Long term marketing strategies

- Search Engines
- Opt-in List (Ezine)
- Affiliate Program
- Free Trial
- Viral Marketing
- Articles
- Joint Venture
- Links Exchange

A FINAL WORD

APPENDIX . BIBLIOGRAPHY
CHAPTER I: INTRODUCTION

This is a digital age. Today almost everyone in the world has a life-line connection to the information superhighway – the internet. This is the time to get into the race and build a new world new age information product. Technology has not only made it possible to make e-World products but has also enabled sales of such products. These products can be very popular and can be used by any person for a growing career.

Information on the internet is experiencing a hot sell - must buy phenomenon. Internet entrepreneurs who provide information are making fortunes simply by taking advantages of the facilities offered on the World Wide Web. The future of mankind is definitely all electronic and service based.

An estimate by Forrester Research says that digital books and information products will be an astounding 7.8 billion dollar market in the next five years. The secret of success is to find valuable information that is needed for specialized work from the incredible maze of data at a reasonable price. The way to create that kind of a product is explained completely in this e-Book.

The future of subject matter on-line is in the form of electronic books. No matter what the information is, electronic books are the way to deliver that information.

It is very simple to create an information product. The product can easily be created, published, sold or even given away. The distribution costs of the book are
very low by using e-Mail or download from a website. Creation of the e-Book is a simple multi-step procedure and is explained in very simple language in this e-Book.

A particular application of e-Books is that it can be used for free give-away at the web-site. This free information promotes your business. Thousands of visitors come to your website to pick up your e-Book and in the process you generate business from the publicity at a low or zero cost. This kind of Digital Publishing will be increasingly used as a sales and marketing edge over the competition.

**What in the world is an e-Book?**

**The fundamental concept:** An e-Book is just like a traditional paper book in an electronic form. It is read by using a computer. It does not require that the computer be connected to the internet. One way to view an e-Book is through a floppy disk. This eliminates the need for complex plug-ins of reader software. E-Books are full of life and combine media to deliver text, video and audio. Hyperlinks connect various sections of the ebook. It also has links that can connect the ebook to the internet for related articles, programs and even other e-Books. Hence, all the required information comes from a single source.

A common form of e-Books is HTML documents. These are combined with an in-built browser and the entire work is compiled to form a single executable file. It is thus a website that can be viewed offline. The author is allowed maximum flexibility in the way he wants to deliver the content. The hyperlinks allow navigation to different sections of the e-Book by the use of the table of content or an internal search engine. The user can then quickly refer to the section that contains information of his interest. The hyperlink process is also very simple and
user friendly. The volume of the e-Book on a single floppy includes both an average sized novel and the required reader program. This is way ahead of the Adobe’s PDF option. A PDF document can also be considered an e-Book but the reader program Adobe Acrobat needs to be installed separately. Adobe Acrobat reader software occupies around 12 megabytes when installed. An Adobe e-Book reader is available and has the capacity to read HTML, PDF and other formats combined with excellent features for use. This software occupies around 10 megabytes space after download. That’s quite a bit as compared to an *.exe e-Book. It is best that in the online business the information be downloaded fast and the software should not place a heavy demand on the resource capacity. If the entire e-Book and the required software take up very little resource space the need for complex software is eliminated.

A good e-Book is very printable and can be printed both completely and in sections. There are features for incorporating a variety of fonts and colors. These are a help to the visually impaired also.

**The multiple advantages of a self-created e-Book**

Online publishing and marketing delivers the cutting edge of technological progress. E-Books are the way to deliver the work of the author to the customer in an efficient and economical way. As compression methods have improved downloads have become faster. There are no additional overheads pertaining to distribution and packaging as in the case of paper books. Hence e-Books have a cost advantage.
Another aspect of e-Books is security. With the copy and paste functions disabled it is very easy to protect the work from unauthorized use. It is possible to register the book and time limit restrictions for use can be included in the e-Book itself.

While paper books may not altogether disappear immediately the e-Book concept will definitely rule the market. E-Books are the master-key to the implementation of information delivery.

Basic skills required for understanding this book

- Skills to send and receive e-Mails
- Skills to surf the internet
- Ability to use copy and paste
- Word processor usage capability
- Some imagination
- Methods to install and upgrade software
- Basic HTML language

And finally you must have the drive required to make your online business succeed. The way an e-Book is made is not at all complex however it requires determined efforts.

With this small background let us proceed with the first step of ebook creation...
CHAPTER II: ACTION ZONE – THE NICHE MARKET

What is a Niche Market?

A niche market is defined as a small targeted group of people who share a specific interest. This concept is used for whatever product you are marketing online or offline because you need to focus your efforts on those who want your product and not everybody.

Finding subject matter for your e-Books

Each person has his or her own area of expertise and can write passionately only about those interests. A passionately written ebook is surely a profitable internet product. An e-Book must be written after careful identification of interests and expertise.

Examples of a few interesting topics:

Recipes
Cooking
Sewing Tips
Gardening
Canning
Makeup and Skin Care
Weight Loss
Self Improvement
