging way.

We would like to thank all those listed below as well as many others who have contributed their time and energy to review and provide feedback on the manuscript. Their input has been critical in maintaining the pedagogical integrity and accuracy of the text.

Chapter 1

An Introduction to Sociology

1.1 Introduction to Sociology

Concerts, sports games, and political rallies can have very large crowds. When you attend one of these events, you may know only the people you came with. Yet you may experience a feeling of connection to the group. You are one of the crowd. You cheer and applaud when everyone else does. You boo and yell

1This content is available online at <http://cnx.org/content/m42980/1.2/>.

Available for free at Connexions <http://cnx.org/content/col11563/1.1>
alongside them. You move out of the way when someone needs to get by, and you say "excuse me" when you need to leave. You know how to behave in this kind of crowd.

It can be a very different experience if you are traveling in a foreign country and find yourself in a crowd moving down the street. You may have trouble figuring out what is happening. Is the crowd just the usual morning rush, or is it a political protest of some kind? Perhaps there was some sort of accident or disaster. Is it safe in this crowd, or should you try to extract yourself? How can you find out what is going on? Although you are in it, you may not feel like you are part of this crowd. You may not know what to do or how to behave.

Even within one type of crowd, different groups exist and different behaviors are on display. At a rock concert, for example, some may enjoy singing along, others prefer to sit and observe, while still others may join in a mosh pit or try crowd surfing. Why do we feel and act differently in different types of social situations? Why might people of a single group exhibit different behaviors in the same situation? Why might people acting similarly not feel connected to others exhibiting the same behavior? These are some of the many questions sociologists ask as they study people and societies.

1.2 What Is Sociology?

A dictionary defines sociology as the systematic study of society and social interaction. The word “sociology” is derived from the Latin word socius (companion) and the Greek word logos (study of), meaning “the study of companionship.” While this is a starting point for the discipline, sociology is actually much more complex.

Figure 1.2: Sociologists learn about society as a whole while studying one-to-one and group interactions. (Photo courtesy of Robert S. Donovan/flickr)
It uses many different methods to study a wide range of subject matter and to apply these studies to the real world.

1.2.1 What Are Society and Culture?

Sociologists study all aspects and levels of society. A society is a group of people whose members interact, reside in a definable area, and share a culture. A culture includes the group’s shared practices, values, and beliefs. One sociologist might analyze video of people from different societies as they carry on everyday conversations to study the rules of polite conversation from different world cultures. Another sociologist might interview a representative sample of people to see how texting has changed the way they communicate. Yet another sociologist might study how migration determined the way in which language spread and changed over time. A fourth sociologist might be part of a team developing signs to warn people living thousands of years in the future, and speaking many different languages, to stay away from still-dangerous nuclear waste.

1.2.2 The Sociological Imagination

Although these studies and the methods of carrying them out are different, the sociologists involved in them all have something in common. Each of them looks at society using what pioneer sociologist C. Wright Mills called the sociological imagination, sometimes also referred to as the sociological lens or sociological perspective. Mills defined sociological imagination as how individuals understand their own and others’ pasts in relation to history and social structure (1959).

By looking at individuals and societies and how they interact through this lens, sociologists are able to examine what influences behavior, attitudes, and culture. By applying systematic and scientific methods to this process, they try to do so without letting their own biases and pre-conceived ideas influence their conclusions.

1.2.2.1 Studying Patterns: How Sociologists View Society

All sociologists are interested in the experiences of individuals and how those experiences are shaped by interactions with social groups and society as a whole. To a sociologist, the personal decisions an individual makes do not exist in a vacuum. Cultural patterns and social forces put pressure on people to select one choice over another. Sociologists try to identify these general patterns by examining the behavior of large groups of people living in the same society and experiencing the same societal pressures.

The recent turmoil in the U.S. housing market and the high rate of foreclosures offer an example of how a sociologist might explore social patterns. Owning a home has long been considered an essential part of the American Dream. People often work for years to save for a down payment on what will be the largest investment they ever make. The monthly mortgage is often a person’s largest budget item. Missing one or more mortgage payments can result in serious consequences. The lender may foreclose on the mortgage and repossess the property. People may lose their homes and may not be able to borrow money in the future. Walking away from the responsibility to pay debts is not a choice most people make easily.

About three million homes were repossessed in the United States between 2006 and 2011. Experts predict the number could double by 2013 (Levy and Gop 2011). This is a much higher rate than the historical average. What social factors are contributing to this situation, and where might sociologists find patterns? Do Americans view debt, including mortgages, differently than in the past? What role do unemployment rates play? Might a shift in class structure be an influential factor? What about the way major economic players operate?

To answer these questions, sociologists will look beyond individual foreclosures at national trends. They will see that in recent years unemployment has been at record highs. They will observe that many lenders approved subprime mortgages with adjustable rates that started low and ballooned. They may look into whether unemployment and lending practices were different for members of different social classes, races, or genders. By analyzing the impact of these external conditions on individuals’ choices, sociologists can better explain why people make the decisions they do.
Figure 1.3: Risky bank loans, falling housing prices, and high unemployment can result in higher foreclosure rates. (Photo courtesy of Jeff Turner/flickr)

Another example of how society influences individual decisions can be seen in people’s opinions about and use of food stamps (also known as the Supplemental Nutrition Assistance Program, or SNAP benefits). Some people believe that those who receive food stamps are lazy and unmotivated. Statistics from the United States Department of Agriculture show a complex picture.

### Food Stamp Use by State

The percentage of the population receiving food stamps is much higher in certain states than in others. Does this mean, if the stereotype above were applied, that people in some states are lazier and less motivated than those in other states? Sociologists study the economies in each state—comparing unemployment rates, food, energy costs, and other factors—to explain differences in social issues like this.

To identify social trends, sociologists also study how people use food stamps and how people react to their use. Research has found that for many people from all classes, there is a strong stigma attached to the use of food stamps. This stigma can prevent people who qualify for this type of assistance from using food stamps. According to Hanson and Gundersen (2002), how strongly this stigma is felt is linked to the general economic climate. This illustrates how sociologists observe a pattern in society.

Sociologists identify and study patterns related to all kinds of contemporary social issues. The “don’t ask, don’t tell” policy, the emergence of the Tea Party as a political faction, how Twitter has influenced everyday communication—these are all examples of topics that sociologists might explore.

1.2.2.2 Studying Part and Whole: How Sociologists View Social Structures

A key basis of the sociological perspective is the concept that the individual and society are inseparable. It is impossible to study one without the other. German sociologist Norbert Elias called the process of simultaneously analyzing the behavior of individuals and the society that shapes that behavior *figuration*. He described it through a metaphor of dancing. There can be no dance without the dancers, but there can be no dancers without the dance. Without the dancers, a dance is just an idea about motions in a choreographer’s head. Without a dance, there is just a group of people moving around a floor. Similarly, there is no society without the individuals that make it up, and there are also no individuals who are not affected by the society in which they live (Elias 1978).

An application that makes this concept understandable is the practice of religion. While people experience their religion in a distinctly individual manner, religion exists in a larger social context. For instance, an individual’s religious practice may be influenced by what government dictates, holidays, teachers, places of worship, rituals, and so on. These influences underscore the important relationship between individual practices of religion and social pressures that influence that religious experience.

: When sociologist Nathan Kierns spoke to his friend Ashley (a pseudonym) about the move she and her partner had made from an urban center to a small Midwestern town, he was curious how the social pressures placed on a lesbian couple differed from one community to the other. Ashley said that in the city they had been accustomed to getting looks and hearing comments when she and her partner walked hand in hand. Otherwise, she felt that they were at least being tolerated. There had been little to no outright discrimination.

Things changed when they moved to the small town for her partner's job. For the first time, Ashley found herself experiencing direct discrimination because of her sexual orientation. Some of it was
particularly hurtful. Landlords would not rent to them. Ashley, who is a highly trained professional, had a great deal of difficulty finding a new job.

When Nathan asked Ashley if she and her partner became discouraged or bitter about this new situation, Ashley said that rather than letting it get to them, they decided to do something about it. Ashley approached groups at a local college and several churches in the area. Together they decided to form the town’s first gay-straight alliance.

The alliance has worked successfully to educate their community about same-sex couples. It also worked to raise awareness about the kinds of discrimination Ashley and her partner experienced in the town and how these could be eliminated. The alliance has become a strong advocacy group, working to attain equal rights for LBGT individuals.

Kierns observed that this is an excellent example of how negative social forces can result in a positive response from individuals to bring about social change (Kierns 2011).

1.2.3 Summary

Sociology is the systematic study of society and social interaction. In order to carry out their studies, sociologists identify cultural patterns and social forces and determine how they affect individuals and groups. They also develop ways to apply their findings to the real world.

1.2.4 Section Quiz

Exercise 1.2.1
Which of the following best describes sociology as a subject?

a. The study of individual behavior  
b. The study of cultures  
c. The study of society and social interaction  
d. The study of economics

Exercise 1.2.2
C. Wright Mills once said that sociologists need to develop a sociological _________ to study how society affects individuals.

a. culture  
b. imagination  
c. method  
d. tool

Exercise 1.2.3
A sociologist defines society as a group of people who reside in a defined area, share a culture, and who:

a. interact  
b. work in the same industry  
c. speak different languages  
d. practice a recognized religion

Exercise 1.2.4
Seeing patterns means that a sociologist needs to be able to:

a. compare the behavior of individuals from different societies

Available for free at Connexions <http://cnx.org/content/col11563/1.1>
b. compare one society to another  
c. identify similarities in how social groups respond to social pressure  
d. compare individuals to groups

1.2.5 Short Answer

Exercise 1.2.5
What do you think C. Wright Mills meant when he said that to be a sociologist, one had to develop a sociological imagination?

Exercise 1.2.6
Describe a situation in which a choice you made was influenced by societal pressures.

1.2.6 Further Research

Sociology is a broad discipline. Different kinds of sociologists employ various methods for exploring the relationship between individuals and society. Check out more about sociology at http://openstaxcollege.org/1/what-is-sociology.
